Chapter 921: Personal training

The next day, when the girls opened their eyes in the warm sunshine.

What saw was not the desired strong physique, but a delicate face with a formulaic smile.

"The boss has taken a step in advance, please come to me to check out!" Xu Meixin smiled at everyone.

"What checkout, do you know how to speak?" I didn't want to ignore you and said coldly: "What does your boss mean, I want to send it to us?"

"Yes, isn't it too much, don't you recognize people when you put on your pants?" Lulu muttered unhappy.

Lovely and gentle May, his face was as cold as September's frost: "Qin Dong is too much, even if he is just doing something, he should stay for a few more days.

What is this...what do you think of us...is it the XX that will come and go? "

"Yes, who do you look down on? We are short of your money, are you too bullying?"

"I thought it was a male god... disillusioned, scumbag!"

"Damn bastard, I have never seen such a **** man..."

"Have you finished talking?" This is not the first time Xu Meixin has encountered this kind of crusade.

Calmly kept smiling, the price in his heart raised another level.

For the boss, money is secondary, but trouble is the main one.

The price of happiness can be expensive, as long as it is worth the money.

And the boss has always had a good vision...

In addition, I still have to leave them with some little fantasies.

"Since I'm finished, please come and get the money!" Without giving the women a chance to speak, Xu Meixin resolutely said: "One hundred thousand per person."

"May, Dabao, Monica, Hanyan, Orange and Nan
nan, one million. "

"I~how much?" Dabao, who was about to go crazy, swallowed the beautiful language back.

1 million, is she talking about Zimbabwe?

When the women informed their bank card number to the finances waiting in the living room, they received a short message reminder of the deposit in a few minutes.

only confirmed that his hearing and thinking have not lost his normal due to anger!

"Now, are everyone satisfied?" Xu Meixin asked politely, looking at everyone.

"Satisfied...too satisfied... Secretary Xu, please be sure to notify me next time there is such an event."

Dabao is holding a mobile phone with a SMS reminder of the 1 million credit, and his expression is full of "please insult me as much as you can and use the money to kill me." '

"Secretary Xu, why do they have one million and I only have half a million... Is there any connotation?

Whatever it is, I can do it... By the way, I belong to Fengyulou. "

Seeing Xiao Feifei's nervous expression, Xu Meixin's eyes flashed with surprise, and said: "Feng Yulou, shouldn't it be today...

The amount is determined by the boss himself, and the boss should react to any problems. "

"No, Secretary Xu, then...where is the boss?" Xiao Feifei asked urgently.

"The boss has gone back... If the boss wants you to contact him, he should leave the phone."

"What did you leave?" Xiao Feifei was completely silly.

"What do you mean?" She gave her a smile of self-understanding, and Xu Meixin turned and walked out.

She will also go to see the boss and report on her work progress.

Today is the second day, don't anyone really think that the boss has left?

This is just an excuse!

In the villa at the top corner, Brother Yu embraced Li Shuangmeng with his right hand and Jiang Feier with his left, and looked at Xiaoqi and Xiwang on the other side of the sofa with scrutiny eyes.

"Are you the main player singing?" Seeing Xiaoqi nodded in response, Qin Yu smiled and said, "Sing a song and listen."

"Uh, here?" Xiao Qi asked in surprise.

"What's the problem? You have to face more people during the live broadcast, not to mention there are offline activities." Qin Yu asked.

"No...that, microphone and sound card, I forgot to bring it." Xiaoqi lowered her head.

Qin Yu frowned when she specifically mentioned the sound card.

So, the newcomer that the guild will push in the near future is a sound card monster?

This is also possible!

After all, for ordinary people, people hiding behind computers are ghosts, and they don't care at all.

wants only momentary happiness, not the so-called truth!

"Xiaoqi, don't be nervous, just sing a few sentences casually."

Seeing her nervousness, Jiang Feier comforted: "The boss wants to listen to your voice and strength, not to win you a prize."

"She is a bit introverted, how long have you just been here!" Jiang Feier explained to Qin Yu.

"Well, just sing a few words." Qin Yu nodded clearly and said softly.

"Then what shall I sing! Boss...you order a song!" Xiaoqi still couldn't let go.

"Let's play a song," Qin Yu said.

"Okay, cough cough~" Xiaoqi cleared her throat, "Relax and lift off slowly...,

Have a dream in the blanket, there is too much noise outside, what do you say don't wanna

know...I want to climb over the mountain, in Utopia..."

"It's okay." Qin Yu raised his hand to stop, and smiled: "The voice is not bad, Brother Che's eyes are really reliable."

"Thank you boss." Xiaoqi curled her hands on her chest excitedly.

"What about you?" Qin Yu hasn't played for a while, not sure what the current radio theme is. "me?"

Xiwang pointed to himself, stumbling and stumbled: "That... just chat, emotional topics and the like... occasionally do sleep aid radio..."

"Sleep aid, is that kind of side ball... ambiguous voice?" Qin Yu asked curiously.

"Ah, no, boss, sing, talk softly, and talk about topics that are easy to relax."

Xiwang repeatedly waved his hands and denied it, for fear that he might have any misunderstandings.

"This... do it once." Qin Yu looked around and pushed Li Shuangmeng and said, "You come and cooperate with her."

"Why is it someone!" Li Shuangmeng knocked on his shoulder with his fist charmingly.

That strength...comfortable!

"Don't make a fuss, hurry up." Qin Yu raised his hand and patted her on the back bridge.

Li Shuangmeng twisted her waist and sat upright, and said in a rogue tone: "Well, since it was the boss's order...Come on!"

"Okay, here comes it~" Xiwang sat cross-legged, posing in his most comfortable posture.

'S voice changed color instantly, "It's now... it's midnight... the drizzle outside the window is beating your window, da da, da da..."

A cold wind blows from the window... Some cold you tighten the quilt tightly and find your most comfortable posture... The beauty of the day reverberates in your mind...

The corners of his mouth began to rise inexplicably, and my heart became sweet and warm..."

The sound, the sound that seems to penetrate into the mind from the pinna, and go straight to the depths of the soul.

really has the ability to soothe the mood, this is an individual talent!

"Boss, it will be better with a sound card." Jiang Feier whispered in his ear.

"It's very good." Qin Yu nodded with enlightenment.

"Well, it's too noisy here... Let's try another place." Qin Yu raised his head and looked back, "I'll be in the room."

"Huh, room?"

Li Shuangmeng looked at Qin Yu with a charming expression: "It seems that the boss really wants to experience it, you have to take it seriously!"

"Huh?" Xiwang, who was in a dazed state, opened his mouth, his expression full of helplessness.

What to do when you are helpless, of course, is to set your sights on your only support.

Jiang Feier.

"What are you waiting for? The boss wants to help you adjust your status personally, so why don't you go?" Jiang Feier said with a chuckle.

"Ah...oh!" Xiwang nodded blankly, walking towards the room mechanically.

"Boss, you can be gentle, that's still a kid~" Jiang Feier joked.

"My child, I'm 20 years old and he's not young anymore." Qin Yu retorted, reaching out and pulling her up with Li Shuangmeng.

"???" The two looked at him in surprise.

"Since you are so worried, let's get together." Qin Yu grinned.

Fight left and right...Happy Hour...Start!

King Kong Kidney... recharged... walking hormone activated...

The punch is over!

There is only a lonely Xiaoqi in the living room, sitting on the sofa with a dull expression, looking at the empty room alone.

Who am I, where am I, what happened?

Why all of a sudden, I am the only one left.

Why are there weird noises in the room...the spring in the mattress...is it going to break?

.....

.....

Hudu, the first World Martial Arts Conference was held as scheduled.

The sales and publicity department led by Wang Zhe is responsible for this event. They have been busy for three consecutive months.

is just to present the most perfect scene to all audiences and players.

"Head, this time just sell tickets for more than 80 million, and the company is going to make a profit."

Hearing the excitement of his subordinates, Wang Zhe calmly responded: "Do your own thing, and the company makes money without losing your share."

"Yes... the treatment of our company, which is not available in China."

"Nothing can compare domestically, even abroad."

Hearing their flattery, Wang Zhe said amusedly: "Okay, just such a small amount of money makes you so excited.

Peripherals and equipment also have live broadcast, secondary and tertiary broadcast rights, which is not a revenue of over 100 million yuan. "

"Look at your aspirations, can you learn to take a long-term view..."

After educating his staff, Wang Zhe saw Tang Guo who had rushed to the scene in person, and hurriedly greeted him: "President Tang, haha, why are you here in person."

"President Wang, see what you said, can I not come to such a big event?" Tang Guo responded with a smile.

"Is everything going well?" Tang Guo asked about the situation at the scene.

Although the Network Department hasn't had a single case of abnormal disconnection so far, it still has to fight for 120,000 points for this conference.

"It's all going well, and the players are about to enter." Wang Zhe nodded confidently.

"That's good, let's take a look!"

Together, the two came to a position with a better view on the second floor, and looked towards the main venue below.

On the round platform in the middle of , twelve VR game cabins are arranged in a circle.

Later, the players will hold the competition and the final competition here.

The six people who stayed on stage at the end are the final winners of this 'Budo Contest'.

They will represent all players and enter this limited-time 'dungeon,' to explore a brand new mystery chapter.

At the same time, he will also become the real ***** in the minds of all players.

Be aware that this is an official competition.

Officially certified great god, high gold content...

Chapter 922: Simple and rude

"Come, here, the players are on the stage." In the eagerly awaited look of the audience, the players appeared one after another.

"The toad is a stray toad."

"Haha, Jian Toad is here, Ah Jian, look here..."

"Haha, the cheap toad is so treacherous, it's really a cheap toad."

"Is it called the stray toad?" the old-fashioned die-hard fan said angrily: "Moreover, he is the best swordsman in the game."

"Yes, yes, so I kindly call him a cheap toad, hahaha..."

"Cut, what's so great, isn't it just a good luck to get a heat sword, I can have me!"

"Yes, yes, you can go to the sky if you give you a sky-sweeping monkey, there is nothing you can't... the universe is yours."

What's so serious about this kind of lever? He said it was it.

"The bun is a long-legged bun...puff, his face is so round, so cute!"

"Really cute, do you think his face looks like a bun?"

"Eh~ It really seems, so appropriate, haha..."

"Cute? People are the first Marines to board the battleship, how can you describe it as cute?"

"Why, does it conflict with cuteness?" The young lady flashed her big eyes at the questioning man.

The big flickering eyes were filled with cuteness, and this dear man was cured in an instant.

"Ah, haha, no conflict, of course no conflict...cute, really cute." The dear man slapped haha and responded with a shy face.

"Huh ~ lost~~" The brothers around him couldn't stand it for an instant, and waved in disgust to drive him out of the team.

The cute little girl saw this scene, her expression turned red in vain, shyly curled her neck into an ostrich shape.

can be cute and loving, and instantly captured the hearts of a large number of otaku.

"The Dark Lord is here... No matter how you hear this name, I think it's a good second."

"Haha, but he's really amazing... Do you know how long he stayed in the ruins and got a set of simple power armor?"

"I know, 5 years and 6 months, this perseverance is terrible."

"More than that, he also taught himself armor and dynamics... the power armor customer put together pieces of garbage piece by piece."

"This is the so-called struggle! It's too burning~"

"Compared with him, we seem so incompetent... I decided that the road will turn dark in the future."

"??? Why, shouldn't you follow him?"

"Sorry, Ben Xianyu can't do it. Struggling, it's dark all my life, and I haven't run away."

"Here is a waste to the Dark Devil, **** him!" The fan behind jumped up and pointed at the salted fish and shouted.

A variety of beverage bottles, garbage bags, snacks and cheer sticks flew in, instantly submerging the salted fish.

"Vulcan, it's Vulcan here, ah~~ So handsome!" The harsh screams made everyone pay attention to the main stage again.

The salted fish that escaped the catastrophe struggled out of the mountain of garbage and grabbed a bag of potato chips.

slap~

With a hard shot, the potato chips burst open, and the salted fish was eaten happily.

tilted his head, Xianyu found the happy water at hand.

Hey~

is still ice, bring it to you!

There is a decision to eat and drink salted fish, and in the future, he must be an unwavering black devil.

This way, when he goes to participate in any competitions and celebrations.

Just open your mouth~

Hmm... the white prostitute tastes delicious! ! !

As they have gained a lot of fame in the game, players with impressive performances in the primaries have entered the arena one after another.

The atmosphere at the scene also ignited like a fire, with cheers and thunderous applause one after another.

When 268 players from all over the country, they all took to the stage.

The originally empty stage suddenly appeared crowded.

At this time the host also started to take the stage...

The two beautiful hosts attracted everyone's attention. After a brief period of calm, deafening cheers broke out.

"Queen of the elves, is the queen of elves."

"I love you, Queen of the Elves."

"I actually saw a real person, this is too beautiful."

"Haha, take pictures, take pictures~ I can play for a lifetime in this game today."

Seeing Savannah wearing VR promotional costumes and fairy costumes, the otakus on the scene seemed crazy.

At this moment, their performance is even crazier than seeing a handsome nympho.

Someone even hit the stage!

Fortunately, the company has prepared a security plan before, and the stage is full of grilles and security guards.

"Okay, all our players are here, let us welcome them again."

The host said humorously: "However, there are a lot of players today, so we won't introduce them one by one.

Otherwise, today's game will be moved to tomorrow. I'm afraid I won't be able to get home safely tonight. "

"Hahaha....."

"Okay, let's announce the rules of the game now... There is only one stage in the whole game, and there is only one rule...

Wow~ This is the most capricious game rule I have ever seen. It is really hard to imagine that it will actually appear. "

"Yes, it's the first time I have seen you too."

Beautiful host Chu Yu said cooperatively: "To be honest, it's really hard to believe before seeing the rules."

"Yes, I don't think the audience present would have imagined that this time the rules will be like this...How to describe it, it should be simple and crude in four words."

"Haha, really..." Chu Yu laughed in cooperation.

"Okay, let's get back to business, I think everyone can't wait." The host smiled and turned around, and stepped back two steps to give way to Savannah in the middle.

"Next, we will invite our most beautiful fairy queen to announce, the rules of this game, okay? Where is the cheers..."

"Okay~" neatly shouted, and the whole venue was shaking.

"Hi, hello to the audience, I am the queen of elves, Savannah~" On the stage, Savannah smiled generously on her knees.

"Oh~" cheers were heard on the scene again.

"Thank you." Bowing to show respect, Savannah opened the card in her hand, and a touch of surprise appeared in her beautiful peach blossom eyes.

"Ah, this time the rule is... Survival."

"All the players arrived at the designated place within the specified time. After the time is over, the six players who can survive the longest..."

Listening to the rules announced by Savannah below, Tang Guo, who was standing on the second floor, sighed with a weird expression: "Such rules are too rough."

"The boss has never been someone who likes trouble." Wang Zhe smiled and said: "And I heard that this new copy is mainly about survival exploration."

"Really?" Tang Guo was surprised: "Why don't I know?"

"Huh? Don't you know?"

This time it was Wang Zhe's turn to be surprised, "I also listened to Mr. Xu. Didn't you talk to him?"

"I have been busy with APP development recently... it is my fault, I can't figure out the priority." Tang Guo said with some chagrin.

The APP development commissioned by Aixia has now become the primary task of the Network Department.

It is because the company is too idle and there is basically nothing to do.

The maintenance and update of the game are all taken care of by 'Kirin', and they are just helping them.

This is also the reason why the network department has not expanded its manpower until today.

"Don't worry too much, Mr. Tang, as long as it can create value for the company is a good thing. I believe the boss must have his own plan..."

"Well~ I hope so." Tang Guoyi said happily.

He suddenly felt that he was a bit like a company outsourcing, not really integrated into the whole.

This feeling of being isolated and divided is very uncomfortable! ! !

"By the way, who is Mr. Tang more optimistic about?" Wang Zhe saw that he was absent-minded, obviously still struggling, and took the initiative to lead the topic to the game.

"Who are you more optimistic about?" Tang Guo raised his head, like players entering the game cabin with the assistance of the staff.

The twelve game pods in the middle stage are for the twelve players who performed the best in the primary stage.

Other people's game pods are compactly arranged on the steps behind the stage on both sides, arranged in a fan shape.

just allows the audience to see everyone, and presents a kind of sci-fi beauty.

The wandering toad that caused a sensation before, the long-legged steamed bun, the Great Dark Devil, is one of the twelve.

However, Tang Guo is not among them the most optimistic.

"Xie Wu, I am most optimistic about Xie Wu." Tang Guo said firmly.

"Oh why?"

Wang Zhe curiously said: "I think Baozi has a better chance of winning, after all, he has a standard mecha Xingtian."

"The probability of buns is also very high, but I am still more optimistic about Xiewu."

Seeing Wang Zhe's increasing curiosity, Tang Guo smiled and said, "I want to know the reason...Actually, he is the secret weapon of our network department."

"Huh~?" Wang Zhe was stupid.

The secret weapon of the Network Department, what is that.

"Well, all players are connected...Next, please look at the big screen."

In the loud voice of Chu Yu, 268 small squares appeared on the curved screen surrounding half of the conference hall at the same time.

Each small square represents the state of a player at the moment.

All the screens are the player's first perspective. At this moment, all players are viewing their personal information.

The new news in is the relevant element of this competition!

Time: 6 hours and 35 minutes.

Location: Death penalty area.

"Huh..."

There was a sound of inhalation at the scene, and the upper layer of cold air was thinned by 0.1mm.

"Death penalty zone, what are you kidding about, is that a place where people can go?"

"It seems that this game will be over soon."

"No wonder this time the rule is survival battle. I am afraid that as soon as you enter, you will be released in seconds, right?"

"Ah This is too unfair! Our devil is so far from the death penalty zone."

"Is that also called far? Steamed buns are now in the large ruins of Area B, a straight line distance of 3000 kilometers."

"Well, is there anything in the death penalty zone?" Novice Xiaobai asked weakly, raising his hand.

Several death gazes were cast at him, and each gaze read, "How did this kid get in?"

"I just played, ha, ha ha~" With an awkward smile, Xiao Bai has already begun to regret why he had to speak.

"Well, for the sake of your humility, I will be merciful to popularize the knowledge of the death penalty zone for you."

The buddies next to Xiaobai's shoulders were holding Xiaobai's shoulders, and under the enviable gaze of everyone, they were preparing to start a literacy science popularization.

On the stage, Chu Yu wearing a princess dress suddenly appeared, holding the microphone and whispered: "Everyone has seen the destination of this game, the death penalty area.

I believe that any senior player has heard of this name. It represents absolute danger and zero survival rate..."

The guy who was robbed of the job smiled helplessly, let go of Xiaobai's shoulders and tilted his head towards the stage: "Now, listen carefully!"

Chapter 923: Shi Cui's Anxiety

Death penalty zone, the most dangerous copy of the evil demon known. '

is known for its zero survival rate with no survivors. Players successively broke into the restricted area and wanted to be a display board "Zhang Wuji." '

There must be many good things in such a dangerous place.

The result is death again and again, death, death...

There were no accidents, and no lucky ones were born.

The player who entered the death penalty area said the most words in the forum: "The back of the head seems to be sap-rounded by someone, and the eyes will die as soon as it gets dark."

After more inexplicable deaths, there are no longer any players who imagine that they can be the lucky one in all.

What treasures got in the death penalty zone, just soaring to the sky.

can't stand the loss caused by death again and again...

The equipment (worn) that was obtained through hard work is so worthlessly worn and lost!

The time consuming will only make the distance between yourself and other players get farther and farther.

Thinking of the equipment and time lost due to this, players couldn't help but complain.

The game company set the destination in the death penalty zone this time, is it a bit too much?

You know, the equipment on these elite players is extremely valuable!

They all spent a lot of effort, time and money to get such a set of equipment.

If it is lost because of the breakage of this game, it will instantly fall from the first echelon to the second and even the third echelon.

became an obscure little pawn...

No, it's worse than an unknown person!

The unknown boy hasn't seen the scenery on the top of the mountain, so he can easily be satisfied.

They will not be ridiculed or taunted by players who once looked up to them...

The strong sense of gap that erodes the heart, thinking about myself all the time.

Some viewers began to look at the small squares on the big screen with sympathetic eyes, and their hearts became contradictory.

not only hopes that his idol can arrive in time, but also hope that he will be interrupted by accident and be eliminated beyond the prescribed time!

The fans of this session...it's too difficult! !

In the game, a fully armed bun is riding a motorcycle to the destination.

Several inferior bullheads suddenly appeared in the front line of sight, holding the handle with one hand, Baozi raised his left arm.

The automatic light machine gun above is aimed at the target, da da da~~

The fire was blazing, and the blood splashed.

The motorcycle raised dust and smoke quickly passing by, leaving only a few inferior minotaur corpses covered with holes on the scene.

The Dark Demon is flying the 'borrowed' solo aircraft and flies straight towards the destination.

When he flew over a mountain peak, a piercing sound suddenly came from the sky over ten thousand meters.

The Dark Devil controlled the aircraft to dive and dodge for the first time, but the engine was still hit by a gray lightning!

The out of control single-man aircraft swayed and crashed into the canyon.

"Gan!" Angrily, the Dark Lord turned over, stepped on the seat with one foot, and crouched on the aircraft.

barely controlled the aircraft to slow down and fall, at a distance of about 10 meters from the ground.

The Dark Demon suddenly kicked down, and while his body leapt up, a violent explosion ignited a raging fire in the valley.

The players use different tools, and the troubles they encounter on the road are also different.

But there are lucky ones, who are not far from the 'Death Forbidden Zone'.

just need to walk to get there in time.

However, they didn't plan to enter in advance, instead they went to camp outside Anzhai.

The lucky ones plan to get stuck in the last few seconds of the time limit.

Just looking at the dark scorched earth and mountains from a distance, the rugged rocks, the absolute silence of the extinction of birds.

These... are enough to make people nervous.

...

...

Sanya, Sun Bay.

Qin Yu is lying on the beach chair, watching the game live broadcast on the tablet!

Savannah and Chu Yu's live commentary, as well as the magnified independent first perspective, seem to be more interesting than the live.

At this time, the camera cuts to the long-legged bun, looking at the face with the outline of Tang He.

Qin Yu couldn't help but laughed: "I didn't expect that Baozi would also participate in this competition, and he didn't say anything to me in advance."

"Boss, do you know?" Xu Meixin, who was wearing a black bikini and lying beside Qin Yu enjoying the sun, looked up curiously.

"Well, the playmates from childhood to age are almost like brothers." Qin Yu responded with a smile.

"Long-legged buns...he is very popular in the game." Xu Meixin said in surprise after seeing the name.

"Really?" Qin Yu looked surprised, why he had never heard Baozi talk about it.

told him last time that opening up wasteland in the game is a good choice.

Qin Yu never asked him about his situation again. Who would have thought that now he is a master of the game, and his reputation reached Xu Meixin's ears.

"The members of the Marine Corps of the Church of Miracle Science are responsible for ground tackling, land reclamation and expedition, always fighting in the most dangerous places on the front line.

The death rate is extremely high, but he never died once, and some players even wondered if he was on the hook. "

"Really?" Qin Yu listened with gusto.

"Do you think he might win?" After hearing Xu Meixin's evaluation, Qin Yu wanted to know her opinion.

"Uh...I don't know!" Xu Meixin said helplessly.

In her opinion, the proportion of gambling in this competition is too high.

The time of death in the restricted area is unpredictable, the method is unknown, and all means cannot be avoided!

Judging from the barrage, everyone has the same idea: to enter at the last minute of the time limit.

Then, whoever dies first, who dies later.

can only look at fate, how can an effective judgment be made in this case?

"I do, he is very hopeful!" Qin Yu said calmly.

Of course he knows the danger of the death penalty zone, but so far it is not that no one has survived.

It's just that the level that players can touch is too low to know these secrets.

Ann, death.

had entered the restricted area and returned unharmed.

However, they also failed to break into the depths of the restricted area to find the truth about the formation of the restricted area!

has caught a few interesting experimental subjects, and is currently receiving treatment from a doctor in the healing clinic!

Biological research is not only carried out in the underground beehive of the miracle city, the Healing Institute is also unlocking the secrets in it.

However, due to the difference in time and frequency, the progress of the healing center is obviously prior to Fengchao.

Gene medicine is the greatest result of healing.

Although injections have a great risk so far, there are also many successful cases.

This means that their general direction is correct...

Fengchao has not yet conquered the cellular mysteries of the abnormalities and deformities, and has found a way or key to open the door.

"By the way, did Shi Cui apply for in vivo experiments again?" Qin Yu asked, frowning.

"Yes, it was rejected by President Hua and Doctor Zhu. This is the third time." Xu Meixin's tone was full of worry.

Leader Shi Cui became more and more aggressive, lacking the necessary patience and calmness.

In this state, many people are paying attention to whether he is suitable to continue leading the project.

"There is a risk of losing control?" Qin Yu asked again.

"According to the evaluation, there is a 47.9% out-of-control rate." Xu Meixin responded.

"In this way, give him a vacation and rest for two months first. Let him take his family to find an island to relax and enjoy life!

All expenses are paid by the company and paid vacation. I believe that the family of Leader Shi must be looking forward to it! "

"Okay, I will notify Doctor Zhu now." Xu Meixin picked up the phone and walked aside.

...

...

The city of miracles, underground beehives.

Shi Cui, who has forgotten sleep and food, has forgotten the existence of time, is still comparing the experimental data hundreds of times before.

He has done this work several times, but each time he hasn't gained much.

Shi Cui's patience is gradually being worn down, and the whispers inexplicably always appear in his mind to make him upset!

This **** sound made him almost collapse.

Wow~

violently swept away the utensils and data placed on the table with his hands, Shi Cui yelled, "Why, why can't I find it?"

"Where did it go wrong, it shouldn't be like this... it shouldn't be like this."

I was walking back and forth in the room irritably, when the air pressure door was suddenly opened from outside.

"Leader Shi." Zhu Ying walked in, silently watching the chaotic ground.

"Director Zhu...what's the matter? Did my application pass?" Shi Cui's expression brightened, and he quickly stepped forward and asked excitedly.

"Sorry, your application was rejected." Zhu Ying calmly shook her head.

"How come?" Shi Cui took a few steps back as if he was shocked, obviously unable to accept this reality.

The progress of the other groups is very smooth, and new results are born every day.

Only the third group led by him is still stuck outside the door, without any progress.

The direction is correct, the data is correct, and the experiment has been carried out countless times.

Where did the problem go? This inexplicable anxiety that could not find a direction, plus the noise that appeared in my mind.

Ling Shi Cui is already on the verge of collapse, which is why he keeps applying for in vivo experiments!

But now, what I am looking forward to is another blow of disappointment. UU reading www.uukanshu.com

"However, there is good news to tell you." Zhu Ying told Shi Cui of the company's decision.

Shi Cui stood there, bowed his head silently.

Until Zhu Ying said again: "Captain Shi, are you okay?"

"It's okay." The low-pitched voice sounded a bit weird, and Shi Cui continued, "I need to pack up some materials, and I will leave by myself when it's over."

Zhu Ying was a little uneasy, but after thinking about it, she felt nothing to worry about.

Shi Cui's performance is a bit unusual, but many researchers are even more impatient than him when facing difficulties.

If his position is not too important, the project he is responsible for is extremely dangerous.

Its out-of-control rate will not reach the height of 47.9%, and the company will not decide to give him a vacation!

I believe Shi Cui can understand, this is the performance that the company values him.

Compared with the current experimental progress, the company obviously attaches more importance to his personal value.

"Leader Shi, the company cares more about your mental, mental and physical conditions. If you take a break and come back, I believe it will bring you a different inspiration."

"...I see." Shi Cui stood still with his head down.

Seeing that he still can't figure it out, Zhu Ying no longer advises.

turned and left, leaving him alone in the room to calm down, believing that he will figure it out soon.

Besides, what is more exciting than taking your family on vacation?

Chapter 924: value...

Soon after Jingyuan left, Shi Cui, who hung his head and fell silent, followed him away.

It's just that the direction he left was not to the elevator, but to the depths of the core laboratory...

"Warning, please wear protective clothing and enter the experimental area."

"Authorization verification~"

"Verification, welcome, Dr. Shi Cui, for your personal safety, please wear protective clothing and enter the experimental area."

Ignoring the warning, Shi Cui entered the training room without protection.

opened the refrigerator with a yellow skull in front of him, Shi Cui took out the green transparent injection from it, and his eyes showed fascinating paranoia.

...

...

"So far, the game has progressed very smoothly... We can see that most of the players have reached the boundary of the penalty area."

Chu Yu pointed to the player in the screen and chuckled: "As you can see, everyone has the same idea. Wait until the last moment to enter."

"That's right, after all, the death penalty area is too dangerous...no one can guarantee how long they will be able to stock up after the penalty area."

"In addition, you can see that they are providing players with equipment repurchase and temporary storage services... As a professional businessman, you can find business opportunities at any time!"

"That's right...ah, I saw the merchants in Barrow, what are they going to do...ha, haha, they are actually offering hard drinks to the players."

"Wine can be bold, this is also a good business, haha..."

"Savana...Do you like vodka too?"

"Occasionally, only occasionally..." Savannah responded with a chuckle.

"Oh, isn't it? I don't know what our Elf Queen looks like getting drunk, she must be cute!" Chu Yu said curiously.

"Nothing!" Savannah shook her head and smiled.

"Isn't he drunk or..." Chu Yu obviously wouldn't let her go easily, and asked with a smile on his face.

"Drunk...never drunk, my drinker...very good." Savannah said in a slightly accented Daxia language.

"Wow~ It seems our fairy queen is..."

"Boss, emergency call." Xu Meixin put the phone in his ear, interrupting Qin Yu's mood watching the live broadcast.

"Hey~" Qin Yu handed the tablet to Xu Meixin, and she stood up and walked towards the beach.

"Boss, it's me... The hive was blocked by a girl from the inside, and there was a leak in the core experimental area. The specifics are unknown!"

"How could this happen? Did the surveillance take pictures?" Qin Yu asked.

"Yes, I will pass it to you now." Watson said.

"Okay...I will cover the first flight back." When Qin Yu spoke, Xu Meixin was already looking at the ticket.

Waiting for Qin Yu to hang up, Xu Meixin stepped forward and said, "Boss, the fastest shift is in 56 minutes."

"Let the hotel prepare the car and leave now." Qin Yu said decisively.

On the way to the hotel, Qin Yu saw the surveillance records from Watson.

Shi Cui entered the core laboratory without any protection and aimed the test drug at his arm...

"Grass!" Qin Yu couldn't help but explode.

As he fell to the ground in pain in the laboratory, his body began to deform, and the horrible roar made the driver shudder while driving.

Goose bumps all over my body, I can't help but come out...

Reduced the volume, Qin Yu silently watched the monster distorted to the point of no human form in the video.

Xu Meixin covered her mouth with her hand, and the panic in her eyes became more solemn!

Only in this way can she stop the screaming...

The last thing that appeared in the video was a twisted monster that was covered with twisted sarcoma and continuously sprayed pus outwards.

Is it really Team Leader Seok Choi?

"Oh~~"

Xu Meixin couldn't help turning her head out of the window and retching. The distorted and piled Roshan in the picture seemed to cause the most feared evil in people's hearts.

made her feel fear from the bottom of her heart, and every cell in her body seemed to be trembling.

The stomach and intestines also convulsed crazily because of this intense fear, making her want to spit out all the bile.

"It's okay." Outside the airport, Qin Yu handed Xu Meixin's back the clear water.

"Yes, vomit..."

Xu Meixin wiped her mouth with paper, drank her saliva to suppress the nausea, and said apologetically: "I'm sorry, boss."

"It's not your fault." Qin Yu said softly.

"No, I'm too fragile, sorry!" Xu Meixin supported the twitch of her stomach and stood up and said, "I'll get the ticket."

"Let me come!" Holding her shoulders, Qin Yu looked straight into her eyes and said seriously: "I said, it's not your fault."

Looking at the back of him turning around, Xu Meixin always feels that he has something to say.

It's not my own fault... Then what is it?

...

...

The city of miracles, it was already midnight when Qin Yu arrived at the hive.

The entire hive is confined underground. Fortunately, on weekdays, scientific researchers don't go home every day, and it doesn't cause any commotion.

"What is the mood of the employees below?" Qin Yu asked first when he saw Watson.

"Most people don't know what happened, and the alarm was sent directly to my personal terminal.

At present, except for the members who have access to the core laboratory, they are a little restless, but on the whole everything is normal! "

"Got it." Qin Yu walked into the elevator, swiped his work permit three times, and the hidden card slot popped open.

"Leave it to me, go back and rest!" Qin Yu said with a smile.

"Boss, let me go down with you!" Watson said with some worry.

Xu Meixin also tried to walk into the elevator, but was stopped by Qin Yu: "I can go down alone, girl...close the passage and wait for new instructions."

"Girl received it." The elevator door closed, and the indicator light on the top flashed several times quickly, before it went out suddenly.

From this moment on, the hive was completely sealed.

Before Qin Yu gave one step closer, no one could enter the hive, and no one could get out of it.

Honeycomb, the elevator door was open and stalled. Qin Yu took the four [Creators] waiting at the door and went straight to the core experimental area.

A series of air pressure doors open and close.

[Creator] guarding at the door enters a state of alert, without causing any disturbance.

The hive has secretly entered a state of martial law...

bang, bang~~

The thick tentacles with sarcoma splattered disgusting mucus and slapped the explosion-proof glass wall again and again.

fell into the sarcoma, struggling and pain gleaming in two small green bean-like eyes.

Shi Cui's consciousness was collapsing, and the whispers in his mind became clearer.

always tempts him to do some crazy things...

But in the deepest part of the spirit, there is still a trace of clarity that keeps him awake at the end.

Loyalty to the boss... the company! !

That loyalty seemed to be imprinted in the depths of his soul, even if the evil whispers eroded his mind and will.

can't make him forget this deep loyalty...

It's just that compared to the chaotic madness, the power of loyalty is too small.

Shi Cui doesn't know how long he can hold on, maybe in the next second, his soul will be completely crushed.

噗~

The air pressure was released, and a figure walked into the empty laboratory.

"Roar!~"

The roar sounded, and Shi Cui, who was piled in mud in the cultivation room, rushed to the glass wall frantically.

seems to be provoked by someone, crushing the glass wall, and then tearing the other party into powder.

But Qin Yu heard excitement and prayer from his roar.

"Are you awake?" Across the glass wall, Qin Yu ignored the oozing sarcoma pus and stuck it to observe him.

slap~

A pool of thick meat stuck in front of his vision, and the two small eyes sunken in the mud radiated a dim sheen of hope.

'Help me...or...kill me! Qin Yu understood his mind from it.

Shi Cui, who was still sensible at last, made Qin Yu entangled.

Originally, he decided to find a way to solve the problem directly.

As long as the distorted objects of Shi Cui are removed, the problem will be solved naturally.

But now, he hesitated.

Do you want to try to save him, Qin Yu is thinking about...

Shi Cui's arbitrarily calling the shots made his position in Yu Ge's mind plummet.

Shi Cui is undoubtedly a genius who can find the 'door' in such a short period of time.

What a genius, if it is an arrogant guy.

For Qin Yu, the value is not as good as an obedient doorman...

is a good advocate, treats the company's orders as white paper, and puts his orders on deaf ears.

Is such an employee worth saving?

Qin Yu finally decided to give him a chance.

is not only Shi Cui himself, but more importantly, his current state.

Living, sane experimental subject...

Very valuable!

"Can you still hold it?" Qin Yu asked, looking directly at her mung bean eyes.

"Hi, ha~" The roar that sounded unconsciously was Shi Cui's only means of expressing his intentions.

"Is it going to work?" Perceiving the sorrow from the heart, Qin Yu stepped back, gradually losing focus.

...A few minutes later, his eyes refocused.

Qin Yu's expression is more joyful and clear, this time it is really a bumper harvest.

faith card X10, give him 1298 faith points.

Let Qin Yu's belief value successfully break through the 3000-point mark again, reaching 3178 points.

Then, he opened the "Precious Knowledge Blind Box" that was kept in storage, and planned to open it on a festive day. '

Brother Yu's luck was not so good this time, he could open a blind box of up to 3 books, and he only published 1 book.

However, the content recorded above, UU reading www.uukanshu.com made Qin Yu decide to feed the super **** gene to Shi Cui.

In addition, he deliberately spent 1,000 faith points to purchase a 'loyalty card from the mall. '

Shi Cui's spirit is polluted, I don't know if the loyalty card can disperse the pollution.

If it doesn't work, then there is no need to waste supernatural genes.

directly destroyed him!

If it can dispel the pollution, or let him maintain absolute loyalty, and not be affected by the pollution.

Then, 5000 faith points...

hiss~

Thinking about it, it still feels painful, and I looked up at the meatball inside the glass wall.

Qin Yu whispered: "I hope you won't disappoint me again."

"Using the loyalty card, the goal... Shi Cui!"

"The target is locked, the status is abnormal... Judging..."

"The loyalty card is valid, are you sure to use it?"

"confirm!"

Received a clear reply from the system, Qin Yu no longer hesitated to press confirmation.

Then, the person turned around and walked out.

He is going to the Super God project team to bring the 'primitive gene' to Shi Cui himself.

Other people, including [the creator], he is not at ease.

Because so far, the only thing Qin Yu can confirm is that he will never be affected by pollution.

Compared with the pollution encountered so far, the power of miracle is obviously better!

Chapter 925: evolution

"Back!" Holding the petri dish, Qin Yu was testing the distorted Shi Cui's obedience in front of the door.

There are also many types of loyalty, and systematic loyalty is more inclined to have independent thinking.

Instead of following Qin Yu, the worm who only knows how to slacken his beard and slap a horse!
so...

Qin Yu wants to test his true inner thoughts first.

If Shi Cui thinks that polluting oneself is the right choice, Yu Ge is just a weak and sad existence.

I should let myself be with him and feel the greatness of "Chaos"...

Ha ha, that's a lot of fun!

The meat ball squirmed and retreated like a snot, leaving a pool of fluid mucus on the ground.

"Wait and don't move, don't do anything that causes misunderstanding, it's best to stay still, understand?"

Qin Yu stepped forward to the locked pneumatic door and put his hand on it.

Roshan, which is indistinguishable from a slug, has a thick tentacle.

shaking up and down...like nodding in agreement!

噗~

The air pressure is released, and Qin Yu's gaze has been staring at Roshan deep in the room.

Seeing that it didn't react at all, it still clings to the inner wall.

Qin Yu opened the door and put the utensils on the ground, "This, wait until I close the door and eat it."

The tentacle nodded again to confirm, and waited for Qin Yu to close the door.

The wind rushed towards the gate, hit it hard and fell to the ground.

The vessel placed on the ground is also wrapped in its twisted body.

咚咚, 咚~~

The sound of swallowing sounded in the room. After a long time, the empty vessel filled with mucus was squeezed out by the body.

The unfolded mass of meat condensed into a ball again, and sharp thorns continuously appeared on the surface.

"Hoo...ohhhhhh..." The painful wailing continued to echo, and all the monitoring facilities in the room were shut down under Qin Yu's instructions.

tear it~

The surface of the meatball is torn, revealing the tender granulation inside.

can be instantly filled with the surging mucus of the epidermis, healed, and restored to its original state again.

Click, click bang~

The only bone was broken, and the center of the meat ball seemed to become a powerful black hole.

The infinite suction force squeezes the flesh and twisted tumors on the periphery.

Ga... Kick... Kock... Kock...

After squeezing and deforming again and again, the mucus on the surface of the meat mass seemed to be absorbed by the cavity in the body.

The burst sarcoma was restored and smooth, and the skin reappeared.

Then, an arm broke free from the meat ball, covered with mucus and blood...

Click, another...

Shoulder, neck...Finally, the head suddenly lifted, as well as the torso and legs that stood up.

"what..."

A hoarse voice came from Shi Cui's throat, and the burning sensation made him shut his mouth quickly.

He wanted to talk, but at this time his vocal cords were too immature to take up the job.

"Don't worry, take your time...try first from..." Qin Yu didn't know what to call it when he looked at the fleshy membrane that fell off beside him.

Embryo?

"Try to get out first." Qin Yu said to Shi Cui, who was hesitant to regenerate.

Under his guidance, Shi Cui's right foot slowly raised.

咚!

One step, 咚...two steps...

"Yes, try to do some complicated movements, how about squatting down?" At this moment, Qin Yu looked at him as if he was looking at a masterpiece of God.

The combination of super **** gene and chaotic energy, Shi Cui is reborn.

In human history, the first human to complete evolution!

Although this evolution is full of uncertainties and extremely dangerous, the cost is even more terrifying.

But he succeeded after all...

"Old Sisi...Boss..." Shi Cui's voice had a strange electric noise.

He is still adjusting to his new vocal cords, which is obviously very different from before.

After a simple test, Shi Cui told him that he can imitate most sounds.

includes high-frequency sound waves, but not limited to ultrasonic waves.

"Okay, don't do strange experiments anymore, now what you need most is rest." Qin Yu opened the air pressure door and let the reborn Shi Cui walk out of the room.

"Let's go, I will take you out." Qin Yu personally took him away.

"We are going to the garden area now, I think you know the company's process very well, and then you need to cooperate with the team to do some tests.

After everything is confirmed... we will decide your future life direction. "

On the road, Qin Yu told Shi Cui what was going to happen next without any concealment.

As long as he cooperates with inspections and experiments, then he is a valuable asset of the company!

No one can hurt him...

The company will also conduct experiments without harming him as much as possible.

"During the experiment, a lot of blood will be drawn and tissue cells will be stripped..."

"Boss, don't forget that these are my jobs!" Shi Cui who followed behind him suddenly interrupted.

Looking at his calm expression, Qin Yu turned to face him and asked seriously: "Are you sure you are fine?"

"No." Shi Cui shook his head firmly.

Looking at Qin Yu's eyes, a trace of guilt and apology flashed through his eyes: "I'm sorry for causing such a big trouble to the company.

Super God Gene... It's the truth that Team Leader Jingyuan has been chasing, she, okay? "

The project I was presiding over suddenly disappeared because of someone's mistake, as well as the meaning of the whole project.

If this happens by himself, Shi Cui thinks he will go crazy.

... Once upon a time, it was him who would go crazy.

Now, his loyalty to the boss is unshakable, even the clear whispers in his mind cannot shake his heart.

is like the experiment that the boss said, even if it is to put all the crazy ideas in my own mind on myself.

Shi Cui will not regret it, nor will he make any actions that are detrimental to the company.

"Very well, trust me... you won't regret what you are today!"

Qin Yu patted him on the shoulder with relief, and walked towards the garden area at the bottom of the hive in a stride.

Garden area, the name sounds very romantic.

In fact, what Qin Yu said is only abbreviation, and its full name is 'Garden District Prison. '

This is a prison reserved for the most dangerous experiment in the hive. I did not expect that the first person to be imprisoned was his own.

"Stay here at ease, I will take care of the rest!" Looking at Shi Cui inside the door, Qin Yu solemnly promised him.

The current Shi Cui has the value that he attaches so much to!

Whether it is himself or his loyalty...

Brother Yu is on him, but he has placed a heavy bet of 6000 faith points, how can he not pay attention to it!

Now he can be said to be the most valuable company asset in the entire hive.

Next, can he realize the cultivation of 'super **** gene' from him and find the secret of 'chaos'.

These, you have to see Jingyuan in the end...

"Boss." Seeing him coming up from the bottom, Jing Yuan asked with a complicated expression: "Resolved?"

"Well, it's solved." Qin Yu sighed.

Although the process was surprising and risky, the risks involved are still scary in retrospect.

If the distorted Shi Cui breaks through the hive and escapes to the ground.

how much damage and impact it will cause, just imagine it enough to make people feel terrified!

"How long has it been?" Underground, time is always lost inadvertently.

learned from Jing Yuan that he had been below for two days.

"This is for you." Qin Yu handed her the box in his hand.

Looking at the box curiously, Jing Yuan remembered the box containing the 'super gene' that he took out of the experimental area last time.

The two don't look like they are exactly the same!

"Boss, what's in it?" Jing Yuan asked excitedly, her tone trembling.

"A book...you will use it." Qin Yu blinked mysteriously and walked quickly towards the elevator.

Watson and Xu Meixin are still waiting for news...

Two days, ten days have passed in the game, I believe the game should be over too!

The elevator indicator lights up again, which means that the closure of the hive is over...

Seeing Hua Sen and Xu Meixin, Qin Yu also learned the latest development of the game from the two people.

The final six victors have appeared, namely, the stray toad, the long-legged bun, the dark devil, the evil spirit, the bear child, the small-headed father and the big-headed son.

"After attending the celebration, they are already on their way to the headquarters." After reporting the situation, Xu Mei hurriedly asked: "Boss, are you okay?"

"Well, it's okay." Qin Yu smiled and nodded.

Watson asked with some worry: "That... Leader Shi, how does he deal with it?"

"For the specific situation, you communicate with Director Zhu and Team Leader Jing." Qin Yu lay on the sofa a little tired.

I haven't slept for two days. Although he is full of energy, the biological clock from the body makes him feel tired.

"I'm going to go to bed first, and I'll talk about it tomorrow." He put his head against the armrest of the sofa, and the sound of snoring came from his breath.

The two women knowingly chose to shut up, and Watson thought about it and walked to the cabinet in the corner.

Opening the cabinet, Watson took out a blanket from below. UU reading www.uukanshu.com

This is when she usually takes a nap, it is covered to prevent cold.

covered Qin Yu, she waved to Xu Meixin, rubbed her hands and feet and left the office.

The next day, Qin Yu sat up from the sofa as soon as it was light.

This night, I slept really well.

He is not picky about the environment in which he sleeps. Seven-star hotels can sleep, as can the office sofa.

Of course, when there is a good environment to enjoy, Qin Yu doesn't have to let himself be wronged!

He neither makes shows nor has a tendency to be abused, so why can't he get along with himself?

"Boss, you're awake!" Pushing the office door open, Xu Meixin who was guarding outside immediately woke up.

She always sleeps very lightly, not to mention Qin Yu in her heart, worried that he will feel unwell due to exhaustion.

"Well, is there anything to eat?" Qin Yu woke up a little hungry and continued to replenish energy.

"I'll go to the cafeteria to have a look, please wait a while." Xu Meixin opened her purse and took out a small bottle containing a transparent liquid.

first sprayed a few times on his face, so that his face was covered with mist.

Then he took out the facial tissue and wiped it briefly a few times.

put on lipstick, Xu Meixin quickly walked towards the cafeteria...

Using the shortest time to make yourself radiant is the first professional skill Xu Meixin learned after becoming a secretary.

Up to now, she has mastered the skill and skill with ease.

Chapter 926: On stage, off stage

"Qin, I need your help...now...help me save my father!"

Ilibera Fink's plea made Qin Yu realize that the condition of the bald eagle has deteriorated further.

"Has the matter reached a point beyond BlackRock's control?" Qin Yu asked.

"Yes, help me, Qin."

Ilibera said eagerly: "I lost contact with my father. When I finally received the news, he was on his way to Peanutton."

"Lost contact, I know." Qin Yu responded calmly.

Seeing him as if he didn't say anything, Ilibera on the other end of the phone bit her lower lip and said in a deep breath: "If you can rescue my father, I will persuade him to move BlackRock to Daxia."

"Hehe...Bella, don't you understand?" Qin Yu suddenly laughed.

"What?" Ilibela was surprised.

"That's a gift, in Daxia... it's a gift for BlackRock, understand?" Qin Yu said seriously.

Until now, she still can't figure out the situation, Daxia is no longer what Daxia used to be.

Now Daxia is a pure land holy land that everyone yearns for, and a land of opportunities for science and technology.

is wealth and the future...

is just the Vulcan immigration plan, which represents much interest...

Infinity, it is infinity!

If you can go to Mars today, you may go to other planets tomorrow, or even break through the solar system and explore the Milky Way.

How many treasures are there in the vast universe.

The development of immigration technology will be popularized for the general public in the future, and how much profit is it...

Persuade BlackRock to come to Daxia...what a joke!

Now, it's time for it to convince Brother Yu and accept BlackRock's surrender.

Ilibela on the other end of the phone grew her mouth, her thinking nerve was paralyzed...

Is this true?

Ilibera raised her head to look at the think tanks around her, everyone's eyes were helpless and unwilling.

Can't refute the facts Qin Yu said, and can only use a silent nod to maintain his final stubbornness!

"Then... would you like to help?" Ilibera's voice became dry.

is like a soup dumpling full of moisture, the soup is sucked up all at once, leaving only the dry fillings.

"Of course, we are partners... I think Mr. Fink will definitely say something after the rescue is over."

BlackRock is BlackRock, and Fink is Fink. If I remember correctly, this little old man has a lot of cash in Switzerland.

Now that the situation is turbulent, it is better to leave the money to Lixin Investment for safekeeping.

The annual return on investment is 18%, which is very impressive!

"I will transfer the funds to Lixin Investment, I hope you can send people now... No, it is to send those robots.

Ordinary people, they can't deal with those monsters..."

mentioned the word 'monster', and Ilibera's tone was full of horror.

After watching the video, her knowledge of the world was completely subverted.

"He will be fine, unless my people find a corpse." Qin Yu replied confidently.

Hanging up, Qin Yu was not in a hurry to send someone out.

But after a brief thought, Qilin suddenly notified Zhu Ying and sent Shi Cui up.

"Boss, will the status of Team Leader Shi..." Xu Mei stopped talking.

The images in the lens have been flashing repeatedly in her mind these days.

The terrifying distortion is beyond words.

Although Shi Cui like this has regained his humanity, would it be too dangerous to just send it out?

"I will let the creators of Sitai follow him." Qin Yu said calmly.

Shi Cui was imprisoned in the garden area not because of his danger, but to reassure other people who knew the inside story.

In fact, now he can control his brand new body, and his thinking is no longer affected by whispers.

From the current point of view, his condition is very stable.

is just about one's own abilities, and there are still many things that I don't know enough about.

This trip, Paishicui and the creator are walking together.

When he gets there, he can unleash his abilities as much as he can and discover his potential in actual combat.

A deeper understanding and control of new abilities is more conducive to Shi Cui's future development and stability.

At the same time, based on his performance in actual combat, the collected data is also more conducive to the next research and development.

Did not see Shi Cui, Qin Yu was blocked by Zhu Ying first.

"I want to talk to the boss alone, Secretary Xu." Zhu Ying, who was standing at the door, said with a serious expression.

looked at the boss, Xu Meixin exited the room when he was signaled.

"Xiaoyu, do you know what you are doing?" After closing the door, Zhu Ying's name changed immediately.

"Of course I know what I'm doing, Doctor Zhu, don't worry, sit down and say."

Qin Yu and Yan Yue greet her to take her seat, and pick up the tea cup on the table to make tea for the two of them.

"You are still in the mood to drink tea... This accident, if it weren't for proper control, has already gone wrong."

Zhu Ying looked at him helplessly, really wondering if he was big-hearted or really confident.

The monitoring record about the accident that day was listed as the highest sealed storage.

Everyone who has read the record went to the counseling room for counseling.

Even so, Zhu Ying still feels uneasy these days, and she still has nightmares at night.

The hysteria occasionally remembered in her ear still bothered her.

"Isn't this under control, no trouble?" Filled her with tea.

Qin Yu picked up the tea cup and smelled it, showing a smile of enjoyment.

Authentic red robe, the buds picked from the mother tree are golden and very beautiful.

The hot water is brewed, the curling buds are stretched, and the deep aroma goes straight to the spleen and lungs.

This tea came from Lao Bai, only half a couple.

This is what makes Lao Bai feel distressed. He only has one or two in total, and it took the boss to get it.

In a blink of an eye, Qin Yu knocked away half...

If it weren't for being afraid of Zhou Lao turning around and asking, the half said nothing.

Anyway, that kid Qin Yu didn't understand tea, so it was a waste to give him a drink.

It's better to cut it off by yourself and keep it slowly!

Brother Yu naturally didn't know that this tea was originally handed over to him by Older Zhou through Bai Ze's hand.

He is still complacent about his success in blackmailing Bai Ze, and the one he grabbed is delicious!

"This tea... good tea!" Seeing that his dead pig is not afraid of boiling water, Zhu Ying can only suppress his anxiety and enjoy tea with him.

This product, the eyes lit up: "Is there any tea left? Give me...cough, let me bring some for Teacher Shen."

"It's gone, that's it." Qin Yu said decisively.

If Brother Yu believed her, it would be a hell.

Take it to Teacher Shen, I will not send it personally, I need to let her transfer it.

Besides, it's just a matter of half, and I still have to give Lao Qin and Zhun Zhangren one point.
can't tell the extra one!

"Can you really guarantee that there will be no problems with Shi Cui?"

Looking at his steady performance, Zhu Ying began to believe that he was really confident and could ensure that Shi Cui would not lose control.

"Don't forget, I brought him out."

Qin Yu smiled and said, "If I'm not sure, how could I waste precious supernatural genes."

"Speaking of this...how did you let Jing Yuan calm down?" Zhu Ying asked curiously.

Since he is sure, he has no reason to refuse.

Just as Qin Yu said, it was he who made Shi Cui, who had been distorted, re-behave.

Since such magical things can happen, what else is impossible.

Besides, are the miracles happening in the company still rare?

However, Zhu Ying is still very curious about how he calmed Jing Yuan down.

At that time, when he was going to walk the "Super God Gene", Jing Yuan almost ran away.

Even the equipment worth 500,000 in the laboratory was smashed on the spot.

But the next day, she seemed to have forgotten this matter.

I shut myself in the room, inside without a step...reading a book.

"Genetic Evolution", the signature is Cholev Abelard Kodeslavsky.

Zhu Ying searched the Internet and academia, but could not find a name.

"Although there is no super gene, there is now a living super gene body.

There is another book that can unlock the mystery of genes. Why is she dissatisfied? "

Qin Yu's rhetorical question confirmed Zhu Ying's guess, but it also made her more curious.

Where did he find these knowledge and techniques far beyond modern technology?

Is it really just like what the outside world says, there is a real world in the game?

That shouldn't be the virtual world, Zhu Ying is really confused.

Sometimes she almost can't understand what is illusion and what is real.

Looking at Zhu Ying's eyes seriously, Qin Yu asked mysteriously with a smile: "Do you... believe in miracles?"

Miracle!

Zhu Ying didn't know if she should believe it, and attributed everything to a miracle.

But if the miracle really exists, and it's around.

Then, he must be the embodiment of a miracle!

The child of miracle.

This name is really appropriate...

"I should be going."

Realizing that Qin Yu's eyes began to change, Zhu Ying got up and left, with a smug smile on her mouth.

This scumbag, as Shen Bing said, he was uneasy and kind to himself.

There are already so many women around, don't he feel tired and hard to cope with when UU read www.uukanshu.com?

Seeing Xu Meixin who stood up and smiled outside the door, she watched her leave.

Such a beauty by his side is not enough to solve his problem.

How strong is he to feel dissatisfied?

Watching Zhu Ying leave, Xu Meixin's smile suddenly reduced, replaced by the bitterness on her face.

Her eyes are very straightforward. In the eyes of her and others, she is both the boss's personal secretary and life secretary.

not only solves his problems at work, but also meets all his needs in life.

Whether it is psychological or physical...

But only Xu Meixin knows that she has not seen the boss's ancestral spear until today.

wrong...

She met once, but it was just to change clothes for the boss and make him sleep more comfortable.

still when the boss is drunk!

Thinking of this fact, Xu Meixin couldn't help but sigh.

The thing you are thinking about, it would be great if it really happened.

Unfortunately, the boss's principles are so strong!

Everyone says that the moon comes first near the water tower, but only Xu Meixin, who is on the tower, knows it best.

There is no ladder at all on that platform, she can only stand under the stage, looking at the shining boss on the stage with eyesight.

helpless tears shed from the corner of his mouth...

Chapter 927: Rescue and accidental products

17 light-years away, the Xihe, summoned by the command, returned to the earth at the limit speed.

The city of miracles, the apron!

On the empty platform, an aircraft suddenly appeared.

It feels like it just stopped there, but everyone didn't notice it.

"Boss... I won't let you down again this time." Shi Cui vowed to say in front of the aircraft.

"Anyway, be careful." Qin Yu patted his shoulder and said.

Shi Cui showed a touch of excitement, but quickly pressed it down.

This time, he will never disappoint the boss again...

boarded the Xihe, and in a blink of an eye, they had reached the sky above the bald eagle.

The streets and lanes, including the private monitoring equipment in the building, have been invaded and controlled by Kirin.

Soon, the trail of Fink and his party was found.

They were trapped in an abandoned building on the outskirts of the city. The people around them suffered heavy casualties, and there was an elite team in charge of protecting him.

Outside, two mutants with a group of deformed bodies are searching his tracks.

It seems that the other party is here specifically for BlackRock.

Has its own unique power already formed in the body of Mutation?

Observing these, Qin Yu couldn't help but fall into thinking. This is not good news for mankind!

is a variant that is polluted and always affected by whispers.

The attitude towards humans is like humans treat livestock.

When you want to eat chicken, have you considered the feeling of chicken?

Humans, to the mutants!

is a chicken that can be slaughtered at will. As for its own ideas, the mutator does not care or pay attention to it.

Food should look like food...

In the abandoned building, Fink looked nervously at his only support: "Captain Mark, what should we do?"

"Stay quietly." Mark is not in the mood to explain to him how bad the current situation is.

Next, if there is no support, the probability that they will survive is almost zero.

I have tried all possible Marks, but there is only hopelessness in my heart!

The signal is blocked, and the teams from various places can support.

Because of various reasons and difficulties, they are all in the process of performing tasks...

Now, the only thing they can rely on is themselves and the people around them.

No one can help them, and Mark will never give up.

Even if his heart is full of despair, he still has to find a breakthrough point and strike a chance of winning.

"Map." Mark asked the map to be placed in front of him and began to look for a possible way out.

"Here~" Suddenly, Mark pointed to the slum two blocks away.

There is a mixture of fish and dragons, densely populated, old buildings spread in all directions, and the route is very complicated.

If it is not for the people who have lived in it for a long time, it is impossible to find the right path.

Moreover, the gangs entrenched have a strong concept of territory.

If someone breaks in suddenly, he will fight back immediately!

As long as they can escape to the slums, provoke a fight between the gangs and the mutants.

Maybe they can find the last chance!

"Ready to set off, use incendiary bombs to attract the attention of those monsters." Mark gave the order.

A team member ran to the next floor, placed the incendiary bomb and the bomb together, and set the range of the original road after the time was set.

Two minutes later, a violent explosion suddenly sounded from the building next door, and the flames skyrocketed.

The mutants who searched outside were really attracted by this sudden change.

Just as they turned to the next building, Mark led the team and quickly left from behind.

"Hurry up, hurry up." His mouth kept urging, and everyone shuttled between the alleys.

is the main street in front of you, as long as you cross it and pass through that alley, you can reach the slum area.

Then, you will be saved.

The light of hope is right in front of him, and Mark can't help but smile at the corner of his mouth.

Immediately afterwards, the smile solidified on his face, and the pace of advancement stopped abruptly.

"Captain Mark, why did you stop?" Fink, who was protected in the middle of the team, said anxiously: "Quickly leave here, we are almost there."

"...This time, I really can't escape." A solemn tone came, and Mark raised his gun and aimed forward: "Ready to fight."

In front of the main streets and alleys, the gentle white man smiled playfully.

Seeing Mark and the others, who were stuck in the alley and were like a mouse crossing the street, raised their feet and stepped closer.

a huge bulge on the shoulders, and then the chest...

The skin on the surface of the legs and arms was split apart by sudden explosive muscles. In just a few seconds, the opponent changed from a human form to a twisted monster.

A fist covered with tumors is like a spliced tumor.

With the waving of the arm, a large amount of yellow pus was scattered everywhere, everything that was splashed by it.

all gave out white smoke and made a corrosive "Zizi" sound.

"Fire~"

After seeing this scene, Mark ordered an attack. The fire was everywhere, and countless bullets leaned forward like rain.

At the same time, the expressions of the two team members became tangled.

The arm holding the gun was also shaking slightly, and the muzzle of the gun gradually turned back to his companion under the confusion of the brain.

"Be careful~" Fink shouted abruptly.

The instinct from battlefield experience made Mark perceive the danger.

lowered his head and rolled forward, the bullet grazed the back of his head and hit the wall. At the same time, the three team members also vomited blood and fell in the convulsion.

bang bang~

turned around, the bullet penetrated the eyebrows of the two contaminated team members.

Crazy eyes spread rapidly, and people fell to the ground...

"Damn it!" Seeing only the last player and himself, Mark couldn't help cursing.

"Captain." The remaining team members called out Mark's name in pain, and the gun in his hand fell.

held his head in both hands, knelt on the ground in wailing, making a terrifying scream.

"Mark, Captain Mark, he, he is contaminated...Quickly, get rid of him." Fink shivered and avoided.

At the same time, he turned his gaze away, not looking at the approaching mutant and the Marines struggling to deform on the ground.

"Ah~" Mark roared angrily, but it didn't help the distortion that was happening in front of him.

Looking at the mutant close at hand, Mark suppressed the crazy gibberish in his mind with his steel-like will.

pointed the muzzle straight at him, squeezed the trigger, still making an angry roar in his mouth: "Ahhhhh, give me death."

bang bang bang~

The bullets opened numerous holes in the body of the mutant, and the splashing pus was mixed with blood that seemed to be diluted by water, and it gurgled down.

But his progress was not affected in the slightest.

Facing the rain of bullets, the moment he was approaching Mark suddenly accelerated.

That twisted, long tentacles, swollen and pus-filled middle finger, the palm of the little finger like a sharp animal claw pinched his head.

"Excellent seed...Join the chaos and become the subjects of the great chaos!" The mutant said with a grotesque smile.

Mark, who was pinched his head, moaned in pain.

It's dead, it's dead this time.

Mark, who put his face against the wall, trembled like a mosaic.

The wall was stunned by him. One can imagine how hard he was and how desperate he was!

bang, click~

Boom!

The strange sound that came suddenly, accompanied by violent vibration, seemed to happen behind him.

Mark's groan also became softer, no longer as heart-piercing as before.

"Huh? What happened?" Fink carefully observed the direction of the sound from the corner of his eye.

The smooth and dust-free metal came into view, making his heart instantly excited.

"Ha, miracle... it's the miracle boy, I love you, the miracle boy, can you hear me?"

Fink stepped forward and hugged [Creator], yelling in excitement, and shouting at its electronic eyes: "I love you, kid, hahaha..."

In the next second, [Creator] pushed him away with a cold mechanical arm, allowing him to fall to the ground.

With his pupils contracted, he walked towards Mark who was curled up on the ground.

"Roar~" With a roar, the contaminated team member surrendered to Chaos.

stood up distorted and deformed, and roared hoarsely at the iron bump that had come from nowhere.

Click!

【Creator】 Stopped, his arm suddenly lifted, palms pinched his head.

Squeeze inward without any hesitation, bang~

The watermelon exploded, and the twisted thing that had lost its head fell to the ground slantingly, turning into a pool of flowing mud.

The moment his body was contaminated, he was already dead.

solved the trouble, the creator continued to walk towards Mark, bent over and pinched his head to lift him up in the air.

Relax is like carrying a piece of air, without quality!

"Huh~"

The sudden sound stopped [the creator]'s actions, and Shi Cui, wearing a white coat, walked from the end of the alley.

"With my own will, resisting the pollution and erosion of chaos...what a powerful willpower."

Shi Cui looked at Mark with admiration, the pair of eyes were squeezed into the deformed eyes, revealing a strong unwillingness to fight.

reminds him of the self before, the despair at that moment and the gratitude of being reborn after being redeemed...

"Take him on the plane." Shi Cui gave orders to the creator.

Shichoi decides to bring Mark back to the hive. As for him, he will eventually become an experimental subject and a member of the Miracle Group.

depends on his willpower, UU reading [www. How powerful is uukanshu.com!](http://www.uukanshu.com)

After dealing with the accidental product of Mark, Shi Cui bowed and smiled at Fink, who was clinging to the wall with a nervous expression: "Mr. Fink, I am from the city of miracles. On behalf of my boss, Mr. Qin Yu will take you to Daxia. ..."

Looking at Shi Cui's smiling face, although it feels like a monster covered in human skin, it gives people a strong sense of anxiety.

At this moment, Fink has no other way to go.

There are strange sounds of abnormalities and distortions everywhere, and the fall of the entire city will happen sooner or later.

If he doesn't leave now, his previous desperate fate is his final fate.

returned to the former abandoned building, all the way up to the rooftop, Fink saw a few blood piles that had been crushed into sludge on the road.

"A few dishonest little fleas, for the sake of safety, I just got rid of them."

Shi Cui smiled slightly, and apologized: "I'm sorry, I'm still adjusting to this new body. It is inevitable that I can't control my power, and it's too bloody."

Listening to Shi Cui's patient explanation, Fink's legs trembled uncontrollably.

Why the more he explained, the stronger his inner anxiety and fear.

Please, stop talking, just leave now!

Going on, Fink worried that he would lose the courage to leave with him.

That is the instinctive alertness that would rather face death than stay in the same place with him, like a piercing police siren constantly surrounding him.

Chapter 928: Enter the copy

! In the city of miracles, the returning Xihe appeared on the tarmac again.

disappeared suddenly as before, and appeared again suddenly!

Stepping down from Xihe, which is full of futuristic science fiction, Fink's heart is full of astonishment and surprise at the moment his feet are down to earth.

Here...it's so quiet!

The fragrance of birds and flowers, the children chasing in the garden in the distance, the old people walking.

The relaxed performance when people talk, and the peace and tranquility from the heart!

Is it really Daxia here?

"Welcome to the city of miracles." Shi Cui said with a smile at Fink.

.....

.....

Twenty minutes later, Fink sitting in the office still couldn't believe it, so he escaped from hell.

What makes him even more helpless is that the country he once regarded as proud of, now what he says from his mouth is "hell..."

The one who was proud and struggling for, disappeared overnight, but Fink had not much time, half of his foot stepped into the loess pile.

At his age, encountering such a thing... Isn't it a sorrow!

If possible, Fink is willing to spend a lifetime of wealth to get the world back on track.

This sudden change, for the first time, made him realize his insignificance.

"Qin, this is like the Garden of Eden, it is so beautiful...you are such an amazing young man."

Fink said with emotion, and his eyes were filled with the appreciation of the elders for the younger ones.

"You should walk around and see, Daxia's 80,000 li mountains and rivers are more spectacular and more like a paradise!"

Qin Yu was not surprised by Fink's fuss.

Not to mention that the bald eagle has become a battlefield. Even before it becomes a battlefield, the foundation and humanities are far worse than Daxia.

Not to mention that the gunpowder is full of smoke now, I don't know how long it will take to return to peace.

has become a monster paradise, it is not without such a possibility!

The situation worse than the Bald Eagle is its two neighbors.

Mexica and Dabaina!

Dabaina's situation is similar to that of a bald eagle, and while resisting stubbornly, he seeks help from the father of the country of corruption.

Mexica's show operation is going to be eye-opening, after discovering that it can't resist the pollution of the mutant.

Several drug lords even chose to surrender, hoping to open a new era by this.

Who is messing with? Since 'Chaos' is so strong, it's okay to change to a boss.

Don't say it, this trick works pretty well, the mutants quickly take over the power of the city and preach chaos.

Batches of aberrations and anomalies began to go online.

In this regard, various countries strongly protested and threatened Mexica with force to resolve these silly brains as soon as possible.

Especially the bald eagle, hesitate to use nuclear peace as a threat.

Mexica is her own back garden. Her troubles haven't been solved yet, and a monster base suddenly pops up behind her.

How can the bald eagle suffer this grievance? If you dare to resist, I will quell you.

Don't look at the bald eagle now being beaten all over his head, but that's because the incident was too sudden and the enemy was too weird.

Plus, the battlefield is in my own yard, so I can't let go of it.

Changed to Mexica, but there was no such scruples, two nuclear weapons were leveled, and the missiles washed the ground.

What chaos, mutation, distortion, all brother...

Now everyone is exercising restraint, and Daxia will extend a helping hand to the bald eagle in the future.

Daxia must not be able to sit back and watch the bald eagle and perform a shave on Mother Earth.

Just like any country will not let it go, the Western Hemisphere is completely occupied by monsters.

Now, everyone is just buying time.

Barrow, Baimaozi, Smecta, these were all brought to their own camp when the bald eagle was overwhelmed.

Neon and Dai Xiaozhuan Bay are getting better and better now!

If you beat it for a while, you will be able to return to the embrace of a loving mother...presumably the above preparations have already begun.

As for other small countries in the surrounding area, nowadays, they are also looking forward to the big summer!

Dare to be disobedient, and pull it out is a meal of loving care from a mother.

Crackling~

...The flames bring lightning, so everything is fine.

"Dad." Bella, who rushed to the city of miracles, flew into his father Fink's arms.

In this world, her only relative is her father.

no matter how bad and rebellious the character is, she can't stop her love for her father.

That is the most important bond in her heart...

"Hu...Bella, my baby girl."

hugged his daughter, Fink's face showed a smile from the heart for the first time since his escape.

Xu Meixin, who had brought Illibela, closed the door, leaving time for the father and daughter.

Back to the office, Xu Meixin saw Qin Yu sitting on the sofa, watching the 3D projection in the center of the room.

Six customized open game cabins, no need to bind an account, anyone who enters them can use the game cabin to enter the game.

uses the same technique as the World No. 1 Budokai, but fine-tuned the appearance.

makes them look more handsome...

After all, this time-limited copy is to be broadcast to the world.

And, it represents the glory of the winner, too sloppy can be sorry for being a champion.

Wandering toads, long-legged buns, big dark devil, evil spirits, bear kids, little-headed sons and big-headed daddy.

The six players put on the "game clothes" specially provided by the company. The inner lining is soft black armor, and the outside is covered with a transparent glittering object like glass.

With the help of the staff, he entered the game cabin and lay down.

"Now that the six players are ready, they will directly enter the limited-time dungeon for this exploration.

In other words, what kind of copy it is...I am also starting to be curious now. "

In the small window of the live broadcast, Chu Yu gave an explanation with a smile on his face.

This time, her career can be said to have shined, and she was also named the goddess of the game along with Savannah.

Two female anchors are responsible for the game commentary, which is rare in the history of games.

But since it was the boss's order, just listen.

Besides, this is not a big deal, it is nothing more than being teased about "LSP."

As for who this LSP refers to, you know everyone!

"Oh, here comes~" In Chu Yu's excited expression, the screen switched to the entry special effects.

Arcs traveled through time and space, and finally landed on a mysterious planet.

When the arc fell, the dazzling white light illuminated the screen, making it hard to see anything.

When the white light disappeared, what appeared in front of everyone was a white and bright passage, and at the end was a mottled and plain dark black door.

"Fuck, devil, how did you become a robot?"

The angle of view shifted, and Jian Toad looked at the robot with "Dark Devil" on his head and shouted in surprise.

"So are you..." The Dark Lord said coldly.

His character design is very cold, and he is never allowed to tease him. Hundreds of millions of viewers are watching him!

can't make a comparison, can't make a comparison...

The Dark Devil is in self-hypnosis, while the others are checking their new body. '

"This is too handsome, but the head of this mantis is too low." The long-legged steamed bun was speechless.

is clearly a simulation robot that cannot be more subtle, every part of the body is so dexterous and real.

Why is it matched with a mantis triangular head?

"So, what is our mission?" The taciturn evil spirit is more concerned about this mission.

Limited-time copy, I don't know what good things are in it!

Not only did the Miracle Group be tempted, they offered a cash reward of 5 million yuan per person, but they hadn't prepared such sophisticated equipment. '

"Here, I found the portal of the dungeon." The child bears his hands on the edge of the door and window, looking inward with excitement.

The "Star Gate" in the center of the room was shining with a halo of morning stars, showing a scene of scorched earth inside.

Isn't this the portal of the dungeon!

"Hey, it's really...it seems we have to open the door first... leave it to me, I'm the best at organizing."

The stray toad fumbled on the door, knocked back and forth again, looking for the suspicious button.

In the next second, Xie Wu already pointed to the top of the gate and said, "Isn't that written?"

"Open Sesame!"

As Xie Wu shouted out the "signal" written on the top of the gate, the black gate that fits seamlessly shuddered.

Then there was a sound of stirring gears, and the door pushed out a few centimeters first.

then automatically moved to the right. At this time, everyone noticed the slideway against the wall through which the door opened.

"emmmm~" The wandering toad stood awkwardly in place. At this moment, he felt that he should live on another planet.

On the earth, he has lost the right to choose a mate, mate and pass on from generation to generation.

"Haha, the cheap toad is so funny... all get out of the way, I'm good at this... open the door with sesame, hahaha..."

"Miracle Company is good or bad, this is not to pit us toad... However, the toad is really nasty, hahaha..."

"Hey, they are so handsome now, I really want a set."

"My sister is 177 in height, 56 in weight, and 111 in leg length. She has a fair complexion and big waves. Who can give me a piece of this equipment, I will be his girlfriend~"

"Go away, if I have this equipment a woman is a Jill! One big long leg with one knife, kill indiscriminately!"

The barrage was instantly captured by a straight man. As soon as the girl's speech appeared, it was covered by a group of group screens of 'this he is not more scent than a woman'.

A group of female players are embracing their hands in front of the computer, their chests undulating and sulking.

In the live broadcast room, six players have lined up to enter the Stargate.'

Qin Yu in the office also stood up excitedly, prepared for so long, just for this moment.

What kind of world is behind the 'Star Gate' and whether there is life?

What is chaos, Yu Ge's inner curiosity is no less than the audience before the live broadcast.

After a short period of garbled interference, the picture is clear again.

And the desolate world that appeared in front of you stunned everyone before the live broadcast.

The twisted and twisted, ups and downs of the earth, the mountains are like monsters and monsters that have been frozen.

Above the sky, there are 'stars with thorns all over the body like a pufferfish.'

A strange green mist drifted above the sky, without clouds, wind, and no signs of life.

Whether it's the ground under your feet or the starry sky looking up...

only gives people the feeling of endless silence and despair. This is a dying universe!

Chapter 929: Approach boldly

"Fuck, this copy is too ugly, it makes me get goose bumps."

"Look at the mountain to the east, do you look like a grinning monster?"

"Who can tell the difference between the southeast and the northwest?"

"How come this ground is full of fangs-like spikes, like a monster with an open mouth."

"Fuck, it's really... the brothers won't drop the monster's lips, right?"

"Trap! If this is a mouth, how big is the monster, a head the size of a planet?"

"Oh, oh, it's terrible!"

"Grass, I'm a forty-eight-meter sword!"

"Upstairs, I stabbed her with a toothpick."

"Did you know what?"

"Look, something is coming."

With the appearance of the barrage, a puff of black smoke appeared at the end of the line of sight, rushing towards several players quickly.

"Grass, what the hell?" The stray toad made a gesture of drawing a sword in astonishment.

reached out and grabbed it, and found that he had changed his equipment, the sword was not there...

'The weapon system is activated!'

'Smart assistance system activated!'

"Stupid tutorial is being implanted..."

There are more memories in his mind, and the six people have a comprehensive understanding of the functions of this 'new equipment'.

Controlled by the whole mind, the evil spirits moved, the smooth shoulders sank, and a shoulder gun appeared to aim forward.

Bun stretched his arms, sliding on the panels on both sides of the arms, and two automatic machine guns protruded inside.

"Super armor, start!" S2's cry sounded.

The pulley popped out from the foot of the bear child, and the vector engine injection port was exposed on the back of the calf.

The chest slid open to the sides to reveal a row of small missile clips...

"Wow... handsome!"

The bear kid jumped up happily, and fell on one knee with a backflip and looked forward.

[illegible]

humming in his mouth, the Dark Devil points his toes like a ballerina, kicks his right ankle with his left leg, and the vector engine jet pops out.

The right leg kicked the left ankle, the vector engine jet popped out, his hands raised the top of his head in an umbrella shape, and his toes slowly lifted off the ground while rotating.

"Lalala, fly to the distant stars, come on... Astro Boy, a good boy who loves science. Brave and kind-hearted~ Astro Boy with iron arms..."

Embarrassment, every cell in his body exudes a strong aura of embarrassment.

Xie Wu felt a tic tac toe on his forehead, and he was about to cut out a five-bedroom and two-room on the spot with his feet.

Three rooms and one hall, not enough for him...

Such a thing... how did it get into their team.

It was not very cold before, and there weren't even a few words, how about your cold? What about people?

collapsed? ? ?

and your look, it has nothing to do with Astro Boy, okay!

Astro Boy shouldn't be that kind of very passionate, S2...

Wait, why did I think of this.

MD, I was infected, so terrible!

shook his head vigorously, Xie Wu quickly threw off the picture in his mind, and cast his eyes on the approaching black smoke.

"Hey, are you too calm?" The light spot in Baozi's eyes shrank, and the picture in the distance gradually enlarged.

There is no heat source, no signs of life...

"A special natural phenomenon?" Baozi whispered softly.

"It's not a natural phenomenon." The small head and the big head said urgently: "There is something in it, I know..."

"How did you know?" Baozi asked in surprise.

"...Just know that there must be some kind of evil hidden in it!"

The small head and the big head pierced the horse and made a fist, and said with a heavy fist in front of him.

"..." Crazy, Xie Wu is already crazy.

is a secondary second again, and the reason "I just know" is fine.

He wouldn't think he was living in a comic!

Why don't your teammates have a reliable one, can they really complete the task?

Hu~hu~

The black wind howled, completely covering the eyes of the six.

In the black wind, countless cotton-like debris kept beating on his body.

"what is this?"

Bun reached out and grabbed a piece of cotton wool, crushed it into ashes, and disappeared by the wind.

It seems as if nothing happened, the cotton wadding is just an impurity caught in the wind.

But in the office, Qin Yu's number of people in front of him is constantly changing.

Among them, the bun's sanity value instantly dropped by 20, reaching 79 points.

Moreover, this value is still falling, and his state at this time is not very good.

A strange whisper appeared in the black wind, and I scanned the surrounding landscape.

Those hideous and grotesque mountain veins seemed to come alive in an instant, squeezing towards where they were.

"Run." Baozi exclaimed and went to catch the people around him.

But when he stretched out his hand, he realized that he was empty around...

looked up, the companion who was beside him disappeared, only the ghost yelling of "Woo~Woo~".

and the terrible mountains that twisted up to the sky and pressed down from top to bottom.

"Bun, bun..."

Looking at the buns that suddenly flew into the sky, as if they were about to escape from fear, several people hurriedly exclaimed.

In the office, it was discovered that Baozi had lost control, Qin Yu hesitated and said, "Inject him!"

"Please confirm!" Kirin.

"Confirm the instruction." Qin Yu.

Miracle Headquarters, a live broadcast room with a delay of 120 seconds.

Two medical staff in white coats came to the game cabin where Tang He was.

One of them picked up a two-finger-thick needle tube, which was filled with a transparent liquid.

噗~

is inserted into the artery, and the energy injection is completed.

In the live broadcast, this scene has been edited out...

When everyone occasionally scanned the real picture, all they saw were six game pods that looked like still pictures.

and the staff passing by from time to time, nothing else has changed.

The mysterious figure in a white coat has never appeared!

In the game, a bun soaring straight up in the sky flashed in front of his eyes, and the terrifying picture disappeared.

There is still a strange black wind beside him, and the cry of his companion faintly came from below.

fell in the direction of the sound, and the black wind gradually faded and disappeared, blowing further behind everyone.

"Baozi, are you okay?" Everyone looked at him worriedly, their eyes full of questions and vigilance.

What he did just now was too weird to allow everyone to doubt it.

"It's okay, I seemed to be in a hallucination just now, and I am much better now." Baozi said in a relaxed tone.

"Scan the other party's data!" Almost at the same time, the other five people scanned the buns.

came to the conclusion that it was "normal," which relieved the worry in my heart!

"Let's go, we have been delayed long enough, and we should run out of energy if we continue this way."

Xiewu urged and said that he wanted to complete the task as soon as possible, and then stay away from these middle two young people.

Otherwise, sooner or later, I will become the same as them in second grade.

"Hey, my energy is consumed 2%, so fast?" The big head and the little head monster cried, but he didn't do anything.

"4 percent." The stray toad said silently shutting down the weapon system.

"5 percent, why do I have the most." The jet port above the ankle of the bear child retracted into his leg.

"Bun, how much do you have?" Xie Wu looked at the bun, and with his actions just now, the consumption must be the most.

"Uh..."

Looking at the full energy bar, Baozi didn't know how to explain it for a while.

...

...

In the office, Qin Yu stood in the middle of the projection and explained to Xu Meixin the true meaning of the 'energy bar'.

"The energy value is actually a value to prevent pollution. The lower the value, the higher the probability of being contaminated.

The energy injection previously injected into the steamed bun is a liquid extracted from a high-level energy crystal, and the energy liquid diluted 1:100, otherwise he should have fallen in the pollution now. "

"Boss, since it's so dangerous, why should you explore it?" Xu Mei asked puzzled.

Qin Yu looked at her and said: "You can't stop because you are afraid. Crisis and opportunity coexist."

"If you are worried about the scorching heat of the candle... human beings are still blood-drinking beasts, how could it be possible to ignite civilization."

"The origin of mankind is still a mystery. Maybe the so-called fire was not discovered by humans at all?"

"Hey, do you know this too?" Qin Yu thought she would not pay attention to these theories.

"...I am often caught by Team Leader Jing and Team Leader Cui for class. They shouldn't be here, they should go to school to teach."

I think of every time I communicate a problem, once it involves something I don't understand.

The two will grasp themselves as soon as the education is popularized, and Xu Meixin once again remembers the fear of being dominated by the academic hegemon!

Since entering the company, he has become Qin Yu's personal secretary.

The various kinds of knowledge Xu Meixin has learned are more than what she has accumulated in the previous 33 years.

asked her to put on a white coat and then put on a pair of glasses to pretend to be a staff member.

No one can see the flaws, even if it involves professional knowledge, as long as it is not too esoteric, she can answer it!

"Secretary Xu, you can..."

Qin Yu smiled slightly, and said: "Keep it up, UU reading www.uukanshu.com is a positive and correct attitude."

"Then... Do I still need to learn massage techniques, psychological counseling, and other professional services to serve people?"

Xu Meixin boldly approached, standing in front of Qin Yu and staring into his eyes.

The trembling eyelashes and short breathing all mean that her heart is not at peace.

But she still held up her courage, looking straight into Qin Yu's vast and deep eyes, looking for an accurate answer.

"What do you think?" Qin Yu responded to her bravery.

Although it is only a hint, Xu Meixin, who has followed him for many years, has already received a clear answer.

The blinking eyes suddenly closed, and the breath became longer...

After taking another deep breath, Xu Meixin suddenly bent her knees and squatted.

The light source of the 3D projection is affected, becomes incomplete and trance.

Strange voices fluctuated in the office, just like the feelings of Baozi and others experiencing fear.

This place is too evil. So far, they haven't encountered any creatures.

Only the black wind that appeared one after another caused the energy value to drop by 80%, and the lowest bear child was only 75% left.

And they found nothing except the scorched earth, strange and grotesque landforms.

Plants, water sources, strange landmarks or traces of life, nothing!

At the end of 's sight, there is only endless scorched earth, appearing again and again.

Chapter 930: Flesh Swamp and Silver Ink

The repeated scorched earth made the six players feel anxious.

Patience is being exhausted, and the bear kids start flying around, trying to find something different.

As long as it is not dark and scorched earth, anything will do!

A whistle-like sharp sound came into the ears, and the bear kid flying at an altitude of sixty to seventy meters immediately swept forward.

"I'll go see the situation!"

"Wait, don't act alone." Xiewu hurriedly shouted, but the bear child had disappeared in the blind spot behind the mountains.

Fortunately, the signal has not been lost. Several people quickly received his reply: "You should come here to see..."

Hearing his solemn tone, several people started their engines and flew over the mountains.

swamp, a swamp of flesh and blood exuding the smell of blood.

There are countless corpses floating on it, among them the bloated man with a twisted face, and the hollow eye sockets seem to exude endless despair.

"Humanity?"

The stray toad with a hippy smile landed on the side of the swamp and said in a heavy tone.

"According to skeletal analysis, it is human beings!" Baozi said for sure.

The atmosphere became solemn, and several people in the game cabin were gritted their teeth with angry expressions.

It's a pity that there is no change in that iron triangle face in the "Game"...indifferent and weird!

In front of the live broadcast screen, six mosaic perspectives made the audience vomit: "What is this, mosaic warrior?"

"So, this is a cavalry?"

"No, this is a mobile soldier, boy, you have to imagine..."

"Which sand sculpture hasn't been closed properly, quickly close the door and close it."

"This silencer, I have taken it..."

"Haha, beep all the way..."

Not only did the live broadcast picture become a mosaic, even the conversation process was endlessly beeping.

However, some people still see the truth through the few frames exposed when the bear kid broke in at first sight!

It's just that at this moment, everyone has a tacit understanding of ignoring this topic.

Xiaobai occasionally asked questions, but was overwhelmed by a large number of sand sculpture speeches.

I'm scared, or that the sudden change is at a loss and I don't know how to deal with it.

Although I don't know the true origin of the limited-time 'Duplicate', I can see from the experience gained from "The Scary Demon".

It should also be real...

The reason why no one mentioned it at first was because it was impossible to determine whether there was life on this planet.

Now, they know.

There is life on this dying planet...

At least, there used to be human beings on this planet.

The mood is getting heavier!

"Look, there is no distortion on that child." Baozi found the corpse in the distance, still keeping the appearance of a human.

There is no distortion of hands and face, thick hair on the head, and no strange tumors.

'A mission item with special value is found, please recycle it! In the panels of several people, smart prompts appear at the same time.

At the same time, the boy's chest in the swamp showed a red bright spot.

Mission goods with special value, right there...

"They found it." Xu Mei said excitedly looking at the metal necklaces in the hands of several people.

"Not sure, but its frequency is indeed different from the previous radiation."

Chaos energy can pollute the living body, distorting its spirit and even the deepest body structure, cells and DNA.

This is like a super radiation with extremely fast and terrifying effects.

This kind of radiation can not only affect humans, but even the environment and landforms will be polluted and changed.

In fact, nuclear radiation also has this ability.

It's just that the effect is not as direct, rapid, and intense as 'Chaos'.

Just like lead plates can effectively cut off nuclear radiation, coal ash is a good helper in extinguishing fires.

In a world full of powerful distorted radiation, natural materials can also be found to restrain it.

A very special new element, its material is a bit like silver, but softer than silver.

has a higher ignition point and strong corrosion resistance.

Because it is most similar to the silver element, and it is jet black, it was temporarily named 'silver ink.'

"Puff~named ghost talent, silver ink, 666..."

"Daxia language is broad and profound, and the homophonic stem will be immortal!"

"I'm here to announce that I will pack the silver ink in the future."

The ridicule of the sand sculpture netizens was put aside first, and the new task for the six lucky players came.

Find the origin of silver ink, mark it and return.

...

...

The main purpose of this trip was achieved, and the materials I wanted were found.

Solve the immediate urgency, and at the same time the harvest is huge.

Although the players did not notice, the [creators] who can enter it have been collecting all the data.

Air radiation indicators, starry sky distribution map, landforms, signs of life, atmosphere, pressure, gravity, etc.

These data play a key role in future exploration.

At the same time, this experiment also proved the limit and comprehensiveness of titanium rhodium alloy and liquid crystal.

The next step is to create a new exterior coating for [the creator], and conduct frequent and in-depth exploration.

However, these explorations will no longer be open to the public.

All are done by the Network Department, and Xiewu exists for this purpose.

The Network Department will recruit a group of patient players with high quality, flexible thinking, and creativity from the society.

Start a comprehensive exploration of the world of 'Star Gate', with more advanced scientific and technological instruments.

includes disassembling vehicles and aircraft into parts and sending them to the "Stargate" world.

Build a base inside the door as a bridgehead and research institute for exploring the world.

"There are not enough people." Qin Yu rubbed his temples and fell into thought with a headache.

The development of Miracle Group is too fast, and all kinds of events are overwhelmed. The recruitment, training and delivery of talents.

can't keep up with the development needs at all, so that it is always in a state of tightness.

This kind of abnormal development is a huge hidden danger for the entire company.

Qin Yu needs more high-quality and experienced high-tech talents.

"Boss, Mr. Bai Ze wants to talk to you."

Hearing Bai Ze's name, Qin Yu thought about it, his expression became lively and said: "Kirin, come in."

Lao Bai called suddenly, just for this copy event.

Others don't know, but he has met [the creator].

After combining all kinds of clues, Lao Bai guessed the so-called dungeon entrance at the first time, and there was a 90% probability that it was on the moon.

This also explains why Qin Yu secretly built an ecosystem on the moon in the first place.

tried his best to prevent the landing of the bald eagle, and took a negative attitude towards the support given above.

"Old Qin, you are not authentic in doing this, and everyone is like an outsider. Why, I am afraid that I will hack your benefits."

Hearing Lao Bai's teasing, Qin Yu lay back comfortably, enjoying Xu Meixin's Shiatsu massage.

"I really don't worry about that. If you want you, you have to have this ability... The radiation inside is not a joke."

"So, did you admit it?" Bai Ze's tone became serious.

"The door you see is the gateway to another world. The star door...subspace...chaotic energy can be regarded as a new kind of special radiation, which is extremely harmful and only takes a few seconds to trigger..."

After retelling the radiation storm that broke out before and the recent events in brief and terrifying.

Bai Zeren is completely stupid!

It turns out that with so many things happening during this period, the bald eagle's problem really came from the moon.

"It won't break out again, right?" Bai Ze asked worriedly.

Like the previous energy storm, if it comes once over the east, they can't bear it.

If it is really unavoidable, at least it is necessary to take countermeasures in advance to reduce losses and confusion.

"Are there few strange people and strange things in the folk? There is no disturbance." Qin Yu smiled, and the conversation changed.

"Don't think I don't know, those who have undergone abnormal changes in their bodies will be solicited by you."

The number of abnormal players born in the game is scarce, but not without.

Like accelerated healing, super strength, extreme speed, etc.

The changes of these people are within the normal range, and they are more controllable and acceptable than the mutations of the bald eagle.

Bai Ze has also been monitoring the movements of these people, and after discovering a new target, he will come to solicit as soon as possible.

So far, no one has refused his invitation!

"What if someone refuses?" Qin Yu asked jokingly.

"It depends on the situation. If the threat is too big, it should be controlled. If there is no threat, we are willing to live a peaceful life. We respect personal wishes, but we must record it."

"Very enlightened." Qin Yu joked.

"Hey, do you guys want to come for tea, I invite you?" Bai Ze said angrily.

"Forget it, I can't get used to your scum tea." Qin Yu mentioned the situation inside the Star Gate again.

"You should have guessed the truth of this copy."

"Like I was back then, relying on VR remote neural control."

"Yes, they found materials that can cut off radiation. UU Reading www.uukanshu.com is currently looking for mineral veins.

As long as there are enough materials, I can put on the right coat for creators and let them explore spontaneously. "

Thinking of the various weapons he saw on the live broadcast before, Bai Ze said in vain: "You told me at the time that it was engineers."

"Yes!"

Qin Yu confidently said: "When the engineers are on the battlefield, it is reasonable to have their guns on their backs to guard against enemy attacks, right?"

"Are your security standards exceeded?"

"I don't have enough firepower. I'm not at ease in my heart. If I don't feel at ease, it's easy to mess up. So in order not to mess up, all firepower is fine, right?"

"Is it in this river?"

"In the Ganges!"

"I am a little worse than shameless." Bai Ze said speechlessly.

Engineers...preparing for enemy attacks...

The whole body is made of titanium and rhodium alloy, the missile can't go in, and the engineer can dismantle the tank with bare hands.

Armed with firepower to the teeth, this would be just opening your mouth to extend an energy cannon launch tube, Bai Ze is not uncommon!

This kind of firepower, one is enough to crush a third country.

You told me that it was to prevent a sneak attack, who...who can't think about it so much and ask for death?

Come here, let me meet this warrior, and ask if his surname is Hao.

gave up and continued arguing with Qin Yu, Lao Bai urged the order again, and let him continue to deliver on time, and the line went down.

Going on, he was afraid that he would have to go to the ICU for a monthly subscription.
