

Pinnacle 951

Chapter 951: Rely on billions to enter YYDS

What kind of state is Xinliang? Brother Yu said he didn't understand!

Run is quite run, B+ is there.

There are some things, the model is not the bigger the better, you have to consider the ratio.

is bigger, the cow is quite big, you are on it!

Ring ratio.

The ratio of body to size, as well as color number, activity, elasticity and vividness...

These are the key points.

Light is a big mind, and at first glance it is a little chick who has just entered the society...

There is another very important data that needs to be specifically mentioned here.

The English letters after are only the size, and the numbers in front are also important.

Sometimes, the quality of numbers breaks the size control of letters.

Still the same sentence, proportion is the key to everything!

Muna's proportions are perfect!

However, Qin Yu's attention still turned away from her. Li Xiao who was talking was obviously more attractive than her.

"73 hectares, 1095 acres, are you sure you can use such a large area?" Li Xiao was still a little unbelievable.

Originally, the qualification for land approval was in Lingang.

But when things are halfway through, he finds that he has lost control and someone above has taken over the project approval authority.

Then, the planned area is getting bigger and bigger and more exaggerated!

7,300 hectares, 109,500 acres...

one-fifth of the area of Minhang District, what does he want such a large area of land for?

"Didn't I say it?" Qin Yu asked curiously.

"Did you say it?" Li Xiao's face was full of question marks.

"To build the world's largest and most advanced alien imitation ecological training center, you can use it as an upgraded version of the headquarters imitation ecological center."

After listening to Qin Yu's explanation, Li Xiao probably understood what he wanted to do.

It's just that such a large training center requires much manpower, material resources, capital and equipment to complete it.

"368.514 billion, which is enough to support the normal operation of the project in the early stage, and the subsequent funds will be solved by profit!"

The third flight plan will send more than a thousand people at once.

The introduction of senior talents accounted for about 30% of the total number, which is 300 people.

The remaining 70% is provided to passengers in need from all walks of life.

Rich people, entrepreneurs, speculators, politicians, adventurers, scholars or ordinary tourists, as long as they can pass the review, everyone is eligible to go to Mars.

It's just that they need to buy the ferry tickets themselves, and the price is tentatively set at between 100,000 and 200,000.

As for the final accurate price announced to the outside world, a comprehensive opinion is needed, combined with the previous investment and the subsequent expenditure ratio to calculate it accurately.

You can enter the training camp for free if you buy a ticket, but other additional services will be charged.

For example, if you want to eat well, drink well, live well, and occasionally buy some souvenirs and special products.

All kinds of high-quality services, all of which will be charged separately!

In addition, the spacesuit also has three options.

The standard version is the last one, which is bloated, bulky, and has very few functions. The power reserve and oxygen reserve are also standard units.

But this does not mean that it is not safe enough, but it does not seem to be careless enough, and it is bloated and troublesome to wear.

The price is 420,000.

The mid-range is what the Blazers are wearing now, and they belong to the close-fitting spacesuit independently developed by the Miracle Group.

Simple, close-fitting, safe and intelligent, even in the event of accidental danger, it also has a strong self-rescue ability and a high-labeled oxygen reserve.

The price of such a space suit is only more than twice that of the standard version: 870,000.

The most high-end is the new generation of tight-fitting spacesuits created by Miracle Group, which combined with the multi-functional spacesuits provided by Qin Yu before.

is not only equipped with an oxygen cycle regeneration system, the maximum life span is 76 days, and it has a signal relay mobile terminal that can directly contact the ground.

It is also equipped with multiple functions such as medical treatment, entertainment, sleep, body data monitoring, etc. It is equipped with the latest intelligent assistance system, and the whole process of brain wave control, so there is no need to worry about using it!

There are many strange card slots on its appearance. Miracle Company will only tell customers that these card slots are the greatest value of this space suit.

As for its role, it will be revealed later!

As for its price, each all-round space suit sells for 10 million.

"Fuck, Brother Yu, is it too much?" Li Xiao almost jumped up, a spacesuit of 10 million yuan, is there any mistake.

"Do you know how much the extravehicular walking space suit is currently selling?"

"200 million, the all-round spacesuit not only supports spacewalks, but also has a hundred times more powerful functions."

"10 million, I was moved by this price."

Brother Yu has an innocent look on his face, he is really about to be moved by himself.

If it weren't for the sake of selling more in the early stage, cut a wave of rich people's leeks!

The all-round spacesuit in the later period will also be fully popularized, and he will have to add two zeros to the 10 million.

"Come on, I thought the price of 660,000/mu before, the company will be short of funds, hasty, hasty!"

On this profitability, what kind of loan should I bring?

You built it, come, come, do you want to borrow some money?

Do you want to cross the bridge impulse? Not much, but a little more cash.

How about opening a settlement point directly below our company?

is also wrong, you don't seem to have enough level, so let's find Xia Xing to open a settlement point.

Send a team of [Creators] in to guard, absolutely invincible.

The world's safest financial settlement center, it is none other than it!

"Do you have any misunderstandings about the company's ability to make money?" Qin Yu looked at him like a fool.

Other than that, just the five King Kong-class cruisers ordered by Bai Ze, the profit is 550 billion.

Understand the profit of a single ship of 110 billion yuan?

Let's talk about the land price mentioned by Li Xiao, it is not too cheap.

65.7 billion bought 7,300 hectares of land, still in Lingang...

If this is used for commercial development, the bosses will laugh.

However, if it is really a commercial development.

Don't care how hard your relationship is, don't even think about getting this price even if you can get through the sky.

The public price of land used for commercial development in Lingang is now 10 million per mu...

660,000/mu, what's the surname of our dad?

"Brother Yu, will you pay dividends this year?" Xu Hao, who kept his ears upright, rushed over with a swish.

The company's net income this year is at least 300 billion, and 1% is also 3 billion. He has a private jet.

"If there is no new big project to start before the end of the year, we will have one cent." Qin Yu said with a smile.

"Come on, I will start to look at the aircraft model tomorrow." Xu Hao happily grabbed the wine bottle and poured it into his mouth.

I am happy, my heart is hot, I have to take wine to cool down!

"Don't buy the plane. After a while, I will let Vulcan develop a small aircraft. By that time, your plane will be broken copper and iron, and no one wants to sell it."

"Really?" Xu Hao asked in amazement: "Stop talking, I'll order one first."

"Brother Yu, the price is not expensive. I will order one for my family if it is not too expensive." Li Xiao said immediately.

His current status is not suitable for being too high-profile.

Even if there is no problem with the source of the money, once this kind of thing spreads out, it is as if he has done something illegal.

So, I bought one for my family, and I might use it sometime.

For himself, it is better to keep a low-key low-key.

Seeing the three big men whispering and chatting around each other, Mengjiao, who was sitting by and drinking alone, was numb!

What is going on with boys nowadays, are women not fragrant? Have to get together with the smelly man to talk privately.

There really are so many things to say, is it because the girl next to me can't be displayed?

Look at other girls, they are all innocent!

puts a beautiful girl without hooking up, talking and laughing with the man...

absolutely!

However, the big guy is often tens, hundreds, or hundreds of billions of words and phrases, and she is terrified when she hears it.

In the world of big brothers, is the currency used as the basic unit of 100 million?

It's numb, and my mind is completely down!

What kind of fairy did I run into? Isn't this a fake bar?

Thinking about Qin Yu's identity again, Mengjiao overturned her own thoughts.

The sporadic phrases that came from time to time made Meng Jiaofu think again and again, as if they had to build something.

What is worthless, intermittent conversations, Mengjiao listens crazy, but dare not get too close!

"Shao Qin, shall we have another drink?" Seeing the three of them stop, Mengjiao said as she toasted with stitches.

"Okay." Qin Yu took the cup and took a sip, and said in surprise: "Are you really Sister Xiaojie?"

"Yes, my dear sister." Mengjiao said enchantingly: "What, Qin Shao feels that we don't look like us?"

"Curious, pure curiosity!" Qin Yu was full of emotion.

His vision is right, UU reading [www. uukanshu. Com](http://www.uukanshu.com), this young man, is a person who can accomplish great things.

At three o'clock in the morning, Brother Hao unsurprisingly 'drank too much,' walking to the hotel by the two little sisters.

Looking at the two people laughing and opening their eyes, Brother Hao is afraid it will be difficult tonight.

Look at the little brother again, this will support the dizzy head and maintain the final majesty.

is the beauties who are wearing revealing clothes next to him. They are a little too close, which spoils his image.

"Brother Yu, Ming, I will be at the company tomorrow morning, let's sign the contract."

After drinking too much, Li Xiao still kept a little sober and made an appointment with him to sign the contract.

After signing the contract in the morning, he will fly back to Hudu.

There are still a lot of things waiting for him over there, and now Li Xiao is also lacking in skills, and can't stop for a day.

Waiting to send them away, only Qin Yu and Mengjiao are left on the street.

Xiaojie stood at the entrance of the store, and swept the two people from the corner of his eyes like a thief.

"Would you like to say hello to your brother?" Qin Yu looked at Mengjiao, the girl had made up her mind to go with her.

"A little kid, what can I say." Mengjiao took his arm and walked forward quickly and said, "Shao Qin, my head is so dizzy!"

just three steps and two steps, pulling Qin Yu forward, the next second is dizzy, forgetting his house number.

You asked how fickle a woman is, now~

This is not a clear example, "Master, go to the honey house."

Chapter 952: Golden age

Honey Smart Homestay, Suite on the Peak of Bliss.

Qin Yu glanced at Mengjiao, who was drowsy on the intelligent remote control bed, and put the watch on and walked out of the room.

Walking in the corridor full of graffiti style, Yu Ge also forgot when he started and how much he paid attention to the homestay.

It seems that there are not enough points in the hotel, and the chances of meeting are getting bigger and bigger...

Illusions, all illusions!

Turning on the phone, Qin Yu found the new WeChat account he had just added and marked "workaholic."

100000.00 yuan, the transfer was successful!

OK~

After worrying about it, it's time to work hard again.

At the company, Xu Meixin and Madoka are already at work, "Boss, have you eaten?"

"No, what can I eat?" Qin Yu asked casually.

"Tofu brain, vegetable box!" Xu Meixin.

"Bun, soy milk!" Madoka.

Looking at the breakfast that the two of them were holding in their hands, and looking at him expectantly, Qin Yu asked for all of them.

"Is Dong Li here?" Qin Yu asked.

"It's still on the way, the driver has already picked it up." Xu Meixin responded.

"Li Dong is here, let me know immediately."

Qin Yu bit the bun, "By the way, let the Legal Department prepare the contract."

"clear."

Xu Meixin and Madoka immediately went to work.

After Qin Yu left, Madoka looked at Xu Meixin with a triumphant and provocative gaze, and clearly said, "The boss chose me!"

As for Xu Meixin's breakfast, it seemed to Madoka that the boss took care of her to take care of her.

evidence?

Didn't you see that he ate the buns first?

In the office, Qin Yu put the buns on the table, opened the box and dried the tofu brains.

Waiting to solve the problem, Qin Yu looked at the steamed bun and thought, "This steamed bun tastes too weak."

But no matter what, it is wrong to waste food.

So, Brother Yu stuffed the buns into his mouth in two or two, chewed and swallowed, and the answering machine heard the news that Li Xiao had arrived.

The miracle has caused enough sensation over the years, so the company did not invite too many outside media for this signing.

In addition to the local official media and mainstream media, only the company's internal propaganda department is responsible for taking photos and videos.

The main reason for inviting local media is to take care of the emotions and face of the 'current management'.

The miracle group is the pride of Sanqin and even the Northwest.

No one can deny its success, but the proportion of each contribution in this success is to be discussed!

Of course, the greatest contribution belongs to Qin Yu and the dedicated workers in his work.

But in addition, the local yamen's policy tilt, support and all-round support are also credited.

Incidentally, it was mentioned in the report, can it?

Hello, I'm good, everyone carries the sedan chair.

does not involve the issue of principle, the local government has indeed done some practical things, and has provided many conveniences for the development of miracles to this day.

It's no harm to mention such a mouth!

On the premise of not affecting the miracle, it is understandable to give some care to the other party appropriately.

Mutual benefit is good for everyone, and Qizhu will not be far away!

"Today's cooperation is for a better future."

"Welcome to the golden age. The era of cosmic navigation started by Miracle Company is here. Are you ready?"

When the interview was over, Qin Yu saw Xu Meixin walking quickly after returning to the background: "Boss, Mr. Bai Ze's call."

raised an eyebrow to Li Xiao, who was looking weird. Qin Yu smiled and said, "It's faster than I thought."

"Hey, Lao Bai..."

Miracle Company made a public announcement, and a new era has begun.

And, it was the miracle company who personally started the curtain, and played a key role in it.

He should have said hello to more people in advance, but he did not do so.

Actually, he did it on purpose.

If you tell Bai Ze in advance, the answer must be "Be patient!"

Sometimes it is necessary to chop first and play later.

Today's Miracle Group needs people to accept reality faster, instead of immersing in memory of the past...

or brilliant, or frustrated, failure and success are all past.

A new future is waiting for them to enter, explore, everyone...

This is a brand new opportunity. Miracle Company has set off the wave of the times. Who can fly on the wave and be the man of the times.

It depends on whether his movements are fast enough to get ahead of others.

This is destined to be a magnificent era with many heroes, and the vast and mysterious universe will open a new chapter before human civilization!

"Old Bai, things are a foregone conclusion, do you really think the existence of the monster is still a secret?"

"Stop deceiving yourself, mankind has set foot on Mars and started a new life, the arrival of the universe era is a consensus..."

"The best thing you should do now is to prepare people for the fourth industrial revolution."

Bai Ze on the other end of the phone was silent for a long time, and had to accept this fact.

In fact, the brand-new alliance can be reached so smoothly, and "Ghost" occupies an important leading position in it.

This is an indisputable fact. All the people who know this and the high-level people know that the future has already taken the initiative to rush to them.

is unstoppable, all they can do is speed up their pace, and will not be abandoned by the times!

The value of the various technologies in "The Monster" in the new and unknown universe is incalculable.

Although there are some misunderstandings in this, everyone thinks that Qin Yu's technique also comes from "The Monster".

He just got ahead of everyone and found the biggest treasure.

But who can be sure that there is only one treasure?

There are only Western countries such as the Bald Eagle, still clinging to the non-existent imagination, immersed in the disillusioned fantasy of leading the world and civilization.

Speaking of the Bald Eagle, we have to mention our lovely and funny Miss Daisy.

She had a brand new name there: Worm Girl.

And, creating countless shocking terrible tragedies, her name has been on the wanted list!

One billion dollars is offered as a reward, which can be said to be the highest amount ever.

Even in the chaos, there will still be people taking risks for this bounty.

Even the mutants joined in.

Compared with the 1 billion dollar reward, the mutants are more interested in the existence of the 'worm girl' itself.

Some fanatics even made her the "Queen of Mutations," who think she is the most perfect mutation of evolution.

'S combat performance in a breakout shows that the thinking of the "worm girl" will not be affected by the radiation whispers.

She was able to stay awake continuously instead of gradually falling into chaos in whispers.

That's right, the influence of whispers is the most terrifying to the mutant.

No matter how strong the strength after the mutation is, in the end, he could not escape the curse of whispering, and his consciousness fell into chaos in despair.

The out-of-control body exacerbates the abnormality, becoming a disgusting, disgusting, lowly, beast-like aberration.

There are many mutants who cannot accept the ending of becoming a beast.

At the last moment of maintaining his sanity, he crushed his heart, threw his twisted head at the deformed body, and let them compete like wild dogs.

did this in order not to leave a trace of the possibility of surviving, and to prevent the powerful healing ability from regenerating the remnant body.

Lost the heart and brain, and the head was eaten by the aberrant body.

It's not dead yet, it's not enough to describe it as 'healing', it's the right way to call it 'rebirth'.

Fortunately, so far there has never been a mutant that can be reborn.

Under normal circumstances, the thinking of the abnormal person is gradually affected by radiation erosion.

From the beginning, occasionally go crazy, become irritable, anxious, kill, cruel...

After receiving any stimulation, it will instantly change and fall into madness, and will not leave until all energy is vented.

At the last moment, the mutant can no longer maintain his human form, and most of the time his thinking is in chaos.

At this time, they are extremely terrifying, and any creature that dares to approach will be regarded as a hostile unit!

can communicate with him only during the short waking phase.

During this period, the mutant still has to endure the torture of whispers from the depths of his mind, every second is like **** to him.

Often at this time, other anomalies will lead multiple aberrations to the vicinity, and quickly complete suicide the moment they regain their sanity.

Cut my heart, twist my neck...

toss!

Then the guide will take away his remnant body, use it as experimental material, or become a part of the body of the other mutants.

But Daisy's performance was completely different, from her first riot in the Big Apple City to dozens of scattered battle records.

The fighting style tends to be crazy and cruel, and the methods are extremely cruel!

It can be seen that she has been in a sane state, at least maintaining the most basic thinking ability.
Knowing how to do it is the best choice for oneself.

No one knows how incredible this is in the eyes of other mutants. UU reading [www. uukanshu.com](http://www.uukanshu.com)

According to the projection of the mutant, she should have entered the 'runaway,' it was difficult to control the wildness and brutality in her heart half a month ago.

But as of today, there is still no news of her running out of control.

Two days ago, someone of the same kind saw her on the west coast, and she was still as calm, proud, and cruel as before.

The same kind who appeared rashly in front of her were almost torn their heads to pieces by the 'worm girl'.

Yes, the mutant has tried to contact her, wanting her to join the major league of mutants.

The available answer is that two corpses of the same kind and a contact stronghold were bloodbathed, and the skinheads who took refuge in them all turned into her nourishment.

Why not absorb the body of the mutant, but clean up the ordinary people, this is also the place where the mutant is puzzled.

Insect Girl's strength improvement speed also exceeded the expectations of the Miserable Alliance.

It can be said that she is a miracle in her own right!

As long as she can catch her for research and find out the truth, the mutator will completely change the fate that seems like cannon fodder.

no longer need to catch people everywhere like desperate beasts, forcibly contaminate each other with radiation, and create new defective products to continue the number of mutants!

If you admit that the mutants are a new ethnic group, then this ethnic group is imperfect and incomplete.

Only by constantly creating (polluting) new people can inheritance and continuation.

How can a mutant who pretends to be noble and a creature better than humans accept it?

Chapter 953: You can't copy this homework

Ding Dong, Ding Dong~

Qin Yu, who is staring at his mobile phone, doesn't know the exciting contest on the other side of the ocean.

He is solving the trouble caused by Xiaoyu at the moment, Mengjiao woke up!

"What about people?" Workaholic.

"???? You are gone, haha~" Workaholic.

"So, this money is a hush fee for me?" Workaholic,

"Do you think I can be spent with money just like other women? Is there a man who is more **** than you?" Workaholic.

"Qin Yu, you are a scumbag, I still treat you as an idol!" Workaholic.

"Speak, do you dare to admit it?" Workaholic.

From the text, Qin Yu can see how crazy she is at the moment.

In this case...

咻.

100,000 transfer: Qin Yu.

"You still want to buy me with money, Qin Yu, come out for me, let's meet and talk." Workaholic.

咻.

100,000 transfer: Qin Yu.

"...you, I don't need money, you give me out." Workaholic.

咻.

100,000 transfer: Qin Yu.

"What do you mean, you want to stun me with money?" Workaholic.

"I won't give in." Workaholic.

咻.

100,000 transfer: Qin Yu.

咻.

100,000 transfer: Qin Yu.

咻.

100,000 transfer: Qin Yu.

咻.

...

10 times in a row, during this period Mengjiao has not spoken.

Until the end of the 10 transfers, Yu Ge briefly summarized the meeting, and then heard the reply.

"If you need it, please find me at any time. {Love Love Love}" workaholic.

Putting away the phone, Qin Yu and the executives left side by side.

"Boss, immigrants will celebrate their last night on Earth in the cafeteria tonight. Would you like to say a few words?"

Zhang Wei in a white coat came over and mentioned the immigrants' sorority tonight.

Tomorrow morning, at 10:01, the Immigration they are on will take off on time and embark on a journey to Mars.

The 隧人 will also set off as a disguised material ship to Mars, and then set off from Mars for deep space exploration.

"No, just celebrate. I will go back to be with my family tonight." Qin Yu smiled and declined.

Tonight, Lu Qing will arrive at the hotel to meet him.

A long-awaited, reckless, **** wheel battle is about to kick off!

Friendship? Can have this incense?

"Old Tang, Old Tang, wait."

Qin Yu called Tang Guo, who was striding forward, "I have something to discuss with Lao Tang, and you can do it yourself."

"Okay, then I'll go first."

Zhang Wei nodded and patted Tang Guo on the shoulder: "Ms. Tang, go."

"Zhang Gong walks slowly." Tang Guo nodded and smiled.

"Let's go, how about the framework I asked the network department to prepare?" When he came to the conversation room side by side, Qin Yu closed the door smoothly.

Tang Guo politely pulled out the chair and asked him to sit down first, and then said after he took a seat: "It's all ready.

Boss, tell me the truth, are there any big moves behind us? "

Let them design a map frame to imitate all kinds of extreme weather, including space and meteorite belts.

then made subtle changes to the internal structure of the game cabin, adding some strange peripheral interfaces.

God is mysterious, even he is kept in the dark!

"Yes, there is a big move." Qin Yu nodded and said: "The network department will add a new game."

"A holographic like the monster?" Tang Guo asked excitedly.

"What do you think?" Qin Yu asked back.

He reminded that Tang Guo was also calm, and should not be the same type as the monster.

The framework they had made before was obviously a map loaded into the game.

When have you seen the monsters need them to update the map and write a new code framework?

"This time it is a competitive theme, focusing on battles!" Qin Yu's succinct description made Tang Guo dreamy again and again.

Suddenly, a triangle head with silver light flashed in his mind, "Creator, mecha fighting?"

saw his face red, like Tang Guo who inspired the second spring.

Qin Yu smiled in surprise: "Yes, Old Tang, you guessed it all."

"Haha, I know the boss, you let the network department be responsible for the mineral mining of the new copy with a purpose.

holographic mech battle, competitive games on the market will suffer. "

Thinking of the behemoth far to the south, Tang Guo grinned and said, "Haha, how can I think Penguin can sit still this time?"

"I can't sit still a long time ago, do you think it's voluntarily lying still?"

"How to say?"

"Let the top be pressed!"

Qin Yu raised his head and pointed upwards, Tang Guo looked at the ceiling with a clear look.

"This time, the other party is afraid that they will jump."

"It's right to jump, and it's his turn to jump once in these years, and taste the pain!"

How would the other party react? Qin Yu and Tang Guo just mentioned a few words and laughed off as a joke.

The moment the Miracle Technology Network was born, the old rules and styles were destined to be broken and abandoned.

It's just a matter of time!

This miracle understands, Qin Yu and Old Tang understand, and Penguin understands.

It's not that they haven't thought about finding a way to break the game, and even taking action for it.

There are several holographic games with 100% realism after the so-called monsters on the market, all of which belong to the Penguin family.

How's the effect...

You can guess one or two by looking at the closed comment areas on major platforms.

What are you doing, what am I doing...

By virtue of the first-hand flow realization method, it has not encountered any jobs that cannot be copied since its development.

Who ever thought, it ran into it today.

I didn't copy this homework to understand!

"You can start to prepare, the factory side, the battle compartment can also start to stock up."

"Boss, is our company's new space suit prepared for the battle?"

"Well, the specific function, you will know after the announcement."

Qin Yu chose to keep it secret for the time being, not because he was worried that he would leak the secret, but because some details have yet to be finalized.

When the actual production, detailed data and functions will be announced.

But its biggest function will not change, you can experience the most realistic driving experience in the battle cabin.

At the same time, it can also be used as a body armor when driving a mecha, effectively protecting the safety and health of the mecha division.

Mecha battle, these four words are the dream of many men in their lives.

Just by hearing it, people ignite unconsciously.

I believe that after the news is announced, the sales of the battle compartment will be even more crazy than the monster equipment!

However, only a small number of people can really own this luxury toy this time.

does not have a body armor, it is just an ordinary holographic battle game.

Maybe you can develop super consciousness, but it is limited to this.

The mech is really on, and it is a completely different concept from the game body.

10 million, is it expensive?

Whether it is expensive or not, it still has to be judged by the market!

Knowing that the driver has picked up Lu Qing, Qin Yu also intends to drive off.

But as soon as he got downstairs at the company, he was stopped by a phone call.

The caller was Shen Dong. Last time he participated in the 'Limited Time Copy' event, because Qin Yu hadn't seen him before the two of them.

This time, he happened to be participating in a small team event in Waste City, so he wanted to call to see if he was there.

"Where are you, I will go over." Qin Yu decided to go and take a look.

I haven't seen him for a long time, he also wanted to ask about Shen Dong's home.

"I just arrived here, Brother Yu, please tell me a place, and I can go there."

Arranged to meet him in the executive lounge of W Hotel, and Qin Yu drove to the destination.

The weather has been surprisingly good recently, looking at it tomorrow is eleven, and there will be 26 or 7 degrees in the evening.

Tank tops and shorts full of streets make the air in the city even hotter.

The air conditioners in the major shops and malls have never stopped, otherwise it is surprisingly good!

What kind of evil consequences the continuation of the greenhouse effect will bring to mankind may not take long to experience firsthand.

The speed of Martian immigration should be accelerated. In addition, should the coverage of the monster port be increased?

Reducing travel, emissions, and population reduction will inevitably play a positive role in restoring the natural ecology.

This is a great achievement, right?

Looking at the system that hadn't responded for many days, Qin Yu sometimes felt that it was dead.

Only when you open the panel and look at the prompts above can you clearly realize its existence.

The upgrade experience of 100,000 faith points is still 0. Brother Yu wants to hold a big move and upgrade it all at once!

He is busy enough now, and the miracle is like a bloated monster.

The disadvantages of savage growth are gradually being exposed. It is time to pull down the brakes to cool down the high-speed miracle.

In addition, he also needs to cooperate with Bai Ze to solve a major issue.

Tomorrow's National Day gift, there will be explosive news announced.

This time, the whole world will probably fall into panic.

Bai Ze was worried that the other side would take reckless measures to deal with this huge change.

So, if you can create a little trouble for it, it wouldn't be better if it has no time to clone.

Qin Yu agreed to this request and promised to arrange it properly.

Mark is still following our lovely Miss Daisy, UU reading www. The 'Mr. God Stick' on the moon in uukanshu.com should also be sent back.

There has been no substantial progress in the research on him.

Insane remarks have no progress or practical significance other than disturbing people.

And his body tissue data shows that everything is normal.

Someone suggested to him before, let him return to society and see what happens.

At that time, they had not found 'silver ink,' which failed to effectively prevent and curb the spread of radiation.

Considering the possible consequences, Qin Yu rejected the application.

Now, the [Creator] who has been armed with the 'bathing' is online, and the mutant has once again become a weak reptile.

The worries of the future are relieved!

So, there is nothing to worry about, just follow the previous plan.

It happens that they need chaos. What kind of surprises will chaos-believers bring?

Qin Yu is looking forward to this and hopes that he can bring about different changes.

In thinking, Qin Yu turned his car and parked in the hotel parking space.

"Mr. Qin, you are welcome to visit W Hotel again, your room is ready.

In addition, there is a Mr. Shen in the executive lounge who said he is your friend and is waiting for you. "

"Yes, he is my friend, please lead the way!" followed the foreman to the executive lounge.

Bypassing the partition of the wine cabinet that was as high as the ceiling, Qin Yu opened his hands to Shen Dong who stood up to meet him.

Chapter 954: expect

"Brother Yu, I want to die."

hugged Qin Yu, Shen Dong expressed his thoughts from the bottom of his heart.

"It's been a long time." Qin Yu patted his back and laughed loudly.

The feelings between men are no less than women, but they are more sincere.

What girlfriend group, sister tao, celebrity group!

Yu brother is also very knowledgeable, there is right and wrong, intrigue, not to mention how bad it is.

Good sisters on the surface, turn around MMP~

Normal!

is the four fairies, and occasionally there are some small conflicts between each other.

It's just that they never put these contradictions on the table, let alone resolve them in front of Qin Yu.

Fortunately, the biggest contradiction is that Lazy Cat was the first to jump on the thief ship.
was successfully resolved!

Even if anyone has an opinion, what can he complain about in the face of a non-aggressive and docile little cute cat?

Long live cute things...

"Brother Yu, how is your second brother now? Have you met?"

After sitting down, Shen Dong first asked about Yan Er's current situation.

"It's been a long time, but occasionally there is a phone call, and he is also very busy over there."

Now is the time to go to work, not only Qin Yu is busy, but Yan Er and Shen Dong are also busy.

At this age, you should take bold steps, dare to fight, dash forward, and dash forward.

Don't waste your good time on indifferent things.

When you get growth, joy, harvest and touch on the way forward.

suddenly looked back, everything I wanted is already available!

"Hey, my second brother must be better than me now, and I must let him treat me next time at the window." Shen Dong said.

"Then you have to make an appointment in advance." Qin Yu said jokingly.

"Shit, if he dares to let me make an appointment, be careful. I tell my sister-in-law about his glorious history. I know a lot!"

Shen Dong winked and said that he had a lot of material in his hand.

"Brother Dong, have you forgotten, he also has yours." Qin Yu said amusedly.

"Haha, what can you drink, Brother Yu, please!" Shen Dong changed the topic in time.

"When I arrived at my site, I asked you to please, are you not using the landlord as a cadre?"

Qin Yu snapped his fingers, and the waiter brought the prepared wine.

"Mr. Qin, this is the 2007 Margaux that you specially selected, and it is now the best vintage to drink."

In 2007, due to frequent rainfall and insufficient light, molds were prone to occur.

Chateau Margaux conducts the most rigorous screening ever, and only 32% of the grapes are used to make authentic wines.

Fully absorb the light and abundant, pure and full-bodied Cabernet Sauvignon, Hagrid and Cabernet Franc together create this soft and full wine classic vintage.

waited for the waiter to pour the wine into the decanter and back off.

Qin Yu looked at Shen Dong, who had been introduced to Huyou, and said, "Actually, there is a taste in your mouth when you drink it."

For the red wine, Brother Yu really did his best.

But no matter how you taste it, he can't taste the so-called fullness.

full, what does it taste like?

He has only tasted it personally on certain women.

Red wine, forget it!

Hearing what he said, Shen Dong, who was still a little cautious before, smiled and said, "I knew I had asked you to be outside."

"It's not too late."

Qin Yu raised his arm and looked at the time, "People will be here soon, and I will move to the barbecue booth."

"Which sister-in-law did you have an appointment with?" Shen Dong asked uncertainly.

"Cough, don't talk nonsense, there is only one sister-in-law." Qin Yu emphasized in an eightfold voice.

"Yes, typo, typo!" Shen Dong grinned and teased.

Lingling~

The phone number is Lu Qing's number, and the person is downstairs in the hotel.

After half an hour, the Mercedes-Benz canopy stopped by the road in Xiaozhai.

Old rules, wear a mask and get out of the car.

But that's the case, it still caused a lot of people to look around.

Qin Yu is tall and tall, even in loose casual clothes, he can't hide his sturdy figure.

Sword eyebrows and star eyes, round frontal bones, you can know that he is a handsome little brother just by looking at the back.

Look at Lu Qing next to him, with long hair fluttering, and although his eyebrows are ordinary, he has beautiful and gentle almond eyes.

The moment he looked at each other, people were already drunk!

Tall figure, plump waist, Bai Zhi's long legs under denim shorts are straight as chopsticks.

stepping on the middle tube Martin boots, there is not only the docile and naughty little sister next door, but also a kind of free and easy atmosphere.

There is nothing more perfect S-curve than this.

When the two stood together, all they could think of was the golden boy and the jade girl.

"Hey, the rich will eventually get married, and those without money can only see it." Diao Si sighed and shook her head.

At this time, Shen Dong had already sneaked to the skewers shop in the alley.

He doesn't want to stay where he is, as a background wall for Brother Yu and his sister-in-law, to set off their excellence!

When he was in school, he was already shocked enough by his appearance.

Every time I go out with him, the girl only sees him, and all the others are reduced to a sad backdrop.

have graduated now, do you want to do it again?

Have fun!

"Brother, how many of you?" The waiter came to greet him.

"Three," Shen Dong said.

"Okay, brother, you..." The waiter pointed to the red wine in Shen Dong's hand, with an expression like seeing a monkey in a circus.

BBQ booth? wine?

These two are really a perfect match, do you need them to buy some goblet?

Oh, sorry, there are only disposable plastic cups here.

"Just give us a few cups." Shen Dong said with a smile.

For the ridicule of the waiter's eyes, when he goes to school, he will still feel embarrassed, or become angry and arguing with the other party.

Now, Shen Dong just smiled.

There are so many ignorant people in the world, why bother to live the way you should be in the eyes of others.

"Brother Yu, will you be there for tomorrow's launch?" After ordering the food, Shen Dong naturally mentioned tomorrow's launch gift.

This incident can be said to be the most concerned event in the country in the past six months.

Launched the Immigration on November, sending 500 immigrants to Mars, completing the first immigration mission in the true sense.

Last time, only 11 Blazers set off.

The personnel are highly professional and belong to a non-public state-level mission.

did not openly recruit from the society, and everyone just watched the excitement.

This time is different. There are not only people from Bai Ze, but also top talents from all walks of life.

Although they are not a task to join through open recruitment, everyone comes from all walks of life and is very representative!

"Yes, I will be there too." Qin Yu said with a smile.

"What is the whole process, let's talk about it." Shen Dong said curiously.

"The spacecraft took off from the launch pad and headed south to Demon Capital, passing through 23 cities to reach Shangdu, and finally lifted off the People's Square to break through the atmosphere and head to Mars."

"Fuck, it's exciting to listen to it." Shen Dong said with an exaggerated smile, patted his chest.

"At that time, the spacecraft will keep flying at a low altitude, and people can see the whole picture when they look up, and they can also wave goodbye to the immigrants in the ship."

Looking at Qin Yu's smiling face, Shen Dong gave a thumbs up and pinkie, 666!

"Husband, can I go and see it?" Lu Qing asked excitedly.

"Of course, you can either be on the observation deck or watch the spacecraft take off directly below." Qin Yu nodded.

"Brother Yu, count me, count me."

Shen Dong can't wait to watch the spacecraft lift off up close, I believe the scene will be unforgettable for a lifetime.

"Count you." Qin Yu nodded.

"By the way, what activities are you here for this time?" Qin Yu still doesn't know the real purpose of Shen Dong's trip.

"Don't you know?" Shen Dong looked at him unexpectedly.

"Should I know?" Qin Yu was surprised.

It seems that he is indeed unclear, Shen Dong only explained: "That's right, such a small matter as the closed beta will definitely not bother you, the big boss."

Shen Dong is an internal tester this time, and he was invited to the Network Department to participate in the test of the new game.

Shen Dong looked around, and involuntarily asked in a low voice: "Brother Yu, what is your company's new game? Why is there no news outside?"

It turned out to be this. Qin Yu thought Tang Guo would need some time. Is the map ready?

"A battle game, the specific details... are kept secret." Qin Yu smiled mysteriously.

"Okay, business secrets!" Shen Dong rolled his eyes, no longer entangled in the content of the game.

However, it turned out to be a battle game, and Shen Dong had inexplicable expectations in his heart.

The miracle has never disappointed players so far.

Uh!

Although they only have one version of "Ghost", from content to technology, it can be said that they beat all the game manufacturers on the market.

How could it be disappointing to be able to create the miracle network of "The Monster"?

"Does everyone think so?" Qin Yu asked thoughtfully.

"Of course, the players invited this time think so." Shen Dong nodded affirmatively.

Lu Qing was originally very excited, but after listening to him, he looked at Qin Yu with some worry.

If Miracle Network disappoints the players this time, will Qin Yu be hit by it?

Flowers do not have a hundred days of red, and people do not have a thousand days of good.

The good things in this world cannot be taken up by one person, UU read www.uukanshu.com. Although Lu Qing hopes that this is the case.

But, what if?

"What's the matter?" Perceiving Lu Qing's concern, Qin Yu stroked her hair and smiled.

"It's okay." Lu Qing shook her head and chuckled. She didn't want her emotions to affect Qin Yu.

"Are you worried about this game release?" Qin Yu said confidently: "I have confidence in this new game."

"What's more, it's not just a game as simple as it is, it will change the world!"

"Change the world?" Shen Dong was even more curious, like being caught by a cat.

Listening to Qin Yu's meaning, this game is more than that simple, is it like the last time 'Limited Time Dungeon'?

another world?

Although the last 'limited time copy,' they didn't see any creatures.

But that kind of feeling is just like "Golden Devil", so real!

Actually, this question is buried in everyone's hearts, and everyone wants to know the correct answer.

I heard it personally from Qin Yu, the founder of Miracle.

It's just that, even if Shen Dong thinks that their relationship is very close, he still doesn't know whether to ask.

How should speak?

Is it possible to ask him directly, the monster is a new world, and everything there is real, right?

involves a brand new real world, even Shen Dong understands the benefits and risks involved.

How stupid

"Brother Yu, I want to die."

hugged Qin Yu, Shen Dong expressed his thoughts from the bottom of his heart.

"It's been a long time." Qin Yu patted his back and laughed loudly.

The feelings between men are no less than women, but they are more sincere.

Chapter 955: Daxia children

[« PrevNext »](#) [Table of Contents](#)

"Let's drink less today, and there will be major events tomorrow."

Shen Dong poured half a cup for everyone, and said to a toast: "First I wish a smooth takeoff."

"Everything went well." Lu Qing echoed.

"Good, I wish all the best."

Qin Yu raised his glass to make his mouth form a circle, and Gu Dong poured a full glass of red wine into his throat.

Niu chews peony, that's probably what it means!

Looking at his empty cup, Shen Dong smiled bitterly and said: "Brother Yu, I said drink slowly."

"Thirst!" Qin Yu poured himself another glass.

"Sister-in-law, don't you care?" Shen Dong looked at Lu Qing.

"Happy to see you, let him drink!" Lu Qing sent the meat skewers to Qin Yu's mouth thoughtfully.

After taking a bite, Lu Qing wiped the seasoning from the corner of his mouth with a tissue.

Shen Dong smiled bitterly and shook his head, and said in his heart, "Take it, take it!"

"By the way, don't hurry after watching the ceremony tomorrow, I'll have someone give you a gift."

Qin Yu suddenly thought that Shen Dong is now a professional player. Than us

In the future, I will definitely continue to develop in the game face to face, maybe I can also become a formal mecha division.

gave him a set of body armor (all-round space suit) as a gift, it couldn't be more appropriate!

"Okay, I'm not polite with you." Shen Dong said stably, but secretly wrote down in his heart.

Brother Yu's favors are definitely not over for him, but after all, he should do something.

"Is the family affair resolved?" Qin Yu asked after drinking three rounds.

Shen Dong smiled, seeing his relaxed attitude know that there must be good news!

"The other party hit someone, and the economic dispute became a criminal case. The yamen moved really well and the person was arrested.

The money only recovered part of it, but at least he sighed. "

Speaking of the follow-up development of this matter, Shen Dong was also dumbfounded.

Dad Shen was beaten to the hospital, but he was almost saved.

may have caught someone, thanks to the seriousness of the fight.

Shen Dong really didn't know if he should be happy or sad when he mentioned this.

"How is uncle now?" Qin Yu felt that money is secondary, mainly because people's thinking has to change.

Shen Dong is not short of money now. The last competition held by the company alone allowed him to win 5 million.

There is a girlfriend who is staring at the courier order, and it doesn't make a lot of money. There are one million dollars a year.

Now I am buying a house in Hudu, which is not a difficult task.

Successful career, stable relationship, as long as you go forward, life will only get better and better.

I'm afraid that Dad Shen can't turn his mind until now.

fooled around without telling the family, and finally tossed something up and asked the family to wipe their ass.

Once a person is brainwashed, it does not mean that it can be changed by changing.

Or, liars won't succeed again and again!

"To be honest, my mother confiscated his card and cell phone, and warned him to get divorced if he tried again.

also said hello to relatives and friends at home, whoever wants to lend him money is considered for nothing, no one will return it! "

It was very unpleasant to make trouble at the time. Shen's mother didn't save any face for her wife.

He even replaced his mobile phone with an elderly phone, and he didn't even think about installing a dime on his body.

Take the birds, grow flowers, play chess, watch theaters.

What can I do for you? Shen's mother has been careful for a lifetime. In the past, people who bought bean sprouts for two dollars would have to make a price.

just gritted his teeth and bought him a bird for 8,000 yuan, just begging him to stop tossing about it.

This time it is because my son has the ability, and he has handed in his help.

Otherwise, their home will be over in one go.

It doesn't matter if I am old, what about my son?

How can you be worthy of your son, worthy of your hard work all your life?

"Brother Yu..."

Shen Dong looked solemnly, just about to ask Qin Yu to raise his hand to stop him.

"Know what you want to say, drink!" Qin Yu held up the cup.

"Okay, drink!" Shen Dong laughed at himself, raised his head and drank the wine.

Don't say anything, all this friendship is in the wine.

Drunk, Shen Dong screamed, "Brother Yu, the luckiest thing in my life is to know you and my second brother."

"Brother Yu, I'm sorry for you."

"Brother Yu, I love you..."

"Let me tell you, Brother Yu can bend people!"

Hearing what he said was getting more and more outrageous, Qin Yu really wanted to knock him out.

Looking at Lu Qing again, turning his head to the other side along the way, his shoulders shrugged and twitched.

When he arrived at the hotel and threw him on the bed, Qin Yu closed the door and held Lu Qing in his arms with his backhand.

"Ah, husband, I was wrong, haha..." Lu Qing screamed for mercy, still unable to stop laughing.

Although I have seen a lot of men confessing to men abroad, I didn't notice anything wrong. can be replaced by his own man as the object of the confession, and his expression of unlovable life.

"Ha, ha ha ha... ah, wrong."

"No, ah...um..."

Click, the door is closed, which means that the war has begun.

The tragic process is like a straw boat borrowing an arrow!

The next day, Lu Qing, who was battered and battered, was obviously unable to move, "You will sleep again, and I will let the driver pick you up when the time comes."

"Yeah." Lu Qing answered vaguely, turned around and hugged the quilt to sleep again.

Amusedly kissed her on the forehead, and Qin Yu arrived at the company early.

Today is a big day, for Miracle Company, for Daxia, and for the whole world.

The eyes of everyone in the world are focused on the TV.

even some barrens, turn on the radio!

When Qin Yu arrived, the control room was already full of people.

The staff are already in place and are doing the final handover inspection.

In front of the launch pad outside, the ground crew left in an orderly manner!

In the observation platform behind the control room, Lao Bai's figure reappeared, but this time he was a kind old man with white hair and crane face.

It seemed to Qin Yu that the old man smiled and waved his hand to say hello to him.

smiled, Qin Yu suppressed his surprise.

Putting all their minds on the work in front of them, the immigrants began to board the ship.

is so vigorous, naturally, the media's participation is indispensable!

The court sent an ace team, and the host Sisi stepped forward to interview the immigrants: "Hello, how do you feel about this trip to Mars?"

"Excited, look at my hands, you can't stop shaking." The man raised his hands and smiled brightly.

Tensed with hope, full of hope for the future!

"Okay, I wish you a smooth journey." Sisi turned to the back of the team and found a young man again.

"Hello, excuse you."

"Hello, Miss Sisi, I am your fan."

"Ah, really, haha..." He smiled triumphantly at the camera, and Sisi asked how he felt.

"Hope, I think it is a new hope, a new environment, a new challenge, a new opportunity and life."

"So, don't you worry that you will never have a chance to come back?"

"Of course I am worried, but life is an adventure. If everything is done in order, what's the point?"

"Yes, life is an adventure. I wish you a smooth journey."

"Thank you, one more thing, you are more beautiful than on TV."

"Haha, thank you!" Continue to look for the next interviewer.

In front of the TV, young and old women laughed at their aunts, watching the funny responses in the screen.

Since the court stage lowered his body, he has become more and more grounded.

The interview has also become lively and interesting, and it is no longer as rigid as before, making people look drowsy.

Especially with the addition of several beautiful hosts, the young blood attracts more young audiences.

The imperial court stage, which is somber, rejuvenates.

"It's almost time, let the reporters take off." Looking at the countdown, Zhang Wei said calmly.

"Okay, Zhang Gong." Here we inform the reporter to end the interview.

The speed of boarding the ship also began to increase, and the voice of the crew was also heard from the cockpit of the Suiman.

"The Suiren is ready, waiting for takeoff instructions."

"Vulcan received."

Immigration is also like the original Chang'e, without any contact instructions.

In fact, after the Chang'e landed on Mars, some people raised questions.

Why hasn't the list of crew members been announced? Who is the pilot among the 11 Trailblazers?

But this voice was quietly covered in great joy.

The Trail Blazers themselves don't know who the so-called crew is.

From beginning to end, they never saw the cockpit door open.

Since landing, there is no sign of life in the cockpit.

All of this, because of the silent command in advance, made the Blazers hide their doubts in their hearts.

Observation station, Bai Ze is also explaining to the elder beside him: "Lao Zhou, the posture of the Immigration is fully automated.

All operations are completed by artificial intelligence. The Kirin of the Miracle Group can be said to far exceed the world's leading level. "

"Well, I've heard this many times. I don't know if I have a chance to see it this time."

"I'll make arrangements, Qin Dong is still very good at talking."

Zhou Lao looked sideways at Bai Ze, smiling rather than smiling: "You are accustomed to being ripped off, is he easy to talk?"

White lowered his head and smiled awkwardly, and defended: "In comparison, it's quite easy to talk.

At such a young age, he is a genius in such a big industry, and some arrogance is inevitable. "

"That's true, I want to treat him at his age, it's not terrible!" Zhou Lao agreed with these words.

Young man, UU reading www.uukānshu.com is full of blood, a bit of temper and personality, it is understandable!

Besides, compared to those young people who are proud of their talents.

The temper of this little guy can't be described as docile.

is that there are more women around, but because of this, it makes him appear very real.

People are not sages, everyone will have some small problems.

It is common to make mistakes, even when he makes mistakes.

As long as it is not a principled error, it is not important to know what is right and wrong.

"You're right." Bai Ze nodded, pointed to the front and said: "It's about to take off. Let's take a look below?"

The observatory can only see the big screen and the data, and I have to go down if I want to see the spacecraft.

"Go." Zhou Lao got up and walked out steadily.

At this time, Lu Qing, who arrived late, was also standing on the steps in front of the building, looking at the two spaceships on the front platform.

The bonfire representing civilization on both sides of the 燧人 makes people feel inexplicably excited.

Just looking at it, there is a sense of heavy mission that travels through time and space and is passed down from generation to generation.

is proud of the prosperity and strength of the motherland again, glory!

Today, no matter where my Daxia children are, they can proudly say: "I am Daxia."

Chapter 956: The Great Ship Crisis

[« PrevNext »](#) [Table of Contents](#)

Today's take-off procedure is different from before. The Sui Ren took off first, followed by the immigration.

When the two spaceships fired up one after the other, they climbed to the specified height under all eyes.

, at a relatively slow speed, the tour started southward.

Thunderous applause sounded in every corner of the world, sending blessings and greetings to the immigrants on the ship!

The four armed helicopters climbed and followed, and two active fighter jets escorted them to the left and right.

Although there is no need to do this at all, today's tour shows are not just for sending immigrants into the air.

Demonstrate national strength, condense national beliefs, and enhance the sense of honor and pride.

Give citizens inner security and enhance national happiness.

This is the purpose of this tour.

Otherwise, why do you need to make a detour and pass over 23 cities.

"OK!"

Witnessing the takeoff of the two spacecraft with his own eyes, Zhou Lao nodded with infinite emotion.

"Zhou Lao, a group of immigrants will be sent to Mars every six months from now on. When the Hudu training center is completed, the number will exceed 10,000.

In addition, the other four spaceships we ordered will also be delivered gradually in half a year! "

燧人 is just the first of the five spaceships Bai Ze ordered.

The remaining four ships are Renhuang, Yandi, Fuxi and Xuanyuan.

From the way they are named, it can be seen how much the above attaches importance to these spaceships.

At the same time, they are also studying their own spacecraft.

The progress in "The Monster" is slow, but it is always in progress.

Perhaps tomorrow, the Iron Eagle Alliance will build its own warship and become the second space force to break away from gravity.

formally joined the Star Wars with the devil, sharing part of the pressure for the Church of Miracle Science.

The fleet that now belongs to the church has an unpredictable number of deaths every day!

The battle between the two sides in the void, after the death of the two Lord-level demons, fell into a stalemate vacuum period.

Now, both parties are doing their best to control more planets.

The Church of Miracle Science needs a huge population to maintain the war, the devil needs...

They have nothing to need. Even if there is no church, pollution and conquest, death and fear are still the main theme of life.

Now, they just have one more reason to drive mankind to extinction.

Seeing that the plan is unfolding smoothly, the signal tracking ensures the spacecraft's trajectory and confirms the arrival time with the Shangdu Satellite Center.

All aspects of the work are methodical, but Xu Meixin suddenly rushed to Qin Yu's side, whispering something in his ear.

After that, everyone saw Qin Yu's expression change and quickly left the control room.

"What happened?" Everyone looked at Zhang Wei.

"It all depends on what I am doing. Are you okay? The mission continues." Zhang Wei's composure restored the scene to normal order again.

Everyone devotes themselves to work again, but there is a hint of curiosity in their hearts.

Zhang Wei is no exception, "What's wrong with this???"

"I'll give Shen Dong an all-around space suit later, and help me to tell Bai Ze, there is an emergency, please forgive him!"

On the apron on the top floor of the building, Qin Yu hurriedly explained the follow-up matters.

"Boss, Miss Lu is still waiting for you downstairs." Xu Meixin reminded him not to forget the lady.
Snapped!

patted his forehead, Qin Yu took out the phone and dialed Lu Qing's number: "Qingqing, you are downstairs, I know..."

I have an emergency here, I have to rush to deal with it... West Coast, yes, the situation is very urgent...

Rest assured, I will take care of myself, yes, I must go there myself...wait for my return. "

Soothed Lu Qing, there was an abnormal air current in the air, and the Xihe number suddenly appeared on the empty tarmac.

"Let's go, let Kirin contact me for anything." Close the hatch, Qin Yu fastened the seat belt.

waved his hand to the door, and the invisible device activated again.

Instinctively closing his eyes, Qin Yu remembered the last time he took Song Yuqiao to Mars.

"Try once, try again."

whispered to cheer for himself, Qin Yu opened his eyes vigorously and ordered to take off.

My eyes looked out through the window, higher and higher, higher and higher...

Weier~

"I have arrived at my destination."

There was a mechanical sound in his ear, Qin Yu opened his eyes in a daze, and the moon base arrived.

shook his head, Qin Yu only remembered that Xi He was flying higher and higher.

I can't remember anything when my eyes go dark.

"It must be too tired recently!"

Brother Yu squeezed his slightly 'stiff' shoulders and walked towards the gate of the base.

The shoulders reinforced by Nanoworms were accidentally mounted on the door frame.

哐当~

A small piece was smashed by the door.

Brother Yu looked around with embarrassment and found that there was no one, so he swept the debris aside with his feet.

Although he knew that no one would exist, he would be inexplicably guilty.

"Kirin, the gate of the base is broken."

"I saw it." Qilin.

"You should let the creator check frequently, what should you do if there are humans?" Qin Yu solemnly accused.

"Let them remember that the person who killed him was called Qin Yu?" Qilin.

"..."

Since it has become more and more intelligent, this mouth has become unpleasant.

A good AI intelligence, how come the mouth opens up?

"Is the Eagle ready?" Qin Yu walked into the passage, his clothes torn piece by piece.

Soon, there is only a pair of boxers left on him.

The golden lines resembling a resurrection statue begin to change color under the light of daylight.

A layer of armor like scales wraps his whole body, and finally wraps his body completely in the nanosuit.

"Everything is ready, do you really want to go in person?" Qilin.

"Yes, I don't want to miss anything." As he spoke, Qin Yu had already stepped on the elevator platform.

looked up at the eagle falcon suspended in the sky, with a bright smile on his face hidden under the nano layer.

The other side of the ocean, the west coast.

The shining star gate that appeared out of thin air on the sea caused the entire city to panic.

During this period, people have experienced more disasters than they have in their lives combined.

Various bizarre and bizarre incidents occur frequently. Abnormalities and distortions rages in the territory, and countless people die every day due to various reasons.

The state system is half-paralyzed, and the whole world seems to have isolated the bald eagle.

Even Messica, who was once regarded as a threat, now sees the bald eagle as a scourge.

A large number of white people flocked to Mexica, seeking a touch of psychological comfort.

The church was toppled, the statue was overturned, and more and more people fell into despair, enjoying the last indulgence of life.

Now, another weird light gate appeared out of thin air.

God, have you really abandoned your believers?

No one noticed, just by the shoreline reef group, a shaggy man was jumping back and forth like a convulsive wind.

opened his hands, his head swayed like a motor, and his mouth was yelling.

The feet are beating back and forth alternately, but the body is grotesquely in a standard arc.

As the mysterious man moves faster and faster, the light gate on the sea becomes bigger and bigger.

Its diameter gradually exceeds 5 meters, and people can see the twisted and weird rocks inside through the front of the light gate.

Deep in my heart, the strong anxiety reminds everyone that this is not a good thing.

Under the sea, the wandering fish became manic.

Teeth burst from the lips of the fish, the fins turned into sharp blades, and the body surface bulged terrible tumors.

Bang~

The tumor exploded, and the yellow pus merged into the sea water along with the green gas, and more marine life was distorted under the pollution.

Buzzing!

The intense shock swept like an ultrasound, and countless people covered their ears in pain and fell to the ground.

The strong shaking is like inserting a blender into the brain and pressing a switch.

Buzzingly smashed the brain into a ball of minced meat.

The thick and long steel spikes passed through the light gate and appeared before the eyes of the world, and the huge steel-wrapped horn-shaped bow came out.

As the buzzing became more and more intense, it seemed that the huge hull that had turned the aircraft carrier upside down came through the light gate.

"Oumaika, aliens, aliens have invaded."

"God, we're over, the bald eagle is over."

"Hi, alien, I am your loyal servant."

"God is God's battleship. God has come to save us. Kneel down and pray to God."

"Gosh, it's so spectacular."

When the hull completely passed through the light gate and truly entered the human world, they could see this magnificent ship 1,500 meters long.

There are six huge guns on both sides of the hull, and under the front-end collision angle is a thick barrel, exuding a threat of eerie fear.

The top deck is also full of turrets, and the bottom and stern part of the ship has an attack device like an energy weapon.

This is an offensive space ship born for war.

huh~

The steel plates on both sides rose, and the cannon extended its barrel to prepare for battle.

The giant artillery on the top deck has also entered an automatic defense state, and the device at the bottom and stern of the ship is condensed with blue light waves.

At this moment, the sky suddenly detonated, and people only saw three yellow lights flashing away, and the beach seemed to be bombed.

Three potholes appeared on the ground, and the quicksand was pouring inward.

Immediately after that, the airborne layer that appeared in the Big Apple City last time popped out of the sand layer, and the hatch popped open.

"It's Robocop."

"It is the alien robots who bought Karma."

"What are they doing here, is it for that door?"

"Damn, why does this all happen to me, god~"

"Look, there is a difference this time, is that their chief?"

Standing on the beach watching this huge ship suddenly appeared, Qin Yu's eyes were full of enthusiasm.

"Kirin, be light, I will keep it for research." Qin Yu said to himself.

Kirin's reply came from her ear: "Target locked, angle calibration..."

"With the abolition of combat capability, the estimated minimum loss is 39.2%. Do you attack?"

Qin Yu hesitated, considering whether he rushed to the boat and capsized...

Regardless of whether it was a human or a monster, he snatched the ship over to study it.

"Warning, the opponent has entered a state of battle, and found that high-concentration energy has gathered, and the opponent is about to launch an attack." Kirin.

"Confirm the attack." Qin Yu said in a deep voice.

Chapter 957: Stargate visitor

silently, an empty spotlight fell from the sky.

split into dozens of smaller red light beams at the moment of penetrating the clouds and descending, hitting the unknown giant ship with precision like a surgical operation.

"This is the art of explosion!" Qin Yu opened his hands in front of the beach and looked up at the sun.

The soul of Nakaji, burn!

rumbling.

Fierce fire lights one after another on the hull, waiting until all is over.

The weapons carried on the surface of the giant ship turned into burning flames and were all destroyed.

Even the energy device at the bottom and stern of the ship was cut off the energy-gathering ring by a laser that avoided the power cabin and penetrated the entire giant ship.

The unknown giant ship full of threats, at this moment is like a hedgehog that has been plucked!

But this did not stop the attack of the giant ship, and the giant ship burning with blazing flames started again.

The huge hull full of deterrence swooped down suddenly, and the metallic gold slammed into the beach.

Even if the weapon system is lost, the giant ship itself is the most terrifying weapon.

Looking at the giant ship coming straight towards him, Yu Ge, who was poisoned in the second stage, was a little dumbfounded.

NM, coach, it fouls!

How terrible is the power carried by the 1.5-kilometer-long ship hull and the horns of gold collision with dozens of stories high?

Before getting close to the blowing wind, he ploughed the entire beach, as if a terrible tornado of sand appeared in front of him.

"Fuck." Brother Yu leaped and ran away.

Kirin's urgent warnings also flickered frequently in his mind, but it would be too late to say anything.

Fortunately, this is the west coast of the ocean, and it doesn't hurt to crash anything.

Boom!

There was a loud noise like the sky and the earth cracking, and there was a violent shaking on the ground.

In the city behind, the sound of collapse is raging!

The screams of the crowd were suppressed by the violent wind and huge waves, and the sight of an apocalyptic disaster film came into view.

Crawling like a mountain on the beach, halfway into the sea on the deck of a huge ship, tiny ants swarmed out.

The line of sight switched to a satellite angle, and Qin Yu saw the densely packed power mechas on the deck.

Fission-class power armor?

No, although they are similar, there are still differences.

The fission class is more deterrent than the power armor that appears on the deck, and the shoulder armor and surface armor are heavier.

The weapons carried by are also large-caliber, and most of the power armor on the deck is equipped with melee weapons.

It seems that they are a bit like the Orbital Marines of the Church of Marvel Science.

It's just that the current state is a bit tragic!

After zooming in, Qin Yu saw that more than half of the power armor was incomplete.

'S body was covered with broken marks, and even a few of the breastplates were missing, and the driver was just exposed to the air.

At the same time, this also made Qin Yu clearly see that the man who controls the power armor in the cab is human.

...Like a little giant, a human with strong muscles like rocks.

"Kirin, I think I need more support."

At this time, the number of power armors appearing on the screen has reached hundreds. It is impossible to do it with just one, plus two [Creators].

Besides, these are precious collectibles, and Brother Yu doesn't want to take them all down.

"The airborne warehouse is in the process of launching... 104 has been launched."

"Enough." He lifted his head and looked up.

The shocking meteor shower pierced the neat sky, as if someone had left many shallow marks on the ink with a pen.

boom.

It was another turmoil, and the golden sandy beach where the bald eagle was proud became riddled with holes.

The earth cracked and the city fell into flames and smoke.

A Jiang Mo pestle accidentally slammed into the main natural gas pipeline. Amid the violent explosion sound, the Jiang Mo pestle that had just landed flew out.

咻~

The vector engine embedded outside the largest diameter starts, so that the out-of-control magic pestle returns to a stable state, and it is inserted into the ground accurately again.

Wow!

In the joyful sound of gear friction, the hatches of hundreds of Jiang Mochu bounced open.

A big battle is imminent, and it is about to break out.

The secret agency of the Bald Eagle came from a distance, standing in place with big eyes and small eyes, and no one wanted to be the first to go up and die.

"What should we do?" The face of the senior CIA agent was as ugly as if someone was forcibly fed shit.

He has had enough headaches recently, and the top of the organization was bloodbathed by Daisy.

Oh~

It's time to call her a bug girl, the former Daisy is dead.

It's not that they haven't experienced this kind of thing, and they immediately have senior agents on the top to continue to maintain the operation of the organization.

Then, the person on top died in the safe room the next day.

No matter who is in charge, and what kind of secret safe house she hides in, even the safe house that has never been activated will be found by her as soon as possible.

Death is more cruel than one! !

Until now, no one dared to replace the post of interim chief. This is a promotion and salary increase to the top, it is basically an invitation from the **** of death.

Without the chief, it is tantamount to cutting off the connection between the organization and the White House. As a hawk dog, the CIA is like a dog without minions.

The organization's authority and the power that can be mobilized have fallen to the lowest level in history.

Now, there is another confrontation between the alien giant ship and the moon alien.

Seeing the war is about to start, they don't know what they can do.

What's more **** is that the battlefield is on my beach, Ouma's FK
Shet...

One hundred [Creators] formed a mechanical army standing behind Qin Yu, waiting silently for instructions.

In Qin Yu's 'line of sight', the power armors standing scattered on the deck retreated one after another, giving way to a straight passage.

, wearing a huge yellow armored power armor, walked towards the bow step by step.

"Human, I am the head of Xingyue, is this a premeditated ambush?" A hoarse roar came.

The anger contained in it is chilling.

Hundreds of years of escape, Xingyue received unusual guidance signals from subspace.

They thought it was the guidance of their comrades-in-arms, they jumped into the subspace with joy and came to this brand new world.

I didn't think about it, but when I came out, I was horribly attacked.

Damn bastard, who is the navigator, he will use his sword to cut off the head of this running dog.

The leaders of the organization standing outside the beach took a few steps back to prevent themselves from being caught by the other side.

The anger in that voice clearly represents "Stand up, I will kill you with a sword."

Look at the giant sword hanging behind him. It is at least four meters long and wider than the long bench.

One sword went down, and even the corpse could not be found intact.

嗖!

A figure leaped up, and the mechanical legion took off and rushed to the Xingyue deck together.

fell in front of the leader, Qin Yu, wearing a nano suit, looked like an immature child in front of the opponent's huge mecha body.

"It was you who broke into my world suddenly." Qin Yu said in a cold voice.

"Your world?" The group leader let out a deafening laugh: "You mean your world?"

"Is there a problem?" Qin Yu's voice contained anger.

The arrogance and disdain of the other party made Yu brother very upset.

Don't think you're too big to be awesome, believe it or not, give you a punch and get on the ground.

Brother Yu just thought about it, but the other party has already acted.

The fast-moving backhand grabbed the giant sword and cut it off with a heavy blow. "The weak, you are not qualified to talk to me."

boom.

The ship's body trembled suddenly under the tremendous force, and then looked at the two people in front, the wide giant sword hanging in the air.

A metal palm that emits dark light drags the blade with one hand.

This scene shocked the group members behind the group leader. The eyes that looked at Qin Yu were full of incredible questions and appreciation from the heart.

Only the strong can be respected!

Feeling the power coming from the palm of his hand, the head laughed boldly again: "Haha, I, Niken Thadder acknowledges your strength."

"Really?" Watching the opponent raise the great sword, reinsert it into the card slot on the back.

Qin Yu moved his wrist and raised his head in vain, "Is it time to change me now?"

Before 's words fell, his figure disappeared in place.

Captain Niken only felt that there was a flower in front of his eyes, and the speed of the opponent escaped his dynamic gaze capture.

was shocked, relying on thousands of years of fighting instinct, Niken crossed his arms at the last moment to block the attacking fists.

Boom!

A metal moan came after the loud noise, and Captain Niken felt an unmatched force hit him.

The powerful impact made Captain Kenny, together with the 4 tons of power armor, quickly retreat.

Both feet plowed two clear scratches on the ground deck, and new injuries were added to the deck full of battle marks.

"Leader." The group members beside Kenny rushed forward, glaring at Qin Yu.

哐!

The mechanical corps stepped forward, neatly and uniformly, and the momentum was like a dragon.

"Haha, happy, I haven't fought for a long time, my old buddy is rusty." Captain Kenny's body leaned forward and stood upright again.

shook the 'creaking' mechanical arm, and the tone was full of decline.

"Now, can we talk to another place?" Qin Yu reached out to Kenny.

He was full of curiosity about the battleship that appeared through the star gate, as well as Kenny and his crew.

Where do they come from and what have they experienced?

Regardless of the truth, this warship must have experienced terrible battles.

I hadn't noticed that I was far away before, and I was standing on the deck at the moment, from the repair marks that spread all over every inch.

only really felt what is tragic! !

"Of course. UU reading www.uukanshu.com"

The heavy power helmet swayed up and down, and Kenny continued: "Before this, can I see the navigator?"

"You will see him." Qin Yu laughed dumbly.

Who would have thought that Andrew, who was put back on earth, would bring him such a big surprise.

Although it is not yet clear how he did it, he did open the star gate and guided the Xingyue to the earth.

This guy is a baby!

Hiding behind the reef, Andrew, who has a panoramic view of everything, is about to drive away.

He thought that the people he called would obey his orders, but now it seems that he is just a 'coordinate.'

The opponent is a terrifying creature with independent thinking, if the giant sword is shot on himself.

There will only be a puddle of blood in the air, nothing else will be left.

There is also a mechanical army that fell from the sky, "Damn monster, I really hope you all die together."

slipped away, waiting for him to figure out his abilities.

With the help of the power of chaos, it will surely be able to dominate the human world, hahaha...

Squeak!

There was a mechanical sound from behind, making Andrew, who had fallen into conjecture, froze in place like a sculpture.

Then, an irresistible force pinched his neck.

carried it over the reef like a chicken, and walked straight towards the anchored giant ship.

Chapter 958: Clash of civilizations

After a simple and rude communication between a man and a man, Niken, the weeping man, agreed to leave with Qin Yu.

Just, Niken looked at the console behind him with a tangled expression.

He wasn't sure if Xingyue could be activated again, even if it could, they couldn't get rid of gravity.

That will tear up the worn-out battleship! ! !

"Captain, the power of Xingyue has not been damaged. According to calculations, the outer armor of the warship can be lower than the gravity of this planet."

Hearing an answer that was different from what he had imagined, Niken's expression was wonderful.

How could it be possible? Under normal circumstances, the current Xingyue number should be unable to start because of various coincidences.

Even if it can be started, it will inevitably face various problems.

If the planet's gravity is too strong, the armor is damaged, the energy transmission system fails...

So, are they lucky this time?

"Can you go now?"

Qin Yu didn't know Niken's shock, he just wanted to bring Xingyue back to his territory as soon as possible.

then unload it to eight pieces...

ahem, take it apart and repair it!

As a five-good young man in the new century, how could Brother Yu dismantle other people's boats at will.

The Bald Eagle Operation Command Center learned that the abruptly appeared spacecraft had reached an agreement with the moon aliens.

The opponent's spacecraft started again, preparing to escape the gravity of the earth.

Destination, are there other options besides the moon?

"What are we going to do, do we want to intercept?" In the combat command center, a group of big men with medals on their chests gathered together.

The big people who pointed the country in the past are looking at each other like a goose at the moment.

Do you want to intercept?

Well, this question asks... Is it too special? It's not human.

interception, the most you get is a broken spaceship.

Then what?

Who can hold the space-based weapons in the sky, one split into dozens of laser beams, precisely disarming all the spacecraft.

Who can ensure that it cannot be split into dozens or hundreds, and the entire North American defense system will be completely paralyzed in an instant.

Who can stop the anger of those 'alien'?

"Ah, for such an important decision, I think I should first ask the president for advice." Someone suggested.

"Yes, the third successor passed away unfortunately, and the fourth, fifth...13th, fourteenth successors were either seriously ill or disappeared.

What we need to do at present is to select leaders who can take on important responsibilities as soon as possible, and counterattack under the leadership of the president! "

"It's so decided, the meeting is adjourned." A high-level military meeting was over.

Xingyue, which was stranded on the beach on the west coast, slowly lifted into the sky under countless victims or hatred or complicated gazes.

When Xingyue turned into a black spot, it completely disappeared from sight.

The magic pestle that covered the sandy beach bounced up, spraying fire light into the space, leaving only the holes 'gugu' everywhere and splashing water.

came to the back of the moon together with Xingyue, and the battleship landed at a predetermined position under the command of Qilin.

Then, tens of thousands of [creators] walked out of the base and flocked to Xingyue like marching ants.

"Captain Kenny, please rest in the base. My mechanical legion will try its best to restore the Xingyue to the most perfect state."

Kenny's expression was a bit tangled, he didn't want to give his warship to others.

Actually, the current Xingyue number is in a semi-scrapped state.

came to this desolate planet out of gravity, already infinitely close to its limit state.

If you make another voyage, Xingyue may disintegrate at any time.

And there was not enough manpower and materials on the ship to repair the warship, which left Kenny no choice.

"Then, Mr. Qin is troublesome, and I would like to pay tribute to you again." Kenny hit his chest with his right fist and nodded.

"I will leave the mechanics on board, and cooperate with the people who guide you to repair the hull."

It would definitely not work to hand over the entire ship to Qin Yu.

But let his people cooperate with the repair, use the materials provided by the opponent, and then leave most of the members of the battle group on the ship.

I believe that this is enough to ensure the safety of the warship.

"Let's go have a drink."

Looking at Kenny who was about five meters tall, Qin Yu pointed to the base door below: "I think you need to remove the armor."

instructed Kirin to bring an oxygen system, and Qin Yu himself also lifted the nano camouflage on the surface.

Seeing him in an anaerobic environment like this, Kenny's eyes flashed with surprise.

Although he and his soldiers can also survive in a vacuum.

But only for a short time, it is impossible to express such ease to Qin Yu.

pushed aside the helmet sent by [Creator], Kenny jumped out of the Star Moon, just like him without equipment.

strode towards the main entrance of the base, and bent over to enter it upon arrival.

Kenny, who took off the power armor, still has about four meters, his muscles are like a basketball under the skin.

The majestic shoulders are like two pieces of steel armor, the sturdy red neck, the bold face and the plate are full of fierce fortitude.

When he came to the canteen, Qin Yu opened the unopened box and took out two bottles of vodka from it.

"Here you are." He threw a bottle to Kenny, and the other party grabbed it.
boom.

The glass ball was mixed with liquid flowing between his fingers, and Kenny let go of his hand with a slightly awkward look in his eyes.

Wow!

The glass **** fell on the ground, and Kenny scratched his head like a silly stupid man: "It's too fragile, sorry!"

drew out a bottle of vodka again, and the [creator] who came to clean up the garbage, Qin Yu sat on the bench.

put two bottles of wine on the table, opened one of them and pushed it in front of him: "You should learn what gentleness is."

Kenny carefully pinched the wine bottle with his fingers, and after making sure that it would not fall off or shatter, he plugged the mouth of the bottle into the mouth and swallowed 'boom boom'.

drew out the whole bottle of vodka in one breath, and Kenny let out a sigh.

pat the empty bottle on the table, click bang~

The bottle broke into several pieces again, but this time it did not turn into **** like last time.

"Thank you, Qin, for hundreds of years...I have almost forgotten the taste of this drink."

Kenny couldn't bother to apologize, and looked at the wine box in the corner with his eyes shining.

"You can do it yourself." Qin Yu raised his finger and lowered the box.

squeak, squeak~

The floor groaned in pain, Kenny moved the wine box to the table, pinched the spout with **** and raised a bottle.

After hesitating, he proposed another bottle and pushed the two bottles in front of Qin Yu.

Then, snap~

咚咚.

slap~

咚咚.

After finishing six bottles in a row, Kenny wiped his mouth and hiccup: "This is the happiest moment in my escape career."

"Escape?" Qin Yu caught the point.

They are going through an escape, what can make Kenny and his people with such a huge combat power desperate.

"..." Kenny fell into the memory, but the movements in his hand did not stop.

After adapting to the fragility of the wine bottles, he never breaks them again.

"We have failed. A war that lasted for several epochs. Darkness enveloped the universe, leaving only the lingering losers running away."

"We are just a bunch of poor bugs who have lost their homes." Kenny said tremblingly.

The pupils with large light bulbs were filled with blood red, and the monstrous warfare made the tables and chairs in the restaurant creak.

If this continues, Qin Yu has no doubt that the entire restaurant will explode on the spot.

"Kenny."

reached out and held down his big hand, the power on it awakened Kenny instantly.

"Sorry, I think of some unpleasant memories."

This is Kenny's second apology, and there is a kind heart hidden under the rough appearance.

"I smell chaos here, your world is being eroded by chaos?"

Kenny stared straight at Qin Yu with his big eyes, as if to see through him from the inside out.

"Come with me." Qin Yu held half a bottle of vodka in one hand and strode towards the depths of the base.

Looking at his back, Kenny turned his head and stared at the box on the table, hesitating to hold the box in his arms.

dragged the box with his left hand, took out a bottle of vodka from it with his right hand, bit the opening of the bottle and followed it with a 'gu-dong-dong'.

In front of the altar room, Qin Yu pointed to the star gate inside and said: "If we say the same, you should be referring to chaos."

"I should admire your courage." Seeing the star door opened inside, Kenny joked while drinking.

"How do you say?" Qin Yu asked.

"You are the first normal person I have seen who dares to fix the gate of the subspace."

Those chaotic minions have long been decayed, leaving only empty bodies and incomplete fighting instincts.

"I didn't open it, but this building." Qin Yu said, pointing to the lines in the altar room.

"Oh?" Hearing this Kenny was intrigued, he put his right eye on the window and carefully observed the layout inside.

"Unbelievable, magical design... the race that created it must have had a glorious civilization."

After seeing the lines clearly, Kenny said with admiration.

"So, are you the heirs of this civilization?"

Qin Yu wants to understand Kenny's experience. He also wants to understand this new world.

Although there are fixed open star doors here, from the current point of view, chaotic energy cannot penetrate the room and spread out.

This is good news for Kenny, maybe they can get a supplement on this planet.

Rest, rebuild the battle group, and reproduce the glory of the empire.

"Let's go back and talk slowly. I think there will be enough time for us to get to know each other."

Qin Yu once again invited Kenny to return to the restaurant to open up a deep understanding between the two civilizations.

Earth, Great Summer.

The 11th tribute is progressing smoothly, and the Suiren and Immigration numbers arrived at People's Square on time after the detour display.

Then, the salute and the deafening shouts of citizens sent off.

Get out of gravity and head for deep space!

The high-level managers of the Miracle Group and Bai Ze's team are full of serious expressions, without the joy and excitement as imagined.

The sudden situation on the west coast has spread all over the world, and everyone knows that a warship from an unknown civilization has appeared on the earth.

and disappeared again under the hold of the moon aliens.

It's just that countless people can clearly see that the light gate that opens on the sea is exactly the same as the 'limited time dungeon portal' in the previous "Ghost".

Chapter 959: genetic modification

The disturbances below did not affect the people on the moon.

After contacting Xu Meixintoi, he purchased a large amount of high-quality liquor and sent it to the base through Xihe.

The whole battle group's favorability towards Qin Yu has risen sharply, even causing systematic feedback.

"Ding!"

"Congratulations to the host for contacting visitors from another world for the first time and triggering designated rewards!"

"Reward 1: Medusa-class flagship."

"Reward 2: Technical Guide for Hyperspace Communication Relay Base Station."

"Reward Three: Eternal Pointer."

The latter two rewards both appeared in the moon base closest to Qin Yu, and they were locked in the strategic warehouse with the highest level of confidentiality.

The Medusa-class flagship is on the distant Pluto, and Qin Yu has provided the coordinates to Qilin.

Let it try to gain control of 'Medusa', and then consider what to do with it.

Medusa is a larger battleship than Xingyue, with a total length of 5.5km, capable of accommodating 100,000 people at the same time.

In the hands of a clever commander, it can stand alone against an entire fleet.

is equipped with the main weapon star destroyer, the planet is as fragile as an eggshell in front of it...

Qin Yu has reason to believe that if this main battleship appeared above the earth, the panic caused would be catastrophic.

Even the people around you start to feel fear.

One step beyond is a genius, two steps and three steps are evildoers, one hundred steps...

is a different kind, can only be eliminated and destroyed!

Therefore, Qin Yu tends to let it stay outside of Pluto, using the orbit of the planet to cover up his tracks.

With this reward, I face the Xingyue number owned by the Kenny battle group.

Qin Yu spoke more confidently.

"If you want, you can stay here."

Qin Yu pointed to the outside of the base and said, "This planet can be your residence!"

"Are you serious?" Kenny stood up excitedly, his forehead almost breaking the ceiling above.

"Of course, both human beings should guard each other." Qin Yu said firmly.

咚.

His fists hit his chest hard, and there was a sense of collision with metal.

Kenny lowered his head and said solemnly: "Qin, you will be the eternal friend of the weeper. Here, we swear in the sacred name of the weeper."

Seeing such a sincere Kenny, Qin Yu's heart throbbed and almost gave up his original plan.

However, considering the future of mankind, Qin Yu persisted.

"Kenny, I am very interested in your body. I wonder if I will have the opportunity to learn about this technique?"

His body has obviously undergone transformation, and Qin Yu is particularly interested in this transformation technique.

Maybe, it can bring Shi Cui different inspirations and let him perfect his 'Gene Evolution' project.

"This." Kenny looked at Qin Yu a little embarrassed.

After pondering for a moment, he proactively said: "I'm sorry, Qin, I very much hope that I can help you, but the genetic modification technology has been lost for many years."

Qin Yu nodded suddenly, and then said: "If you can get a few soldiers to cooperate with some simple experiments, I believe we will find a way."

"Will these experiments hurt their lives?" Kenny asked.

"Of course not, but the process will be very painful." Qin Yu said apologetically.

Kenny raised his head and laughed, slapped his chest boldly and said: "Pain is the food of the weeper. There is nothing more pleasant than pain."

Hearing that Kenny was so happy, Qin Yu hit the iron while it was hot and asked him to take himself to choose the right fighter.

came outside the base again, and the abandoned armor on the surface of the Star Moon was being dismantled.

The sound of steel and machinery intertwined inside it merges into a passionate metal symphony.

On the deck, following Kenny's orders, the weepers gathered from all directions.

Soon, the power battle armour regiment appeared in front of Qin Yu again.

"Guardian Guards, get out!"

Kenny's shout, wearing yellow power armor, holding a huge sword that is one size smaller than Kenny's weapon.

"My guard group is a battle group made up of the strongest fighters in the battle group. I think there will be the ones you want among them."

looked up at Kenny who was re-equipped with power armor beside him. After getting his nod and approval, Qin Yu stepped forward and started picking people.

Although the power armor blocks the line of sight, Qin Yu can still judge their strength based on armor data, heartbeat and breathing.

According to Kenny, the stronger the power armor, the stricter the requirements for the driver.

Strong physique, terrifying power, iron will and tempered combat experience are all indispensable!

So Qin Yu quickly selected suitable candidates from among them.

Two power armors were damaged, but not serious members of the Guards Corps, and a veteran of the Hundred Wars whose breastplate disappeared.

"Do you only need three people?" Kenny was a little surprised.

He believes that Qin Yu needs at least a dozen soldiers to ensure that his life is not injured during the experiment.

From this point of view, the opponent's biotechnology level far exceeds his estimation.

"Enough, it will take you to the laboratory in a flying vehicle." Qin Yu pointed to the creator who was waiting in the distance.

Xi He has arrived and will **** three fighters to the City of Miracles by it.

So far, Qin Yu still loves Xi Hehao.

Its invisible device is so easy to use!

When the research institute can bring the cost of the invisible cloth to the price of cabbage, Qin Yu must first transform the "Life" into an invisible model.

Imagine that the opponent's space battleship is heading towards its destination, and the armor and various weapons on the surface are inexplicably destroyed.

is like an invisible big hand, controlling everything secretly.

Hey hey...

Get what I want most, Niken also put forward his own request.

He wants to recruit soldiers on the earth!

"How long does it take to train a qualified fighter?"

Qin Yu was not in a hurry to refuse, it was not too late to figure out the other party's system before making a decision.

Knowing that the training time of an interstellar warrior is calculated based on half a century, Qin Yu immediately agreed.

For half a century, too many things can happen in 50 years.

By the time the earth is still not there, it is an unknown in a sense.

Worry about Kenny taking away the source of students, no no no...

Qin Yu now hopes that the other party can work harder and recruit more people to step up training.

These reserve fighters are not just a ready-made talent pool?

"You can send someone to the earth with me, but one thing is that you must not disclose the true purpose of the training before the end of the assessment."

Kenny thought for a while, and agreed to his request: "Then what name should I use?"

"I will give a reasonable explanation." Qin Yu responded.

He originally planned to train mecha divisions, but now he just has one more choice.

As long as Kenny does not take the initiative to expose it, it will not have any additional influence on his plan.

only needs to give two different choices when graduating.

Whether to go to the Science and Technology Department or the Biology Department, it is up to the students to choose.

However, if they want to go to the biology department, they have to wait.

half a century...

"The life of a reformed soldier is infinite." Listening to Kenny's understatement, he said 'immortality'.

Even Qin Yu seemed a little uncomfortable.

Throughout the afternoon, he was in a trance.

Qin Yu's thinking returned to reality until the message from Kylin that Medusa had successfully received it.

To be honest, even Brother Yu was moved in front of Eternal Life.

However, considering his special body shape, Qin Yu has extremely reason to suspect that he is already an immortal. '

Even if it isn't, it's not far away.

The cells in his body have been banned by Nanoworms. As long as the Nanoworms do not die, he will not die.

The advanced energy crystal makes the nanoworms in the body produce abnormal changes, which can absorb the free energy in the air on its own.

I believe that if you stick to it, Nanoworms will become stronger one day.

With an idea in his mind, Qin Yu shuddered involuntarily, looking at Kenny's abnormal height and bulging sarcoma.

Becoming this ghost, who else would dare to approach him?

Even if the other person is fond of Brother Yu's inner being, she can't stand the size!

completely crushed the inner impulse, Qin Yu, Kenny and his two entourage boarded the returning Xihe together.

"I'm leaving." As soon as the voice fell, Qin Yu held his chin and tilted his head and closed his eyes.

Kenny only thought he was thinking, and the two entourage looked curiously at the blue planet ahead.

Rivers, vegetation, vast seas, land exuding the fragrance of earth.

Reinforced concrete rises from the ground, a cast of civilized capital.

Kenny frowned. He hated the smell of the city, which reminded him of the ruins that were ruined in splendor.

"Qin, can the training camp be located there?" During the flight, Kenny reached out and pointed down.

Qin Yu called Qilin in his mind.

"He was referring to the central area of Shennongjia." Qilin.

"I need to think about it, there is an important natural ecological area, I don't want to see its ecological chain being destroyed. UU看书www.uukānshu.com"

Qin Yu, who closed his eyes in response, did not notice the fleeting appreciation on Kenny's face.

Worship, get close to nature, and then conquer are the qualities that a qualified fighter should have.

"Qin, your worries are unnecessary. We will never destroy its ecological chain, but will promote the development of the ecological chain.

Human beings are also a member of nature, why should he be excluded?

In addition, the primitive lifestyle is part of the training. "

When Xi He landed in the city of miracles, Qin Yu opened his eyes again: "I will seriously consider it."

His original plan was to place the training base in the imitation ecological center of Lingang. The place there is large enough, and the future mecha training is also here.

After listening to Kenny's request, Qin Yu also felt that the environment here was too superior.

Being in a city with lights and feasts every day, how can I settle down and train?

Do anything, in the early stage external interference is fatal.

Shennongjia Center No Man's Land?

took the two to the warehouse, Qin Yu pointed to the custom-made mattress prepared in advance and said: "You can rest here first. The environment is a bit rudimentary. After the room is remodeled tomorrow, you can move in."

Touched the six mats stacked together, Kenny sat down for an interview carefully.

Then, a child-like joyful smile appeared on his face!

Chapter 960: celebration

"...Here, I solemnly announce to all the people of Daxia, Barrow, Smecta, and Baimaozi that the Milky Way Republic is officially established."

settled the temporary residence of the three of Kenny, Qin Yu returned to Lujiazui by car and watched the replay on the phone.

The 11th day's plan did not deviate because of his sudden departure.

On the contrary, because of the emergency on the west coast, the world's eyes turned to the other side of the ocean.

In this way, it can be regarded as a roundabout completion of Lao Bai's entrustment.

Now, the wood is done!

The Bald Eagle was busy dealing with the follow-up to the Xingyue incident, finding new qualified pigs who were willing to go to the White House and wait for death.

I can't deal with my own troubles, even if I want to reach out and interfere, I still feel powerless.

How did the star gate appear? Does the 'Machine Life on the Moon' leave any clues?

The materials splashed out by the explosion were fully recovered by multiple joint agencies.

Any detail has been studied countless times.

finally came to the conclusion: no solution!

No one dared to act rashly before unsure of the limit of that laser.

The many giants of the Bald Eagle family began to invest money regardless of cost, trying to develop effective countermeasures.

It's just that no one knows where the opponent's limit is!

The establishment of the Galactic Republic undoubtedly made the bald eagle's difficult life, even more difficult.

In addition to being incompetent, only a sigh can express the other party's depression.

Seaview One, Qin Yu opened the door and heard the sweet silver bell.

The little anchor is preparing for the next live broadcast with Wang Hong and exchanging opinions with the quality control team.

"Boss." Yuli, who was in the welcoming living room, greeted Qin Yu.

"Hmm." Nodding in response, Qin Yu stepped back after passing by him, and looked sideways at Yuli.

Yuri, who was seen by him a little bit differently, looked down at his body with suspicion.

There seems to be no problem, what is the boss doing?

"Do you want to be stronger?" Qin Yu said abruptly.

really meet, she has to betray the other side's little girl in minutes.

"Boss, do you know what the restructuring is all about?" The passion retreated, and the little anchor cared about recent hot events.

Galactic Republic, it sounds so overbearing.

Although very happy, the little anchor still wants to understand the deep meaning.

After the restructuring, the future direction of the country's development, and where should her career go!

As the space heat is booming, pan-entertainment has suffered a wide range of influences and severe blows.

People no longer focus on adverts, celebrities, and Internet celebrities.

Instead, he is concerned about positive events such as aerospace, armaments, good people and good deeds, and the five-year plan.

For a time, the live broadcast industry wailed all over, and everyone was complaining that it was getting harder and harder to make money.

Even if I couldn't make a head before, I could easily earn a million a month if I had some fame.

Now, the head is better.

Like a small anchor, this year's personal income statistics exceed 200 million.

Except for the full-blown career and diversified head anchors like her, the following will be miserable.

The most one year is no more than 10 million. Throwing away various taxes and expenditures, some people have negative incomes.

Of course, this is a minority. The other party wants to rush to see if they can catch the head train.

invested all of his money for this, and finally fell a dog shit.

is a bit like the albino shark back then, but the ending is worse than him!

was burdened with debts, so he quit the live broadcast. I heard that he went to the construction site to move bricks to pay off the debt.

There is nothing wrong with being down-to-earth!

"Actually, there is no change for ordinary citizens. You can regard Barrow as the Far East area, Smecta as the entertainment area, and Baimaozi as the fish pond area."

"Fish pond area?" The little anchor smiled but didn't smile.

"It's not that there are many beautiful Baimaozi, I just heard that I have never been there." Yu Ge said with a normal expression.

To tell the truth, there is a guilty conscience. If you haven't been, you haven't been.

Neon is going to kneel too, first try the servile boy, only then can Bai Maozi's blond hair and big white legs turn.

"You don't worry about the meeting being held, how many votes can Daxia have?"

The small anchor did not struggle with the problem of fish ponds, but she was more concerned about whether Daxia could take the lead in the Supreme Council.

The highest governing body of the Galactic Republic, the Supreme Council, composed of the highest leaders of several countries.

The re-division of rights is proceeding in an orderly manner.

"Although I'm not sure how many votes I can get, I know it must be the most." Qin Yu responded confidently.

In the afternoon of the same day, the establishment of the Supreme Council was completed.

As Qin Yu expected, Da Xia had six votes in the 12-member assembly.

Barrow won three votes, Bai Maozi two votes, and finally Smecta, who came to make up the number, took one vote.

Although he only got one vote, Cosmect's optimistic spirit was very optimistic.

After the news of the one vote was announced, there was a vigorous celebration in China.

Celebration activities are held by major chaebols, and various free gifts are distributed to mobilize the enthusiasm of the people, making the entire event process particularly sensational!

Daxia also launched various celebration activities, and stores launched discounts one after another.

Many restaurants and supermarkets put up banners of 'Free dinner, large delivery of goods', which attracted bursts of applause for a while.

At the same time, a huge party will be held that night.

each country...

No, it should be said that each region is correct.

The teams sent from various regions have arrived in Shangdu for several days and are only waiting to perform on stage tonight.

The people do not have too much worry about the integration of Barrow, Baimaozi and Smecta.

The history of Daxia is destined. She is a very tolerant country.

As for the emotions in other regions, Barrow has a very good impression of Daxia and believes that each other is already friends.

Now, it's just taking each other's friendship one step further.

Baimaozi has watched Daxia take off over the years, and his family is getting worse and worse. He has long wanted to change his family and find a new partner.

Now that he can officially join the league, Bai Maozi is only excited and excited.

Some small opposition voices in the area also disappeared under the huge wave.

Smecta, this is a typical fox and pretender nation.

After the rise of Daxia, the degree of hatred of its citizens towards Daxia has increased day by day.

In the final analysis, it was because Daxia stopped playing with her and cut off her cultural output.

has developed rapidly again, breaking the suppression and blockade of the Bald Eagle with an incredible counterattack, and stepping out of its own development path.

Therefore, Smecta was jealous, jealous, and hatred.

Even if you join the Galactic Republic, this mood can't be changed in a day or two.

The Supreme Council already has a solution to this problem. Under the resolution of the President of the Daxia Council, [Xing Tian] will be dispatched to various regions to maintain stability and order.

Among them, 20 were sent to Smecta, 10 were in the Barrow area, and 10 were Baimaozi.

The region is not as big as Barrow, a provincial-sized Smecta, and the number of [Xingtian] dispatched is the most.

The deep meaning of it, I believe the Smecta party's legislators are deeply moved. UU reading [www. uukanshu. com](http://www.uukanshu.com)

It can be seen from his face that was black when he left, that he already understood the meaning of the Supreme Council.

As for whether the number of dispatches will increase in the future, it depends on his performance after returning.

"Drink!" The cups and shadows crossed, and the diners who were eating were all beaming.

"Barrow District, Ross District, Hancheng District, turning the country into a large district, who else, just ask who else?"

"Fuck, when I heard the news, I punched through the computer screen and ran for three laps with blood before I went to the hospital."

A thin young man with heavy glasses and a bandage on his arm swigs a cow.

"Hey, you said, if you go to Smecta to buy cosmetics in the future, do you no longer have to pay taxes?"

"Of course, in the future, it will be as simple as inter-provincial, and it is called Hancheng District, what Smecta is."

"Yes, I can't remember how I can't remember, I punish myself for a cup, I punish myself for a cup."

A few little sisters got together, jokingly discussing when to go to Hancheng for a big purchase.

"Hey, brothers, let's go to Barrow tomorrow and have a drink with the Barrow brothers and welcome them to join Daxia."

"Go, I must go, I will pay for it."

"I buy wine, is five boxes of Moutai enough?"

"Fuck you, just drink these two dishes like this, do you have 10,000 yuan in your pocket?"

While laughing and scolding, all that was revealed was joy.

Tonight's Daxia is destined to sleepless!
