

Pinnacle 981

Chapter 981: Split

People who bought the all-round spacesuit waited for the question mark to turn into a detailed product introduction.

Those who haven't bought are also waiting to prove that they are smart.

Only Miracle Company stands firm, as if it doesn't care about the attitude of the players at all, whether anyone buys their products.

Their family is not the first such a cold company.

"Who has the monopoly of the industry!" The yin and yang tone appeared in every corner of the Internet.

It seems that something is brewing, which has also attracted the attention of the Network Department.

In this regard, Qin Yu only said "Let them make trouble" and stopped paying attention.

To put it bluntly, he doesn't need to care about these thoughts at all.

No matter how bad the online trouble is, the miracle will not make a penny less, and the above will not be dissatisfied with the miracle because of this.

What can I do if someone is dissatisfied?

In the past few days, Qin Yu's time has been devoted to various meetings.

Each subsidiary's year-end summary meeting, project progress report meeting, and strategic direction seminar.

Year-end rating, bonus distribution, welfare of various departments, etc...

Seeing that the New Year will be in another month, all of these need to be prepared in advance, and the taste of the new year will become more and more sufficient.

Nowadays, Chinese New Year is becoming more and more like dealing with errands, becoming boring and boring.

In order to increase the taste of the year, let the employees strengthen the connection with the company and the cohesion.

The company has hung up lanterns, couplets, and organized various eBay incentive activities.

For example, take an hour before dinner to make dumplings and steam the steamed buns in the kitchen.

Basketball, singing, dancing and other competitions.

This year, an additional 'Mecha Confrontation' was added this year, where employees use VR equipment to control [creator] to fight.

The scene was so hot that half of the company's people were in a carnival, and the deafening shouts were about to overturn the roof.

The female white-collar workers who were reserved and proud in the past are also blushing in the sound of the iron metal clashing with their fists.

Yelling loudly: "Twist its neck, kill it, go!"

Sitting in the VIP area, Qin Yu watched everyone vent their dark emotions with a smile.

There is a terrible beast in everyone's heart.

Even if you close the door and lock the beast, you will be more or less affected by its wildness.

Repress, control, or transform wildness into more efficient action, turning it into a motivation.

There will still be negative residues in the body, waiting for dumping or backlog qualitative change.

Now is the time to vent.

This is already the third mech battle held by the company. From the initial reservedness, the image has to be maintained and the personality is maintained.

Until now, everyone is like a cruel and cold-blooded monster, desperately screaming and venting negative emotions.

This change is exactly what Qin Yu wants to see, and they must remain wild enough.

Greedy, aggressive, and paranoid about victory.

But you can't be affected by negative emotions and keep your thinking and mood happy!

This is exactly what he hopes to see...

Xu Meixin suddenly stepped forward and said something in Qin Yu's ear.

Keep smiling, Qin Yu said to the executives beside him: "Look at it slowly, I have to deal with a little trouble."

"Boss, don't you go down and have a game?" The executives are eager to wait.

First, the internal qualifying, and then the executives' turn to the exhibition.

Therefore, they can only wait anxiously here!

"No, you guys have a lot of fun." Qin Yu said as he stood up and walked out.

Seeing him with a smile on his face, everyone did not take it seriously, but Xu Hao lowered his head and opened the WeChat account.

There is a new announcement in the Sanqin meeting to end all transactions on hand that are directly related to the Bald Eagle stocks.

The crash is coming!

On January 11, 2027, the Bald Eagle said 'no,' to Neon, refusing to perform the content of the previously signed agreement and repurchase the national debt.

The Bald Eagle market fell 500 points that day.

The next day, the latest news came that the Bald Eagle completely denied the legality of issuing national debt.

Broke!

The market index plummeted, and countless investors threw stocks to the market like throwing rubbish.

The predators are sharpening their knives and waiting for the harvest. Small companies can hardly protect themselves and just want to survive.

In this situation, the Bald Eagle closed the market.

Start to sit in rows at home and divide the fruit!

These guys have been completely shameless, treating the law as a trifle.

During this period, several large companies quietly chose to merge to form a joint group.

Putting aside the bald eagle, began to contact national and international institutions in the name of the company.

In the true sense, it does not include the country, only as a company!

The true owners of the bald eagle exposed the hidden fangs and claws to the eyes of the world without any disguise.

At the same time, it also caused huge repercussions and shocks.

On New Year's Eve, Qin Yu, who was still working overtime in the company, received a blessing call.

Tang He and Gao Bo asked him to go to the bar, but Qin Yu politely declined: "This year is not going well, I'm afraid there will be no time to get together."

"You are busy with you, let's get together again." Tang He smiled.

"Those who have no money are celebrating the holidays, and those who are rich are making money. This is true!" Gao Bo said with emotion.

Since the birth of the miracle, when has he been busy?

Besides, this year is really special!

It is spread from the outside that large companies must be rectified, capital restrictions will be imposed, and stronger shackles will be attached to them.

What happened to the bald eagle stimulated every leader.

Today, the territory is divided.

Although large companies have not declared independence, they use their wealth to attract talents and conquer the city.

The West Coast was invaded by BlackRock and became the uncrowned king of the West Coast.

The Big Apple City, once the world's financial center, is now also occupied by the Morgan Lowe Saint Ross Consortium.

In the north and south, joint giants also appeared. Some of them had guns, money and power.

Occupy one side, wooing the mutants to join their forces.

The separatist regime is precisely the current status of the bald eagle.

Only the special zone where the White House is located is still controlled by government agencies.

But there is no way to deal with the current situation of chaebols!

In the Milky Way Republic, the sky seemed to be covered with heavy clouds, and a heavy person who was about to rain from the mountains could not breathe.

In Miracle Company, people who come and go have solemn expressions on their faces.

The expression is nervous and uneasy, waiting for the great change that is coming.

Even Mr. Xu, who always laughed in the past, had a heavy haze on his face.

"Why did it split?" Sitting in the office, Xu Hao really couldn't figure it out.

What are these guys up to? Although the situation is a bit chaotic, it's not like this.

"When the east side was disintegrated, everyone said the same thing." Qin Yu squinted and smiled behind the desk.

"Brother Yu, you are really big-hearted, can you laugh like this?" Xu Hao shook his head and smiled bitterly.

If it doesn't work this time, they will be split up.

With stricter regulatory policies and reduced size, the corresponding rights and freedoms will also be imprisoned.

"Don't complicate the problem, our situation is different from that of the Bald Eagle." Qin Yu reminded.

"It's different, but this is not a lesson learned."

Xu Hao spread his hand and said: "Such a big thing, just being affected by the aftermath, is enough for us to drink a pot."

"The sky is falling and there is a high bearer. I am not there. What are you afraid of?"

Hearing what he said, Xu Hao gave him a roll of eyes: "I am not afraid, I am worried about the company."

"The sky can't fall, don't worry!" Qin Yu said confidently.

Qin Yu can understand Xu Hao's anxiety.

But he also has his own considerations. The impact of this incident is huge and it is extremely unfavorable to capital.

But Qin Yu has advantages and trump cards that others do not have, cutting-edge cutting-edge technology, monsters and space technology.

Who can abandon these?

Even if the sky falls, there will be no miracles.

At least until the rest of the liquidation is completed, we will never find a miracle first.

Besides, if someone really wants to make trouble, they have to weigh their own abilities.

The fist of miracle is not small.

It's true to the point of necessity, not that there is a retreat from Mars.

However, these guys actually took the way he wanted to go ahead of time.

Fortunately, this road was wide enough, Qin Yu wouldn't be angry about it.

Speaking of the internal affairs of the split, Qin Yu understands better than others.

Who let Daisy play an important role in it!

If it weren't for her revenge, she was ignited by the mutants and hunted down the big men in the bald eagle area.

Let the white house remain in the state of empty windows, the hearts of the people below are distracted, and the forces are divided and confronted with severe emotions.

The internal backlog of negative emotions cannot be vented to the outside.

No one can stand up to mediate these contradictions, making the misunderstanding more and more serious, and the bald eagle can last for more than ten years on whatever it says.

Perhaps during this period, there will be some great leader who will lead the bald eagle to return to its former glory!

Putting the issue of the other side of the ocean aside, Neon and Wanwan accelerated the submission of documents for joining the Galactic Republic under the stimulation of Bald Eagle Time.

A variety of confidential documents that could not be found before appeared in front of the review team.

Next, just wait to see who will become the first hapless person.

Or the screaming chicken used to warn monkeys!

The only thing that made Qin Yu uncomfortable was that Hudu's imitation ecological center project was temporarily suspended.

The specific construction date is to be determined!

This not only delayed the progress of the immigration plan, but also affected the personnel supply of the Shennongjia Center training camp.

Kenny had already called and asked him why the second batch of students hadn't arrived yet.

Qin Yu only said that some accidents had happened, and didn't tell him the specific details.

Presumably he is not in the mood to listen to these trivia!

However, what no one thought was that it was at the end of the day.

The first screaming chicken to be pulled out was confirmed, and Hei Du topped the list and won the first kill!

Monopoly, disrupting market order, malicious competition, and suppressing peers.

Misuse of traffic and leadership has caused strong social dissatisfaction and caused people's property and spiritual losses...

Good guy, the long list of guilt made many people tremble and almost passed.

Is this a rhythm that needs to be beaten to death by a stick?

In society, they got a huge positive reaction, everyone clapped their hands and applauded, UU reading www.uukanshu.com straightly said, "It's very happy."

Especially those families who were pitted by the blackness, weeping with joy, yelling, "God open your eyes."

In fact, it has nothing to do with God.

Fart is a big deal, I'm afraid I don't have time to take care of it!

No matter what, there is finally a place to vent the evil spirit in my heart, and the atmosphere of the New Year is more abundant.

After making so many years of black-hearted money without conscience, it's time to pay it back.

Thanks to the great sacrifice of Blackness, other companies can finally have a peaceful New Year's Eve.

As for future developments, how will they proceed.

Everything has to be considered after the New Year's Eve, and now he has to return to Nanhu to spend the Spring Festival with his family!

growing again?"

Looking at the elders, relatives and friends, Qin Yu smiled and nodded: "Auntie, Auntie, Auntie, Auntie, Happy New Year."

"Happy, happy." Everyone responded with a smile.

"I don't know how to play cards, you play, I'll go find some of them." Qin Yu smiled and walked to the living room.

On the sofa, the older uncle and younger uncle are discussing the current public policy.

"Uncle!" Qin Yu said hello.

"Xiaoyu is back, are you exhausted?" The little uncle said politely.

"It's okay." When he walked to his peers, Qin Yu saw them playing the Wizard series with PS2 in front of the TV.

Although many years have passed, classics are classics and will not fade with the passage of time!

"Qin Yu, come to play?" Zhang Yue handed the handle over when he saw him coming back.

"Okay." Qin Yu also wanted to relax, but as soon as he took the handle, the phone rang.

Reluctantly shrugged and returned the handle to Zhang Yue, Qin Yu pressed the answer button in the auricle.

"Hey, this is Qin Yu." Qin Yu said.

"Husband, Happy New Year!" Lu Qing said cheerfully.

Qin Yu raised a smile at the corner of his mouth and said softly: "Happy New Year, baby, help me say a Happy New Year to my uncle and aunt."

"Well, you also remember to say hello to my uncles and aunts, saying that Qingqing wishes them a happy new year and be young forever."

"My mother loves these words, what kind of food is prepared at home today?" Qin Yu asked with a smile.

"A table of good dishes, and a few east crabs, produced near the Barrow Polar Region." Lu Qing said.

"Tsk, I'm all greedy!" Qin Yu said with a smile.

"Also?"

Lu Qingjiao groaned: "There are 20 in total, and I brought 15 to your family. My mother said you love to eat."

"As expected of my mother-in-law," Qin Yu said proudly.

"Also, I don't have enough food." Lu Qing said angrily.

"Really?" Qin Yu said with a strange smile: "Why don't you come to my room, I promise to feed you."

"Ah!"

Lu Qing screamed and said shyly: "What nonsense, my mother is still there!"

"Haha, it's okay, young man, mom understands..."

"Mom, what he said nonsense, why are you doing this."

"Okay, mom is going to cook."

"No, no, I..."

Hanging up the phone did not give Qin Yu a chance to speak.

Shaking his head dumbly, Qin Yu pressed the answer button again: "Hey, this is Qin Yu."

"Xiaoyu, Happy New Year!" Zhou Xue said softly.

"Ms. Zhou, why call me when you have time? You guys should be waiting to play." Qin Yu smiled.

"They are on the court, not my teacher." Zhou Xue responded.

"When to rest?" Qin Yu asked.

Although it didn't take long to see him, he really wanted to be a lazy cat.

I should be a **** and tie her to her side.

"This performance is over, there are two months off, but there is still training..."

"Half a month the head office, right?" Qin Yu asked.

He knew that the dance troupe had to stay in shape, but he had to give people some rest.

The machine has to be charged and hibernated. It's really hard to beat people.

"At that time, you can tell her by yourself, as long as Lazy Cat agrees." Zhou Xue also called Lazy Cat.

Qin Yu fainted a bit when she said that.

Lazy let the lazy cat agree to stay at home for a week, which is the limit.

For half a month, don't even think about it!

After chatting with Zhou Xue for a while, the phone rang again, this time it was Yalan and Tongtong...

"Brother, brother, I won the game!" Tongtong shouted excitedly beside him.

"Really?" Qin Yu smiled.

"Well, I am now the strong king of the school, no one has more strength than me." Tongtong yelled happily.

"You are awesome!" Qin Yu praised.

"Mom said the same." Tongtong exclaimed triumphantly.

"Okay, let me talk to my brother." Ya Lan said softly.

"Does my mother want to whisper to my brother?" Tongtong's tone became strange, like expecting, but also shy.

"Tongtong will not eavesdrop, I will wear headphones!"

"There is no sound from your headphones!"

"Oh, forgot to open it."

After a while, Qin Yu finally heard Ya Lan's voice again: "This kid is getting more and more naughty."

"Tongtong is a good boy, very smart, and knows that he loves you, like a little adult, but you are too demanding."

Qin Yu felt that Tongtong was more sensible and obedient than ordinary children.

Delicate in mind, knowing that I feel sorry for my mother.

This is rare among boys, and most boys when they were young were heartless.

Otherwise, just consider one's boring self-esteem and face, and do some stupid actions that hurt the closest person.

This...it's not common in Tongtong!

"I heard about that, is there a miracle risk?" Ya Lan's tone suddenly became official.

What she said was naturally that Heidu was pulled out of the public for punishment.

This matter is so far, or a new beginning, Yalan is very worried about his situation.

"Don't worry, I couldn't be better." Qin Yu laughed softly.

"Really all right?" Yalan asked.

"It's really okay, Sister Yalan, miracles are unbreakable." Qin Yu responded confidently.

Most of the technologies currently mastered by Miracle are monopolistic.

The lack of miracles is tantamount to cutting off the wings to the future!

No matter what, this kind of thing can't happen.

Besides, isn't BlackRock still there?

With the support of miracles, BlackRock occupied the entire west coast and became the uncrowned king.

Now it is no longer a pure money management company!

Now it, like other independent chaebol giants, holds the most terrifying weapon in human history.

There hasn't been any news from the above. If there is anything really going on, Ye Jinlan will definitely notify him in advance.

There is no doubt about this.

Therefore, no news is the best news, and Qin Yu just needs to continue to follow the predetermined footsteps.

"It's fine. If you can help, you must tell me."

Yalan said abruptly: "If you really have trouble, you can go to the other side, there is now a mess, and no one can find it if you hide it."

Hearing what she said was so serious, Brother Yu couldn't laugh or cry for a while: "Sister Yalan, I am not a fugitive!"

Yalan knew that she had said it, so she said awkwardly "Happy New Year, good night" and hung up the phone.

Care is chaos!

After many years, Yalan finally had a trace of suspense in her heart.

She was too afraid that she would lose Qin Yu and let her heart fall again.

"Xiaoyu, have you finished the call?" Liang Chuyu asked him to eat.

"Come soon." Qin Yu replied and pressed the call button again.

Speaking of Cao Cao, Cao Cao arrived.

This time it was Ye Jinlan who called Ye Jinlan. She was celebrating the festival with Ye Lao in the small courtyard!

"Didn't you invite you home?" Qin Yu asked unexpectedly.

Ye Jinlan thought for a while and replied: "Please, I don't want to go back."

"Ye Haotian?"

"Yeah." In the past few years, Ye Jinlan has become accustomed to a simple and clean busy life.

Since knowing that it is not sincere, why not go back and find it happy?

It's nice to spend the festival with Grandpa in the courtyard...

"The old man doesn't want to go back?" Qin Yu asked again.

"It was Grandpa who said he didn't want to return, so I refused." Ye Jinlan said.

Qin Yu wanted to tell her that it was the old man's thinking through her.

The authorities are fascinated, even if they are as smart as Ye Jinlan, there are times when they can't see through.

However, thinking that tonight is New Year's Eve.

Qin Yu didn't want to spoil the mood of the two of them during the festival, and turned the topic to blessings.

"You haven't been affected by the recent events?" As expected, Ye Jinlan was also very concerned about the company's current situation.

Although she is responsible for managing the family's property.

But the benefits belonged to the entire Ye family, and she was just a senior worker.

The miracle is different, the money here is her dowry and pocket money.

Can Ye Jinlan not care?

As for the man she loves, Ye Jinlan is not worried at all.

As long as his head is still on his neck, nothing will happen anytime.

"It's up to you to ask."

Since making this call, Qin Yu also wanted to ask about the above plan.

Ye Jinlan smiled on the other end of the phone and said, "It's okay, you have grandpa and old man Zhou as your backer, don't want to mess around."

After speaking, she asked curiously: "How did you and Zhou Lao meet?"

"Last launch mission, I saw two sides." Qin Yu said.

"that's all?"

Ye Jinlan curiously asked, "I didn't eat, chatting alone, drinking tea and playing chess?"

"No, it's not that there was an alien visitor incident suddenly, I'm going to deal with that matter." Qin Yu responded.

"Can you talk about it casually?" Ye Jinlan asked in astonishment.

"What can't you tell me?" Qin Yu retorted.

Satisfied laughter came from the other side: "If you pass the test, will you go there after the new year?"

"I'm afraid it won't work. Why don't you go to Sanqin for a few days?" Qin Yu said.

On the fifth day of the Lunar New Year, he had to rush to Hudu to deal with the suspension of the imitation ecological center.

In addition, the company's new generation of game cabins have to work overtime to deliver the goods.

Qin Yu will hold a technical innovation seminar with the research institute to reach an agreement on the new machine tool design.

Now that the prepaid order has reached more than 300,000, the expansion of the production line is imminent!

In addition, he will also attend the signing ceremony of the new generation of gaming cabin spokespersons.

It is Xu Hao's request to show the importance of Hancheng District.

The branch just started its work and merged its entire country into a remote administrative region.

Failure to appease at this time will only create violent conflict.

This is not in line with the development strategy specified by them, friendly and peaceful!

Be friendly first, then nuclear flat.

Qin Yu also agreed, and who made the three spokespersons be finalized by him!

"Okay, let me see if the itinerary can match yours, UU reading www.uukanshu.com turned around and asked my secretary to contact Secretary Xu."

"...Is it the right schedule to meet?" Qin Yu said silently.

"Who keeps your busy feet, Qin Daxiao, and there are countless families to take care of!"

Hearing Ye Jinlan's ridiculous tone, Brother Yu decisively turned away from the topic, wishing Ye Lao a happy new year and longevity and health.

"I will tell Grandpa, a man in the world." There was no voice on the other side.

Qin Yu was still talking: "What is the world, what are you talking about, the new century is coming..."

Unfortunately, Qin Yu didn't hear anything except for a dead silence.

In the end, she shook her head unwillingly and walked to the restaurant full of family members.

Everyone was there, just waiting for him to come to the table for dinner.

Chapter 983: Water meter

On New Year's Eve, red envelopes are issued and red envelopes are received.

Because the display of fireworks and firecrackers is prohibited in the urban area, you can only play with flowers in the small courtyard of your home.

The little pumpkin is the happiest one, holding a handful of flowers in each hand.

"Oh~oh~" yelled and ran, it was fun to play!

*

*

*

Downtown, Chunfang District.

This is an old community built in the 1980s with red bricks and slabs and covered with creepers.

The pavement in the community has been refurbished, and it looks alike.

Because it is located in the city center, housing prices remain high, but it is also favored by parents of students and petty-bourgeois youths.

Fang Da is an ordinary social animal and lives in Chunfang Community.

Although the tenants in the community came and left, it didn't affect him as a second-hand landlord.

He likes this old yard, quiet in the chaos, and full of life in the run-down.

A wall of creepers can always bring different surprises to people in spring!

Every time he took the girl home, the other party would be delighted by the scenery in the small courtyard.

Of course, Fangda has a clear goal.

Literary, petty bourgeoisie.

He would never bring home worship of money.

Because the other party doesn't know how to appreciate, the subtle beauty can be seen everywhere in life.

However, in recent months.

Fonda never took any girl home again, and rushed home the first time after get off work every day.

All meals are called takeaways, without leaving the house!

The reason, I believe that every young man who has a similar experience with him understands it.

He is an in-depth "Ghost" player.

For them, it is shameful to waste every second of their time in the game.

1:5 time difference, entering the game one second earlier, it means that you live 5 more seconds.

Wouldn't it be profitable for 500 years of white prostitution?

This amazing brain circuit is amazing.

But the reason Fanda was so obsessed was not to fight for his life, he had more important reasons.

After havingtily resolved the dinner, Fonda threw the tableware into the sink and turned to the room.

On the table was a transparent sealed box, which contained his game helmet.

The spotless helmet was polished bright, and some people believed it was new!

When he came to the table, Fonda was not in a hurry to enter the game.

Staring at the helmet in the box, he was in a daze, then raised his right hand, palm up.

Phoo~

A ball of flame appeared in his palm, rising and falling with Fonda's emotions.

Sometimes bright, sometimes dim!

Fonda smiled with joy, even if it wasn't the first time he saw it, he would still feel happy from the heart.

Keng Keng~

The knock on the door interrupted Fonda's good mood and frowned unconsciously.

Keng Keng~

Fonda who walked out of the bedroom closed the door and asked impatiently: "Who?"

"Community, check the water meter." The woman at the door said.

"Check the water meter at this time?" Fangda was a little surprised.

"We want the daytime too, but there is no one at home during the day." The woman outside the door continued.

All right!

The other party was right, there was really no one at home during the day.

So Fonda opened the door.

"Hello, we are in a strange situation." A man in a weird uniform with a serious expression and a weapon in his waist took the place of a woman.

Seeing the threatening face of the opponent, Fonda began to consider whether to kill the opponent.

It's just that this idea was instantly annihilated after the opponent put his hand on the holster.

"Please come in, what can I do to help you." When the two of them were invited in, Fonda finally saw the appearance of the woman who was talking to him before.

Very beautiful, with long black hair tied into a high ponytail and flicked as he walked around.

Fonda remembers that there was a girl before, and she also liked ponytails.

Every time, he would grab the other's ponytail...

"Put aside the dirty thoughts in your heart, otherwise I will show you a good look." The high ponytail woman said coldly.

"Sorry, I just thought of a friend." Fang Da smiled apologetically.

"By the way, what do you guys say about yourself? The Anomaly Bureau, what department is that?" Fang Da asked the two to sit down and opened the refrigerator to take out two bottles of Coke.

"Thank you, it seems that you are not worried about your situation at all." The man took the initiative to speak.

"Why should I worry? I am a good citizen who obeys the law, pays taxes on time, lives in my parents' old house, and is innocent.

As usual, I like to help my grandmother cross the road. There is no money from unknown sources in the bank card. "

Speaking of this, Fonda was sitting on the sofa, leaning back, and raising his hand: "So, what's wrong with me?"

Looking at each other, the two seem to have reached some kind of agreement, and the woman will speak to explain the current situation.

Anomaly Investigation Bureau, a confidential department responsible for investigating, registering, and compiling anomalies.

It was formally established 6 months ago, and it was formed by the mutators who transformed into public officials from the Ministry of War and Yamen.

The reason why they came to check the water meter was because Fangda was a mutant.

"I'm not a mutant." Fang Da said decisively.

"Really?" The man took the conversation and took a strange device from his waist.

It looked like a fingerprint extractor, turned on the switch on the table, and gestured to him.

"Show me the proof, just put your thumb up." The man said lightly.

Fonda asked nervously, "What is this?"

"The instrument to identify the abnormality, just put your finger on it, collect blood, and it can confirm whether you are the abnormality or not in 10 seconds."

"Very convenient." The woman said with a smile.

"Yes, it's very convenient!" The man smiled and nodded in response.

Seeing the two singing and making a peace, Fonda's emotions became more and more tense.

run?

No matter how fast they can pass the gun, not to mention that they come from a department that specifically targets abnormalities. There must be other means.

Perhaps, the two of them are also mutants.

What ability will it be, will it be more powerful than yourself, and how can you defeat them.

Where to go after defeat?

Thinking of this question, Fonda suddenly calmed down.

Yes!

Where can I go if I defeat them? Today, Daxia's national strength is thriving, and the future prospects are bright.

As a fugitive at this time, do you want to go abroad?

There must be a hole in your head to choose this path, so...

"Well, I am a mutation, but I have never hurt anyone." Fonda raised his hands and said that he was not threatening.

With his proactive acknowledgment, smiles appeared on their faces again.

It's just that this time, it's not as aggressive as before, and it's gentle and friendly: "Mr. Fonda, please don't be too nervous."

The other party did not put away the authenticator, but motioned him to continue: "First confirm your identity, register it, and then we will discuss the next step."

"Choose?" Now that he had accepted his fate, Fonda no longer resisted.

Isn't it just being registered? Since he was young, he has done few registrations? It's not bad at all.

"That's right, you can choose to be an ordinary person, as long as you don't do illegal things, you only need to report to the local anomaly bureau every six months.

If you want to join the Outlaws, we will arrange a position that suits you according to your abilities, and at the same time there are benefits you can't think of.

In addition, you can also be an outsourcer, if you like to talk freely. "

In the process of explaining, Fonda has finished sampling.

The finger is placed on the discriminator, and the needle ejected from the inside punctures the epidermis for sampling and analysis.

Fonda put his thumb into his mouth and curiously asked: "Outsourced personnel?"

"Yes, to put it simply, the Anomaly Bureau will release various tasks for you, and you can choose the ones you are interested in to complete and get corresponding rewards."

"What can rewards do?" Fonda put down his thumb, the needle was very small, and it was now bleeding.

"Everything." The woman said without embarrassment, making Fonda amused.

everything?

If you dare to say that, it's not a big flicker or a nervous change.

Seeing that she is so beautiful, it should be the former!

Ignoring Fonda's ridicule, the woman said to herself: "Yes, like the game pod you want, the all-round space suit, the latest generation of exoskeleton mecha, mysterious..."

"What's the mysterious?" Fonda's curiosity was mobilized.

Game cabin, space suit, exoskeleton mecha.

Can these things really be obtained by completing tasks in the Alien Circumstances?

What a joke!

"Sorry, the latter is confidential, and only the internal members of the Bureau of Exceptions can know."

This time, it was the woman's turn to respond to his question triumphantly.

Fonda opened his mouth, pointed at her speechlessly: "You deliberately cheated me..."

"I'm just answering your question." The woman denied it.

As a public official, how could he cheat others, absolutely impossible!

Curiosity tortured Fonda like a cat's claw, making him unable to calm down, "No, I won't give in, I won't join."

Fangda forced himself to calm down and kept suggesting that he was "false, all false. This is a trap that the other party deliberately throws to attract him to join."

"Well, what a pity!"

The woman stood up and sighed: "I originally thought that we would have different stories."

"...I'll join." Fonda rebelled. Before he could understand, his mouth had already expressed his brain's opinion.

He was under control. He didn't want to do it. It was a rebellion by the brain and the mouth.

This is a naked betrayal, **** it! !

"Congratulations, Fonda, we will be colleagues in the future." The woman stretched out her hand to him happily.

Looking at the slender, white fingers in front of him, Fang Da suddenly felt that he was not at a loss.

"The story you just told?" Looking up at the other party's fluttering ponytail, Fonda thought of those wonderful nights again.

"Ah, a story that you don't make sense?"

The woman suddenly said, "Isn't it right now, isn't it amazing that we have changed from strangers to colleagues?"

"Huh?" Fonda dropped his chin in shock, I am amazed, you big-headed ghost!

Sure enough, a beautiful woman can't believe a punctuation mark. U U Reading www.uukanshu.com

Fonda, Fonda, you are also a veteran of Hua Cong.

Today, it was shameful and too shameful to have only the house bird pecked at it!

"Under the formal introduction, elasticity." The man stood up and said sternly.

"Hua Wu." The woman put her smile away and said: "Now, you can consider your future code name.

As for your real information, no one can easily transfer it except inside the Bureau of Foreign Affairs. "

"Isn't it okay for Yamen?" Fang Da replied completely deliberately.

"Yes, the Aliens Bureau is directly under the authority, and our authority is much greater than you think."

Hua Wu smiled mysteriously, stretched out her hand and pointed upwards, clearly showing off to him, "Boy, there is someone on top of sister."

Chapter 984: Door-to-door

Anomaly Investigation Bureau, Anomaly Investigation Bureau.

A mysterious department that does not exist in any literal records, and all members are made up of mutants.

Their responsibilities are only one: to manage all the abnormal things in the territory!

As long as it is something that cannot be explained by common sense, it is within the management authority of the Bureau of Foreign Affairs.

However, when the target was pointed at Miracle Company, the Anomaly Bureau still had a kind of helplessness!

When gods fight, mortals suffer.

There are people above who want to find out the hidden power of the miracle and see if they know anything about the mutants.

Is there a violent organization of its own inside?

The head of my house is the other party's person, so naturally he would not refuse this proposal.

It's just a small temptation, not a big deal.

Besides, this is the job done by the Anomaly Bureau. Don't the changers of Miracle Company need to be registered.

Who gave him such a big right? ? ?

"Be friendly when you go, don't put on airs, explain your purpose to the other party, just keep a record.

Our normal work, no one can say anything..."

"What if the other party shirks and disagrees?" someone asked.

"If you still don't agree with this, then it's business affairs, no one's face is good!"

Hearing what the director said, several team leaders looked at each other helplessly and turned and left the office.

"Gan, you have come and tried, are you annoying?" The elasticity who closed the door vomited impatiently.

"Move your mouth on the top, and break your leg underneath, what can I do?" Chaifeng helplessly spread his hands.

"Who allowed the miracle to rise too fast, the strength shown is too amazing!" The ghost fire expression was also full of helplessness.

"Or I'll go!" The female captain standing at the back stepped forward and looked at the crowd and said.

"You? Hanshuang, this is not a good thing!" said elastic.

The ability of Frost is to create and control Frost to fight.

It is predicted that as she grows, she will become a so-called ice mutant, able to control ice and snow.

There is control, damage, and continuous frost damage!

This kind of ability is also rare in the abnormal situation.

Therefore, as long as Hanshuang does not take the initiative to speak, no one will force this matter to her.

This will stand up, what's the situation?

"I and Xiaoxiao are friends, and so is he... I believe that with this love, he will understand our work."

Hearing her justified remarks, everyone felt reasonable.

It's better to have such a relationship than a stranger coming up unexpectedly.

"I'm going." Hanshuang said, going out.

"Wait, don't you bring anyone?" Elastic called to her.

"Bring someone? I just went to visit, why should I take someone?"

*

*

*

At the Miracle Headquarters, Qin Yu, who had just arrived at the company, received news that someone had come to visit.

The person was brought by Xu Hao himself, "Xiao Xiao's friend, Xu Zixin, is also from Shangdu at home."

Hearing Xu Hao's introduction, Qin Yu turned off the flashing map and said with a smile: "Hello, Miss Xu."

"Hello, Qin Dong, I am here to visit you for official business this time."

Hanshuang, that is, Xu Zixin said politely: "I hope you won't blame me for coming without telling me."

"Official business?" Qin Yu cast his eyes on Xu Hao.

The other party shrugged, saying that he didn't know about it.

"I'm a person with a different tone." Xu Zixin said.

Upon hearing the other party's introduction, Qin Yu motioned Xu Hao to leave first, "Leader Xu, I should call you that way, please sit down!"

"Thank you." Xu Zixin sat in front of him.

"What to drink?" Qin Yu walked to the bar.

"Clean water is good." Xu Zixin said.

After pouring a glass of clear water, and taking himself a can of ice-cola, Qin Yu took a seat back and asked: "Are you here for this?"

Qin Yu has not only heard about this department, but it can even be said to have a deep connection with him.

The original plan, as well as various internal materials and rewards, are all provided by Miracle.

However, Qin Yu didn't intervene anymore behind.

Comparing to the abnormal situation, Miracle has enough manpower to solve the trouble, and he doesn't need this power.

Is the other party looking for more sponsorship now?

"I'm here this time to go through the registration procedures for the changers of your company." Xu Zixin said bluntly.

After listening to what the other party had said, Qin Yu couldn't help but laugh.

Come to register for the changers of Miracle Company, did they make a mistake?

"Miss Xu, Miracle is a technological innovation company, and there are no mutations."

"According to the information we have, Captain Hank is a mutant."

Xu Zixin glanced at him and explained: "We have detailed information about what he did on the other side."

"I think you have misunderstood. Hank is in Miracle Town. There is a confidential unit. I can't disclose the details to you."

"The authority of the Bureau of Abnormalities is greater than that of any organization, and any confidentiality is a waste of paper in front of us."

"Is this too?"

A blue projection appeared in front of my eyes, and I saw the confidentiality agreement and the final joint seal.

Xu Zixin's expression instantly sat on wax, it was the joint seal of the twelve members of the Supreme Council.

The unanimous vote on behalf of the Supreme Council is also the highest level of secrecy in the Galactic Republic.

Except for up to twelve people who can view the relevant information, no one can pass.

"Sorry, I was abrupt." Xu Zixin changed the conversation, never mentioning the biggest joke of the different tune.

Before the twelve-member joint seal of the Supreme Council, her so-called privileges were in vain.

"I want to know, who proposed this resolution?" Qin Yu asked amused.

Looking directly at the other person, Xu Zixin's smile was full of irresistible majesty, which made Xu Zixin extremely nervous.

At this moment, she realized that she was in charge of a family with a valuation of more than RMB 5 trillion.

The sole founder of a technology giant who has created countless miracles and can communicate directly with the Supreme Council.

If she can't give a reasonable explanation, Alien Game will stand on the opposite side of the other party.

"I'll leave first."

Xu Zixin picked up the paper and pen, left a name on it, smiled apologetically and walked out of the room.

Watching her walk out of the room, Qin Yuxin said, "We will meet again soon."

Then, pick up the piece of paper and read the name on it.

A completely unfamiliar name that had never been seen before, made Brother Yu a little helpless.

Forget it, I'd better call Lao Qiao and let him solve it.

Today, Barrow also occupies three seats in the Supreme Council.

A little waiter, there is no need to trouble Ye Lao or Zhou Lao, I believe the outside world is also very happy to see this happen.

"Secretary Xu, come in."

When Xu Meixin came in, Qin Yu said in front of her: "We will cut 90% of the funding for the Bureau of Foreign Affairs."

"Nine percent?" Xu Meixin was slightly taken aback.

Cut 90%, not the same as not giving, what is this going to do?

"Yes, do as I say." Qin Yu emphasized.

"Yes, I know the boss." Xu Meixin arranged according to his instructions.

I am the boss's secretary, so I naturally want to listen to him.

Even if you don't understand, just do what he says.

The progress of the technical seminar was orderly, and the adjustments in the details had the final pace.

The next step is to assemble the new production line and put it into production.

While increasing production, Qin Yu also urged the company to open branches in the Barrow and Ross region as soon as possible.

Hancheng is important, and the other two districts are the same. There are also offices in Neon and Wanwan, so we must hurry up.

These two little brothers, there is no need to set up a branch in a projectile-sized place.

Like Hudu, it is enough to set up a special communication office and send one or two people there.

The first batch of battle game pods will be officially shipped in two weeks.

At the same time, there are further graphic descriptions on the official website.

The battle game cabin contains a new generation of virtual reality games, and the inner armor of the body is to cooperate with the new version of the game.

The additional pages of the specific user manual will be delivered to the players along with the game cabin.

One more thing, the spokesperson's shooting and stickers.

At this meeting, the endorsements of the three beauties should also be here.

In this beaming day, Qin Yu received a communication request from Mars.

It was from Yang Chengjun, Brother Mai: "Hey, Brother Mai, how are you doing on Mars?"

"Apart from yellow sand, it's still yellow sand. The **** storm period lasts for six months, so I feel like vomiting when I see yellow."

"Don't say it so ambiguous, it will make people misunderstand. If I remember correctly, you prefer yellow on earth."

"Brother Yu, please, don't mention that word." Yang Chengjun folded his hands in the projection and smiled bitterly.

He can't stand it anymore, how boring can be here?

Bring all your imagination to the limit, plus the tedious eight hours of work every day.

Probably, one-fifth of his real experience.

"Let's talk about it, why do you, the governor of Mars, think of calling me?" Qin Yu asked with a smile.

"I want a console game pod!" Yang Chengjun said.

He came for this. He had known it would be so boring. When he came, he should bring more entertainment equipment.

Now, he desperately needs something to release his depressed emotions.

Other people have their own ways, hangovers, fights, teasing, playing cards or doing things they love to do.

As a manager, Yang Chengjun, the highest official, must maintain sufficient authority to maintain stability.

If he is also like a playboy, who will be convinced and follow his orders.

To suppress nature, we must overcome various difficulties and manage hundreds of people to form a harmonious and stable micro-society.

This life is not easy at all, especially on Mars.

"The next time Immigration departs, the game cabin will be loaded on the ship, and there is enough energy."

Qin Yu intends to customize a privately customized battle game cabin for him to provide energy with advanced energy crystals.

It can ensure that it can be used normally under any circumstances without worrying about power problems...

"Thanks, Brother Yu, you are my life-saving angel." Yang Chengjun said excitedly.

Keng, there was a knock on the door.

I saw Yang Chengjun as a urchin just now, UU reading www.uukanshu.com is instantly tall and mighty, his face is calm, and his eyes are shining with calm wisdom.

"Come in."

"Mr. Yang, the team that lays the pipeline on the ground is having some trouble." The uniform, the female secretary of Hei Si walked in.

"I know, I'll go now." Yang Chengjun said sternly: "Dong Qin, let's talk about it next time."

"Okay, hard work." Qin Yu nodded slightly.

The person set successfully docked, and the two closed communication with each other.

Thinking of Yang Chengjun's face changing in a second, Qin Yu couldn't help but chuckle.

At the same time, he also received news that the spokesperson had arrived at the headquarters.

At this time, the three women were entering the company from the lobby and walking through the gate to the elevator.

Chapter 985: speech

The top floor of the headquarters, the chairman's office.

Qin Yu is here to receive three spokespersons, Zhang Zi, Zhi Yun and Xiao Lin.

"Qin Dong, we meet again."

Zhang Zi's performance is the most relaxed. It's not the first time that the two have met. They are old acquaintances.

Ji Yun and Hyo Rin looked very cautious!

On the one hand, the other party is a big figure that he could not be expected, and on the other hand, the current Smecta has become Hancheng District.

For Smecta, that feeling is to instantly become Pluto from the center of the universe.

Directly kicked out of the nine planets, it became Pluto that no one cares about, comparable to the countryside of Seoul.

Not only the difference in status, but also the psychological gap is more serious!

Otherwise, being selected as the spokesperson this time will not cause a national jubilant event.

The people need good news to inspire people, and Ji Yun and Hyo Rin are favored by the technology giants in Chuo District.

It was just a simple business decision that became Smecta's life-saving straw.

The executives who made this decision at the time did not expect things to develop like this.

But also happy to see it happen!

The approval rate of Miracle Company in Hancheng District in the polls reached 56%, and this deal is a good deal no matter how you look at it!

From this we can also see the status and value of Miracle Company in the hearts of the people!

At least for now, it is the entire Daxia...

No, one of the most valuable companies in Chuo City.

Unfortunately, so far, Miracle Company, including its subsidiaries, has no plans to go public.

"Sit down!" Around the desk, Qin Yu invited the three of them to sit in the sofa area.

"any drinks?"

Qin Yu pressed the answering machine, and after a while, Xiaoyuan outside brought drinks according to the taste of the three.

Perhaps to please Qin Yu, the three of them chose tea by appointment.

They must do their homework before coming.

"This time, I am honored to be able to work with three of them, Idol, the former Miss World. I think this will definitely make fans excited."

Qin Yu came up to compliment the three ladies, they deserved such praise.

Everyone who works hard for life and dreams is worth it!

"Thank you, Qin Dong." Zhi Yun responded in an official language.

It must be mentioned here that since the establishment of the Galactic Republic, Daxia has become the designated official language.

The popularization of Putonghua has become a top priority for the education bureaus of all regions.

What English CET-4 and CET-6 are no longer popular nowadays.

To take the test, you have to test Putonghua Level Four and Six.

If you can pass the eighth level, that is the local hot and scarce talent.

Not only can you get subsidies from the regional government, you can get a certificate before you graduate, and even the salary is top-notch in the industry!

This is all thanks to the too hasty time for the establishment of the Galactic Republic, and Daxia won the dominant power of the Republic.

Become a potential mainstream culture and guide the actual development trend of the entire Republic.

Therefore, I want to go to a high position.

You have to figure out the humanities and customs of Daxia, and the operation process of doing things here.

At least you have to understand what they are talking about!

Otherwise, it will only become a conversation at the table, a laughing stock in a meeting, and a puppet for everyone to play and joke.

Even the whole social atmosphere has become confused.

Everyone is proud of being able to speak Mandarin, being able to speak two sentences of Mandarin, and speaking confidently in front of colleagues.

In the entertainment industry, the most obvious change is Rune.

Just because Mandarin speaks so well, she has once again become a trend sought after by fans.

Although the thigh era has always been a trend, it is obvious that the exposure and popularity have dropped greatly compared to the peak.

Now, Rune, who has won three new endorsements in Daxia, has a tendency to return to the top.

Although, these endorsements are not top-tier.

But it is undoubtedly good news for her, very good news.

In particular, the endorsement of the blue car has brought her huge speech capital, new energy and automobiles.

Beauty and new energy, the two together are ready-made hotspots.

As a result, there was also a frenzy of learning Mandarin in the Smecta entertainment circle.

Learned that Ji Yun and Hyo Rin were lucky enough to be selected to become the new generation of goddesses in "Golden Devil".

The company urgently arranged teachers for them to learn Mandarin.

Those complicated conversations are too late, start with the simplest ones.

For example, "Thank you, Qin Dong." "No, boss." "Great, continue."

"Wait, no." "Handsome, comfortable..."

Although the tone sounds strange, at least it can clearly express what you want to express.

That's enough!

"Do you learn Mandarin?" Qin Yu asked with a smile.

"Yes, boss." Xiao Lin responded softly.

"Boss?" Qin Yu asked in surprise.

"Of course, we are working for you now, you pay the salary, naturally the boss." Zhiyun stumblingly explained.

"Very well, I like this attitude." Qin Yu pointed at her and smiled.

"Boss, great!" Xiaolin said abruptly.

This untimely compliment made Zhang Zi smile slyly, why does the atmosphere look so strange.

They don't seem to be talking about a business cooperation, but it's like their mother is introducing the girls.

No, it should be said that it was a self-recommendation!

"Ah, Qin Dong." Zhang Zi interrupted the strange rhythm of the two men's speech, and said, "Is there anything I need to pay attention to this filming?"

"I know that our new generation of game pods will be shipped in two weeks. Will the time be tight?"

Zhang Zi's focus is clearly beyond her scope of business.

However, Qin Yu would not refuse her kindness, "It's too late, it's just stickers after all."

Such remarks are suspected to belittle the nature of the work of the three.

But with Qin Yu's status today, there seems to be nothing wrong with it.

After all, for him.

Female celebrities are nothing more than expensive playthings with exquisite appearances.

"Then, do we need to prepare now?"

Zhang Zi got up very professionally, pointed to himself and said, "How does it look?"

"It's great, but there seems to be something missing." Qin Yu rubbed his chin, pondering.

Her figure and looks are impeccable!

But, I always feel that something is missing...

"Ah, I thought about it, expression, Shen Yun!"

Qin Yu clapped his hands and said abruptly: "The expression should be more charming, enchanting, sexy, and full of fantasy."

"Yes?"

Zhang Zi rubbed his hands on his thighs, and said nervously, "What should I do?"

"let me help you."

Qin Yu pointed to the suite next door: "Maybe it can inspire you with a different style and inspiration."

In front of Ji Yun and Hyo Lin, the two disappeared behind the door.

The automatic door closed quietly, leaving the two of them looking at each other on the sofa, their expressions full of complex emotions.

What should they do next?

This is a good question!

*

*

*

When Xu Meixin received the call from the boss, it was already dark outside.

Madoka has also left work, and she is the only one still working on the entire top floor. A more correct explanation should be "waiting for the boss to provide all services."

"Go buy some clothes, the size..." Qin Yu took out three pieces of rags with size markings: "Here."

"Do you need to order a meal?" Xu Meixin asked, taking the rags, not surprisingly.

When he personally asked the endorsement, Xu Meixin guessed what would happen next.

Ji Yun, Hyo Lin.

It just happens to be the style and appearance he likes.

If nothing happened in today's meeting, Xu Meixin would be surprised.

After all, before they came.

Xu Meixin has already taken note of the other's brokerage company and asked them to prepare mentally for Jiyun and Hyorin in advance.

The world is relatively fair. Whatever you want, you have to pay.

The influence of "Ghost" is now international.

The company's fees are also implemented in accordance with international top-tier standards.

Not to mention the follow-up influence and huge chain of interests after becoming the endorsement of "Ghost".

Want to win such a high-quality endorsement, as long as three to five years of public opinion heat.

There is no extra effort, it can't be done!

"Well, I want to eat hot pot." Qin Yu said.

"I will arrange it now." Xu Meixin closed the door and walked to her job.

After 45 minutes, clothes and hot pot appeared in the office.

Several people formed a circle, sitting cross-legged on the carpet, eating the Hai Lao hot pot on the coffee table.

All the dishes are Qin Yu's favorite.

So, since the pot was opened, he never stopped his chopsticks.

Xu Meixin sat next to Qin Yu, always cooking his favorite dishes.

Melaleuca belly, yellow throat, blood clot, duck intestines, squid, meat rolls, soft tofu and shrimp slippery.

Each dish takes a few seconds, how does the boss taste it.

Is it a dry dish or an oil dish?

Xu Meixin keeps everything in her heart, there is nothing wrong with it!

Such a capable performance made the other three women look at her frequently, and they were full of admiration for her in their hearts.

Be able to do the work of serving people to this degree.

It is also a rare talent.

At least, none of the three of them can do it.

Zhang Zi has always been the one who was served by people, and the same was true for Ji Yun and Hyo Lin.

Being considerate and not making trouble without reason is already a model of contemporary women.

Is it too much like Xu Meixin?

Is it too much, or envious of her being the closest woman to Qin Yu's side.

In fact, Zhang Zi couldn't say clearly!

Maybe, both.

For a moment, Zhang Zi suddenly felt that he was getting married early.

If a few years later...

Well, she must admit that she thinks too much.

When this little **** reaches the age when he wants to get married, she will already be an old woman.

Maybe it's well maintained and you can find the most enjoyable interest.

But when it comes to getting married!

No matter what, UU reading www.uukanshu.com will not have any real communication with her.

Even Zhang Zi has already begun to think in his mind, what kind of woman can make him think of marriage?

Based on Zhang Zi's two brief in-depth contacts and his understanding of him.

Want to let him take heart, choose stability.

For any woman, it will not be a simple matter.

Because he is such a bastard, and full of fatal temptation.

If the bad man is ranked, then he must be standing at the top of the atmosphere.

Whether it is from wealth, appearance, or figure.

In terms of his personal performance ability, they are all perfect! !

Chapter 986: spark

Cheers and laughter at the dining table, but all the voices of Zhang Zi.

Hyorin and Ji Yun were silent all the time, not as lively and talkatively as they used to be.

Especially Ji Yun, she is often called 'Hua Jiyun'.

But today, she seemed to be gagged by something.

"Zhi Yun, are you accustomed to eating hot pot?" Qin Yu asked actively and caringly.

"Ho, **** ho." Clearing his throat hoarsely, Ji Yun said in a hoarse voice, "It's delicious."

"I'll prepare honey water for you." Xu Meixin stood up.

This time she made a mistake and forgot the boss' hobby.

Looking at the two poor little girls, they must have suffered a lot, and their voices are so dumb.

Go to the secretariat and open the cabinet.

There are a variety of throat lozenges, honey and other throat care products, as well as several cans of different flavors of lubricating oil.

Food grade!

I made two cups of honey water and added two lozenges to it.

After melting away, Xu Meixin returned to the office with a tray.

Seeing the boss who moved from the sofa to the desk, Xu Meixin put the honey water on the coffee table as usual.

Then put down the tray and walked quietly to the suite!

It seems that they are going to live here tonight, Xu Meixin needs to make adequate preparations in advance.

One bed is not enough for five people.

But the fact is that Xu Meixin's worries are unnecessary.

Qin Yu did not stay overnight at the company, he just left late.

It's a holiday now. As a young man with aspirations and ideals, I want to give all the young ladies a home.

How could Brother Yu not come home at night?

It's just that when you go home, you need to struggle for a few seconds, which home to go back to today.

However, this time he didn't struggle, and drove the car directly to Teacher Song downstairs.

Tonight, he is going to learn official language here!

"Wang Wang, Wang~" As soon as he entered the door, Xiao Hei Dou shouted at Qin Yu with his head held high.

The spirit of this little bullfighter is great!

Perhaps it was because every time Brother Yu came, he had to be driven out of the bedroom to the balcony to sleep. Heidou had always been very unfriendly to him.

Until now, nothing has changed!

"Hi, Black Bean." Lifting his foot and hooking its abdomen, the dog flew directly.

Reaching out, Qin Yu hugged it in his arms and walked into the house with its slightly wrinkled skin.

The two **** eyes are full of questions!

who am I? where am I? How did I get up?

"Qin Yu, is that you?" Song Yuqiao's voice came from the room.

Qin Yu didn't tease her, but responded with a smile: "It's me."

The door opened, and Song Yuqiao rushed into his arms sleepily, with a happy smile at the corner of his mouth.

When all he was waiting for fell asleep, Song Yuqiao thought he would not come tonight.

"How come, I promised you." Qin Yu said softly.

"You have worked overtime until now, have you eaten?" Song Yuqiao asked concerned.

"I have eaten, and ordered a hot pot takeaway with my colleagues who worked overtime." Qin Yu casually threw the black beans in his arms to the sofa.

With a bang, Heidou fell on the sofa dumbfounded.

Holding Song Yuqiao who was curiously looking back, Qin Yu strode towards the bedroom: "Wait, let's rest early."

As he entered the door, Qin Yu hooked his foot back, and the door was taken home.

Heidou, who hurriedly jumped off the sofa to chase him, was still a step late, and his ugly face banged on the door.

"Wow~"

"Black beans seem to be calling."

"Now is study time, it has to stay outside the classroom."

"Are you sure we are studying?" Song Yuqiao's nasal voice sounded heavy, as if he had a bad cold.

"Of course, Teacher Song, otherwise you think you are doing it?" Qin Yu's voice was bright and crisp, full of vitality.

"I thought...this should be counted as after-school tutoring."

"Well, just as an after-school tutoring, I will be paid."

"Really? I'm a famous teacher, and the price of 1V1 guidance is very expensive."

"For me, the most feared thing is expensive! I'm just afraid it's not expensive enough..."

*

*

*

Working day and night, Brother Yu still went jogging before dawn.

When he returned home with his breakfast, Mr. Song Yuqiao, who did his best to complete the night tutoring, was still asleep.

Seeing that it was impossible for her to wake up in the morning, Qin Yu had eaten breakfast and left a note on the table before leaving again.

Compared to leaving a message on Weibo, Qin Yu prefers to express his emotions with pen and paper.

The tangible, visible, and ink-scented text can trigger sight, touch and smell in an instant.

Go straight to the heart and let the words convey the emotion you want to express.

This is a cold electronic product that can never be surpassed.

Therefore, all the women he values.

Every time he left, he would leave a handwritten note, even if it was just a few simple words, a funny symbol or the like.

It's better than the boring tricks copied and pasted in WeChat, the boring words of affection.

Even the punctuation marks in each sentence radiate false signals!

Compared with Qin Yu's busy schedule, the post-disaster reconstruction of Xiawa Village, with the support of Lu Qing, has made amazing progress.

In just two months, Xiawa Village has completely changed.

The first is the cement road in the village, which has been re-widened and paved in front of every house.

The second is the dilapidated building, which can be repaired and reinforced.

If it doesn't work, just push down the heavy cover.

Although it is not a small two-story building with reinforced concrete, it is countless times better than the previous dilapidated building.

At least live inside, don't worry about bricks falling off the top of your head.

The entire reconstruction project was the Miracle Charity Fund contacted by Lu Qing, who asked them to match up and find a reliable construction team to contract the project.

Supervise the use of funds to ensure the quality of the project!

After all, it is difficult for a small place like this to attract capable contractors even with policies.

This kind of project is neither profitable nor well-known.

The project has to be done well and solidly.

As long as there is a problem, there may be a big thunder behind it, and it will be blown up directly.

It's thankless, that's the kind of work that I'm talking about.

I really want to let Xiawa Village find it by myself, or find some pheasant contractor team if he decides.

It is conscientious if you can give you practical materials. Don't think about the design and quality.

Part of the money is provided by the village, and part of the support is provided by the township and district.

The surplus...Lu Qing paid for it out of his own pocket.

More than 160,000, which is not a big number for her, but it is a huge love for the village.

When the project ended, the village wanted to give her a pennant, but Lu Qing refused.

"The secretary, don't thank me, I am not a great saint. I just feel that I have arrived in Xiawa Village and become a teacher for the children.

This can be regarded as a kind of fate. Since I have encountered it, in addition to such a big disaster, I should do what I can to provide some help. "

"If you guys really want to thank me, you can support your children in studying in the future, and let them do less work in the field."

The party secretary naturally agreed, and immediately patted his chest to assure Lu Qing.

In the future, if anyone opposes Wawa going to school, his party secretary will personally come to the other party to make sense.

After all the finishing works were completed and only a few days after leaving school, Lu Qing returned to the abandoned city again.

At this time, it was the Miracle Company, the first batch of game cabins: Spark.

The big day when the official shipment is out of the warehouse.

Discussions about "Spark" on the Internet pushed Miracle Company to the top of the hot search list within an hour.

The number of participants in the discussion shown at the end of the topic is: 200 million.

Players who bought it are waiting impatiently to receive the goods, and they have to look at the real-time logistics information every few minutes.

Those who haven't bought are actively discussed on the Internet, waiting to see if there are any big guys who get it, and come out to show off.

It's best to come to a detailed explanation and tell everyone what is different about "Spark".

What kind of style does the battle game loaded in it belong to?

Is it the mecha battle that everyone discussed before, what is the quality of the picture, and who is more authentic than "Ghost"?

And the most important point, how does the actual operation feel?

Wait and wait, wait and wait!

Until 3 o'clock in the morning, the joke of "logistics collective missing halfway" appeared on the forum.

Only one player suddenly left a message in the forum: "For Xinghuo, I can only say four words: Miracle Niubi!"

"That's right, there's one more sentence: I got the Spark, didn't buy the evil pen for the inner armor, right? Ha, ha, ha..."

After saying these two sentences, the boss disappeared, the kind that didn't hear from how to call.

The angry and unidentified player yelled at the following: "Half of talking, you don't have a good eye for a son."

Be quiet, everyone seems to be missing.

Even the big talkers who were active on the forum in the past are missing.

until.....

"Hi, everyone, I'm your little anchor, Cheng Xiyu." On the note, Cheng Xiyu had a long-lost live broadcast.

LSPs flocked to the crowd, and the popularity was over 10 million in an instant.

The name of the first sister in the live broadcast was not called for nothing.

Even if there is less time for live broadcast now, there are more and more opportunities for Cheng Xiyu to show up.

News, platforms, interviews, various cocktail parties, business meetings, exchange meetings, etc.

All of them could see her, appearing in the venue.

And, always stand in the C position!

It is precisely because of this that Cheng Xiyu's appeal has not decreased but increased.

However, this time has not spread to the game circle.

Until Cheng Xiyu turned the camera behind him, a brand new pink customized game pod appeared in the screen.

"Fuck, this is Spark." Seeing the Jiyun goddess sticker on the side of the game cabin, players immediately recognized its origin.

"Yes, someone in the barrage has already said its name, Spark, the latest battle game pod released by Marvel."

"And this." Cheng Xiyu turned the camera again, aiming at the dark black iron box on the chaise longue.

"It fits the inner armor, the all-around space suit, and 10 million people walk."

Regardless of whether it is affordable or not, netizens know a lot.

Know astronomy from the top, and geography from the bottom.

Before and after five thousand years, you can understand everything you can mention.

Let's not say whether you are good or not. Anyway, you don't need to be good at astronomy and geography in your daily life, and you can do everything!

Pretending to be a beep, what are you more serious?

Chapter 987: Play against

In the hotel, Qin Yu was watching the live broadcast with Lu Qing in his arms.

Guilty conscience!

Impossible, it's impossible to have a guilty conscience in this life.

If the legs are soft, it is because you have eaten too much seafood, and the moisture is too heavy, so be careful!

"It's so beautiful, do you know him?" Lu Qing said, pointing to Cheng Xiyu in the picture.

"I have met several times and have in-depth cooperation with the company, which can be regarded as the company's external image promotion ambassador."

Qin Yu said solemnly, staring at the live broadcast without blinking.

It's like listening to Cheng Xiyu's explanation carefully to see if she is qualified and incompetent!

"Xinghuo can choose a third party to watch the game, but it also needs access to the game cabin.

In addition, players can take photos of their own battle records and post them on major websites and forums. "

"But so far, we haven't seen the corresponding video. I believe everyone is still addicted to it."

But, but, but...

but? Everything has a but, hurry up and serve the main course!

No, but I can get it off, do you hear it after you get it off?

Hurry up, I will sell the house with a video.

Go and go together, sell iron and buy equipment, I must live the addiction!

The barrage was noisy, and the little anchor smiled happily: "It seems everyone can't wait.

I just mentioned that the players are addicted to it, there is no battle screen to enjoy.

but..."

Here comes, mom, it comes.

Sure enough, let me wait until the video is on, and the carriage is ready.

Lu turns to fans, conscientious anchor!

"However, I specifically found a professional player and recorded my own fighting video to show everyone."

The little anchor shook his hand triumphantly, and said loudly, "Here is here, he is here...Connect the long-legged Baozi Great God."

The live broadcast screen was divided into two, and Tang He went online: "Hello, everyone, I am a long-legged bun. Just call me a bun."

The barrage immediately swept the screen, and Tang He was obviously a little nervous.

According to what I said before, ignoring the barrage, he said: "Thank you sister Xiao Yu for the invitation. I am fortunate to be able to share my battle video with everyone."

"Xinghuo's battle can be said to be 100% restored to the control of the monsters. The mecha I control is the standard armor model of the inland squad of the Church of the Miraculous Demon, Xingtian..."

"Bao, hello, how about telling us about this mecha first?"

"Okay, let's talk about the setting of mecha first. Xing Tian's style is biased towards battlefield assaulters."

Following Tang He's introduction, the analysis picture of [Xing Tian] is cut into the screen.

"Sacrificing 60% of armor coverage is to reduce weight, enhance handling and increase speed.

Except for the important heart, chest, and abdomen positions, the thickest part of the armor is the power compartment and shoulder armor. "

"The strengthening of the power cabin is to prevent the armor from losing power. I believe that everyone does not want to suddenly become an immovable iron lump on the battlefield."

"The shoulder armor is to protect the robotic arm and the missiles inside.

Of course, during the battle, this place will also become a key attack target.

Once it is penetrated and causes an explosion, there is no need to continue the fight, because the opponent is blown to pieces, right! "

Baozi explained the characteristics of [Xing Tian] to fans in simple and popular terms.

Finally, with Cheng Xiyu's lead, the screen was cut into the 'battle recording video.'

I rely on, so realistic picture quality.

As the picture unfolds, the technologically dilapidated mechanical city comes into view.

Towering chimneys, orderly speeding cars in chaos, huge holographic projection advertisements.

Cyberpunk!

Some fans called out the background setting of the city, and more and more people chanted 'Handsome!'

In the screen, the camera first lowered his head and looked at his palms and arms.

White lights gleamed beside him, and each gleam represented a new player online.

Baozi didn't pay attention to the online players, but looked around looking for something.

Soon after, he locked the target and walked to the shop on the side of the road.

It was a gun shop selling weapons, and the metal decoration at the door was bright and shiny.

Standing in front of the metal decoration, Baozi could see his appearance.

Rough, bold, with a cross scar on the center of his brow.

The eyebrows are thick, like a line.

Throw him into the wild, and some people believe that it is a savage!

This image is absolutely stunning, 2333.

I remember that although the buns are a little fatter, they are handsome and very white. What the **** is this black face?

Fans of steamed buns poured into the live broadcast room, complaining that the official image was too deviated.

"It seems that the image is randomly disguised, no wonder there is only morphological data detection when entering the game, no faces."

The bun in the picture is talking to himself, not paying attention to his looks.

Instead, I started to understand the details of the game's, which caused a series of "666" to appear in the barrage.

The focus of the Great God and ordinary players is really different...

But in fact, Baozi was also complaining in his heart, but knew in advance that the video was going to be broadcast.

Therefore, if you have complaints, you can only hold it in your heart. This is a good opportunity to show it to the outside world. He doesn't want to mess up.

The theme this time is popularization, to take players into the game from a professional perspective, not sand sculptures.

After today, when the buns do video and live entertainment in the future, they can add sand sculpture style.

Entertainment to death, the environment is like this...

Next, Baozi started to follow the instructions of the smart assistant and went to the mecha shop to receive the novice gift package.

The choice of the novice gift package, I thought there was only [Xing Tian], but I didn't expect it to be very different.

In addition to the standard [Xingtian], players can also DIY by themselves.

Equipped with weapons, armor, various types of thrusters and detailed adjustments, there are at least hundreds of different options in a simple calculation.

If you want to see two [Xingtian] mechas that are exactly the same, unless the other party directly selects the standard version.

Of course, this is also the safest option.

Although DIY is good, it is full of uncertainties.

Drive it and it blows up by yourself, it is also your own pot, the store will not be responsible for the after-sales three packs.

Even if you only change one screw, all after-sales will be cancelled.

In addition, you can also choose high-power weapons.

Such as laser cannons, large-caliber anti-ship snipers.

Most people don't even talk about using that stuff, but it takes a lot of effort to carry it.

In short, there are all kinds of strange choices.

After a brief understanding of Baozi, he decisively chose the standard version.

This is the mecha he is most familiar with, and it is also the key to his promotion as soon as possible.

Why do you want to advance quickly, because in accordance with the introduction of the intelligent assistant.

Mainly able to hit the Silver level, he will have more choices, and he will be able to see a brand-new fission power armor.

And the Mystery Mecha Prize...

This mysterious prize has made all Gaowan gear up.

Everyone wants to be the only lucky person, and Baozi is no exception.

Obtain mech and equip it.

Baozi chooses to enter the battle, and a brand new interface immediately pops up in front of him.

Please choose the target you want to challenge: a row of lists with names appears in front of you, and at the bottom is a quick random match.

At the bottom left, there are maps, weather, and matchmaking options.

The map has deserts, storms, neighbors, islands, rainforests, airborne and planetary belts.

Only the airborne and planetary belts are currently in a gray inactive state.

The weather has four options: normal, severe, extreme, and hell.

The final duel is a **** battle with reincarnation.

Seeing the four big red characters of 'Blood War Reincarnation', the barrage was immediately swiped up: Blood War Reincarnation, this must be chosen.

But Baozi did not choose **** reincarnation as everyone expected.

He first chose 1V1, the map was desert, the weather was bad, and finally he clicked on random matching.

Huh!

The picture changes, Baozi is in a desert.

The soft sand surface under his feet caused his body to sink.

Baozi quickly moved his legs forward, and stepped his ankles into the sand in the afternoon.

"Fuck, is it so real?" Bao Zi was shocked.

What shocked him was the audience in front of the screen, what was behind the bun, was it a sandstorm?

Steamed bun, move quickly, the sandstorm is coming.

This Nima, is the bad level so cruel?

The buns are so miserable, but why do I want to see the **** class more.

I want to see +1, 2333...

When the barrage was swiping, Baozi also saw the sandstorm coming from behind.

In fact, he didn't see it, he heard it.

The howling gale winds up the yellow sand, forming a terrible roar that covers the sky and the sun, which is daunting!

"Fuck!" Baozi screamed and ran away.

I kept complaining about it, what the **** was this mode, the enemy had to hang up before he showed up.

Looking back at the sandstorm again, Baozi suddenly found that just in front of it, a little metallic luster was flickering.

Take a closer look, "Fuck, won't that be my opponent?"

At this moment, the other party is wearing fancy DIY armor, dancing and rushing towards the bun with the help of the propeller.

Seeing him waving his vague head, he must be very happy in his heart.

Confirming that it was his opponent, Baozi quickly accelerated in ecstasy.

This Nima, is there such a good thing?

Now there is no need to worry about being eliminated, as long as you run faster than your opponent, you will win.

As a result, the steamed bun uses the maximum horsepower, does not hesitate to consume energy, and jumps forward like the wind.

After only about seven or eight hundred meters, a melodious reminder sounded in the ear: The player is dead, congratulations to the long-legged buns for their victory!

The picture freezes, and the yellow sand storm disappears.

Right in front of the settlement screen, Baozi won 10 victory points.

With a flash of light and shadow, he returned to the preparation city again, waiting for the next round of battle.

The barrage of refreshing the screen spit out like crazy: This Nima is also OK, won't you be promoted automatically if you open a hell?

Mentally handicapped system, I can do it too!

In the screen, UU reading www.uukanshu.com Baozi opened the summary again: "I was very lucky last time, but I still have to change the mode.

I was lucky just now. I was sent to a location farther away from the sandstorm. If the locations were swapped, I would lose.

At this stage, the player does not have the ability to withstand bad weather, so we change to ordinary, the extreme and **** behind, and we will consider it later. "

After selecting, click Random Match again.

The bun entered the desert again, and the endless yellow sand was still in front of him.

A kilometer away, there was also a [Xing Tian] that found him.

There is no communication, the grenade bin on the opponent's shoulder rises at a 45-degree angle, dong dong dong...

The flames are everywhere, and the battle begins immediately!

Chapter 988: reform

The battle ended with the victory of Baozi, and the experience accumulated in the evil demon made him comfortable in the battle!

However, there is still a long way to go from bronze to silver.

Popularization came to an end after the third battle.

The live broadcast of the small anchor also ends here, but it has caused great repercussions on the Internet.

In particular, the role of the inner armor of the body makes the players shout "shadow."

Isn't this krypton gold in disguise?

Buy 10 million equipment, you can have a better sense of experience, the most realistic control and combat perception.

Ordinary players can only do stream of consciousness, engage in DIY, and make soy sauce throughout?

In this regard, Miracle still maintains his cold style and will not reply.

However, after a post about "Games or Future Wars" turned out.

The players realized that their thinking was too superficial.

As stated in the post, isn't this the mecha reserve?

Having the inner armor of the body is equivalent to the actual operation of the mecha.

After thousands of game battles, the accumulated experience...

Good guy, I'm a direct good guy!

Then, someone found the relevant loan business in the business of the local bank.

The loan time limit is 20 years, and the amount to be repaid in the future is even more exaggerated to an outrageous 15 million.

But this undoubtedly provides a precious opportunity for ordinary people who are unable to purchase the inner armor and dream of becoming a mecha division.

As for whether to settle for the status quo or take a fight, it depends on his own choice.

The loan process is not complicated, but the conditions are very demanding.

Must be in the top 100 on the Spark List, or a member of the monster fleet mech.

How difficult is it to reach the top 100? Let's talk about Spark's orders, which are already three months later.

To get the game pod, you have to compete with millions of players for this one hundred places.

Players who entered early have accumulated a lot of combat experience.

Maybe they also replaced powerful firepower equipment with their hard work.

Not to mention that there are an amazing number of advanced players who are matched with the inner armor.

Want the latecomers to get the upper hand, and suppress the forerunners and advanced players who have the resources, awareness, skills and abilities.

Ranked among the top 100, the difficulty is by no means less than that of 985 schools.

Let's talk about the monsters' fleet of mecha units. The probability of picking one in a million will tell everything.

But there are still many people who are tempted by this, and even parents support it.

Because of the official announcement made by the Yamen, players with outstanding performance will be specially recruited in the future.

The most basic condition is to have the body and inner armor, and the yamen do not lack theoretical experts. What they need is the actual combat group.

As for the special recruitment department, it has not been announced at present, and only players who have been specially recruited can understand the inside story.

In terms of treatment, one of them relieves the worries of ordinary families!

15 million rewards will be provided to the special recruitment target at one time, and there will be normal salary and various subsidies in the future.

Although it sounds a bit like a settlement fee, it still can't stop people's enthusiasm.

For a time, major banks also began to provide related services.

At the same time, Miracle Company openly recruits outstanding players from the public.

Although no money is provided, you can get the exclusive right to use the body A after work, and you don't have to bear any loan burden.

In addition, there is a salary that can be taken directly, 30,000 yuan per month.

It sounds like a loan, and it's more cost-effective to sell.

At the same time, the Ministry of Education issued the guidance of "Strengthening physical fitness training from primary and secondary schools, adding physical fitness classes and related majors".

What kind of weird event that the physical education teacher is sick today, tomorrow, and the day after tomorrow, will never happen again!

In addition to arts and sciences, physical fitness has become another channel for promotion.

Strong strength and strong body are capital, and it is no longer a dream to take physical fitness to the pinnacle of life.

Such a vigorous reform has even affected Xiawa Village.

Lu Qing received a call from the old secretary and asked her if she would like to open a physical training class.

After all, the above is all below, so I have to do it.

"Is there really a way out for physical fitness?" Lu Qing threw the question to Qin Yu.

Doesn't it mean a waste of resources without asking people who know the inside story?

"Yes." Qin Yu nodded.

There is definitely a way out for physical fitness, but what is the probability that this path will be successful is open to question!

At present, although the equivalent formula of 15 million = 1 mecha division is given.

In the end, the price paid is far more than this, the mecha, various consumption, and maintenance.

Clothing, food, housing, transportation and salary are not included.

But even with such a high price, the final cultivator is, in the final analysis, a major soldier of a special unit!

It just sounds taller: the mecha division.

They only accounted for the heat, just like the IT fever of the year!

Everyone ran to learn IT, and the publicity everywhere was about the huge employment index, the talent gap, and the good salary.

The first few batches can still be taken up. When the third and fourth batches entered the market, they suddenly realized that they seemed to be late.

There is a flood of talents, and the selection criteria and requirements are getting higher and higher.

So that those who rushed late can only become slaves at the grassroots level in society.

Not reconciled, I can only take one step at a time!

So much effort and devotion, plus age is not young.

At this time, another choice is to be made, success or failure is still different, at least being a code slave will not starve to death.

The current physical heat is almost reappearing in the past!

The only difference is that the demand base of the two is just like the sky.

Go to the deep space of the universe and penetrate into the subspace.

Either way, it is not easy for today's human beings.

And it needs a steady stream of troops to continue to invest to maintain the progress of the project, just like the Weeping Band.

Because of the long-term escape and unable to obtain new blood, they even lost their genetic modification technology.

If it hadn't happened to come to the earth, in a few centuries, the weepers would surely perish under the endless pursuit!

I have to say that the weeper's luck is good.

Although in the previous centuries, they had never been favored by 'lucky'.

But this time, maybe it's very peaceful!

Weeper, transferred.

"Since even you said the same, the few troublemakers in the school might be able to change their choices."

Lu Qing jumped out of bed thoughtfully, went to the computer desk and opened the notebook.

She needs to check some information and record it so that she can communicate with the children's parents.

In fact, the most difficult thing in Xiawa Village is not the education of the children!

It is how to maintain good communication with parents so that the elderly understand the importance of learning.

How to make your own efforts not be defeated by the phrase 'the big deal stays and farms'.

"Do you really want to work now?" Qin Yu hugged her from behind and moved about unfaithfully.

Lu Qingjiao smiled and dodged, "Don't make trouble, you have been asking for it for two days."

"But we only have five days...now, there are only two days, 11 hours, 23 minutes and 15 seconds left."

"Then I only need an hour, okay?"

Seeing that she was so sensible, Qin Yu was about to nod her head and the phone rang.

The smile on Lu Qing's face receded, looking at Qin Yu and reluctantly said, "It seems that this time someone is wasting more time."

"Maybe it's just normal communication and wait for me." Qin Yu said an excuse that he didn't believe him, and turned to the balcony.

When he came back again, Lu Qing had put clean clothes beside the bed.

I also sat at the table and devoted myself to work.

"The clothes are on the bed, the keys are at the door, and the shoes are already wiped. Wipe them when you go out." Lu Qing said without looking back.

Walking behind her, Qin Yu bowed her head and kissed her on the head, picked up her clothes and walked to the bathroom.

I took a shower and changed into clean clothes.

Qin Yu didn't bother Lu Qing any more, and quietly closed the door and walked out of the room.

Put on your shoes and brighten it on the shoe polisher. Qin Yu, who picked up the key, stood in front of the standing mirror and smiled slightly: "It's still so handsome!"

Perfect, go!

The red Rafa is like a horse that can never be conquered.

Exuding a hot breath, he roared and ran into the distance.

When waiting for the red light, Brother Yu met the young lady who hit up again.

The young lady with super kawaii interior lowered the window and knocked on Brother Yu's glass.

Then he threw a piece of paper in from the gap, made a call gesture to him, and blinked sexy.

The currents crossed, Yu Ge opened the stalker map and it didn't light up!

He crumpled the paper into a ball and threw it into the cartoon trash basket of Central Control.

Before the lid is automatically closed, you can see that it has been filled with various cards and small pieces of paper.

Ordinary strike-ups have been unable to cause his mood swings.

If you encounter a good family who can light up the map, fit his personal aesthetics, and have interesting specialties.

Brother Yu doesn't mind having a 419 match with the other party!

It can be changed to this kind of goods that can't even light up the map, and Yu Ge is lazy to open the 'scan'.

Tens of millions up and down every minute, can time be wasted?

When he came to the company and threw the key to He Wu, Qin Yu came to him with a smile on his face: "Old He, it looks good!"

Today, He Wu and Qin Yu stand together, like a thin and strengthened version.

In layman's terms, it is a thief fat, a fat fat!

The size of the two is not much different, and now He Wu is only a head taller than him.

This figure is more and more in line with his professional positioning.

Something is really going to happen. When you get off the bus, the other driver has to laugh out loud and say enthusiastically, "Big brother, are you okay?"

"I'll be back, everything is arranged at home?" Qin Yu patted his arm and motioned for him to go with him.

"Well, everything is fine with UU reading www.uukanshu.com." He Wu's character is still the same.

The word cherishment is like gold, this is Qin Yu, and the only thing he hears is the word "um".

"That's good, do you understand the current situation of the company?" Qin Yu thought quickly after entering the through elevator.

Should he continue to stay in his current position or transfer him to RRT?

Two people with Mark are responsible for the surface armed forces of Miracle Company.

Regarding trust alone, even though they both use 'loyalty cards,' Qin Yu still prefers He Wu in his heart.

Non-my family, its heart must be different!

Even if there is a systematic guarantee, subconsciously, he will be closer to the yellow-skinned He Wu.

At this point, data alone cannot be changed!

Chapter 989: Courage

After all, he still has too few people available, and he is reluctant to let He Wu go.

In fact, in daily life, there are fewer and fewer opportunities for He Wu to drive.

In the company's business activities, there are drivers on duty!

Outside, Brother Yu basically only runs supercars...

Cough, send my sister home!

Therefore, there is no need to get a place for the driver.

Just tethering He Wu to his side, no matter how you look at it, it's a waste of resources.

"Old He, do you want to go to RRT?" Qin Yu asked him suddenly, leaving He Wu unprepared.

"It's okay, you can think clearly before answering me, now we should set off."

While they were talking, the two had already reached the top of the building, and Qin Yu's personal speed car was parked on the tarmac.

Reaching out and pressing on it, the car door slid to the sides and opened, like flowing water.

"This is the new speed car developed by the company?" He Wu sat in the co-pilot curiously.

"Yes."

Qin Yu nodded and said again: "Kirin, you can set off."

Stealth, smooth acceleration!

The speeding car drove straight towards Hudu, and finally landed in Miracle Town.

"You can move around freely and tell me the answer when you leave." Qin Yu said to He Wu when he got out of the car.

Leaving him alone, Qin Yu took a rail car to the administrative building.

Li Xiao was chatting with Watson on it, waiting for the arrival of his righteous master.

"Brother, Watson." Pushing the door and entering, Qin Yu opened his arms enthusiastically towards the two.

"Haha, Brother Yu." The younger brother stood up to greet him.

Patting his back, Qin Yu let go of him and walked towards Watson.

"No!" Watson reached out and pressed his chest to avoid him getting close to him.

"Are you sure you have the heart to reject me?" Brother Yu looked at her sadly.

"Yes, I'm sure." Watson said back while shaking his head.

"Well, I was really hurt." Qin Yu threw his body onto the sofa.

Tired, destroy it!

"Brother Yu, what have you been up to lately, don't you contact me when you go to Hudu?" Li Xiao interrupted the two of them.

His time is very tight, and he will go to the city for a meeting in an hour, and he will report the results of the meeting to him.

"Half an hour ago, I was still in the abandoned city." Qin Yu said solemnly.

"Don't be kidding, you came here as a spacecraft?" Li Xiao obviously didn't believe it, and joked with a smile.

"It's not a spaceship, it's a speeding car." Exposing the terminal on his right wrist, Qin Yu stretched out his hand and waved forward.

The projection of the speeding car appeared in the room, and Li Xiao's eyes almost fell out.

"Fuck, what are you kidding?" Li Xiao pointed to the front projection, "Where is the holographic projection?"

"Do you know this too?" Qin Yu asked in surprise.

"Understand, I heard people mention this information before, and I remember it." Li Xiao clicked on his temple.

Then point to the front projection again, "Can I try it?"

"Here you are." Qin Yu took off the ring and threw it to him, motioning Li Xiao to put it on his middle finger.

Putting on the ring, Li Xiao cautiously stood in front of the projection and tried to wave his hand to the left.

The projection began to rotate in place, presenting a 360-degree dynamic picture with no dead ends.

Close your hands up and down and pull outwards.

The speed car was immediately disassembled into individual parts, and a detailed logo brief appeared.

Reached out and grabbed the door of the car and pulled it into his arms.

The other parts were shrunk and moved back, and the door stopped in front of them.

Li Xiao gestured to the frame and stretched the oblique angle to both sides, and the door of the car was immediately enlarged several times.

The introduction, which was originally only a few times, has also become a detailed introduction!

"It's enjoyable, it's too convenient." Li Xiao waved his hand and tried to close. This time he was unsuccessful.

Taking off the ring and returning it to Qin Yu, Li Xiao asked expectantly: "Brother Yu, is this thing in stock?"

"Internal beta, it will take a while before going public." Qin Yu said.

"Pity."

Li Xiao shook his head regretfully, staring reluctantly at the controller he put on his **** again.

In just two minutes, Li Xiao fell in love with its comprehensiveness and convenience!

If everyone has a terminal, how efficient and fast the communication between each other will be.

"It will definitely become popular in the future, and the company has only one ultimate goal of developing products."

"Profit!" the two said coincidentally.

"However, I am also a shareholder of the company. Would you like to provide me with a piece of fun first?" Li Xiao asked with a smile.

"No problem, President Hua, prepare for us Li Dong!" Qin Yu looked at Hua Sen and joked.

"Okay, you guys talk first." Watson took the opportunity to leave.

When the door was closed, Li Xiao's expression became serious: "Brother Yu, you know that this time the situation is a bit special, and miracles are not the goal."

"I know this, otherwise I won't talk to you." Qin Yu smiled and motioned to him to stop being nervous.

"But in any case, the company's development progress is indeed seriously affected. You have to know that every day of delay is equivalent to a loss of hundreds of millions."

Hundreds of billions of funds are placed in the account, which can neither circulate nor create value.

This is a loss!

Not to mention handing the money to Jiang Luo, such a large sum, just a few hundred million dollars in daily income for any investment.

What's the matter if you just press and do not move now?

"I'm already urging, but now all companies are facing the same problem. If the miracle is released alone, it would be too conspicuous!"

"What is conspicuous, other companies are other, and miracles are miracles. Besides, does it receive less attention from others?"

Hearing what he said, Li Xiao could only smile and shook his head: "I know you are right, but this is not on the cusp."

"Brother, I understand what you mean." Qin Yu interrupted him and patted him on the shoulder: "But you have to understand, don't wait for me!"

"I don't care who is stuck, I will see the approval at the end of February." Qin Yu said straightforwardly: "Otherwise, he will explain to the above himself!"

Hearing what Qin Yu said, Li Xiao felt that there must be something in it.

I am afraid that the project of the Ecological Training Center is not that simple.

"Brother Yu, you vote with me, do you give your full support?" Li Xiao gritted his teeth, as if he had made a certain determination.

"It's not all-out, it's all-out, even if you don't have any strength!" Qin Yu said confidently.

Why was the Shennongjia training camp approved? The sudden appearance of Xingyue is a wake-up call for everyone.

The people are immersed in unnecessary entertainment, and they have not forgotten the turbulence caused by the appearance of Xingyue.

The abilities of the interstellar warrior, the power armor that it controls, are all what the above wants.

In addition, the cultivation of immigrants and fighters should also be accelerated.

The interstellar era came so suddenly, it was unprepared, especially the appearance of Xingyue.

If it weren't for those robots that descended from the sky, has the earth now been ruled by Xingyue?

The unknown crisis is shrouded in the heads of all mankind.

Don't forget, there is also a "star gate" that is constantly open on the moon. '

Who would dare to say that nothing strange would come out of it?

Educational reforms, physical selection, and special recruits worth 15 million.

These are all preparations for war!

The five King Kong-class warships that were originally planned to be dispatched, except for the Suiren which has already set off.

The directions of the remaining four ships have all changed their minds.

Leave it in low-Earth orbit and load it with the strongest weapon system Marvel Company can provide.

There is no need to say anything. From this latest plan, Qin Yu has already seen the above thoughts and worries.

Another Xingyue, suddenly appeared in the waters of the Central District!

There was nothing worse than that. The short-lived appearance of Xingyue that day caused the riots that caused hundreds of deaths.

If it happened again in the Chuo District, it would be a catastrophe of the century for the newly established Galactic Republic!

Not fully armed, firepower coverage, how can you feel safe.

All the changes and measures that have taken place in these short months are all based on this point.

Nowadays, equipment, weapons, and foundation.

The overall framework has been built by Miracle Company.

The only thing missing is people.

When the first batch of mecha divisions are in place, the Miracle Company will immediately initiate an exploration to the "Star Gate".

At that time, Kenny will personally join the fleet and lead them to the unknown space as a guide.

That is a brand new field, what a glorious journey it will have!

Qin Yu couldn't wait to start the association and explore the mysterious and wonderful unknown space.

"Are you leaving?" Li Xiao looked at him in astonishment.

This is not a good idea, the Miracle Company cannot lack his presence, and the rest of the people, Sanqin Hui, also cannot do without him.

It seems that many things don't require him to appear in person, and most of the time it is just a symbol, an invisible person.

But it is indeed a well-deserved pillar, he is able to keep on track in everything.

But once the pillar collapses or leaves, everything built on it will be vanished.

"No, I will use this." Qin Yu shook the helmet beside him, motioning him not to be so anxious.

How could Qin Yu leave, here are all his ties.

What he cares about, what he cherishes, everything is here.

How could Qin Yu leave these behind and ran to an unknown space as an explorer.

Don't forget, he still has unfulfilled dreams.

"Give thousands of girls a home." He shouted out his great dream in unison, Li Xiao couldn't help but slumped on the sofa with a smile.

"The imitation ecological training center will officially reopen tomorrow."

Seeing him laughing and gaffey, Qin Yu only thought he was joking: "Don't joke with me, I know your difficulties, just convey my words to you. UU Reading www.uukanshu.com"

"I'm not kidding."

Li Xiao sat up straight and said with a smile that was serious: "I'm serious."

Although there was still a slight smile on the corner of his mouth, Qin Yu could see that he was serious.

"Can you handle the pressure?" Qin Yu asked intently.

"Brother Yu." Li Xiao slapped him on the shoulder and said loudly, "Who do you look down on?"

"I can't resist this little pressure. How can I mess with Li Xiao in Hudu?" Li Xiao said grievingly, and Li Xiao got up and adjusted his suit.

"Okay, that's it. The fence will be removed tomorrow, and you will let people come in for construction."

Patting his chest, Li Xiao pointed at him and said, "Leave the rest to me."

Chapter 990: set sail

Sending off Li Xiao, Watson happened to return to the office, "How is the talk, what do I need to do?"

Qin Yu shook his head and said, "Work will start tomorrow."

"Negotiated?"

Watson looked at him unexpectedly. When talking with Li Xiao before, he looked embarrassed.

The boss is really different from himself.

"Li Xiao will take care of the specific matters, you can just start the work." Qin Yu did not explain the details.

Specific circumstances, as the project progresses, Watson will naturally understand the inside story.

Now, he has to enter "The Scary Demon" to see.

Opening his eyes, the templars on both sides were already kneeling on one knee.

The lowered head symbolizes surrender.

Without leaving the temple, Qin Yu asked the scientist to call.

"President."

The scientist knelt on one knee, and put his right hand on his chest to send high respects to Qin Yu.

"Get up!" Qin Yu beckoned and motioned for him to come forward.

"How are you preparing?"

The scientist looked around instinctively, and Qin Yu said amused: "There are only them here."

After confirming that only the Templar exists, the scientist lowered his voice and said: "Everything is going according to plan!"

For the first demon hunting expedition, the church will send a large number of soldiers to join this massive expedition.

In fact, it should be called Demon Hunting Expedition·Set Sail.

It is not a simple matter to encircle and destroy all the monsters in the galaxy.

So far, they have not encountered the main force of the monster army.

Although he fought several beautiful battles, he rescued more than 30 planets from monsters.

But in fact, there is no high-level monster army stationed above, and even the middle-level army does not exist.

There are only some cannon fodder like the inferior monster army, and the high-level monster leader responsible for polluting the planet.

The number of these leaders is a bit!

But that's it, every time the leader is encircled and suppressed, he will suffer heavy losses.

Fortunately, so far, the monster army has been advancing, and it seems to be sweeping the entire galaxy.

The Miracle Fleet chased behind the opponent's ass, regaining the planet that the opponent had captured.

The 'Set Sail' plan this time is a major decision!

Representing the Church of Miracle Science, it will initiate a head-on battle with the monster army.

The Ministry of Science has been preparing for this, battleships, airborne tanks, mechas, weapons, supplies!

The training and compulsory recruitment of personnel have also been carried out for three years.

At present, the only difference is a command!

"I will let the favored person cooperate with the action, and officially set off in fifteen days."

At Qin Yu's order, the scientist bowed back and said, "Yes, the president."

"In three days, I want to see everyone." Qin Yu disconnected after speaking.

Seeing that the figure above was not opening his mouth and his eyes closed tightly, the scientist walked backwards out of the church.

He didn't want to provoke the fanatical perverts on both sides.

These guys are all fanatical believers.

Only listen to the orders of the president and the saint, and ignore the rest, including two of the Big Four.

And he is one of them.

If these lunatics think that they are disrespectful to the president, they will not hesitate to draw out their weapons and chop off his head.

Although it won't die, it hurts...

Rumble!

The stone door was closed, the scientist straightened and curved back, and the drooping head was high, revealing a semi-mechanical appearance.

The left half of his face was banned by metal, and his pupils were electronic eyes with red dark glow.

The body covered by clothes is also full of various precision mechanical parts.

The right hand under the glove was also replaced by a mechanical prosthesis.

On both sides of his head, automatic telescopic tubes control two multifunctional tentacles.

One anterior segment is an eyeball-shaped mechanical eye, and the anterior segment is classified into five slender mechanical tentacles.

It can be connected to various customized tools created by scientists personally to facilitate his work and experiments.

At this time, the electronic eye connected to the telescopic tube ran in front of the scientist, facing parallel to his left eye.

Countless information is exchanged between the two, and the red light inside is getting brighter and brighter.

When the light dimmed again, the telescopic tube connected to the electronic eye became soft.

The scientist chuckled and said, "Tell them the news, and the president will see everyone in three days."

Tens of thousands of miles away, a huge fleet of foundries.

The Ministry of Truth is receiving and testing the new King Kong-class cruisers, and arranging personnel to board the ship to take over control of the ship.

At the end of Anda's inspection of the command room, he received a message from the scientist.

"The president is awake, he will see you in three days, and the expedition is about to set sail."

Hearing the electronically synthesized sound coming from the terminal, Anda smiled excitedly and excitedly on his face.

He has waited for this day for too long.

Finally, you can have a good fight.

The cheeks are raised, the corners of the mouth are tilted back to the extreme, and abruptly pulled into a thin slit and split behind the head.

It returned to normal in an instant, as if everything was just an illusion.

In the southern valley, the goddess of death who chased the remnants of the empire stood on top of the lonely mountain.

The breeze was blowing, and there was only the cold breath of death, as if there was a touch of softness.

In Refuge No. 1, the Saint Ann, who was dealing with government affairs, stopped and looked out the window.

Wanjia's lights illuminate the huge cave city, as if looking through the thick soil, watching the distant and mysterious birthplace.

When I met He Wu in the cafeteria, Qin Yu hadn't had time to ask him what he meant.

He Wu took the initiative to say that he wants to go to RRT, "It's okay to stay here, I want to give full play to my value."

"Old Ho, it's okay to realize it!" Qin Yu smiled and asked, "Did you see Shi Cui in the afternoon?"

It didn't seem like he could say it, but it seemed like Shi Cui's behavior style.

Value is the key to measurement!

Without value, it is not worth being taken seriously, and will be gradually eliminated by miracles.

"Yes, I met once." He Wu responded calmly.

"Really what you meant. I figured it out. Are you willing to have a wife and children?"

Now that he met Shi Cui, he should know the mission of RRT, not just to protect the company's safety.

RRT will bear the brunt of the exploratory work that is about to start.

"It's not a goodbye!" He Wu looked at him, as if asking for a promise.

"If there is no accident, at most one or two years." Qin Yu said.

No one knows the specific situation of subspace until now.

The details will be known after entering.

Now, with the protection of the titanium rhodium alloy coating added with 'silver ink', they can explore this mysterious virgin space more deeply.

marvelous!

"Don't you feel very excited? This is the greatest discovery in human history, a whole new universe." Qin Yu asked He Wu.

"Yes, I'm very excited." He Wu nodded blankly.

"..." The interest disappeared instantly, just like the feeling after the end.

"I will locate you personally. If... I mean, if there is an accident, I will try my best to find you back. Don't worry."

With Qin Yu's promise, He Wu's deep worries disappeared completely: "Boss, if there is any trouble, help me take care of my family."

"Don't worry, it will." Qin Yu solemnly promised.

This is the best guarantee he can give He Wu. If there is any accident to him, I hope that none of this will happen.

That night, Qin Yu spent alone in the hotel.

He has to go to see the Big Four in "Ghosts" and finalize the details of their completion of the "Devil Hunting Expedition: Sailing" plan.

February 21, 2027.

On the official homepage of Miracle Technology Network, a new announcement appeared:

Demon Hunting Expedition Set Sail, the new large-scale information chapter is officially announced. After today's update, players will officially enter the interstellar era.

All organizations will be open to recruiting players. Players can choose different forces, join the opposing fleet and conquer the universe with the warriors, and start a comprehensive counterattack against the demons.

The announcement was released for 15 minutes and ranked third in the hot search of the day.

This is the result of tens of millions of players discussing and searching for related topics together!

They are all concerned about whether they have the opportunity to board the battleship and follow the fleet to the vast universe after this update.

"Even in the game." This comment was liked by more than 20 million people.

"The above comment made me laugh." This comment was ranked second by 18 million likes.

The number of likes for the third place is 17.98 million, which is about to surpass the second place.

"There are still people who just treat it as a game, Lord laughed!"

The discussion that follows is varied, such as 'Which power will you choose? '

'Is there any choice? Except for the Church of Science, there is only Iron Eagle. '

'Why doesn't anyone form a power that belongs to the players, just like the guilds in other games. '

'The brotherhood recruits people, and those who come are all brothers. '

'Who said no, there are player unions everywhere, like maggots. '

'Man, don't say it so disgusting, okay? It's just that those two **** are too strong. '

'I would like to call you the strongest warrior. Are you afraid of being invited to drink tea? '

'In other words, the technology church is a miracle. Everyone knows this. Iron Eagle...really? '

'Fake, all fake, haha...'

The back building was crooked, what, 'I'm crazy again, hurry up and send it away. '

'Buddy must be frightened by the knock on the door. Someone wants to check the water meter. '

'Drafting it, I have the cabinet moved, I'm not playing anymore. '

'Fuck, someone knocked on the door and I pissed. '

The chaotic discussions dazzled people, and at the same time lost the nature of participation.

At least, that's true for Qin Yu!

Three days later, 2027, February 24.

Many companies choose to take vacations directly, but if they fail to do so, the personnel receives countless requests for leave.

My uncle is here...the dog is dead...the girlfriend commits suicide...the girlfriend is smashed...at the hospital, don't ask, ask is stuck when he is fucking, and is undergoing an operation.

In short, there are all kinds of strange reasons.

Believe it or not, UU reading www.uukanshu.com or not?

I have the ability to fire Lao Tzu, eh, I don't want to do it!

For the post-95-00 generation, there is nothing bad about changing this bad job.

At the same time, electricity consumption in various regions has shown a skyrocketing trend.

If not for preparation in advance, everyone can enjoy the beauty of the blackout day today.

In the Network Department, Tang Guo led everyone to prepare.

Don't get me wrong, it's not a boring job of maintaining server stability.

In the game cabin in front of Tang Guo, there were no programmers lying down, they were talented players recruited by Miracle Company.

Now, they are going to enter the game, set foot on the fleet of the Church of Scientology, and join the church members to show their loyalty to the miracle...
