

The Return of the God of War [The Protector] Chapter 2116

Levi Garrison hurriedly took out the black token.

But he turned it over for a long time, and the black token was no different.

He had observed and pondered this token many times before.

There is no mystery.

Why did the evil god Huoyun make such a big change after seeing it?

The only explanation is that the evil god Huoyun recognizes it!

Know what this is?

It may be a status symbol!

This is left by Master!

That must represent the identity or characteristics of Master!

Moreover, the Evil God Huoyun was in the same line as himself, and he was more or less related to Master.

So he did this after recognizing Master's token.

Everything makes sense.

The evil god Huoyun is not a master.

Most of them are taught by the master, or have other relationships.

Huoyun Cthulhu probably knew the identity of the master.

What is the identity of Master?

Holding the token, Levi Garrison knew that there was a great secret hidden behind it.

It is estimated that it will be announced step by step.

If he encounters Huoyun Cthulhu next time, he will definitely ask.

Next he should study how to deal with pure energy bodies.

...

On the other side.

Richard went to see Li Chengmin to settle the account.

It turned out that Li Chengmin had not left the Star Country, but was at the headquarters of Sanxing Group.

It turns out that she has a special status and is one of the true direct descendants of Sanxing Group.

The descendants of the Sanxing Consortium are not only those who are engaged in business or embarking on official careers.

Others were taken out of experiments at a very young age to modify the genetic blood.

Even some bold ones have already made some deployments during pregnancy.

Li Chengmin is like that.

When I was young, I was dragged to reform.

She was extremely successful.

It is highly valued in Sanxing Group.

Especially this time, she controlled the thirteen demons of the demon-making plan, so that everyone in the Sanxing Group could see the effect.

That is a true power in the laboratory of the gods.

If Li Chengmin dies, no one can control these thirteen people.

For public and private, I don't want Li Chengmin to die.

So now all the senior leaders of Sanxing Group have come out to intercede with Richard.

Explaining the situation, Li Chengmin was not betrayal, but was just being intimidated by coercion.

Although Sanxing Group is a dog to Zhuo Shen Lab.

But this is a vicious dog, and his fighting strength is so full that he can be called a Tibetan mastiff-like existence.

The value is great.

Richard can only compromise and let Li Chengmin go.

Li Chengmin hesitated for a long time, but in the end he still didn't say the identity of Levi Garrison.

...In

the dark palace of the Bible Organization.

Several people knelt to the ground.

"Enlighten the Dark God, under Richard and the others, Levi Garrison finally left!" A

voice came from above: "Well, yes. I thought I could keep it this time."

The following people continued: “But with Levi Garrison’s entanglement, the Lab of the Gods now basically believes that we have robbed them of the Sun Stone!”

“Yeah, is this unclear to entrap us?”

The Dark God smiled: “It doesn’t matter! Let the Gods Lab come, I’m not afraid!”

Then, the Dark God left here.

Turn to other places.

This is a secret room.

There was a screaming and crazy sound from inside.

The people inside seem to be affected by

The Return of the God of War [The Protector] Chapter 2117

Richard returned to the Lab of the Gods with a punished mentality.

As a result, the immediate boss comforted, “It’s okay! You can’t deal with them as normal!”

“And your pure energy body is this?”

A word from the immediate boss made Richard unable to refute and was humiliated.

This was the first actual combat of a pure energy body, but it did not show its dominance at all.

“Please rest assured! The pure energy body is still in the experimental stage. I will definitely create a perfect experimental product!” The

boss held his glasses and sneered. Project! Something that will allow countries to surrender at that time! Hahahaha...”

Richard was frightened and his body trembled.

It turns out that my plan of pure energy body is just a small mess in the eyes of the gods laboratory?

And what have they researched?

Make him so confident?

Seeing Richard’s thoughts, he said coldly, “This is the top-secret plan of the laboratory, you are not eligible to participate! Unless you can solve the current sunstone problem!”

This sentence inspired Richard.

He must have access to the core of the Lab of the Gods!

Originally, people like Lokita would be brought to the experiment next.

Now we still have to pause and continue to improve.

...

At this moment Levi Garrison has joined Qilin and the others.

“Finally didn’t let me down!”

Levi Garrison smiled.

When I brought people to war before, I didn’t do these things less.

It is even said to be familiar with the road.

But now the enemy has changed and there are more methods.

But everyone held on.

Levi Garrison touched his chin and said, “This can’t be

done. How long do you keep hiding?” “What should I do?”

someone asked.

Kirin and Suzaku Road while “wasting Sun Stone!”

Ye monarchs nodded “Yes ah, since it is the energy source, we also directly used!”

“It has laboratories gods, I put forward a laboratory!”

This is Levi Garrison’s plan.

He wants to gather all resources to build a laboratory that can fight against the gods.

Just like Wen Lei’s original Shenlong Experimental Technology Base.

Just do it!

Even if Levi Garrison was hiding in the dark, it was easy to set up a laboratory.

Funding, resources, and technical staff are all arranged by Levi Garrison.

He will get the energy materials and resources.

As for the technical personnel, they mainly searched from all over Erudia.

And then cooperate with some large-scale technology companies.

Such as Wen Jia and so on.

The most important thing is to find a spokesperson to do everything on the surface.

This person, Levi Garrison, has already been found.

Commoner kills the gods!

...The

next day.

It's calm.

On the one hand, Levi Garrison was preparing the laboratory, on the other hand, he was thinking of ways to deal with the pure energy body.

The laboratory was quickly prepared.

The literary family fully helped, and the King Kong Island Gambling King Family also helped.

In addition, Commoner Killing God is dealing with it, and all parties in Erudia are involved and confidential.

Committed to the research of modern weapons and technology.

Named "Kunlun Industry".

In the early stage, he must be an unknown person, secretly developing.

The Return of the God of War [The Protector] Chapter 2118

Looking at the successful Lokita, Richard was quite satisfied.

A lot of pure energy bodies have been successful, and finally there is a decent one.

Xu Zhengjie's idea is to turn himself into a god above all living beings!

One thought can annihilate the gods of all living beings!

But what Richard has created is actually super power besides the immortality.

Lokita finally looks a little bit now.

It was far behind Xu Zhengjie, but after all, he felt that way.

"Test!"

Richard arranged a test again to see how strong Lokita's combat effectiveness is now.

After the test, Richard was satisfied.

Lokita is terrible now.

And report to the immediate boss as soon as possible.

The result was a commendation.

“Yes, keep working hard!”

Just a word made Richard very excited.

Because this laboratory can be further improved!

In other words, he can be infinitely close to Xu Zhengjie!

In addition, with the core technical support of the Gods Laboratory, particles similar to the super-energy particles discovered exclusively by Xu Zhengjie.

Richard didn't believe that he couldn't create something like Xu Zhengjie.

... After

Lokita's various tests, Richard did not deliberately control his thoughts.

Except at critical moments, he can completely control Lokita, and at other times he is allowed to move freely.

“You go back to Erudia now! What about your mission...”

Richard actually asked Lokita to go back to Erudia.

“When all of your family's experiments are completed, they will all return to Erudia!”

...

In addition, this month seems to be peaceful, but it actually caused an uproar all over the world.

Especially for some ancient forces.

They are all crazy, searching for a person everywhere.

The scariest thing is in Erudia.

Tiance Mansion and Baolong clan have monitored that there are many ancient forces that have been silent for too long and are ready to move.

Even if so many things have happened in this era, these ancient forces have not been affected.

How old are these ancient forces and how terrible are they?

Can make Tiance Mansion such a sensation.

There is no other reason.

Some ancient forces existed longer than Tiance Mansion, and could even compare to the history of the Dragon Clan.

Even Tiance Mansion they are afraid of the ancient forces.

They are so quiet that they are forgotten.

At one time, Tiance Mansion thought that they no longer exist and disappeared in the long river of history.

But now they actually showed signs of being born.

It seems that some ancient forces have quietly sent people into the world, and they don't know what they are looking for.

This made Tiance Mansion nervous.

Hurriedly sent someone to find out what was going on.

This happens all over the world.

There are faint signs of emergence from some ancient ethnic forces.

What are they looking for...

This makes the institutions of some countries quite puzzled.

Even the Sky Shield of the Eagle Nation was aware of this happening.

They are also wondering.

What is it that makes the world's ancient powers ready to move?

Token!

That token dropped from Sun Levi Garrison's body!

After seeing it that day, the evil god Huoyun made a strange move.

Don't know the token is

The Return of the God of War [The Protector] Chapter 2119

Currently, only Huoyun Cthulhu knows who the token holder is.

I know his specific identity even more.

The Fire Cloud Cthulhu also knows the big moves of ancient forces all over the world.

"I didn't expect him to be alive! He still has descendants!"

Tears filled the eyes of the Huoyun Cthulhu.

As if he could hear this news, he would be content in this life.

"This is really going to change!!"

Huo Yun Cthulhu sighed.

Only he understood what the token meant when it came out.

As soon as the token came out, the ancient racial forces everywhere would really come out.

In fact, it is these ancient ethnic forces that really guard and control this world.

They are the true source of inheritance in this world.

Such as exercises, such as magic and so on.

They are the real source.

As for the powerhouses restrained by the covenant of the gods before, they were nothing more than terracotta dogs.

Most of these people were ancestors who got some broken pieces of work and used them as holy methods and magical skills to practice.

Little did they know that they were just the fur of some ancient racial forces.

Or abandon unnecessary debris.

Huoyun Cthulhu sneered.

He is looking forward to the appearance of these ancient forces, which will be very interesting then.

...In the

base somewhere in the Lab of the Gods.

There are four people in total.

One of them was playing a hand of playing cards with the Joker's mark printed on the cards.

He laughed fiercely from time to time, which was very penetrating.

Another person is Richard's immediate boss.

They are discussing one thing.

It is the recent changes of the ancient forces and races from all sides.

Naturally, such a huge force in the Lab of the Gods has also discovered it.

"What is the reason?"

one of them asked.

"I don't know at the moment, but it seems that something has been released on the dark web. But we can't enter the specific encryption section of the dark web!"

"So many hackers in our laboratory can't do it? Can't we still enter?"

” Do you know? The creator of the dark web is known as the hacker god! With him, no hackers can break it, even if we can’t!”

...

“Strange, how could so many ancient races emerge at this time? “

The covenant of the gods established in our laboratory at the time! None of these ancient race forces emerged!”

It turned out that the covenant of the gods was established by the laboratory of the gods.

The Lab of the Gods has actually existed for a long time, and it has existed before the beginning of industrial technology in the world.

In order to develop faster and more effectively, the Lab of the Gods has specially set up a covenant of the gods to restrict the strong from all over the world.

In this way, the Lab of the Gods has fewer obstacles, allowing them to develop rapidly.

Therefore, the laboratory of the gods has the current strength and is inseparable from the covenant of the gods.

...

Playing the clown playing cards, stopped laughing, and said coldly, "That's because the covenant of the gods did not touch the interests of the ancient race forces! Otherwise, they would have jumped out to deal with us early!" Richard's immediate boss nodded. Head "to

The Return of the God of War [The Protector] Chapter 2120

As Levi Garrison sought by the ancient racial forces in the world.

At this moment he is retreating, how to deal with pure energy body.

Not to mention the core of the Lab of the Gods.

The pure energy body is now a mountain that lies ahead.

Levi Garrison must be killed.

I have to say that Levi Garrison loves research and is very talented.

He began to study the taboo technique that the master left him.

Since the taboo technique cannot be used.

He tried his best to study variants.

Relying on the taboo technique, create your own things.

The master said that the taboo technique cannot be used, but his own things are okay.

No one knows where Levi Garrison is now.

They didn't even know Azure Dragon (Qinglong).

Levi Garrison gave them the task of developing Kunlun industry, staring at the laboratories of the gods.

The other side.

Lokita has returned to Erudia.

Standing on the land of Jiangbei, Lokita opened his arms, a terrifying and terrifying aura spreading.

As if the king is coming.

Step into the door of Li's house.

Caused a huge sensation.

Today, the Li family is still mixed with the original Xishu clan.

The Li family, who was originally indisputable, has to be a human being with its tail between its tails after this era has changed.

After all, the strong are like a cloud, and the level of the Western Shu gate clan has become an ant.

If anyone offends someone, they will be destroyed directly.

There is no news about Zoey and Levilia, especially when he entered Tiance Mansion, which is the top secret among top secrets.

They don't even talk about it, and don't even know the news.

“What? Wen Hai is back?”

Li Tianhao and the old lady rushed out immediately after hearing this.

Others also came out one by one.

Even Wu Xuelan and Zhao Jianguo were here.

When I heard Lokita came back, I thought everyone else had come back.

For the group of Lokita, everyone is just dead.

After all, he was exiled by the War Eagle Nation, and he did not belong to any country or region in this world.

They are like savages.

It's no different from being dead.

Come back now, everyone is naturally surprised.

Seeing Lokita, everyone felt that Lokita was different.

More like a ruthless machine.

It's too strange.

"Wenhai, are you back?"

Where are Wenfei and others? Where are Songkui Mengyue and the others?" Li Tianhao and the old lady were still looking at the back.

They also want to see other children and grandchildren.

"Yes, where is our Zhao family?"

Wu Xuelan and the others asked anxiously.

Lokita sneered and said, "Don't worry, they will come back one after another!"

Lokita knew about Richard's plan.

Then those people will succeed in the experiment one by one, and then they will be sent to Erudia.

"Really? Where are they now?"

everyone asked anxiously.

Lokita smiled, "They are encountering the greatest gift in life! They are transforming their lives! Once they succeed, Erudia will change!"

Lokita enjoys this feeling of controlling everything.

"You came back without authorization? I remember Erudia still has a ban. People like you can't enter Erudia?" The

Emperor Xi Shu couldn't help but scolded.

"Yes, there is a ban, you can't come to Erudia without a ban, maybe it will kill us all!"
