

## The Return of the God of War [The Protector] Chapter 2256

Xiao Feng and other hundreds of apprentices came together, as well as the secret team established by Levi Garrison himself, and so on.

They don't need to hide now, they have all become strong on one side.

After Levi Garrison was gone, they also continued to gather together with Xiao Feng and others as the leaders.

Make your own contribution to Erudia.

“Master!!!”

“Master!!!”

...

Xiao Feng and the others were extremely excited when they saw Levi Garrison.

No less than Azure Dragon (Qinglong) and them just now.

As soon as they received the news of Levi Garrison's return, they came from all directions.

“Yeah! Not bad! Not bad! Everyone has become a strong one!”

Levi Garrison praised with satisfaction.

Xiao Feng and the others, like Azure Dragon (Qinglong), have become top powerhouses.

Xiao Feng's strength is similar to those of Azure Dragon (Qinglong) Kirin (Qilin).

The boss dragon battle of the secret team is also very close.

.....

This team will be placed three years ago, he is simply too exaggerated.

Why should Levi Garrison hide and tuck him and direct them to push directly.

Who is not convinced!

Even the laboratory of the gods can be swept away...

they have changed too much.

Seeing that his apprentices and his subordinates who had been trained with one hand became strong, Levi Garrison was not happy at all.

Because his hopes were dashed.

None of his apprentices continued to use the basic exercises.

They were all abandoned.

The power in each body is chaotic and there are many elements.

Obviously, in the past few years, I have practiced a lot of things, taken a lot of medicine, and even modified it with modern technology and genetic technology.

In short, all kinds of methods are used.

These key methods have allowed them to advance by leaps and bounds.

Therefore, it is regarded as a holy thing by everyone!

After all, the real effect has been seen!

Which one would you choose to grow tenfold in three years or one thousand times and ten thousand times?

For sure the latter!

Everyone really made a profit!

Levi Garrison glanced at the past. They were all “powerful”, but none of his apprentices insisted on using his basic exercises.

He shook his head helplessly.

But don't blame them!

He himself used to be too, even though he did not abandon the basic exercises, he has been practicing.

But I didn't take it seriously, always pinning his hopes on taboos and treating his hole cards as taboos.

In this way, the subconscious will regard the taboo technique as a life-saving trump card.

As a result, it ignores the most basic exercises, resulting in not much improvement in strength, or even stagnation.

The key master also told him not to use the taboo technique as a last resort, because there will be unexpected troubles.

It wasn't until later that Levi Garrison understood that this was actually a difficulty set by the master deliberately for him.

The taboo technique is powerful, which made Levi Garrison omnipotent three years ago.

But it also became a big mountain on his way forward.

Let him rely on taboo techniques.

...

Everything is a test for him!

Fortunately, Levi Garrison was trapped in a dark cage behind him.

I understand these truths.

These are good for you, but they are also your biggest obstacles.

Therefore, Levi Garrison abandoned all messy taboo techniques.

Specializing in the most basic things...

only today!

It's also a process of growth!

But Levi Garrison is different from them-they are now practicing quick methods.

Everything is for quick success.

Improve the most powerful force in a short time.

There is no process of accumulation and precipitation.

It will be disadvantageous for them in the future.

"Master, you..."

Xiao Feng carefully observed Levi Garrison.

He hesitated and stopped.

Originally, he heard from the outside that Levi Garrison was only considered middle in this era, but he still didn't believe it.

He felt that in the past three years, Levi Garrison might also get opportunities to develop.

But no.

Levi Garrison's strength stayed three years ago, even worse.

"This..."

"What's wrong?"

Levi Garrison couldn't help asking, seeing the strangeness.

"Master...that your strength still stays in the past?" Xiao Feng couldn't help asking.
