

## The Return of the God of War [The Protector] Chapter 2717

Sure enough, the silence some time ago was unusual.

Something must happen next.

Sure enough, it's coming.

However, everyone knows that this is just the beginning.

There will be more fierce follow-up.

Everyone began to prepare for defense.

Specifically for this kind of giant...

Especially Xiao Liejun and the others continued their meetings after Lu Xiong left.

"Now everyone can see that the situation is crisis, Daxia is easily affected! If the giant creature just appeared in Daxia, disaster has already occurred!"

"So we can't just pin our hopes on Lu Xiong's safety island! We have to use our strength to deploy defenses on the coastline!"

"The steel city wall mentioned by the king of the word side by side is definitely not possible! But we can deploy weapons and firepower on the coast! The strong will be in the rear! In addition, the Dragon Clan of Tiance Mansion will definitely take action!"

"In this way can we be sure of everything!"

Xiao Liejun said to everyone.

“Okay, understand! We can’t sit still! We must take the initiative!”

“I don’t believe it! With our advanced weapons and technology, can’t deal with this giant creature?”

“When the time comes, direct fire cover! Give them a pot of steel hot pot!”

“I don’t believe it! Are you afraid of anything?”

“With our strong strength, we don’t need to defend at all! Direct attack! Attack is the best defense! We will eliminate these giants by then! Is it necessary to build the Great Wall?”

...

After Yan Longwei voted and decided, he immediately began to act.

One by one, powerful mysterious weapons and super powerful firepower were all transported to the coastline and border lines.

Deployed quietly.

In this era, weapons rarely come in handy.

But everything is changing.

Technology is also advancing.

The weapons are still terrifying...

Although Yanlongwei's firepower deployment was carried out quietly, there were SSS-level secrecy orders everywhere.

But the laboratory of the gods happened to be in Daxia.

All bases are in Daxia.

So Daxia has the wind and grass, they all know.

Although Yan Longwei's movements were secret, they were right under their noses.

They have arranged a lot of eyeliner in Daxia long ago.

Therefore, as soon as there is a movement, they know it clearly.

Of course they know about such a large deployment.

Although it is not clear.

It's generally clear.

“Daxia’s execution power is far beyond our imagination! Even the ordinary people who are ignored by us are extremely powerful!”

“Yes, in our eyes, the opponent has always been like Tiance Mansion!”

“Yanlongwei is so strong as expected! Once this firepower is displayed, it will be absolutely terrifying!”

Mr. X and others were amazed.

“It’s a pity, we all know about their deployment plans! They are not a threat to us at all!”

“Moreover, they deployed this way in advance, which is equivalent to completely exposed to us!”

“We must not let that become an obstacle to Forbidden Area 76! We are going to get rid of it!”

They all laughed, the great clown.

...

Everything is under the control of the Lab of the Gods.

This is the most terrible!

Ten days!

It only took ten days.

Yanlongwei deployed all firepower on the coastline.

“哧哧哧……”

They also arranged mechanical beasts with a height of one hundred meters and mechas with a height of one after another.

Xiao Liejun didn't believe it anymore.

These giant creatures can touch their mechanical war beasts

Weapons and ammunition are even more abundant.

It can instantly turn the sea in front of it into fiery magma...

There were no problems for several hours.

one day.

Two days.

...

On the fifth day.

Unknown fluctuations occurred in the waters of the East China Sea in Daxia.

“A situation in the East China Sea has been monitored!”

“It has been monitored that frequency fluctuations have also occurred in the South China Sea...”

...

Then there were abnormal situations everywhere!
