

The Return of the God of War [The Protector] Chapter 2832

Everyone chose one by one.

After everyone took it, their strength improved by leaps and bounds, and they came directly to a new level.

Barely able to enter Levi Garrison's eyes.

At least it can be useful to the strong in the laboratory of the gods.

For example, Lucifer and the Great Clown, Levi Garrison had seen them with his own eyes.

Has made an estimate of their strength.

Now the upgraded Tiance God commanded them, and they were barely able to compete with Lucifer and the others.

In terms of strength, Lucifer and the others should be considered in the middle of the laboratory of the gods.

Now that someone can face them, Levi Garrison is a little bit certain.

One thing that made Levi Garrison gratified was in the genius plan of the Baolong clan.

Gemini, Valkyrie, these geniuses are progressing so fast, they can already be used a lot.

After all, they are all geniuses who were unearthed from the beginning, and their talents should be higher than those of Kunlun Academy.

...

the other side.

The Great Troops of the Lab of the Gods have come to the largest desert in the Western Continent.

It's sparsely populated and the environment is harsh, and even animals can't be seen.

But after they came, a country full of technological sense rose from the ground.

Whether it's a building or various other configurations, everyone has never seen it before.

In other words, it is all the imagined world in the future.

It's all realized here in the Lab of the Gods.

Obviously a desert has instantly become a future country...

Shocked!

It was too shocking! The Lab of the Gods is here to establish itself as a country, called the Kingdom of Gods.

The establishment of the Kingdom of God shocked the world.

The Lab of the Gods is too strong!

Everyone must express emotion!

From this country alone, everyone can know that the technology of the Gods Laboratory is far above the world level.

Satisfy all countries' visions for the future world!

It's really shocking and terrifying!

Especially those upper-class people, isn't the kingdom of God the paradise they have always longed for?

There are even a few super-rich people who want to invest huge sums of money to build such a future city.

When they live in this kind of future world, they are bound to be a level higher than the whole world. This is how they live!

Someone else can never have...

They are still thinking about it.

I didn't expect to be built directly by others.

For a time, this place was the paradise in the eyes of these rich people!

They must do everything possible to live in!

...

All the concerns of the world at one time are on this future country!

The point is that this is just their building!

The scary thing is weapons or other technologies. Is it a big lead in the world?

Reached an unprecedented field!

No wonder the Lab of the Gods is so emboldened to declare war on the world!

Before, everyone was still guessing where the confidence of the Gods Lab came from...

When you see the construction of the future kingdom, everyone can guess it!

The Lab of the Gods doesn't need to be frontally shocked, just let the world know its horror!

Countless people are no longer in panic, no longer trembling!

In this case, how to fight?

Surrender directly, forget it directly!

...

People were panicked everywhere for a while.

Soon, all the equipment in the Lab of the Gods settled in the Kingdom of God.

Everything is ready.

In the central area of the Kingdom of God, the buildings towering into the sky are really going to heaven!

The world's first building will appear very small here.

In the laboratory of the future at the highest point of a building.

Through the glass in front of my eyes, I saw a scene of clouds and mist...

Surrounded by their high-tech aircraft!

It seems that you can travel directly into outer space...

high!

Too high!

This is the perspective of "God"!

Looking down on all living beings!

Mr. X they all settled in.

To carry out the next plan.
