

The Return of the God of War [The Protector] Chapter 2836

It was also Daxia's hostile forces, and at this moment he chose to join the kingdom of God.

...

Next, countries will join the Kingdom of God one after another.

Especially the forces around the kingdom of God...

Because they can feel the power and deterioration of the kingdom of God up close!

Working against them is a dead end.

It's better to join in early and have a meal.

Maybe you will get unexpected benefits!

...

worldwide.

In addition to the superpowers, Daxia, the war eagle country, and the war bear country and his like.

The rest of the world is just around the corner.

And Daxia was the only one to put on a defensive posture.

Therefore, it can also be seen that Da Xia is going to work against the Kingdom of God.

The rest are also on the sidelines.

Although the kingdom of God is coming menacingly.

But the specific strength is still not shown.

Plus all Leviathans are trapped by Daxia.

I haven't found it yet.

...

The situation all over the world has become more complicated.

At this moment.

The Black Hawk agent of the Sky Shield and Smith, the head of the bureau, were invited to the Kingdom of God to open the future science and technology city for negotiations.

Mr. X clearly expressed his meaning and allowed the Kingdom of War Eagle to join the Kingdom of God.

The guarantee he can give is that the Eagle Nation will enjoy the highest treatment.

It means that other people surrendered in.

The Eagle Nation was invited in.

It is the relationship between the eldest brother and the second brother.

The others are masters and slaves.

Let Smith, the head of the game, think seriously and calmly.

“Ah? Do we have to join? Let’s work together, isn’t it good for us to dominate?”

Smith smiled.

The Black Hawk agent also echoed: “Yes, how good is it to work together! Do you want to get a boss?”

“What’s more, it’s very hard to eat all of you, right? Daxia is very strong and has a powerful help! If you join with the War Bear Nation again! You are also afraid it will be difficult to deal with!

But we cooperate with you! The situation is very different! When the time comes, we will divide the country equally. Wouldn’t it be the most profitable? “

...

The Black Hawk agent deserves to be the trump card of the Sky Shield.

Can actually lobby in turn.

This shocked everyone.

“No! We won’t cooperate with anyone! We only want you to absolutely surrender!”

The attitude of the Gods Lab is also firm.

“Then what if we don’t...”

The head of the game, Smith, smiled.

He showed strong confidence all over him.

He didn’t even look at the laboratory of the gods at all.

“Then you can only fight!”

“Of course you can unite Daxia to resist together! We are fearless!”

Everyone smiled.

At all, he didn’t put Warhawk Nation in his eyes.

It’s just that they are afraid of cooperating with Daxia...

Smith laughed after listening.

There was a deep smile on the corner of Agent Black Hawk's mouth: "You still underestimate Daxia!"

"Huh? What do you mean?"

Lucifer's face changed.

"That's Levi Garrison! The person who has made you lose countless times! This time it's him again! You will suffer a big loss in his hands!" Agent Black Hawk looked at them very seriously.

He knew Levi Garrison's strength.

Maybe even stronger.

He is earnestly persuading.

But where can the other party hear it?

I don't even think of Levi Garrison as the same thing!

They are not afraid of everything now!

"We admit that Levi Garrison is resourceful and resourceful! I heard that this time he digs up a lot of information in advance! But that was because we wanted to play tricks before, and wanted to win Daxia without blood!"

“Now, we rely entirely on force! No matter how resourceful and resourceful Levi Garrison is, we can’t use it! Our weapon, our strong man will fight over and destroy everything!”

Lucifer and the others laughed.

...

Then the two sides continue to negotiate.

Both sides are master negotiators.

Push each other, push each other, talk to each other...

In the end, their respective goals were achieved.

The Eagle Nation wanted the Lab of the Gods to aggressively attack Daxia, resulting in a situation where both sides would suffer.

What the Gods Lab needs is that the Eagle Nation cannot unite with Daxia.

...

After several hours of negotiations, the goals of both parties were actually achieved.

“The Lab of the Gods wants us to surrender? Are they worthy? I am not afraid of the Eagle Nation!”

In particular, the head of the game, Smith, looked at this future city, and he sneered: "Thinking that only you can make this kind of city? Ho Ho..."

The Black Hawk agent next to him was horrified.
