

The Return of the God of War [The Protector] Chapter 2843

After all, the initial purpose was to kill Levi Garrison.

“Yes, if you want to know that Lucifer and their disappearance have nothing to do with Levi Garrison, you have to continue to send people to kill him! Killing him while seeing what happens is killing two birds with one stone!”

Everyone said.

“Okay, Levi Garrison must die! Just to see if this matter has anything to do with him!”

Mr. X said.

“But who should I send?”

Now that the four of Lucifer disappeared, then they could not send anyone casually.

Send someone who is stronger than them, can control the situation, and can send back messages.

Gradually, Mr. X's eyes fell on a person in the corner.

He was wearing a black suit, and his whole person was wrapped in it.

Only a pair of dark eyes were revealed.

But it gives people a feeling of black stars.

It seems that the closer you get to him, the whole person will be sucked away. Dark Devourer!

It should now be called the Darkness Devouring God!

The Laboratories of the Gods now call themselves gods.

The Dark Devourer, from the moment of birth, all creatures close to him will be sucked out of life essence and die.

Even swallowing everything, the surrounding flowers, plants, trees, insects, fish, birds and beasts, as long as they get close, they will all be swallowed.

Over time, he became a great plague god.

Later, I met Doctor Dark and helped him improve, giving him the ability to control swallowing.

Able to control devouring!

In fact, it is similar to Daxia's suction power**.

But he is a natural talent.

The nature is the same.

Strengthen yourself by absorbing (devouring) the strength of other people.

It is precisely because of the existence of the Dark Devourer that he can bear no matter how much he swallows because of the race bloodline problem.

This allowed the Lab of the Gods to transform Chen Kong's physique so that he could bear the side effects (cannot bear too much power!)

It is because of the Dark Devourer that the biggest shortcoming of suction power is improved.

Today's Dark Devourer can be compared to the pinnacle of power absorption.

But definitely much stronger than Chen Kong before.

His strength is also higher than that of the four of Lucifer.

After all, against him, it is likely to be swallowed.

Even people who are stronger than him are not his opponents.

Devouring this talent is terrible.

I can't beat you, but I can swallow you...

Sending him to Mr. X is very relieved.
