

The Return of the God of War [The Protector] Chapter 2863

Levi Garrison in the position of commander-in-chief frowned, he was also thinking of a way.

How to get the main priest out?

According to the current posture.

Unless it is to make the Lab of the Gods suffer a huge hit or make them fail.

It is possible for the chief priest to be dispatched.

But if you don't make a move, you don't show the ultimate hole card.

How easy is it to defeat the Lab of the Gods?

What if all the coalition forces are gathered?

Whoever is white, most of them will be cannon fodder. No effect.

Unless the war eagle nations also unite in.

Levi Garrison, the powerful of the Eagle Nation, understood it, even if he didn't know the details.

However, the Warhawk Nation has a clear stand, and will not form an alliance or surrender.

It is difficult to join forces.

Other ways.

Levi Garrison still didn't think about it.

Therefore, only after encountering the army of the Gods Laboratory will it steadily retreat.

He has much more consideration than everyone present.

But it is undeniable, if you want to defeat the laboratory of the gods.

You have to follow Levi Garrison's rhythm.

Others don't even know the composition of the Gods' Laboratory.

Everyone knows that the real power of the Gods Lab is the main gods.

"Commander, do you have a good way? Are you just waiting to withdraw?"

"Really! It's better than we gather all the strength to face them head-on!"

...

Everyone stared at Levi Garrison, waiting for their answers.

“Most of the coalition forces retreat!”

“Leave small teams to harass them and consume them as much as possible!”

“In addition, we lay down regular bombing weapons under our line of defense! When the army of the Gods’ Laboratory arrives, they will all be ignited!”

Levi Garrison immediately gave the order.

Everyone looked disappointed when they heard the word retreat.

They gave Levi Garrison opportunities again and again.

Now that he has the tenth line of defense, he still has no way of retreating.

Everyone’s opinion of him also changed.

The lieutenants quickly gathered together in private.

“Are we all suggesting to change the coach? Levi Garrison can’t do it!”The initial retreat was understandable.

But it was still retreating later, which disappointed everyone.

Disappointment again and again.

They are all withdrawn to the “eleventh line of defense.”

Except for retreat and harassment.

Levi Garrison had no choice.

This is what makes everyone disappointed!

There is no way, so what are you doing?

Who can solve the current dilemma?

This is the truth since ancient times.

Levi Garrison is a military adviser, and it's okay to support him, but he doesn't seem to be the coach at the moment.

“I think Levi Garrison is still suitable to join the think tank as a military adviser, and come up with ideas or something! As for the coach, let's change someone!”

“Well, let's report it first! It is estimated that it will take a while for everyone to make a decision! At that time, under the command of Levi Garrison, it is estimated that we have withdrawn several lines of defense!”

“Yes! Now he has no way to solve it, he can only retreat! The next thing is the same, we recommend changing the coach in advance!”

“Do you agree?”

“Agree!”

...

Where did Levi Garrison know that most of the lieutenants have jointly replaced the coach.

He was still figuring out how to lead the chief priest to come.

The tenth line of defense has been abandoned.

Soon, the army of the Gods' Laboratory was overwhelmed.

“Rumble...”

But Levi Garrison's presets all exploded at this moment.

Caused a lot of impact and damage to the Gods Laboratory.

But on the whole it is basically negligible.

That is, what a bunch of lieutenants said was useless.

There will be no substantial harm to the Lab of the Gods at all.

Next is the eleventh line of defense.

It is also a vital line of defense.

This line of defense fully connects seven countries.

If this line of defense is broken, seven countries will be in danger, which is equivalent to opening the door to the laboratories of the gods.

Suddenly, the Lab of the Gods will have seven more options.

At that time, we will go to defend one by one, and it is estimated that the defense will not be enough.

Seven countries will fall into disaster.

This is something you don't want to see.

The giant cow nation has all evacuated to these seven countries.

Can't we continue to evacuate, right?

Moreover, it took so much effort to withdraw a relatively small giant country.

If the seven major countries are withdrawn, I don't know how much it will cost.

Moreover, if the seven countries were to continue to evacuate, it would be equivalent to putting all the dozens of countries in the rear to the laboratory of the gods to attack.

therefore.
