

The Return of the God of War [The Protector] Chapter 2947

The next three days.

All parties are looking frantically.

Forensic Whiteside of Salt Lake City.

Clarkson, a cancer expert at New Golden City.

Golden State Luo orthopedic doctor Bert.

Professor Louis of Sin Chew International School of Medicine.

...

They were actually arranged by the Doctor of Darkness before, and arranged when the Lab of the Gods existed.

In order to prevent accidents, come to be his substitute.

These goals can withstand queries and are problematic.

Very suitable as a stand-in.

I don't know how many people are targeting these four goals.

Everything about them was frantically inquired.

Including the eighteenth generation of our ancestors, I found it clear after peeing in that place when I was young.

Since they were born, they have carefully checked every penny they have spent.

Where the flowers are, what they are doing, must be exact!

Let alone other.

People who have dealt with them are all being checked frantically.

...

The Sky Shield Bureau took even more effort.

Many people have complaints.

They think it is enough to just arrest these four people for interrogation?

Why bother?

It was ridiculous that people peeed when they were young.

But the head of the game, Smith, scolded when he learned about it.

Never use extreme methods.

Otherwise, Doctor Dark jumps over the wall in a hurry and will be unable to bear the consequences.

Resolutely cannot do this.

This makes everyone more aware of the threat of the Dark Doctor.

Can only continue to honestly investigate.

Other major forces are also carefully investigating.

Their goal is that Doctor Dark will either join in or be captured by them.

Anyway, they are going to be alive.

In the unlikely event that Doctor Dark is dead, it would be an empty basket.

therefore.

All parties are very cautious in their investigations.

Don't dare to have extreme behaviors.

The inquiries from all parties made Doctor Dark and Levi Garrison very satisfied.

I bought them time.

But Levi Garrison's speed here is very fast.

After some queries.

The cities of Golden State and Oakland are excluded.

Directly locked in the new golden city.

"If there is no accident, Doctor Dark is definitely in Xinjincheng. If there is no one, it proves that we are all in the wrong direction from the beginning. He is not a doctor-related job at all! I hope there will be no mistakes!"

Next, Levi Garrison and the others will search all hospitals in New Jincheng. At this time, Doctor Dark had a calm expression, and he didn't think that someone would be here soon.

"Two days! I will finish manufacturing in two days!"

At this time, a good message came from the brain of God.

Doctor Dark smiled and said, "Okay, time is too late! It is estimated that they will find out that the target of their query is wrong in two days!"

...

Wrong.

He predicted almost the same.

The speed of Sky Shield is not so fast.

Only one goal can be excluded a day.

After follow-up proficiency.

Two can be eliminated in one day.

Exclude four targets in three days.

One day has passed and the forensic Whiteside of Salt Lake City has been ruled out.

The speed of other major forces may be slower than that of the Sky Shield.

A goal cannot be ruled out in a day.

On the first day of Levi Garrison's progress, he roughly confirmed the possibility of several hospitals.

the next day.

The Sky Shield Bureau ruled out another target.

Levi Garrison has already moved from seven hospitals to one hospital-Xinjincheng General Hospital.

“According to the information we have found-there is a problem with the handling of corpses in this hospital! There is still reselling of corpse organs in hospitals in all parts of the War Eagle Nation. Only the New Jincheng General Hospital has no problems!”

This is the result of their investigation.

Levi Garrison smiled: “Who would have thought that not doing bad things would expose yourself! This clearly means that this medical center is not enough by itself, let alone reselling!”

Everyone laughed.
