

The Return of the God of War [The Protector] Chapter 2973

This is over!

Completely finished!

I can't catch up any time soon!

Levi Garrison immediately contacted the Black Hawk agent and told him all of the situation.

Immediately, they were asked to reach their destination as quickly as possible.

Although you can't keep up, you have to try.

Agent Black Hawk no longer doubted this time, and proceeded at full speed to the destination.

They carry the only hope.

...

Since Yanlongwei held an emergency meeting, he immediately joined a few allies to start a safe island.

All people and supplies, as well as some things that need to be preserved, are transported to the safe island.

There are 500 safe islands, and there are natural areas similar to safe islands.

Together, it is just enough for Daxia and a few allies.

Within a few hours, everyone needs to be transported to a safe island.

On Daxia's side, Lu Xiong was the commander-in-chief, after all, he had previous experience in this area.

Under his command, all parties proceeded in an orderly manner.

Everyone began to sigh with gratitude, this safe island really came in handy.

And it was used so soon.

The safety island is really life-saving!

Despite the magnitude of this crisis, the island still has a certain chance of being able to stop it.

At least the chance of survival is 50%.

This is quite high.

Several other allies are also deeply grateful, but fortunately to cooperate with Daxia.

Otherwise, there is no place to hide at this time, right?

At present, Daxia can only protect itself, and other forces can't control it.

Time is running out.

However, most forces and regions, even after knowing this news, did not initiate any actions the first time.

Many people think this is fake.

This is Daxia's conspiracy at all!

I want to use this as if to swallow the Dark Doctor alone, so as to get all the secrets of the Gods Laboratory.

They don't even know about things like super spirit veins.
