

The Return of the God of War [The Protector] Chapter 2975

So there is no action.

This is basically 10% of the status quo.

Few people believe it.

What is the situation still waiting?

The smarter ones go to investigate.

However, the emergency response is in full swing in the relatively big summer.

They just didn't have any action.

In fact, another party is also in action.

That is the war eagle country.

After they learned about it, they didn't have the slightest suspicion.

Prepared for the next thing.

One side also asked the Black Hawk agent to organize as much as possible.

While organizing the entire Galactic Guardian Alliance to avoid danger, once disasters and catastrophes occur, they have to figure out a way to deal with them.

So the Galaxy Guardians are acting secretly.

Unexpectedly, there are many secret bases in Warhawk State, which are equivalent to safe islands...

They didn't doubt the authenticity of this incident at all!

Immediately began to prepare.

Perhaps the people who know the Lab of the Gods best know how terrible the consequences of their revenge on Doctor Dark.

They were more nervous than anyone else, and immediately started an emergency response.

Time lost every minute and every second.

Anyone feels terrible.

Xiao Liejun and the others looked at other countries at all, but they were actually very uncomfortable.

But there is nothing that can be done.

It doesn't work if it is reminded.

They still don't believe it!

...

now.

Levilia, who was with his mother, suddenly encountered a strong man from the ancient forces.

After they couldn't catch Doctor Darkness, they could only take Levilia away first.

They are also very simple.

Directly control Zoey Lopez to dye them.

Knowing that Levilia's strength was extraordinary, they didn't dare to attack Levilia head-on.
