Chapter 1778

The most important thing right now was to develop East League Trading Company, spend money, get lavish points, and get to True Saint Rank.

He would slowly research the stone after this.

If he could not, then he would ask Alba for help after managed Alba to get the company on the right track.

David had been

fiddling with it for a long time.

He had pinched, rubbed, squeezed, and threw the stone, but aside from learning it was very hard, he did not find anything.

'Is this stone useless aside from its hard exterior?'

David was in disbelief.

If it was only hard, Archimedes would not bring it along with him.

Based on Archimedes' identity, he would only bring this stone with him if it was useful.

Since the system did not plan to introduce this stone, David would open the system himself to see if it would react.

Then, David opened his system panel.

[Host: David Lidell

[Balance: 9985701990000000 Star Dollars

[Body: Pre-Saint level 1 (You may upgrade one level using 10000 lavish points)

[Mind: Sovereign level 10 (You may upgrade using 100000 lavish points)

[Combat: Saint Realm beginner Pre-Saint Rank.

[Combat Skills: Void Punch (Perfection), Air Crushing Slap (Perfection), Evil-Splitting Sword Technique (Perfection)

[Skills: Ancient Traditional Medicine (Perfection)

[Lavish Points: 900]

There were no changes to the system.

East League Trading Company had not officially started spending money yet. Now, it was still in its preparatory stage.

However, Alba told David that East League Trading Company would start buying a few villas as the headquarters They would start spending money soon.

After that, they would start spending more and more money

if they wanted to build branches in the medium or large trade zones, they would also need to buy a lot of resources after it started operating normally

They would need funds if they wanted to grow East League Trading Company in a short time.

Of course, this was everything David wished for. His main goal in starting East League Trading Company was to spend money and get lavish points.

It would be even better if he could spend trillions as soon as possible to help him get to Pre-Saint Rank. The system's data was not interesting.

Then, David picked up the stone and held it in front of his eyes. He wanted to match up the stone with the system panel to see if the system could detect it.

After the two met, the system changed, and a new pop-up appeared.

[Low-level Space Stone: A Space Stone is an ore with extraordinary powers in the universe. It is a treasure that is rare to come by. It has the power of space and after some refinement, it can be used as storage.

[A low-level Space Stone has one cubic meter of storage space, while a mid-level Space Stone has ten cubic meter of storage space. Similarly, with every increase of the Space Stone's level, its storage will increase tenfold and its value will also increase tenfold. A high-level Space Stone will have 100 cubic meter of storage.

[There are limited ways to use a Space Stone and not everyone can use it. Only people with mind power could use it. Its usage is simple: open the internal storage of the Space Stone with your mind power to store your items. You cannot store living things in the Space Stone. Please be careful with how you use it, Host.]

The introduction ended here.

A light appeared in David's eyes after he read it.

'It's a treasure that I can store my items in!'

This was very useful for David.

Even though it was only a low-level Space Stone and it only had one cubic meter of storage space so he could not place his sword sheath inside, he could at least put the Exquisite Wine of Hundred Flowers and Fruits inside.

It was pretty inconvenient to hold a wine jar everywhere he went.

Since a low-level Space Stone existed, there would surely also be a mid-level one.

If he could buy a mid-level Space Stone, he could put his sword sheath inside the ten cubic meter of storage space.

He would ask Valerio when he had time and see if Treasure Trove had mid-level Space Stones for sale.

If they did, he would buy one no matter how much it cost.

Not only could he get lavish points, but he could also even use it to store his items.
