

I'm A Quadrillionaire by Xirou Huang

Chapter 1935

Chapter 1935

“Vai, you are the head of Treasure Trove, so you should know the value of Treasure Trove! Tell David!” Cedar looked at Valerio.

“Grandmaster, Treasure Trove has a lot of hidden assets, so the specific value is incalculable,” Valerio shook his head and said.

Although he was the head of Treasure Trove, Treasure

Trove had accumulated countless treasures through the development of the Fellowes family over the many generations. Many of these were invaluable.

There were also countless resources stored in each branch.

Hence, it was impossible to give a specific value in a short period of time. Even an approximate figure was difficult.

All the wealth and resources of Treasure Trove could be ranked at least in the top three or even the top two in Star Kingdom.

That was why the Palmore family made such a big fuss. It was so they could take control of Treasure Trove at all costs.

This was a huge cash cow.

It could continuously provide resources to the family so that the family could grow and develop.

“How long will it take to figure it out?” Cedar asked next.

“Not sure. It could be a long time,” Valerio replied truthfully.

“That won’t work! The Palmore family has already started to make a move. Over time, things will become uncontrollable and there will be many changes. The loss of the Fellowes family is also immeasurable. David, what do you think?” Cedar looked at David, seeking his opinion.

“I also don’t think it’s a good idea to drag this on, so you should just name your price! To avoid hitches, I just did the math, and if I add up all the assets given by Master, I can probably come up with 4 hundred trillion Star Dollars. You can decide how many shares that will be,” David thought for a while and said.

This number was the result of his meticulous calculation.

Now David’s Body was at True Saint level 7 and his mind power was only at True Saint level 1.

2. million lavish points were needed to raise both of those to True Saint level 10.

He needed 20 million lavish points to upgrade to Sacred Saint level 1 after getting two

True Saint level 10.

At that time, his combat power would reach beginner Sacred Saint Rank.

However, that was not David’s goal.

Since this was the last transaction, he had to do everything at once and directly upgrade to the limit in order to look down on Star Kingdom and not be afraid of anyone.

He would need 9 million lavish points to get from Sacred Saint level 1 to Sacred Saint level 10 each. With Body and Mind combined, it would take 18 million lavish points.

Adding in the previous 20 million needed to break through to Sacred Saint Rank and the 1.2 million, the total would be 2. million lavish points.

Once he had 39.2 million lavish points, David’s combat power would surpass peak

Sacred Saint Rank and reach a whole new level. He had no idea what would come after Saint Realm.

Anyway, it was definitely not something a Sacred Saint could compare to.

Who else would be David’s opponent in Star Kingdom when the time came?

If he became a Sacred Saint, he would fight anyone who dared to challenge him.

As long as he spent 4 hundred trillion Star Dollars and got 40 million lavish points, everything would be resolved.

It did not matter if he spent the remaining Star Dollars or not.

Even if he spent all of it, it was impossible for him to continue to improve his combat power anyway.

Therefore, there was no need for that.

Forty million lavish points were enough to solve all his problems.

David’s words surprised the four members of the Fellowes family collectively.

‘Four Star Dollars?’

Although the Fellowes family was controlling Treasure Trove, the top three economies in Star Kingdom, they could not help feeling amazed that David was able to take out 4 hundred trillion Star Dollars at once.

They were all very curious.

What kind of sect was David from?

How could it have such a huge amount of wealth?

Even in long history of Star Kingdom, it should be by no means be unknown.
