

Read I Am A Quadrillionaire Chapter 1948

I am a quadrillionaire chapter 1948-Even though both realms had similar connotations, the gap between them was huge. It was as if one was the sky and the other was the earth. They could not be placed on the same level with each other.

God Rank was a ranking limited to Earth.

Meanwhile, Divine Realm was recognized by all of the civilizations in the universe.

Earth had never gotten into contact with the outside world, and that was why it used the word God in the ranking it created for itself.

If the other civilizations in the universe found out that a civilization that was not even at level 1 was using the word 'God' in its power ranking, they would die from laughter.

In reality, the ranking recognized by the universe started from Star Realm.

The ones under Star Realm were all unqualified and were not included in the universal ranking.

These unqualified rankings were unilaterally determined by their respective societies.

There were a lot of civilizations in the universe that were less than level 1, just like Earth.

Therefore, there were a lot of different and unique rankings below Star Realm.

Earth was just one of them.

Someone might even think Saint Realm was the same as Divine Realm.

Aside from that, David also found out that Divine Realm had three ranks just like the other realms.

Anyone who just got into Divine Realm would be a Pre-Deity.

When David's Mind and Body were at the double limit of Sacred Saint Rank, his combat power would reach partial Pre-Deity Rank.

Not only would his Saint's body slowly turn into a Divine body, but even his Saint's Power would also slowly turn into Divine Power.

After he got through the transition period of being a partial Pre-Deity, his Saint Power and Saint's body would successfully metaphorize into becoming a true Deity.

After he went from Saint Realm to Divine Realm, the way he cultivated would also change.

Not only could he cultivate through hard work, but he could also take one civilization under his wing to gain their faith. Then, he could use that to improve himself.

Sacred Saints did not have this power.

Saints could only depend on themselves, while a Deity could get help from a civilization.

After Pre-Deity Rank, it would be Primordial Deity Rank.

After Primordial Deity Rank, it would be Ancestral Deity Rank.

Ancestral Deity Rank was the last rank in Divine Realm, it was also equivalent to Sacred Saint in Saint Realm.

There would be another level beyond Ancestral Deity Rank.

However, there was no information about the realm after Divine Realm.

After reading about the information on Divine Realm, David breathed a huge sigh of relief.

He was finally beyond Saint Realm.

At the same time, Saint Realm was the highest combat power in Star Kingdom.

If that was the case, he was already stronger than the highest combat power in Star Kingdom.

Now, he could do what he wanted without any restrictions, and no one in Star Kingdom could stop him.

Even if Zenon and the like became the head of the Saints Association, David could easily wipe them out.

David quelled his excitement, stood up, and moved his body.

Every movement seemed to carry some kind of power.

Even the space could not bear a movement as simple as David clenching his fists, resulting in countless cracks.

“Is this the power of a partial Pre-Deity? It’s really powerful. It’s not comparable to Saint Realm at all. I’m just a partial Pre-Deity, so how strong will I be when I am a full Deity?” David murmured.

However, after that, David thought of another problem.

After he broke through to partial Pre-Deity Rank, the system did not change or upgrade.

In other words, his strength had reached a limit now, and he could not continue to improve.

According to the rules of the system, if he wanted to continue upgrading, he would need 100 million lavish points.

However, what happened today showed that even if he spent all of his money in the system, it would still not be enough for 100 million lavish points.

He could only have a chance to break through to the proper Divine Realm if he went to a civilization more advanced than Star Kingdom and triggered the system into upgrading itself.

To be honest, David was no longer willing to go to a more advanced civilization.

Everytime he arrived at a new civilization, he would encounter new situations, urging him to continue working hard to improve his strength by spending money.

He would have to worry about it for a long time.

Moreover, there would inevitably be some uncontrollable accidents throughout his journey.

David felt exhausted after coming here all the way from Earth.

He wanted to go back to Earth to rest.

When he was done resting and living, he would then continue to a higher civilization to explore more of its secrets with no worries.

If he encountered any accidents, he would just die.

Furthermore, he did not want to go as he had too many things he was unwilling to part with.
