

## Read I Am A Quadrillionaire Chapter 2169

I am a quadrillionaire chapter 2169-Time was passing slowly, and the battle was one-sided.

The Robotias could not get close to Elora at all.

Even countless super attacks and self-destructions were blocked by her Overlord energy.

Elora's attacks began to intensify, and each attack would take out tens of millions of the Robotias.

Plus, an Overlord had endless energy, so there was no need for her to worry about exhaustion.

With this, Elora could kill as many Robotias as possible.

After a while, a figure suddenly rapidly approached Elora.

Her Overlord energy did not seem to defend her this time.

This figure broke through Elora's energy blockade and appeared in front of her.

Elora was already prepared to face this sudden change.

Now that the Robotias had admitted that they could successfully create a Lv 6 whose combat power was equivalent to that of an Overlord, how could she let down her guard?

When the opponent arrived in front of her, Elora slashed her sword that she had been keeping ready for a long time.

Ding!

However, the opponent not only blocked her full blow but also grabbed her sword.

Elora frowned.

'Have they really produced a Lv 6 machine?'

She felt a little regretful that she did not do everything she could to destroy the Robotias' mother brain.

They did win that time, but it was not so easy to destroy the Robotias' mother brain. Otherwise, they would have done it long ago.

As the most important existence of the Robotias, the mother brain was the key to the continuation of the Robotias. Its strength and shape had always been a mystery, and it was also protected by countless Robotia powerhouses.

Therefore, it was extremely difficult to kill the mother brain.

After much consideration, the five Leila rulers jointly decided to accept the Robotias' apology.

Elora looked at the guy in front of her who caught her full blow.

Although it was in a human form, it was not human at all.

Two eyes occupied a small half of the head.

Then, there were not five fingers on its hand, but three.

It was those three fingers that grabbed her sword.

Elora wanted to withdraw her sword, but it was firmly gripped by her opponent.

'Is this a Lv6?

'Is this the original body or the evolved body?

'Or is this a complete body?'

"Empress Elora, you will be the first Overlord to die at my hands."

"Do you think you have the power to do that?" Elora smiled disdainfully.

At the same time, she silently said, "Overlord Inferno!"

A flame appeared in Elora's body and then quickly spread to the surface of her body.

Elora's whole body was burning under the flames.

Then...

Boom!

The flames spread directly to the surroundings and a raging fire burned in the void.

This was no ordinary flame, but the Overlord Inferno that could incinerate everything.

Whether the Robotias were at Lv 1 or Lv 4, they would die the moment they touched it while the body of a Lv 5 would melt upon contact, causing serious injuries.

Only the Lv 6 in front of Elora could temporarily resist the flames of the Overlord Inferno.

The use of Overlord Inferno caused the Robotias to suffer heavy casualties. Hundreds of millions of members of the Robotias were incinerated by Overlord Inferno, and as it spread, the number continued to increase.

Empress Elora was not idle either.

She pushed her slender left hand which was carrying a more concentrated Overlord Inferno out.

Boom!

There was a loud bang.

With the help of the shockwave, Elora forcibly pulled out her sword and retreated a certain distance.

The moment she stabled herself, she prepared to test the Lv 6 Robotia's strength.

Suddenly, she felt a tearing pain in her soul.
