

## Read I Am A Quadrillionaire Chapter 2181

I am a quadrillionaire chapter 2181-The Elves did not have outstanding talents.

They were considered one of the more relatively backward races in the universe.

It was only because they were very popular with humans and other races that they could gain a foothold in Leila and have a better life than many races.

They knew how to study the psychology of men, and they knew how to play up to those in power.

Hence, they would often send well-trained Elf women to Leila's powerful or powerful forces.

Because of this, the relationship between the Elves and Leila's major races and forces was pretty good.

It was basically the same with the Iridescent Sect of Star Kingdom sending their outstanding disciples to marry into the major forces.

However, the Iridescent Sect was very strong in Star Kingdom, and they excelled as one of the second tier forces.

Eira and her sisters only wanted to wake up Master Azul and they did not want other forces to destroy their plans, which was why they did that.

The Elves, on the other hand, were all about survival.

There were still some differences between the two.

Therefore, their research on this aspect was more thorough and comprehensive.

The Elves had a huge institution that specialized in cultivating women in the clan before sending them to a powerful race.

In Leila, those who could enjoy the service of the beautiful Elves were all prominent figures.

Everyone was also proud to have several beautiful Elf servants.

In addition to L Dollars, the Elf women had also become another currency in Leila's upper class.

Certain forces might not need treasures, but all of them favored Elven women.

When the major forces rewarded their people with meritorious deeds, the first choice would surely be Elf women.

Of course, the women had to be unused.

Once used, they would be worthless.

In order to survive better in Leila, the Elves made great efforts in this regard.

Other races were studying how to break through their realm and enhance their own strength.

However, the Elves only looked into how to better serve men to bring them more enjoyment.

Since they were weak, they would not fight for more authority or power. Plus, they could indeed bring everyone pleasure, so the Elves lived a very leisurely life.

No forces would cause trouble for them, otherwise, they would be the enemy of the whole Leila.

That was how the Elves survived.

Since the middle-aged man could be serviced by several Elf Women, it was clear he had a prominent status.

At least, he would have done meritorious service for his force, leading to him being rewarded with Elf women.

The middle-aged man who was enjoying himself suddenly heard a voice in his mind.

"Blue, news came from a direct descendant of the family who awakened his innate skill a million years ago. He encountered trouble in a level 7 civilization called Star

Kingdom and should have lost his life. Go and see what's going on."

"Alright, I'll take someone there right away," The middle- aged man immediately stood up and replied respectfully.

"You don't need to bring anyone. It's a bit far and it'll be a waste of time. You should go first as that will be faster. Go see if there is anything of value in the level 7 civilization. If there is. Arrange for someone to take it over. If not, give them a profound lesson so that they know they can't just kill anyone in the Feather family."

"Got it."

Not long after, a figure turned into a blue light, passing through layers of space, and headed in the direction of Star Kingdom.

David and the people in power in Star Kingdom had no idea that the Feather family had already sent someone over.

According to Blue's speed, he surely would not need three hundred years. He did not even need one percent of that.

Azul estimated three hundred years based on the Feather family sending over a huge team.

He thought that the family would definitely send a huge team to take over Star Kingdom after receiving this news.

In the message, Azul clearly stated that Star Kingdom was a world that had not been discovered by higher civilizations.
