

Read I Am A Quadrillionaire Chapter 2233

I am a quadrillionaire chapter 2233-David came back to Sole again in The Spirit Cage through the system.

After he went to Star Kingdom to upgrade, his combat power in the real world was greatly increased, but his strength in The Spirit Cage also made great progress since his mind power had upgraded from Primordial level 10 to Ancestral level 1.

However, he had yet to use his full strength since he came to The Spirit Cage, so David did not know where his limit was.

The people in the second-tier city were too weak.

Maybe only in the first-tier city or the main city could he meet someone strong enough for him to use his full strength.

However, David was not planning to leave Sole for the first- tier city just yet.

He would only leave after he had at least one upgrade.

He would need 9000 lavish points to go from Ancestral level 1 to Ancestral level 10.

In total, he would need 18000 points for his Body and Mind.

It would not be too late to leave after collecting all 18000 lavish points and raising his Mind and Body to Ancestral level 10.

According to the previous time, it should not take too long for him to collect 18000 lavish points.

Besides, with Thor's help, David would not need to worry about it himself.

Thus, it saved him a lot of trouble.

After going to the first-tier city, he would have to meet new friends and establish new relationships.

It would be very laborious.

The first-tier city was more prosperous than the second-tier city and there were more opportunities to spend money, but if David did not have enough strength or if he did not do anything, his speed of obtaining lavish points might be slower than in Sole.

Based on what David learned from Beanie, in The Spirit Cage, there was a huge difference between the first-tier city and the second-tier city. They were worlds apart.

Any ordinary third-rate force in a first-tier city could easily destroy a second-tier city.

So, one could imagine how big the gap was.

When both his Body and Mind were raised to Ancestral level 10, David would leave, no matter what.

The next breakthrough would require a hundred thousand lavish points.

It would be very difficult to spend ten trillion L Dollars in a second-tier city.

Not that it could not be done.

It was just that he had spent so much money in Sole, an investment of ten trillion L Dollars or more might cause skyrocketing prices and social unrest.

David did not want this.

He was not the kind of person who would do anything for his own benefit.

He also did not want to affect and inconvenience ordinary people.

Sole was too small for someone like David. When the time came, he could only choose to leave.

In the following days, David continued to stay in Sole.

He would take Pebbles and the others out for a walk if he had nothing to do.

Thor would bring him some treasures every few days anyway.

So, his lavish points would also slowly increase.

However, as time went by, Thor collected less and less treasure.

He had no choice as he had bought everything he could. If this continued, he could only go to other cities.
