I am a quadrillionaire chapter 2236-Then, the two Overlords would become one.

There were not many Overlords in the universe, and there were also no Overlords who became a couple.

However, at this critical moment of success, something happened to Empress Elora.

She was provoked by the Robotias and got into a big fight that caused her to disappear.

How could Emperor Lufian accept this?

Although he could sense that Empress Elora was still alive, he also knew that Empress Elora was very weak and needed his help.

As long as he found Empress Elora and saved her, he believed that she would not reject him anymore.

Therefore, Emperor Lufian desperately needed to find Empress Elora quickly.

In his opinion, Empress Elora was most likely seriously injured by the Robotias after a sneak attack. Then, they took her to their lair.

She needed him the most now.

Then, the fourth voice sounded.

“Okay, stop arguing. This matter is indeed not simple! It is best to act cautiously. We represent not only ourselves but also the countless creatures in The Spirit Cage. If we are not careful, we may cause the loss of life and the extinction of countless creatures.”

Compared with the first three, the fourth one sounded older and calmer.

Plus, his words also carried weight.

After he finished speaking, no one refuted him.

Clearly, he had a very high status.

Anyone with a little knowledge of The Spirit Cage would be speechless in shock when they heard these four.

The first three were Emperor Drogo, Emperor Valentin, and Emperor Lufian. They were three of the five Leila Rulers.

The fourth was easy.

There was only one person whose one words Overlords Emperor Lufian and Valentin dared not refute.

He was the head of the five Leila rulers, Emperor Sylvio.

At the same time, he was also the strongest person in The Spirit Cage.

In addition to the missing Empress Elora, they would make up the strongest five in the Spirit Cage, also known as the five Leila rulers.

It was said that Emperor Sylvio was not human but an ancient beast in human form.

Emperor Sylvio was already around during the creation of the universe.

Therefore, one could imagine how long Emperor Sylvio had lived.

Of course, these were just rumors.

Only Emperor Sylvio knew the truth of this matter.

Even the other four of the five Leila rulers did not know Emperor Sylvio's history and identity.

Emperor Sylvio was already an Overlord before he gained popularity.
