I am a quadrillionaire chapter 2264

She was waiting for everything to be settled before returning to Amber City. After that, using the descending point, she would return to the real world to deal with a mountain of affairs.

The Elven Queen had the greatest power among the Elves.

So she needed to decide everything herself.

The role of the elders was to monitor the Elven Queen in important matters so that she always put the interests of the Elves first.

The Elven Queen had too much power that the Elves found a few prestigious old people to restrict her.

Queen Isa was not only the most powerful person among the Elves but also the number one among the Elves after accepting the inheritance from the previous Elven Queen.

Standing on the top of the tree, she could not find a target, so she could only vent her anger towards the world.

Boom!

Strong energy emanated from her body.

Chirp! Squawk!

In the dense forest with a radius of tens of hundreds of kilometers, countless birds and beasts were disturbed by this energy. Some burrowed underground while some fled far away.

Their instincts told them that this place was very dangerous and they must leave as soon as possible.

At this time, the edge of the dense forest.

On a spacious avenue, three carriages were moving forward.

This was, of course, David and his team.

After more than one and nearly two months of traveling, they were finally more than halfway into their journey.

Along the way, David and others encountered many caravans coming and going.

Their three carriages were small compared to those other caravans that consisted of tens or hundreds of vehicles at every turn.

They looked like a family on vacation.

After what happened last time, David didn't dare to stop arbitrarily, nor did he dare to let Evie and the others reveal themselves, to avoid problems and prevent further delays.

He just wanted to reach Wier quickly and start a new round of accumulating lavish points.

When he left Sole, he had gotten some lavish points, and because of Evie last time, he gained even more in that third-tier city.

Now, David's lavish points were enough for him to raise his Body to Ancestral level 10.

Under the effect of double limits, his strength would reach a new height.

This would allow him to surpass Divine Realm and step into a higher realm.

David had no idea what it was because he still had not returned to the real world to upgrade himself.

He wanted to go to Wier first.

Whether he upgraded his Body would not affect his strength in The Spirit Cage. It would only affect his combat power in the real world.

In reality, he did not need to worry about much anyway.

Ancestral Deity Rank was completely sufficient to deal with all potential incidents.

Next, he needed 100 thousand lavish points to continue to breakthrough.

It was such a large quantity.

So, a second or third-tier city could no longer meet David's needs. Thus, he must go to the first-tier city.

After he upgraded his mind power to the limit of the next level in the first-tier city, he would consider going to the main city of Amber City that Evie mentioned.

While he was at it, he would send Elven Princess Evie back.

David was resting his eyes in the carriage while Pebbles slept soundly in his arms.

In less than two months, David felt that the little girl had grown a little.

Although it was not too obvious, it was still noticeable under his careful observation, i

According to this growth rate, perhaps it would only take a year for the little girl to grow into a fifteen, sixteen, seventeen, or even eighteen-year-old young woman.
