I am a quadrillionaire chapter 2291

Blue received an order from the head of the Feather family, asking him to rush to the target location, a level 7 civilization called Star Kingdom.

A direct descendant of the family who had been missing for millions of years sent a distress signal from there at the last moment of his life.

Although the Feather family had countless family members, there were very few who awakened their innate skills.

Those who possessed such abilities would become pillars of the family.

Someone who could awaken their innate talent had died in a small level 7 civilization, so the family would surely send someone to check.

After receiving the order, Blue set off immediately.

With his Divine Realm strength, his speed would be unimaginably fast if he did not bring anything to burden him.

After nearly a year of traveling, he finally arrived at his destination.

Level 7 civilization Star Kingdom.

Outside Star Kingdom, Blue entered without any hesitation after looking at the countless shining civilizations in front of him.

Along the way, he did not hide his whereabouts and aura.

In his opinion, a small level 7 civilization would not have any Deities so it was not worthy of his attention at all.

Whether human or other races, as long as it was an intelligent life, once it reached Divine Realm and possessed Divine Power, it would be completely different.

Divine power was a power that can crush Saint Power.

No matter how huge one's Saint Power was, in the face of Divine Power, it was like an egg hitting a stone. It would be beyond their power.

In other words, no matter how many Saints there were, they had to kneel when they ran into a Deity.

In a civilization with only partial Deities, Blue figured he was invincible.

He did not need to be timid and could just crush them.

Although partial Deities also had Divine Power, it was not at the same level as the real Deities.

The only difference from Saints was that if there were too many partial Deities, they would still pose a threat to Deities.

After all, they had Divine Power.

However, eight or ten partial Deities would be useless, at least tens or hundreds were required.

However, it was a mere level 7 civilization.

Most of them did not even have one partial Deity, would they have dozens or hundreds?

The answer was, of course, no.

Therefore, Blue was not at all worried about failing.

He showed his Divine Realm strength as soon as he got here and he wanted to make the entire civilization fall into the fear that he brought them.

After entering Star Kingdom, instead of stopping at the outskirts, Blue headed straight to the heart of Star Kingdom.

Those living in the outskirts were some pitifully small forces, so their understanding of the Star Kingdom was limited.

Blue knew that even if he went, he would not get the information he wanted.

So, he would just go a little deeper.

Once he arrived at the center of Star Kingdom, he would look for a place to learn about this civilization.

When passing by the living planet, Blue's Divine Realm energy made the humans on the planet feel unprecedented pressure.

It was as if a boulder was pressing on their hearts, making it difficult for them to breathe.

Everyone stopped what they were doing and stared blankly at the sky.

Their bodies trembled unconsciously.

It was a fear that came from the bottom of their hearts.

It was the impulse to worship produced by lower life forms when they face higher life forms.

All creatures in the living planets that Blue passed by bowed down to the ground.

This was the fear and despair that a Deity brought to ordinary life.

Whether it was in body or soul, none were on the same level.

After going deep into the Star Kingdom, Blue encountered a continent.

The force that could occupy an entire continent was much stronger than the force that could occupy a planet.

It was the same everywhere.

It was because there were more resources on a continent than on a planet.

Blue reckoned that on this continent, he should be able to get the information he wanted, so he headed there.
