

Read I Am A Quadrillionaire Chapter 2362

I am a quadrillionaire chapter 2362-Taking this opportunity, Thor took away a lot of Wier's treasures.

It made the merchants of Wier despise him.

David's lavish points also rose to 30 thousand points.

The trading volume in these two-three days was comparable to the previous two or three months.

Even David had to praise Thor for his awesome method.

Sitting alone in the carriage, David turned on the system out of boredom.

[Lavish Points: 31892]

Both his Body and Mind were at Supreme level 1.

30 thousand lavish points could raise one of them to level 4.

Yet, David had no plans to improve his Body and Mind for the time being.

He wanted to spend 10 thousand lavish points to upgrade Cloning to level 4 to see how it would be.

It was a pity that he could not exit The Spirit Cage while on his journey.

David did not know whether he would appear in the carriage or appear from where he left The Spirit Cage. '

This was a very important question.

If he was in the original place, it would be troublesome. The carriage would have gone and if someone saw him on the way, it would be very hard to explain himself.

'I'll go back to the real world to upgrade myself when we rest for the night.'

Carriages, as the most commonly used means of transportation in The Spirit Cage, were excellent in both speed and stability.

The day passed quickly.

In the evening, the team randomly found a place to rest. They were living on the carriage anyway, so anywhere would be fine.

After everyone rested, David quietly exited The Spirit Cage.

Back in the real world, he directly turned on the system and chose to upgrade Cloning.

A window popped up.

[This upgrade of Cloning will consume 10 thousand lavish points. After the upgrade, Cloning will be upgraded from level 3 to level 4. You can also go from summoning three clones with three drops of blood essence to using nine drops of blood essence to summon nine clones. Please confirm if you want to continue the upgrade?] >

There were two options.

Yes or no.

David's eyes lit up. The corners of his mouth turned up and his heart blossomed with joy. 'What a surprise!'

Unexpectedly, after Cloning was upgraded from level 3 to level 4, instead of adding one clone to make it a total of four, as he originally thought, it would directly give him six more to make it a total of nine clones.

'10 thousand lavish points to have 6 more clones, so it also means 6 beginner Supreme Overlords, right?

'This deal is a bargain!

'What a great bargain!'

If he encountered an enemy that he could not defeat in the future, he could summon 9 clones. In addition to his main form, it would be a fight often against one.

At the same time, the nine would be death warriors and they could self-destruct at a critical moment.

How powerful would a beginner Supreme Overlord's self-destruct power be?

Even a mid- or late Supreme Overlord, or even a peak Supreme Overlord, would fear it.

Cloning was such a good help in leapfrog battles.

'If I can't beat my enemy, I can still escape while my 9 clones help me.'

"Hehe!"

David burst out laughing.

He was even happier than when he got to Overlord Realm. If he could have 100 thousand lavish points and upgrade his Cloning from level 4 to level 5, how many clones would he get?

It would definitely be two digits.

If he fought with a dozen clones, that would surely make people quiver in fear.

The only thing he had to worry about was his blood essence.

There were not a lot of treasures in Star Kingdom that could replenish blood essence.

He asked the Fellowes family to help him collect some, but he did not get the result he wanted.

That thing was as precious as the things that could help increase soul power.

He had to find treasures that could replenish blood essence.
