

Read I Am A Quadrillionaire Chapter 2364

I am a quadrillionaire chapter 2364-The blood essence began to change immediately.

In just three seconds, it turned into another David.

That hint of torn soul power immediately penetrated the clone's body.

The initial corpse immediately gained intelligence but it did not move.

'No! No!'

David felt something was wrong.

There were at least two problems.

First of all, even if he had the blood essence, you could not use Cloning when he was not around. That meant that he could not summon a clone using only blood essence.

Secondly, after the soul power was torn out, it would also lose autonomy if he was not there to control it. So, it would not be able to control the actions of the clone, let alone fight.

If these two problems were not resolved, he could not leave the blood essence here to protect the Star Kingdom and Earth.

When he felt that the time was almost up, David turned on the system and returned to The Spirit Cage.

He would think about these two problems when he was on his way in the morning. When he had the solution, he would try again.

Not long after returning to his carriage in The Spirit Cage, he heard Beanie's voice outside.

"Master David, it's dawn. Shall we continue our journey?"

"Let's go! You don't need to ask me in the future. You can make up your own mind about such trivial matters. I'm a man so I don't have a lot of requests. We can leave when the sun rises."

‘Yes, Master David, we will set off then.’

Beanie left after speaking.

After being with him for such a long time, she also knew what David was like.

He did not have the bad habits of the sons of wealthy families.

So, she did not need to be so polite to him.

Inside the carriage, David let out a sigh.

Luckily, he came back just in time. If not, Beanie might notice that he was not in the carriage.

If she could not wake him, she might come inside the carriage to take a look.

If he appeared out of thin air when Beanie came in, that would be difficult to explain.

Although it would not be a big deal if he was discovered, it would be better to keep this secret himself.

David was thinking about both of those questions the entire day.

What could he do so that the blood essence could automatically summon the clone under certain special circumstances, and at the same time, how could the torn soul power control the clone to fight when David was not around?

To solve these two problems, when it was time to rest at night, David returned to the real world and split his soul.

Once again, he experienced debilitating pain.

Then, he used the torn souls for experiments.

He went all out to solve it.

Whatever happens, he had to solve these two problems.

Otherwise, he could never accept being tied to Star Kingdom, unable to leave.

On the second night, he still could not solve the problem after an entire night of work.

David was exhausted but not discouraged.

David knew how much it would mean to him if he succeeded.

He could leave a few drops of blood essence and some traces of his soul power in Star Kingdom and Earth for some trustworthy people.

When they encountered invasion from foreign enemies, they only needed to take out a drop of blood essence and they could automatically summon David's clone to defend against the enemy.

What problems could an Overlord not solve with his combat power?

There might not be a lot of Overlords even in level 9 civilization Leila.

If that was the case, David could roam around with peace of mind.

He continued to think during the day on the third day.

At night, he went back to the real world to study.

He kept repeating the same thing and after a month of continuous persistence, David finally found a breakthrough and saw the hope of success.
