

Read I Am A Quadrillionaire Chapter 2373

I am a quadrillionaire chapter 2373-After swallowing countless elixirs, Elora closed her eyes and began to digest the elixirs she swallowed.

After breaking the elixir down and absorbing them, her soul power would be restored.

Three days later, Elora, who was sitting cross-legged, suddenly opened her eyes.

The elixirs had been successfully absorbed.

So, her soul power recovered a lot.

Yet it was not enough. This was just the beginning.

After that, she did not hesitate before inhaling again.

Another large amount of treasure flew into her mouth.

Since her soul power had recovered, the treasures she swallowed this time increased from one-tenth to two-tenths.

Then, she continued to close her eyes and break them down.

Three days passed.

On waking up, Elora swallowed another three-tenths of the treasures.

The remaining four-tenths were also swallowed for the fourth time.

Time passed slowly.

After absorbing all kinds of top elixirs and treasures from the eight main cities, Elora finally woke up.

Now, her demeanor completely changed.

She appeared to have reverted to Empress Elora, the one who did countless legendary deeds and fought the Robotias with her Emerald Lotus Sword.

Her soul power had also recovered nearly 80%.

While that was still some way from the peak, it was enough for now.

Dozens of superpowers and countless large, medium, and small forces of the eight main cities in The Spirit Cage contributed almost half of their family fortune only to restore Elora's soul power to 80%.

Therefore, it could be seen how powerful the soul power of an Overlord was.

"80% of my soul power has recovered. It's almost done.

Time to go! But before I leave, I need to meet someone," Elora said to herself.

The person she was going to meet was, of course, David.

After she leaves The Spirit Cage this time, she did not know when she would be seeing him again.

If Leila could overcome the combined invasion from the Robotias and Soul Devourers, she would have a chance to see David again.

If she lost, there would be no chance.

Elora must go to see David.

However, she would not let him know. She would only look at him from afar before leaving.

She would leave it to fate whether she could see David again.

No matter how confident Elora was, she knew that Leila would not have a guaranteed victory when facing the Robotias and Soul Devourers,

Standing up, Elora took a step forward. Soon, her body disappeared, and not even a trace of her shadow was left.

At this time, she was, without exaggeration, already the strongest in The Spirit Cage.

Even David, whose soul power had reached Supreme level 1, could not be Elora's opponent.

After all, Elora was not just a Supreme Overlord.

With only 80% of her soul power recovered, she could not crush David but she could surely beat him to the ground.

It is estimated that David was only abused.

During the journey from the first-tier city Wier to the main city Amber City, three carriages stopped to rest by the road leading to Amber City.

Not that David wanted to rest but the Foal Beast needed feeding.

How could they let the beasts run and not feed them?

David stepped out to stretch his body and take in some fresh air.

He was exhausted doing the research to make clones that could move by themselves after leaving his main form.

Luckily, his Body and soul power had reached Overlord Realm.

After resting for two days, he was restored to his original state.

Beanie let out a sigh of relief when she saw David recovering.
