

## Read I Am A Quadrillionaire Chapter 2383

I am a quadrillionaire chapter 2383-After listening to David's explanation, Sid turned his eyes to the clone. He wanted to speak but was a little afraid.

Even if it was a clone, it was still Master David's clone, and not everyone could command him.

At least, he did not dare at the moment.

David also saw Sid's hesitation, so he said to the clone," Show your strength to Lord Sid, but be careful, don't hurt Star Kingdom."

"Yes!" The clone replied calmly.

He was a sliver of the soul separated from David. It could not think and would only execute orders.

If David was there, he would undoubtedly have to obey David. If David was not there, he would obey the person who broke the seal.

David had set it in advance so that the only thing the clone could do was execute orders.

Then, it would dissipate automatically when the time was up.

The clone faced the void in the distance. A lot of dead stars were floating in front of him, each of which exuded the aura of death.

One should not underestimate these dead stars. There used to be life on them too.

However, their lifespan was up and the creatures living on them had left. Eventually, what awaited them would be their final glory, which was self-destruction.

Boom!

The clone displayed his energy and circles of airwaves dispersed.

Sid felt that his body was unable to move an inch under this energy.

His heart trembled.

'How strong!

'It's much greater than the pressure the Feather family put on me back then.

'This clone of Master David is definitely a Deity, and he is also the most excellent one among the Deities.

'No wonder Master David could kill Blue in seconds.

'If his clone was so strong, how strong would his main form be?'

The moment the airwave spread, David protected Sid promptly to prevent him from being hurt.

Even if the clone had held back his strength, it was not something that a Sacred Saint like Sid could resist.

Once affected, he would surely die.

At this time, the many dead stars in front of them began to explode.

Boom! Boom! Boom! Boom! Boom!

They watched as the dead stars floating in the void exploded like fireworks, forming an extremely spectacular scene.

The moment the dead stars exploded, they released intense light and enormous power.

Countless huge space black holes appeared in the void. They looked like mouths from hell that were devouring everything.

It was the first time David had seen such a shocking sight.

No one else could explode planets and watch them like they were fireworks.

Sid, on the side, was dumbfounded.

'Master David's clone didn't even move.

'With just the energy he emitted, he could cause such great destruction.

'A Deity was indeed terrifying.'

"Okay, stop this now. Don't scare Lord Sid," David ordered.

The clone immediately withdrew his energy and stood there motionlessly. Instantly, the void became calm again.

"Lord Sid, you believe me now, right?" David looked at Sid.

'Yes, I believe you! Master David, your heart is with Star

Kingdom, and I thank you on behalf of all the creatures here! Thank you, Master David. I was judging you unfairly just now with my despicable mind. Please forgive me for my ignorance," Sid quickly replied.
