

## Read I Am A Quadrillionaire Chapter 2399

I am a quadrillionaire chapter 2399-The Spirit Cage.

David and his group looked at the majestic 100-meter-high gate in the distance ahead.

It was engraved with two gigantic words: Amber City!

They finally arrived at Amber City, one of the eight main cities of The Spirit Cage.

There were many more people.

Not only humans but many other races as well.

David stared at the majestic gate in the distance. On the inside, he was thinking about how to start his plan in Amber City and get enough lavish points so that he could upgrade his strength and Cloning as soon as possible.

After all, Amber City was one of the eight main cities of The Spirit Cage so many powerful forces of level 9 civilization Leila would gather here.

This city gate alone was not comparable to those first-tier and second-tier cities.

Moreover, the terrifying power David encountered along the way was probably from Amber City.

'I wonder how many powerful people like that are in Amber City.

'If there are a lot, it would be troublesome.'

David regretted it a little now.

Pebbles was gone anyway, so why was he in such a hurry to come to Amber City?

The main purpose of coming here was to buy more precious treasures for Pebbles and earn some lavish points by the way.

Now that Pebbles was gone, he should continue to stay in Wier, develop frantically, and continue to accumulate lavish points slowly.

He could leave when he was strong enough.

At least while he was there, he was invincible so no one dared to trouble him.

However, Amber City was different.

The powerful person he met on the way was not someone David could deal with.

Even if he used all of his means and efforts, he would still have no chance of victory.

However, since he was already here, David stopped worrying.

He had a great attitude and decided that he only needed to be more careful.

David did not know what level his Overlord strength and soul power would be in Leila and The Spirit Cage.

In Leila, he was second only to the five Leila rulers.

While he was in The Spirit Cage, it went without saying that he would be invincible as long as the five rulers were not here.

However, David had no idea.

Now, he wanted to buy treasures of heaven and earth in Amber City, but he did not know that most of the treasures here were taken away by Elora.

Yet for David, this was not necessarily a bad thing.

The fewer treasures, the higher the price.

After Pebbles left, what David needed was to spend money to get lavish points, not the treasure itself.

The system's evaluation of the treasures' price was not fixed so it would change along with market fluctuations.

The higher the price of treasures, the happier David would be as it would mean that he could spend more money and get more lavish points.

“Rivers, when you arrive in Amber City, you should still follow the old rules. Go do market research, and see how we can start and gain a firm foothold. On the other hand. Beanie, you should go and find a place that’s good to stay in. After that, we’ll buy a place and live there temporarily. Don’t be afraid to spend money, the two of you. I have all the money in the world and I will be happy if you spend more,” David stared at Amber City in front of him and instructed.

‘Yes, Master David!’ Thor and Beanie replied simultaneously.

“One more thing, Amber City is one of the eight main cities of The Spirit Cage after all. So, this place is no less powerful than Wier. On the way here, I sensed a very powerful person spying on us. So since we are new here and we don’t know much about this place, we should keep a low profile as much as possible. Don’t be too flamboyant, but of course, we shouldn’t be afraid of trouble.”

“We understand!”

‘Then let’s enter Amber City! According to the plan, we will stay here for a long time, so you all should be mentally prepared.’

“No matter where you go, we will follow you to the death, Master David.”

After David finished speaking, he led everyone toward Amber City.

Approaching the gate of Amber City, there were a lot of carriages coming and going.

Carriages were the most common means of transportation in The Spirit Cage.
