

Read I Am A Quadrillionaire Chapter 2433

I am a quadrillionaire chapter 2433-Once everything was in place, David took Celia and the women back to Earth.

He did not need to worry about the safety of Star Kingdom anymore.

Sid had one of his Overlord Realm clones and it would be enough for all crises.

Even if one was not enough, Alba had two more.

So, there would be no problem for them to protect Star Kingdom's safety.

Not long after, an enormous tortoise lifted into the air of the Iridescent Sect. Shortly after, it tore open a space crack and went inside.

It was the same vessel David and the women used when they came to Star Kingdom.

The enormous tortoise was only an Eternal so, at most, it could only enter the four-dimensional space.

However, after it entered the four-dimensional space, it did not stop but continued to go into a higher dimension.

It was not because the tortoise's skill had improved.

Instead, it was because as an Overlord, David could move freely in a twelve-dimensional space.

So, he would not feel any pressure taking an Eternal Realm enormous tortoise and a group of women with unequal levels of strength into it.

His mind power was the best barrier.

Levels of space were torn apart and finally, they came into the twelve-dimensional space. The enormous tortoise followed the established path and headed toward level 3 civilization, the Milky Way.

When they were coming to Star Kingdom, David and the women used the four-dimensional space, and now, they were using the twelve-dimensional space to go back. Therefore, they were much faster.

The time spent would also reduce a lot.

If David was doing this alone, it would be much faster.

Because as an Overlord, he could already ignore the rules of space.

Yet, he could not do that if he had other people following him.

Hence, he could only use the twelve-dimensional space.

Level 9 civilization Leila.

Five extremely high statues stood tall on the continent in the center that was named Five Continents.

The five statues represented the five people ruling the entire Leila. Together, they were called the five Leila rulers.

While David was taking the women back to Earth, all of the partial Overlords in Leila gathered at Five Continent.

Meanwhile, three people were sitting crossed-legged on top of the five extremely tall statues.

They were Lufian, Valentin, and Drogo, the three Overlords, and they were here to pass a message to the top forces in Leila.

About forty or fifty people were sitting on the platform under the statues.

These were all of the partial Overlords in Leila.

There were middle-aged ones and old ones.

At the same time, there were both male and female among them.

However, the male-to-female ratio was four to one.

This meant that in about 50 partial Overlords, there were only 10 women.

Among them, an old man with white hair asked, "Are we all here? Let's not make the Overlords wait for too long."

"There are three more. They are the furthest from us but. judging from the time, they should be here soon," someone answered.

"Say, why do you think they summon us here? I remember the last time they did that, it was during the battle with the Robotias. It's been so many epochs since."
