

Read I Am A Quadrillionaire Chapter 2442

I am a quadrillionaire chapter 2442-Mia could not hold back her tears.

She thought, 'I am so blessed to be able to follow Master David in this life. I will even be willing to die for him.'

"Let's go."

After David said that, he grabbed Mia's hand, regardless of whether she consented. Then, he tore open a space crack and walked out with her.

In the sky above Blue Star of the Milky Way.

A small crack appeared and two figures walked out.

Their arrival did not attract anyone's attention.

"Mia, you should go back and reunite with your family for a few days. I'll come and pick you up again after a while.

You're not in Eternal Realm yet so you can't delay your cultivation. You can't be careless either. You will also get enough lifespan once you're in Eternal Realm," David said softly.

'Thank you, Master David. I understand. I will work hard and get to Eternal Realm as soon as possible so that I won't let you down,' Mia lowered her head and said softly.

David was still holding her hand.

Mia's face was very red and she did not dare to lift her head to look at David.

This was the first time she held hands with a man she liked. One could only imagine how happy she felt.

Now, Mia felt as if she was dreaming.

"I told you, you don't have to be so polite with me. We should keep in touch after you go back."

"Okay."

Then, the two headed to where the Concord residence was located on Blue Star.

On Planet Royal that was in the center of the Milky Way.

Nimbus and his family sat together with Wilfred.

“Astrid, tell me, where did you go all this time?” Damora asked.

It had been such a long time since she saw Astrid, so of course, she had to ask where her daughter had been.

Nimbus and Wilfred were all ears, quietly waiting for Astrid’s answer.

They were also curious about where David took Astrid.

“Mother, we went to a place called Star Kingdom,” Astrid answered.

“Star Kingdom? Is it far?” Gamora continued asking.

“I think so. However, what’s weird is that we took the enormous tortoise to Star Kingdom and we spent about two years going. But coming back only took ten days. I also

don’t know why. I didn’t have the time to ask David.”

Gamora was indifferent.

However, Nimbus and Wilfred looked at each other with shock in their eyes.

Astrid did not understand, but they did.

Once someone was in Eternal Realm, they could tear open the space at will and walk into the high-dimensional space freely.

If they were using the same speed, the higher the dimension, the farther the distance if the same amount of time was used.

They used two years when they were going and only used ten days when coming back.

The amount of time shortened so much, which meant that they traveled in two different dimensions for their journeys.

Clearly, the dimension they used when they came back was higher.

As for how high it was, they had no idea.

After all, they were just partial Eternals and not real Eternals.

So, how would they know anything above Eternal Realm?

In short, they could not be sure if it was David who had become more powerful after all these years, or someone else.

“Astrid, did you come back with the original team?” Nimbus could not stop himself from asking.

“Hmm, let me think. I think there’s someone extra.”

‘Who is it?’

“My master!”
