

Read I Am A Quadrillionaire Chapter 2451

I am a quadrillionaire chapter 2451-After David left Dark Cape, he went to Celia's house first.

Jon and Mindy were very passionate when they saw David.

They were treating him better than a biological son.

The husband and wife put down what they were doing and inquire about David's well-being. They were worried that they would neglect him.

David stayed a few days in Celia's home.

Initially, he wanted to spend some alone time with Celia.

Ever since they left Earth for Star Kingdom, the two hardly had time alone. It was pretty inconvenient with so many people around.

However, reality was often worse than imagination.

His plans were always changing and his wonderful imagination was forcefully ruined by his mother-in-law Mindy.

Mindy was very excited and she never noticed her daughter's depressed gaze.

Her son-in-law was Earth's savior and also the boss behind East League International, the biggest financial group.

It was also said that he dominated outer space.

Therefore, it was such an honor to talk to someone like this.

After a few days, David left under the reluctant gaze of Celia and her family to go to the next family.

This trip took more than a month of David's time.

Meanwhile, the news of him coming back to Earth spread.

Earth was wild with joy.

Everyone on Earth viewed David as their idol. Even if not everyone, it was still more than 90% of them.

After all, when Pavan invaded Earth, it was broadcasted live around the world.

Up till now, that video is still circulating on the internet.

The views were shockingly high too.

David knew that once he showed himself, he would cause a huge sensation.

So, no one could see him except for the people that he intended.

With his current strength, it was very easy for him to hide himself.

If David did not want to allow it, even the two Eternal Realm Sovereign Rankers, Nova, and Celeste, or a Saint like Lorraine, would not have discovered him, let alone the earthlings.

After he visited everyone, David went to the headquarters of East League International to visit his old subordinates.

After confirming that East League International had been doing charity this entire time and changed the lives of countless poverty-stricken places, he felt relieved.

When he got home, he noticed that Celeste and Nova were not back yet; they were probably traveling somewhere on Earth.

So, David locked himself in the room and opened the system.

He had been pretty busy lately and it had been some time since he opened the system.

He had no idea how much money Beanie and Thor had spent in The Spirit Cage or how many lavish points they have obtained.

When the system panel appeared, David fixed his eyes on the column headed 'lavish points'.

The number made his eyes light up.

[Lavish points: 683765]

He had about 700 thousand lavish points.

David was elated.

Those two did a pretty good job in The Spirit Cage.

However, David knew that a lot of the lavish points were contributed by Captain Longer of the Amber City law enforcement team.

He promised to sell some houses and treasures to him.

Arian's property was not calculated in units but in blocks.

Moreover, there were even a lot of manors with large areas.

A manor would easily cost tens of billions of L Dollars.

One must know that Amber City was one of the biggest main cities in The Spirit Cage.

So, one could only imagine how expensive a large manor, located in the most prosperous place in Amber City center, was.

Elora took away a lot of the resources from the eight main cities, causing resources to be exhausted and prices to rise. So, David would need to pay the most expensive market price to buy the items.

Of course, this was what he wanted.

Initially, Arian wanted to flatter and build a good relationship with David even if it meant he had to suffer a huge loss.

However, after some calculations, he benefited from this instead.
