

Read I Am A Quadrillionaire Chapter 2465

I am a quadrillionaire chapter 2465-The days passed.

A month later, Lorraine brought Celeste and Nova to Mt. Surr to help The Krums solve this huge threat.

With their strength, this was a very easy fight.

The people of Mt. Surr would not resist at all.

Of course, Lorraine did not kill anyone.

Instead, she just crippled a few of their powerhouses and cracked down on their arrogance.

After the battle, Mt Surr's reputation, which they had accumulated slowly and was about to peak, was all in vain.

Nobody knew if or when they could rise again, even if they wanted to.

After suffering loss, The Krums would never let them have a chance again.

Three months later, Celia and the women left their homes and gathered to train.

Nova and Celeste also came back to teach everyone.

It was of the utmost importance for Celia and the others to raise their strength and break through to Eternal Realm.

When they became Eternals, they would have enough lifespan to stay with David.

If they did not, they would grow old gradually.

None could accept turning old in front of David.

So, they were very serious when training.

Astrid figured she had stayed home for long enough, so she contacted Mia.

The two planned to ask David to come to get them.

After receiving the news, David did not hesitate to head to the Milky Way to bring Astrid and Mia to Earth.

The women were together again.

The countless resources that David brought back from Star Kingdom would be enough for them to use until they became Eternals.

In addition to the teachings of Nova and Celeste, the two Eternal Realm Sovereign Rankers, getting into Eternal Realm would just be a matter of time, as long as the women were not too stupid or they did not have any problems with their intelligence,

Level 9 civilization, Leila.

In a remote corner.

A huge planet was floating in the dark void.

At this moment, the planet was shining in a variety of colors, illuminating the surrounding void.

Four figures were sitting crossed-legged in the north, south, east, and west.

They were Sylvio in the east, Lufian in the south, Valentin in the north, and Drogo in the west.

They were maintaining the movement of the array on the planet so they could not be idle for even a second.

The restoration of an Overlord's body was a long process.

If any mistakes were made, all of their work would be in vain.

After several months of hard work, Flora's restoration was at the final and most crucial step.

If there were no accidents, her body would be restored shortly.

When the time came, she would spend some time getting used to it so that she could completely control her new body. It would not be different from the one that selfdetonated.

With Flora's level of soul power, it would be very easy for her to get a body. She just needed to steal the body of a very talented woman.

However, if she did that, Elora's soul and body would never be 100% compatible.

No matter how she got used to it, there would still be some gaps.

One should not look down on this gap as it could determine the direction of a battle during key moments.

Plus, if she stole a body, she would need to cultivate it again.

Then, it would be unknown when she could get back into Overlord Realm.

Even if those two problems did not exist, with Flora's personality, she would not choose to take those paths.

Other people's bodies belonged to someone after all.

Who was she to take another's life for her own benefit?

For those reasons, she could only choose to restore her body.

"Lufian, Drogo, Valentin, we're at the most crucial step, are you still doing okay? If you encounter a problem, tell us so we can be prepared. Don't have any sudden accidents that will catch others off guard," Sylvio asked.
