

Read I Am A Quadrillionaire Chapter 2469

I am a quadrillionaire chapter 2469-“Sylvio, if you can get Zwei Arithmetics from the God Tier Civilization, why can't we? Even if it's powerful, it can only predict the future so you can seek luck and avoid calamity. However, it can't change the ending. Once its fortune-telling ability loses its function, Leila will lose one of its huge aids. How will you fight with the Soul Devourers? Plus, the Robotias are in play too!”

Stark stated what Sylvio was worried about.

This made Sylvio panic even more.

He did not know whether Stark was telling the truth or not.

If it was true, then it would be troublesome.

He could only seek luck and avoid calamity by relying on Zwei Arithmetics. That was how he got the final victory.

Even so, he got a tragic victory.

Sylvio was the only one who survived among the countless Overlords in Leila.

The rest died in that tragic battle.

Of course, a lot of the Soul Devourer Overlords also died.

In short, Leila was the one gaining an advantage.

If the Soul Devourers had found a way to respond to Zwei Arithmetics and cause it to lose its effectiveness, then Leila might be in trouble.

Facing the collaboration of the Soul Devourers and the Robotias, it would be very hard for Leila to hold on without the help of Zwei Arithmetics.

“Stark, stop spewing nonsense to dampen the spirit of Leila!” Sylvio criticized loudly.

He was doing this to hide the panic in his heart.

His confidence came from Zwei Arithmetics.

If he lost Zwei Arithmetics, Sylvio would be half-crippled.

However, even if he was, he was still not easy to defeat.

After all, he had proven his strength.

“I am dampening your spirits? Sylvio, do you think I need to do that? This time, Leila has no hope. Not only has its biggest reliance, Zwei Arithmetics, lost its efficiency, but it also has to handle the collaboration of the Soul Devourers and the Robotias. How are you going to fight us?” Stark smirked.

“You don’t have to worry about that. An outrageous race like the Soul Devourers shouldn’t exist in the universe at all!” Sylvio triggered loudly.

“Nonsense! Sylvio, we are a race that’s been recognized by the Gods. Meanwhile, you humans from Leila are just the nutrient for our evolution. Stop struggling and accept your fate!” Stark retorted back.

The two renowned Overlords started to argue with each other.

They kept spitting out insults and curses.

Sylvio’s purpose was obvious. He was trying to buy time so that he could finish restoring Elora’s body and then decide what to do.

Meanwhile, Stark knew what Sylvio was doing. However, he did not immediately interrupt him. It was unknown what was going on in his head.

As time went on, Elora could feel her body almost restoring fully.

She was elated.

No matter what, she should first restore her body before anything else.

After that was done, she would have the power to fight again.

There were too many restrictions being soul. She could not even use 10% of her strength when she was at her peak.

Seeing that they were at the final moment, Sylvio knew Stark would not give up on this chance.

His body exploded and he rushed to Stark. At the same time, he yelled, "Lufian, Drogo, Valentin, I'll leave the rest to you. I'll stop Stark. No matter what, we have to help Elora restore her body."

"Go without worries, Sylvio!" Lufian and the other two answered at the same time.

At this moment, Lufian also did not want to hide his

strength anymore. The moment Sylvio left, he increased his output to maintain the movement of the array.

"Haha! Sylvio, if you want to complete Elora's restoration, you have to ask us if we agree," Stark laughed.

How would he not know what Sylvio was trying to do?

He was waiting for this final moment.

If he stopped them too early, only Elora would suffer the backlash. The rest of the people who were maintaining the array like Lufian and the others would not suffer any injuries if they escaped in time.

However, it would be different if he stopped them at the crucial moment. Not only Elora, but Lufian, Drogo, and Valentin maintaining the array, would suffer strong backlash as well.
