

## Read I Am A Quadrillionaire Chapter 2561

I am a quadrillionaire chapter 2561-The Robotias didn't possess a traditional lair; their lair was wherever the mother brain resided.

Wherever the mother brain went, that became their lair.

The mother brain was constantly on the move.

After consuming everything in its path, it would relocate to another area to continue its consumption.

When the Robotias' mother brain initially arrived in this location, it wasn't as large as it currently is.

As the countless planets and continents of level 8 civilization were swallowed up by it, its body also grew. Eventually, a huge body formed.

Whoever saw it would be horrified by such a big and terrifying alien monster.

At this time, A dark shadow stood in the center of the futuristic hall, located in the most central position of the Robotias' mother brain.

If Sylvio was here, he would recognize that the shadow was Stark from the Soul Devourers.

Stark was a powerhouse whose strength had also reached partial Heavenly Overlord Rank.

However, he only broke through to partial Heavenly Overlord Rank not long ago.

Compared to someone like Sylvio, who had been a partial Heavenly Overlord for hundreds of epochs, the gap between them was still quite large.

So much so that he was even more severely injured than Sylvio after he prevented Elora from restoring her body and had a fight with Sylvio.

"Are you sure you can destroy Leila? That guy Sylvio's strength is not a joke. Anyway, I can't beat him. I listened to you this time and prevented Elora from restoring her body. I fought with Sylvio and was seriously injured. Don't tell me

to do such a thing next time. I desperately want revenge, but I don't want to die in Leila for it," Stark said.

Yet apart from him, there were no other living beings in the hall.

Suddenly a voice came from all directions.

"Don't worry! Those five are not even Heavenly Overlords, so they can't stop us. When we successfully invade Leila, you can take the souls of all creatures. I only want the planets and the continents. After I devour everything, I will be able to grow much more again."

"Not even Heavenly Overlords? You have the nerve to say that out loud. If Sylvio and the others really can't stop you, how did you fail in so many attempts to invade Leila and now even need to involve us?" Stark did not believe the other person's words.

This was not the first time that the Robotias had invaded Leila.

Leila had managed to block their attack a few times before, and Sylvio and others had counterattacked and invaded the Robotias' lair.

Later, for unknown reasons, they retreated.

Now, this guy was claiming so brazenly that the five Leila rulers were nothing to worry about and that they could not defeat the Robotias?

Wasn't that nonsense?

"Hehe! You underestimate me! The reason the previous few invasions were unsuccessful was not because of how strong the five Leila rulers were, but because I haven't devoured this place yet. I don't like waste, so no matter where I go, I have to finish eating before going to the next place. Now that I have devoured everything, my next target is Leila," The mother brain explained with a chuckle.

"To be honest, I don't believe you at all! But since we've come to this point, I can only try my best to help you. Plus, you do have some means and you can at least make

Sylvio's Zwei Arithmetics useless. As long as you can block Sylvio, you can leave the others to us, how about that?" Stark suggested.

“It’s so easy to block Sylvio. He’s just a partial Heavenly Overlord! After I devour the last bit of stuff here, I’ll go straight to Leila. The Soul Devourers don’t need to deal with anyone. Instead, you can just watch from behind. At that time, you will know if I’m telling the truth or not.” The mother brain’s voice was relaxed.

It was as if the five Leila rulers were nothing to it.

“I’m very curious. Since you’re so confident that you can destroy Leila and you’re not even bothered by the five Leila rulers, why are you getting the Soul Devourers involved?” Stark asked curiously.

“It’s simple! I don’t like living creatures on the planets and continents when I devour them. After we take over Leila, I hope you can lead the Soul Devourers to clear all living creatures on Leila,” the mother brain explained.

“Is that really the case? We only need to deal with the aftermath?” Stark could not believe his ears.
