

I am a quadrillionaire chapter 2586-Sylvio headed towards Amber City.

However, there was still a long distance between them, with thousands of cities in between.

Judging by Sylvio's speed, he would reach Amber City in two or three months.

As long as Elora was still in Amber City, Sylvio would find her.

Looking at his current situation, David had no plans to leave Amber City.

Since he had already gained a foothold here and the increase in lavish points exceeded his expectations, he did not need to leave.

Time passed like this day by day.

Lufian was still recovering from his injuries somewhere in the universe, while Sylvio kept traveling through The Spirit Cage, looking for Elora.

Only by finding Elora and meeting David could Sylvio determine what to do next.

Making the wrong move could be disastrous.

The entire Leila would be implicated and all lives might be in a terrible situation, or even destroyed.

David stayed in Amber City with Pebbles. Every day, he would eat and sleep with the little girl.

He was watching the little girl grow up visibly.

It was just like raising a child of his own.

When he had nothing to do, he would look at his lavish points.

Two months passed in the blink of an eye.

David's lavish points were stuck at 9.82 million points.

He only needed 180 thousand to reach 10 million.

All it took was another 180 thousand more points for him to choose whether to break through Body, Mind, or Cloning.

David ruled out Cloning.

He was allowed to have 81 clones now that his Cloning was at level 6.

It was enough.

If it raised to level 7, and even if his clones reached three digits, it was not much different from 81.

No matter how many clones he had, they still needed to be summoned with blood essence as the medium.

At this moment, David should think about how to replenish his blood essence instead of increasing the number of clones.

After excluding Cloning, only Mind and Body were left to consider.

If he chose to upgrade Body, David's combat power would immediately soar from partial Heavenly Overlord Rank to Heavenly Overlord Rank.

Then, he would also have his 81 clones.

Damn, if 82 beginner Heavenly Overlords were dispatched together, who could compete with David except for the mysterious great Almighty?

Not even the rampaging Lufian could defeat him.

That would be 81 death warriors at beginner Heavenly Overlord Rank, the kind that would self-detonate at any time to protect the main form.

Even if Lufian could withstand one or two explosions, could he resist ten or twenty? He would be blasted into pieces.

However, if David chose to upgrade his Body, it would mean that his Mind would not change. Meaning that his strength in The Spirit Cage would also not change.

David did not know whether Pebbles' enemies were in The Spirit Cage, so it was hard to make a choice.

He was also afraid that his Ancient level 10 mind power would not be able to deal with the little girl's enemies in The Spirit Cage.

Although he was confident, based on Pebbles' various performances and the terrifying energy in her small body, David knew the girl was not ordinary.

If her enemies could damage Pebbles' soul twice turning her into a child a few years old, they were definitely not weak.

To ensure that there were no mistakes, David decided that once his lavish points reached 10 million, he would retreat and upgrade his mind power.

He would raise his mind power to Heavenly Overlord Rank first.

After all, he had Cloning to increase his combat power in the real world, not in The Spirit Cage.

This was the difference between the soul and the physical body.

Many secret techniques could be performed by the physical body, but not by the soul.
