

Read I am a quadrillionaire chapter 2602

I am a quadrillionaire chapter 2602-All the creatures in Leila knew the five Leila rulers.

Even if they had never seen the statues, they had definitely heard of them.

The reason Leila was so peaceful and prosperous was because of the five Overlord protectors.

Otherwise, Leila would have been invaded by some races in the universe long ago.

Looking at Thor's excited look, David was even more puzzled.

What's happening to Rivers?

Why is he so excited?

"Master David, all creatures in Amber City felt the energy you gave off just now, not just me. We didn't just feel it, we were also quite frightened," Thor calmed down and explained.

"Really? Then I will pay more attention next time and try not to lose control. Rivers, firstly, you should deal with the matter I entrusted you! Remember, you must not let the victims suffer any disadvantages," David ordered again.

"Yes, Master David!"

Thor answered and turned to leave.

However, he hesitated.

The five Leila rulers were his idols and he had always dreamed of meeting them in person.

So he turned and asked again, "Master David, there are some things I shouldn't ask, but I really can't hold myself back, so please tell me, Master David."

"Rivers, if you have any questions, just ask!"

“Master David, is that old man who entered the treasure room just now Emperor Sylvio?” Thor asked, his eyes fixed on David.

‘Yes, that’s Sylvio.” David nodded.

‘Thank you, Master David, for clarifying my doubts!’

Having got the answer he wanted, Thor left quickly under the watchful eyes of David and Pebbles.

It was not until Thor’s figure completely disappeared that the two averted their gazes.

“Davey, are you okay?” Pebbles asked in concern.

“Do I look like I’m not okay? You should pay attention to your master. He is probably injured. I didn’t think he was helping you,” David apologized.

“It’s good that you’re fine. Sylvio will be fine. He should be recuperating now. That’s why he won’t let us disturb him.”

“Pebbles, how’s your memory recovery?”

“I recovered some with Sylvio’s help, but it’s not complete. It’s still very fragmented and I can’t piece them together.

Everything’s a mess and I get a headache whenever I try to think about it.”

“Don’t think about it for the time being. Let your master help you with the recovery.”

“Okay, I got it. Thank you, Davey.”

“Why are you still so polite with me?”

Instinctively, David reached out to caress Pebbles’ head. Suddenly, he realized she had grown up, and his hand hovered in the air. He was at a loss.

When Pebbles saw that, she moved her body and put her head under David’s hand.

After closing the door, Sylvio gritted his teeth and clutched his chest, a pained expression on his face.

Then, he could not hold himself back from cursing.

“Damn it. That brat is not too old but he’s so ruthless. If my soul was not strong, I would have been severely injured by that attack even if it didn’t kill me.

“I wonder how he cultivated it. He managed to solve the problem of upgrading his soul power at such a young age. That is the hardest problem that the entire universe recognizes. He’s even smarter than a genius.

“However, this also proves that Elora has a good eye. Even if that kid is not a Heavenly Overlord, he will be soon. He might even have reached Heavenly Overlord Rank like Lufian.

“No matter what, there’s nothing bad with having someone in Leila who can stop Lufian. Plus, he doesn’t seem bad. He wasn’t arrogant just because he was powerful. He’s trustworthy, so it’s no wonder Elora fell for him so much after only a few years. Something is outstanding about him.”

Sylvio had been alive for so long, and he also had the help of Zwei Arithmetics.

So, he knew how to read others.

Moreover, he had never made a mistake.

Judging from the way someone spoke, he could tell whether the other party was putting on a show.

It was clear that David was not.

Sylvio rubbed his chest and started to make medicine to heal his injuries.

He had to make sure he was healthy before he could help Elora.

If not, it might all go to waste at a critical moment.
