

Read I am a quadrillionaire chapter 2701

I am a quadrillionaire chapter 2701-Three days later, David saw a colorful continent.

It was the Five Continent at the center of Leila.

Only with David's speed, which ignored the laws of space, could he reach the center of Leila in such a short time.

According to Evie, the Elves were living on Five Continent.

After finding the location of the Elven Forest from the galaxy map, David rushed over.

Soon, he arrived outside the Elven Forest.

David was a little surprised looking at the forest in front of him.

From the outside, the Elven Forest was shrouded in green.

David could feel a vitality from the green glow.

It must be the wood element.

However, since it was too strong, it formed a faint green light.

There was also a wood element in ordinary forests, but it was not as rich as the one in the Elven Forest.

The vegetation in the Elven Forest was extremely lush as they were nourished by the wood element.

Some giant trees could even grow to a height of several thousand meters. From a distance, they looked no different

from a huge mountain.

Even ordinary trees were hundreds and thousands of meters tall.

Meanwhile, an ordinary blade of grass could also grow several meters high.

This was unimaginable on Earth.

The largest tree on Earth was about 100 meters tall, not to mention the weeds.

David was about to step into the Elven Forest when he was blocked by a barrier.

He saw that the barrier was formed by a formation.

The Elves should have arranged this to prevent outsiders from entering the Elven Forest.

With David's partial Heavenly Overlord strength, this barrier would not stop him.

He did not need to break it. He could use his ability to ignore the laws of space instead and, with one step, his body entered the Elven Forest.

The barrier was not damaged at all.

If those above Overlord wanted to enter the Elven Forest, they must either unlock the formation or forcibly destroy the formation.

Either way, it would alarm the Elves.

David did not need to undo or destroy it before he entered directly.

He then walked deeper into the Forest.

After a while, David noticed someone watching him.

After releasing a little bit of his mind power, he discovered several Elven women hiding around him.

They almost blended in with the forest. Without his mind power, it would be difficult for him to see them with the naked eye.

It seemed that these races that lived in the forest all year round still had some skills.

With this hiding method, it would not be easy to deal with the Elves in the Elven Forest.

Of course, this was only when there was not much difference in strength.

If the difference in strength was too big, it would be a different story.

Any conspiracy or trick would be in vain in the face of absolute strength.

The reason why David was sure that the other party was Elven women was because he learned about them from Evie.

The Elves were the only intelligent creatures living in the Elven Forest, and the others were beasts who relied on their instinct to survive.
