

Read I am a quadrillionaire chapter 2754-2756

I am a quadrillionaire chapter 2754-Isa smiled at this.

“Great Elder and other elders, don’t worry! Although Master David took the bow, he promised me that he would always protect us from any invasion. In other words, the Elves’ backer in the future will be an Overlord.”

The worries on the faces of the Elves elders present turned into surprise in an instant.

An Overlord said that he wanted to protect the Elves?

What did that mean?

That meant that the Elves would no longer have to act depending on the mood of other forces.

Even the top forces in Leila, who had partial Overlords, would not dare to show any disrespect to the Elves.

Happiness came too suddenly.

The elders of the Elves were all so excited that they were speechless.

“Isa, is that true? Did Master David really promise to protect us forever?” The great elder asked with wide eyes.

“Of course! I wouldn’t dare to joke about this kind of thing,” Isa replied firmly.

“Then did Master David leave any token? Something that can inform him when the Elves are in trouble.”

“He didn’t leave anything like that.”

After Isa finished speaking, she saw the disappointment in the eyes of various elders and continued, “But Master David left three boxes with his clones sealed in them. He said that we can unlock the seals and summon the clones when the Elves are in danger. The clone can exist for an hour and has the same strength as Master David, enough to resolve all crises. Moreover, Master David also said we can ask more from him if we run out.”

“Hiss...” All of the elders inhaled sharply almost at the same time.

A clone with the power of an Overlord?

This was much more intimidating than the inherited bow.

Moreover, there were three of them!

At this moment, the great elder had a thought in her heart.

The Elves also rose to prominence under Isa’s leadership.

With such a strong backing, coupled with the Elves’ unique resources, it would be difficult for the clan not to rise.

“Isa, can you show us the box that seals Master David’s clone? Don’t get me wrong! We have no intention of taking it for ourselves. We just want to see it. After all, it is the clone of an Overlord,” an elder said cautiously.

The other elders did not speak, but they could not hide the look of anticipation in their eyes.

“Of course!”

Isa took three exquisite small wooden boxes and handed them to the elders.

She was not worried that the other party would not return the boxes to her. They must use a unique method to undo the seal and summon David’s clone. Otherwise, it would be useless.

Although these elders were stubborn, they were still wholeheartedly concerned about the Elves.

They would sacrifice everything for the Elves.

Otherwise, Isa would not tell anyone about David’s clones, let alone show everyone.

The great elder carefully took one of them and began to observe it carefully.

After looking at it for a while, she could not find anything special, so she asked aloud, “Isa, how do I open this?”

“Great Elder, if you want to summon Master David’s clone, you must use the unique technique he taught me. It will be useless even if others take the box.”

“I see!” The great elder suddenly realized.

She did not ask how to break the seal, and she did not need to ask.

This powerful deterrent would be best kept in the hands of the Elven Queen, just like the inherited bow.

I am a quadrillionaire chapter 2755-Since the incident with the Vingean, the Elven clan has been joyful!

With David’s promise and the three Overlord clones, Isa became bolder in making decisions. She was like a runaway wild horse and would do everything without restraints.

First, the Elven women serving the heirs of Leila’s major forces were recalled. At the same time, she dismantled the training institutions.

From now on, the Elves no longer needed to rely on these means to please other forces. They only needed to develop their own strength.

Isa’s move directly confused the heirs of Leila’s major forces.

They had no idea what was going on.

However, they could clearly feel the Elves’ change in attitude.

The best proof was the ending of their original benefits.

They were all young and full of energy, so they did not come to the Elven forest just to participate in the sacrificial ceremony.

Instead, it was for the Elven women.

As a result, they did not get anything. How was that possible?

Slowly, some people began to unite and put pressure on the Elves.

In the eyes of the heirs of the major forces, they were showing the Elves plenty of respect by showing up.

However, they had been neglected. Did the Elves think they were weak?

The Elves were just a small clan, and they dared to offend so many forces at the same time. They were asking for death!

The heirs thought that the Elves would come rushing over to apologize and offer better benefits as soon as they spoke out.

However, it was the complete opposite.

Isa ignored all of the pressure from the heirs of Leila's major forces.

In the past, she had no choice. In order for the Elves to gain a foothold in Leila, she had to sacrifice some of her people to win the favor of the major forces.

However, it was different now.

The Elves had a strong backer.

He was so strong that all the other forces combined were no match for him.

Now that they had such an impressive background, would the Elves still need to be submissive in front of the major forces?

Of course not.

As time passed, the day for the Elves' sacrificial ceremony got closer.

The heirs of the major forces could not stand it anymore.

Led by the heir with the most power, he and his people barged into the Elves' forbidden land.

There were no densely packed giant trees here, just tall towers.

It was one of the places that the Elves did not allow outsiders to enter.

After she got news about this, Isa appeared on the tower and looked at the heirs of the major forces below.

"Queen Isa, what is the meaning of this?" One of the heirs of the top power asked.

“Why do you say that, Master Birdwhistle?” Isa pretended to be confused.

She might not recognize everyone below the tower, but Isa knew all those sent by the top forces.

“Stop pretending! You know what you have done! I will ask you right now if the Elves are determined to go against everyone? You have to think about it carefully. The total number of people here includes over half of Leila’s forces. Can you afford to offend us? Or do you want to become the public enemy of the entire Leila?” Master Birdwhistle said with a sneer.

“Master Birdwhistle is right! Queen Isa, since you invited us here to attend the sacrificial ceremony of the Elves, we are your guests. Isn’t it a bit unethical for you to do this? We won’t leave if you don’t give us a reasonable answer today,”

another heir to a top power added.

“Yes! We need a reasonable explanation! Otherwise, you will be everyone’s enemies!”

Others spoke in agreement.

If it were before, Isa would panic after being pressured by the heirs of so many forces.

However, it was different now.

Since she had a backer, it meant that she was confident.

The Elves were now backed by a powerful man called David. So why would she be bothered by these small potatoes?

Even if the heads of the major forces came to her, she would not be afraid.

I am a quadrillionaire chapter 2756-Not to mention the young and immature heirs.

Nobody knew how many of those here today would become heads of their respective forces in the future!

Perhaps not even one percent of them.

The competition would be fierce if they wanted to be the head of a major force.

Talent, ability, mind, sophistication, and luck were all indispensable.

Isa did not think that these guys, who thought about trivial things all day, could become the actual head of the forces behind them.

“Everyone who’s here is naturally a guest of ours. We have never thought about being enemies with you, and we have always carefully maintained our relationship with you. As for the explanation, I’ll give you one after the sacrificial ceremony, and I ensure all of you will be satisfied, so please be patient!” Isa said calmly.

She did not want to have a fallout with these heirs, who represented the major forces.

That would not be necessary.

Although David had promised to protect the Elves forever, it would not be good to bother him too many times.

One must know that an Overlord was very mysterious, and they had their own business to take care of, so they could not stay in the Elven Forest all the time.

“Why wait until the sacrificial ceremony? We can’t wait any longer. We need an explanation now. Otherwise, we won’t leave! Is that right?”

“Yes! We need an explanation right now!”

“Explain!”

The scene was chaotic.

Those qualified to come to the Elven Forest had a high status in their respective forces.

All of them were stubborn and intractable, so how could the small Elven clan restrain them?

Today, these heirs were ready to force their way into the forbidden area of the Elves since they did not get what they wanted.

Isa looked at the angry crowd and frowned slightly.

She wanted to scare these guys, but she felt it was inappropriate.

Offering so many forces was not good for the Elves after all.

What should she do?

Isa could not make up her mind for a while.

There were two paths before her.

The first path met their needs but went against Isa's original intention.

Back then, she had no choice, but now that she had an Overlord backing her, why should she suffer that grievance?

As the Elven Queen, Isa wanted to protect every member of the Elves.

The second path was to shock these rebellious heirs so they would know it was different now.

The Elves no longer needed to pander to them.

She had two ways to deter them.

Either use the clone David gave or ask David to show up in person.

Isa was reluctant to use the clone as it could save her life at a critical moment.

Since David was still here, she would ask him to show up.

After making up her mind, Isa quietly told Evie behind her, " Evie, go get Master David and ask him to help scare away these guys."

'Yes, Mother!'"

After Evie answered, she turned and left.

David lived in the forbidden land and was also the first outsider to enter the forbidden area of the Elves.

This showed how much the Elves valued him.

After Evie left, Isa shouted, “Everyone, please wait for a moment. I will give you an explanation soon!”
