

I am a quadrillionaire chapter 2763-Intimidated by Overlord David, all the major forces went back obediently and waited quietly for the Elves' sacrificial ceremony to start.

At the same time, they reported back to their families about what happened.

There would definitely be an earthquake in Leila soon.

In addition to the Leila rulers, another powerful Overlord had appeared in Leila.

This was no small matter.

Yet, none of this had anything to do with David.

He was bidding farewell to Elven Queen Isa and Elven Princess Evie.

"David, are you leaving now?" Evie asked reluctantly.

"Yes! You heard it, too. Sylvio needs me, so I have to rush there right away. I won't be attending the ceremony. I'm sorry!" David replied.

"Master David, please don't say that. You have helped us too much. Without you, the Elves would still be living humbly and never have a chance to succeed.

We will never be able to repay your kindness. This is the Elven forest's special product, the Water of Life. I hope it will be useful to you.

Please accept it," Isa said, giving David a palm-sized gourd.

Although it looked small, like the Space Stone, a trace of space law was hidden within. It could hold much more liquid than its apparent capacity.

"You're too kind, Ms. Isa. The Water of Life is useful to you but not to me. You should keep it! This way, it can play a greater role, and I have already obtained

the Elves' inherited bow. That is enough for me," David refused.

As a partial Heavenly Overlord, the Water of Life was of no use to him.

Even if he was injured, an Overlord's body could recover much faster than taking the Water of Life.

"Master David, how can a stupid bow offset your help to us? This is just a little something from us. Please don't refuse. Otherwise, we really don't know how to

repay your kindness. Why don't you make a request that we can fulfill?

Otherwise, we won't feel assured."

When David saw Isa's determination, he knew he had to accept the gift.

As for requests, he had none!

Could the Elves help him with anything?

Wait!

At this moment, David suddenly remembered that he had been looking for a treasure that could restore blood essence.

He could not find any in Star Kingdom, but would Leila have any?

He was about to face off against Heavenly Overlord Lu'an. David knew he was not strong enough, and his clones would be his biggest trump card.

He needed blood essence to support his clones.

Ordinary blood could not compare to blood essence.

If David overused it and could not recover it in time, David's body would start developing problems.

So David asked, "Since you asked, I won't be modest. I do need something, and I wonder if you have it here. Or perhaps you know where it is. You can also tell

me where to get it, and I will get it myself."

As long as Leila had the treasure that could restore his blood essence, there was nothing he could not get as an Overlord.

If the Elves did not know, he would ask Sylvio when he saw him.

This thing would be of great use to him.

It was also necessary to deal with Lu'an.

"Master David, please tell me! As long as we have it, you can take it no matter what it is," Isa quickly replied.

"I need a treasure that can restore the blood essence of my body. Do you have one?" David asked with a hint of expectation.

A treasure to restore blood essence?

Isa fell into thought.

Blood essence was a very important thing in the human body, but there were few treasures that could restore blood essence.

The main reason was that one would not lose blood essence normally, so very few needed it.
