

Read I am a quadrillionaire

I am a quadrillionaire chapter 2854-The people who were aware of the value of sea beasts were trembling with excitement.

This scene confirmed a saying. Those who survived a catastrophe were bound to have good fortune later on.

After David found the Space Stone, he went directly to the outside of Planet Gorgon. Then, he opened the Space Stone, took out the spare communication device, and modified it with the system to verify his identity information.

Then, he received countless messages from Celia and others on Earth.

In the past, no matter where David went, he could receive messages from Celia with the help of the system. At the same time, he would often chat with them to report that he was safe.

Now that he had disappeared for six or seven years, one could only imagine how worried Celia and the others would be.

David contacted Celia immediately and told her that he was fine. He told her he did not reply then because he had entered a forbidden area, but now, he was out and was safe.

Since David had the system, he could contact Celia on Earth across such a long distance.

After receiving the news that David was safe, Celia and others breathed a sigh of relief. They were finally relieved, and their eyes turned red.

They did not receive any news from David for six years and felt like they had lost their backbone.

Therefore, they did not even bother to train.

The only reason they were training was so that they could get to Eternal Realm and stay with David forever.

So, what would be the point if something happened to David?

Fortunately, Celeste told everyone that, no matter what happened to David, they could only go find him after they trained hard and had enough strength.

Only then did everyone find the reason to train again, and now that they received news from David, they were all relieved.

After comforting Celia and others on Earth, David contacted Elora.

He was slightly relieved once he learned that Lufian had not appeared during this period. So, he went to Planet Gorgon and returned to Townlet Pescado.

Next, he would start to improve his Body and Mind.

He returned to his room without alerting anyone and turned on the system to improve his Body.

A window popped up.

[This upgrade will consume 10 million lavish points. After the upgrade, the host's Body will be upgraded from the original Ancient level 1 to Heavenly level 1. Please confirm whether to proceed.] There were two options: yes or no.

Of course, David chose the first option.

[Upgrade in process. Please wait.] Soon, David felt the pain caused by the upgrade in his Body.

Usually, it would be the most unbearable to enter into another big realm.

David had no idea if other people's breakthroughs were like this, but he had to go through this.

No matter how painful it was, he must endure it.

David did not know what the consequences would be if he passed out. He had never tried it and would never dare try it.

After a long time, David opened his eyes.

All the clothes on his body were soaked with sweat, and he could wring the sweat out with his hands.

Yet, it was not over.

My Body had only reached Heavenly level 1, and his Mind was also only Heavenly level 1.

He must upgrade both of them to Heavenly level 10.

Then, David began to improve his Body again.

Heavenly level 2, Heavenly level 3... Heavenly level 9, Heavenly level 10.

The upgrade of his Body was done.

Now, it was his Mind's turn.

Heavenly level 2, Heavenly level 3... Heavenly level 9, Heavenly level 10.

When his Body and Mind reached Heavenly level 10, David felt his body shake as if he had reached some critical point.

So, he quickly turned on the system and focused on the combat column.

[Combat: partial Origin Realm (partial Almighty)] When he saw his combat, David showed a smile.

Origin Realm was above Overlord Realm, and it was also known as the Almighty Realm.

Since the remaining lavish points were not enough to improve his Cloning, David chose to end his seclusion.

Partial Origin Realm was enough to kill Lufian easily. It would be the same even if Lufian had the strength of a peak Heavenly Overlord after he went berserk.

Moreover, David still had the help of his clones.

He could not imagine how spectacular it would be to see 81 partial Almighties with similar minds fighting at the same time.

The self-detonation of a partial Almighty could destroy the entire Leila.

Of course, David did not need to do all that to defeat Lufian. He only needed one clone for that.

With David's careful personality, he would not fight Lufian with his main form even if Lufian was just a beginner Heavenly Overlord.

Lufian had already lost when David became a partial Almighty.

After upgrading his combat, David did not rush out of the room. Instead, he forced out three drops of blood essence, made a clone, and sealed it in a wooden box to give it to Cy and Peach for self-defense.

After everything was completed, David stood up, dried the soaked clothes with a shake, and walked out of the room.

He was going to say goodbye to Peach and Cy.

After all, Planet Gorgon was just a tiny chapter in his long life.

Perhaps he would stop by when he took Celia and the others around the universe in the future
