

## Read I am a quadrillionaire

VI am a quadrillionaire chapter 2863-David's contemptuous tone stunned Lufian.

He had already reached peak Heavenly Overlord Rank, so why did David have the courage to say that?

Did he have a trump card?

Without giving Lufian any extra time to think, David forced out four drops of blood essence and summoned his clones. The four drops of blood essence immediately turned into four clones, surrounding Lufian and blocking his movements.

Once David's four clones surrounded him, Lufian felt extremely insulted.

In the battle a few years ago, David used dozens of clones and constantly made them self-detonate, and that was why neither side won.

Now that he had recovered from his injuries and his strength had undergone earth-shaking changes, David decided to summon four clones.

Wasn't David looking down on him?

"David, are you looking down on me?" Lufian suppressed the blood lust in his heart.

After going berserk, his sanity would be weakened and replaced by bloodlust.

Only after he calmed down could he slowly recover.

However, his combat power would drop back to mid- Heavenly Overlord Rank if that happened.

"No, no, no! Lufian, you misunderstood. It is precisely because I think so highly of you that I summon four clones for you." David smiled disdainfully.

He was completely relieved after learning that Lufian's true combat power was only peak Heavenly Overlord Rank.

Although David did not believe that Lufian could break through to Origin realm and become an Almighty in such a short period, what if he became a partial Almighty like him?

Even if he was not afraid, killing a partial Almighty would be very difficult.

Furthermore, the most important thing was that the selfdetonation of a partial Almighty would be extremely powerful and would cause irreparable damage to Leila.

Therefore, it would be impossible for David to randomly detonate his clones as he did in the battle a few years ago, greatly limiting his combat effectiveness.

Fortunately, Lufian was only a peak Heavenly Overlord, which relieved David.

It would be very easy for four partial Origin Realm clones to deal with one peak Heavenly Overlord.

“What do you mean?” Lufian looked confused.

“What do I mean?” David sneered.

Then, his tone changed.

‘You’ll soon know what it means.’

After saying that, he immediately controlled the clone and released some of his energy without waiting for Lufian’s reaction.

Boom! Boom! Boom! Boom!

There were four unparalleled explosions.

Not only were they larger than Lufian’s, but they also contained a trace of Origin Power.

The Origin Power was the nemesis of Overlords.

One could have a little bit of it only by reaching partial Origin Realm.

Then, once one became an Almighty, could they completely control the Origin Power.

Although he only used a trace of Origin Power, he could still firmly restrain Heavenly Overlord Lufian.

The four clones surrounded Lufian and formed an array to stop Lufian's Devour.

At this moment, Lufian was confused.

He had not completely lost his sanity after going berserk.

The energy exuded by David's clone caused the power in his body to continuously give way as if it had encountered a nemesis.

There was only one possibility.

David was using Origin Power on him as it was the only thing that could restrain a peak Heavenly Overlord.

Lufian panicked.

Judging from this, David was now at least in partial Origin Realm.

It was Origin Realm, also known as an Almighty!

Even if he was halfway there, it was still not something that an Overlord could go against, not to mention that David also possessed the unparalleled ability to clone himself.

Now, Lufian finally understood.

I am a quadrillionaire chapter 2864-No wonder David only summoned four clones. He was indeed thinking highly of Lufian.

How terrifying would it be if he summoned dozens of clones?

Even a real Almighty might not be able to escape safely.

"No... No... Impossible! This is absolutely impossible! David, how could you have Origin Power? You have to be an Almighty to have it! You can't have it!

This is not real! This must be an illusion! You are lying to me!" Lufian yelled maniacally.

He could not accept this.

He would not allow anyone to be stronger than him.

At the same time, his energy surged as he tried to break out of the cage containing him.

Thud! Thud! Thud!

The collision sounds continued.

However, no matter how hard Lufian tried, the array composed of four partial Origin clones was still containing him and not moving at all.

A partial Almighty was enough to destroy Lufian, let alone four of them working together.

Sylvio and Elora, who were standing next to David, heard what Lufian said, and their minds went blank.

As Overlords, they knew that Origin Realm, or the Almighty, came after Overlord Realm.

They thought Lufian was already invincible in Leila since he had reached peak Heavenly Overlord Realm.

Who would have thought David would become a partial Almighty and possess a hint of Origin Power?

David was still a partial Heavenly Overlord the last time he fought Lufian, right?

He could only fight Lufian by relying on his amazing Cloning, and in the end, neither side won.

How much time had passed since then?

It was only seven years.

For Overlords, seven years passed in the blink of an eye.

Which of the five Leila rulers' age was not calculated in epochs?

Going from partial Heavenly Overlord Realm to partial Origin Realm in just seven years?

Was that a joke?

Besides Lufian, Sylvio and Elora also thought it was an illusion.

It was so unreal.

As he turned to look at David, Sylvio understood this boy less and less.

Words like genius, pervert, and monster could no longer describe David.

Sylvio even suspected that David might be the reincarnation of an Almighty.

Only in this way could he explain how David attained his current achievements in such a short period.

However, there was another problem.

Even if the Almighty lost their body and only had their soul left, they would also choose to restore their body, just like Elora.

They could not reincarnate. After all, there were too many uncertainties in reincarnation.

If they could not regain their memories, they would go back to becoming ordinary folk.

An Almighty would not take that risk as the gain outweighed the loss.

Elora was already used to this.

Ever since she met David in The Spirit Cage, there seemed to be nothing he could not do.

The doubts she had time and time again were cleared time and time again.

Elora was no longer shocked; instead, she felt proud and figured this was inevitable and right.

This was her Davey!

Although Elora was much older than David, what did it matter?

Strength was everything in the universe.

Since she was weaker than David, so why couldn't she call him Davey?

Elora liked having David's protection.

After all, she was just a woman.
