

## **Read I am a quadrillionaire**

I am a quadrillionaire chapter 2867-Unsurprisingly, Lufian died.

At the end of the day, he was just a mid-Heavenly Overlord. Even if his combat power had improved after going berserk, he was still just a peak Heavenly Overlord.

On the other hand, David was a partial Almighty who surpassed Overlord Realm.

He was many times better than Lufian.

Moreover, he had the help of his clones.

Even if Lufian were a partial Almighty, it would still be difficult for him to escape the siege of dozens of David's clones.

Lufian, one of the five Leila rulers who had protected Leila for hundreds of epochs, disappeared from this world quietly.

How lamentable!

Apart from the trick of fate, the main reason why he had reached this point was because of his dual souls.

It could be said that the souls were a double-edged sword. While it gave him unparalleled talents, it also created an uncontrollable personality within him, which led to his eventual death.

After Lufian died, Leila was no longer threatened.

David entered The Spirit Cage and met Beanie and Thor.

After several years of development, Jumbo Court had branches in almost all major cities in The Spirit Cage and first and second-tier cities.

Although there was some resistance throughout this journey, everything went well eventually with the support of Amber City's Mayor Salem.

After not seeing each other for several years, their respect for David had not changed at all.

They understood that they could only achieve what they had because of David.

Otherwise, they would have been devoured a long time ago.

David came to The Spirit Cage for two purposes.

The first was to raise 10 million lavish points and upgrade his Cloning to level 7.

A partial Almighty's combat power, coupled with level 7 Cloning, had reached its peak.

Therefore, there was no point in earning lavish points anymore. His strength would not change if he did not upgrade the system anyway.

If he wanted to continue to improve his strength, the only way was to collect the top three Ancient Weapons to start the final evolution of the system.

Even though he had collected the two artifacts, the Sun Shooting Bow and the God of Thunder Hammer, David still had little confidence in finding the third artifact, the Sky- Splitting Ax. 2 After all, the universe was too big.

Finding a weapon was harder than finding a needle in a haystack.

So, he would just let nature take its course.

In addition to collecting lavish points, David had another thing to do.

That was to seek the opinions of Beanie and Thor to see if they wanted to continue to stay in The Spirit Cage or return to Leila.

Since he did not need lavish points anymore, David would not return to The Spirit Cage again.

He would make arrangements for them no matter what the two of them chose.

David would not treat his people badly.

Moreover, the contributions made by these two were not small.

After hearing that, Beanie and Thor thought for a long time and decided to return to Leila.

At the end of the day, The Spirit Cage was just a place for training and improving soul power. Everyone who went in there would eventually leave, and they were no exception.

Leila was the final destination.

Once he solved the matter between the two, it would be much easier to deal with his lavish points.

With David's current strength, he no longer had to worry about being exposed, so he could collect lavish points in the fastest way.

He then randomly found a few mayors, met several major forces in the city, and inadvertently revealed a little bit of his strength. After that, he would get streams of treasures.

Once he paid the money, he would get his lavish points.

After collecting 10 million lavish points, David returned to the real world and upgraded his Cloning from level 6 to level 7.

His clones also increased from 81 to 243, a three-fold increase.

With over two hundred clones, David was so confident that he dared to face an Almighty of Origin Realm.

However, the Almighties were mysterious, and not everyone could meet them.

Furthermore, David was not in a hurry to meet an Almighty.

I am a quadrillionaire chapter 2868-After settling everything in The Spirit Cage and promising Elora that he would come to Leila soon, David set out to return to Earth under Elora's reluctant gaze.

That was his home, and all his family and friends were there.

Since he was already a partial Almighty, David could travel much faster.

Not long after, he came to a familiar place. He remembered the messages his old clone sent him, so he decided to take a look at Planet Brechen.

As he approached Planet Brechen, a message popped up from the system.

[Sky-Splitting Ax, one of the top three Ancient Weapons, was discovered.

Please retrieve it as soon as possible to start the final upgrade of the system.]

David looked at the pop-up window in a daze.

What was going on?

He found the Sky-Splitting Ax?

Would the system get its final evolution soon?

This was too f\*cking fast!

David felt like he was in a dream.

Originally, he was relaxed about finding the third weapon, the Sky-Splitting Ax.

He decided to look for it in the future when he took Celia and the others around in the universe. If he found it, it would be great, but if he could not, he would just forget it. He could not force something like this anyway.

Who knew he found it before he returned to Earth?

The discovery of the Sky-Splitting Ax caught David a little off guard.

What shocked him even more was that the system could actually sense the location of the top three Ancient Weapons from such a distance.

Without further thinking, David spread his mind power, and sure enough, he found the weapon on Planet Brechen.

After a wave of his hand, a giant ax flew out and landed before him.

At the same time, David took out the Sun Bow and God of Thunder Hammer.

When the three weapons came together, something unexpected happened.

The system popped up, and the top three Ancient Weapons turned into three light rays. After they integrated into the system, they disappeared.

The system's screen then turned black, displaying only a few prominent characters.

(The system is undergoing its ultimate evolution. Please wait.] That was it?

Everything happened too suddenly.

David stared blankly at the words displayed on the system, unable to recover for a long time.

He wondered, 'Will I have to go to a more advanced civilization to spend more money to obtain lavish points to improve my strength after it evolves?' Judging by the nature of the system, it was very possible.

After the level 9 civilization would be the level 10 civilization, also called the God Tier Civilization.

It just so happened that the system was from the ruins of a God Tier Civilization.

When he got there, would an Almighty discover the existence of the system?

David could not find where the level 10 civilization was and was unwilling to take the risk.

So, he made up his mind.

No matter what the system would become after its ultimate evolution, all he had to do was maintain the status quo.

With his partial Almighty combat power and his level 7 Cloning, David would still have a chance to escape even if he encountered the Almighty, so there was no need to take that risk again.

At least not yet.

After countless years, when he was alone and had lived enough, he would go to the God Tier Civilization and see if he could unlock the system's secrets.

Not now.

Many people were waiting for him on Earth.

Celia and the others would be sad if something unexpected happened to him.

I am a quadrillionaire chapter 2869-David turned around and continued his journey to Earth after deciding on his destination.

The system began a slow evolution process.

Three days later, David stopped midway through his journey and looked at the system panel.

A line of text was displayed.

[The ultimate evolution of the system has been completed. Please find a quiet and undisturbed place within a quarter of an hour.] 'Find somewhere quiet and undisturbed for a quarter of an hour?

'For what?' David had many questions in his mind.

The system upgrade this time seemed different from previously.

However, the system could not talk back to him. So, if he wanted to know, he could only follow the prompts.

After a few seconds, David released a huge amount of mind power to explore the surrounding situation.

After a while, he stopped releasing it.

There was no life around, which was in line with the system's conditions, so he sat cross-legged in the void, waiting a quarter of an hour to come and see what the system would do.

Since he got the system, David had embarked on a different path to becoming a powerhouse. He did not believe that the system would harm him. Otherwise, how would he achieve what he has now?

Time passed minute by minute.

As the quarter hour approached, even David, who had a lot of experience, could not help but feel a little nervous.

He did not doubt the wonders of the system.

However, he had no idea what changes the ultimate evolution would bring, and the unknown was the most worrisome.

Even if he knew that the system would not harm him, David could not be 100%

assured.

As David waited nervously, a quarter of an hour was up.

Suddenly, an unprecedented severe pain swept over him.

“Ah!” David could not stop a howl from escaping his lips, and it caused the void around him to vibrate.

Fortunately, there was no life around. Otherwise, his voice alone would have caused many casualties.

One must know that David’s endurance was very high.

Whenever he had a breakthrough last time, no matter how painful it was, he would never cry out and would just endure it silently.

Yet this time, he could not bear it the moment it started.

So it was clear how intense the pain was.

Not just physically but also mentally.

In the past, David had a breakthrough in his Body or Mind, and he only had to suffer one at a time. Yet, just now, the pain in his body and soul overwhelmed him at the same time.

Since he had never experienced it before, David could not hold it in and let out a howl.

After that, it officially started.

Endless pain hit him, and they were countless times more intense than what he had endured when he broke through before. Coupled with the double torture of his body and soul, David wished he could faint immediately.

Yet, he knew in his heart that he could not faint no matter what.

Once he passed out, he could not control the direction of events.

David did not like this feeling, so he had to be aware of what was happening to him.

If an accident occurred, he could take first aid measures promptly.

For 81 days, he endured excruciating pain that would be unbearable for most ordinary individuals.
