Chapter 889 Slave mark?

'What's that?

'How can I stop it?'

David was confused.

He had a lot of questions in his heart, but the system did not plan to explain anything to him.

Instead, it only warned him to stop the slave mark.

However, David thought about it, and judging from the system's personality, it would not harm him.

Furthermore, he also felt that Pavan was not a kind person.

He came from the center of the Milky Way, crossing a distance of hundreds of millions of miles to come to this peripheral area, just to send warmth to the human beings on earth?

Only a fool would believe it.

These people would not do anything if it would not benefit them.

They would not be motivated unless there was profit.

So, how could they possibly have come to earth?

At this time, David stepped forward.

He moved directly opposite of Pavan. Mason and other masters from Earth also followed behind David.

David was now the strongest man on earth, so these people naturally respected David.

"Pavan, right? Please stop this so-called gift and leave. We Earthlings don't need this and don't want to leave. We just want to stay here and live our own lives," David said.

“You b*****d ! How can you speak Master Pavan’s name so casually? Kneel and apologize right now, or I will break your leg!” An elder stood up and pointed at David, cursing angrily.

Pavan waved his hand slightly.

The elder bowed respectfully after seeing it.

Then, Pavan asked, “You should be David Lidell, the strongest human being on earth, right?”

“That’s me.”

“Did you break the comet just now?”

“Yes.”

“Spectacular! You’re amazing. You reached this level before stimulating the potential inside you. Once it’s stimulated, you will have a boundless future. I have high

hopes for you, so you should follow me now. Be my guard! I won’t mistreat you,” Pavan said insipidly.

“Okay, but I have a few questions to ask you. As long as you answer me honestly, I will follow you,” David thought for a while and said.

“Oh? Ask away,” Pavan said with interest.

“Were you behind the comet?”

David’s first question surprised Pavan a bit.

He was the number one powerhouse on Earth and must have found something.

However, Pavan did not care anymore.

They had almost finished refining the slave mark.

No one could stop him from planting slave marks on the earthlings.

V

“Yes, but we didn’t know that the earth was a living planet at the time. You must know that there are billions of planets of various sizes in the entire Milky Way. However, there are very few planets that can be called living planets. You don’t have to worry, even if

you couldn't stop it, we would have stopped it ourselves to ensure the safety of the earthlings once we discovered that this was a living planet."

Pavan explained.

He was very fond of David.

Plus, once the slave mark was planted, David's future contributions to him would be beyond imagination.

Pavan was also afraid that after David learned the truth, he would rather die than give in.

It would be very troublesome if that happened.

"Okay, I'll believe you for now. That says 'slave', right?" David pointed to the golden word gradually forming on the top of his head, and continued to ask.

"Yes," Pavan replied simply.

Chapter 890 "Slave, as the name implies, means slavery. Although I don't know what method you are using, your purpose should be to enslave us human beings on Earth, right?"

"David, you are brilliant, but the truth is not what you think. I just want to give you all identities so you can leave earth. This place is too poor, and with your talent, you should go out and take a look. The galaxy's center is your stage, where you can display your talents to the extreme and compete with other talents," Pavan persuaded earnestly.

"Give us identities to leave Earth? Is your blood required for that? Is such tedious refining required? Pavan, I don't believe you, so please stop," David said calmly.

"David, you have to know that the Earth is still a living planet that has not been discovered, which means you earthlings are unregistered residents that are not recognized. Therefore, you need my mark before you can go out boldly. Don't worry, I don't have any ill intentions. I'll just ask for some remuneration, which is insignificant compared to what you will get."

“Sorry, we don’t need that, and we don’t want to go out. We just want to stay on Earth and live the life we desire,” David refused.

“I’ve already said this, so are you really not going to give me any face at all?” Pavan asked with narrowed eyes.

“It’s not a matter of face. It’s because I don’t trust you at all,” David said, unmoved. “I have nothing to say then. The slave mark is about to be completed, and it is impossible to stop it now. You have to accept it no matter what,” Pavan waved his hand and said impatiently.

When Mason and others heard this, they understood.

These people from Stella Civilization Galaxy had ulterior motives.

As for what this was, they did not quite know yet.

Not only them, but the people watching the live broadcast also got a clue what was going on.

However, they could only watch and not express any opinion.

“Don’t blame us earthlings for being merciless then,” David said with a gloomy face.

“What are you going to do? Give me all you got. I can take anything,” Pavan said with a look of disdain. This was just a living planet with only a technology level of 0.7.

Pavan was genuinely not bothered. As the gaps after each level of civilization increased would

be worlds apart. There was nothing to fear about Earth, a civilization that had not even reached Level 1. One would be placing an extremely high value on earth if they said that it was miles apart from Stella Civilization Galaxy, a level 3 civilization. David turned his head to look at the masters from Earth behind him and nodded slightly.

Mason and the others understood what he was saying and quietly passed the message back. Somerland and Falconia received the news quickly. Soon, they immediately shot the missile that had been in based at Dark Cape Peak in Dark Peak.

In an instant, thousands of missiles flew in densely. David spread out his mind power, covering everyone in Somerland.

He wanted to see how these people from Stella Civilization Galaxy would deal with such a strong firepower coverage and what methods they would use to deal with it.

Knowing yourself and knowing your enemy could win you a hundred battles.

David also wanted to know the fighting style of these outsiders.

Pavan and others were very powerful, so naturally, they had long discovered David's little tricks.

However, they did not stop it.

From their perspective, the earth was just a civilization that was not even in Level 1, so how powerful would their attack be?

They were from the Tuffin family of the Stella Civilization Galaxy.

If they wanted to, it would be a breeze for them to destroy the Earth.

Since the earth had taken action, they would intimidate the earthlings in one fell swoop.

They would make the earthlings accept their slave mark obediently. After this, the earthlings would cultivate and serve them from then on.
