

R. Paradise 131

Chapter 131

At the attraction of three blue items, the more people gathered, the more the contractors even notified their friends about the situation here.

“A lot of kakuhou, did this guy kill through all of the ghouls’ world?”

“Who knows, but the bottle of [the original Rc cell stock solution] is the best, no side effects, even if it fails, it still can enhance some attributes.”

Many contractors discussed around, but no one came for bargain anymore.

The threshold of 50,000 paradise coins was too high, beyond the range of most contractors could bare.

A big red-faced man panted and pushed the crowd away to get to the front of the booth. He saw the three blue items but did not really care. Instead, he stared at those kakuhou.

“Friends, I want these kakuhou, how about the price?”

Su Xiao looked up at the big man, the eager in the person’s eyes let him know that he would buy without lowering the price. “They are at the market price. I can’t say that this is the cheapest on the market, but not much lower than mine.”

Red face big man nodded, the price of these kakuhou was indeed fair, if he keeps bargaining, it will mean he could get a good bargain.

“It is true, okay.”

After that, the red face big man bought all of kakuhou on the booth, Su Xiao received 5100 Paradise coins.

The first transaction was successfully completed, which was a good start.

After Su Xiao sat in the booth, he did not hawk-like everyone else. He didn’t need to hawk at all, there were more and more people around him.

Less than ten minutes later, Su Xiao was surrounded by three layers of contractors.

Seeing this scene, Su Xiao frowned, there were too many people, and the people around him were just watching, they would not buy, which made him annoyed.

He could not evict these contractors at all, he did not hold the trading market. Although Su Xiao was not merciless in the battle, he was not arrogant.

Just as Su Xiao was worried, more than a dozen contractors around him suddenly disappeared and were sent to a distant place.

The dozen or so contractors whispered and wanted to squeeze into the booth to watch. A transparent film blocked them.

This was the trading mechanism of the reincarnation paradise. If a person does not have the intention to purchase and stays in front of a stall for a long time, the reincarnation paradise will transfer the person to a distance and stop him from staying close to the booth for at least half an hour.

Looking at this scene, Su Xiao was relieved, his booth's sale would be affected by these contractors who were surrounded only for watching.

“Go, go, go, why do you stay here but not buy anything?”

A beautiful female contractor squeezed into the front, the female contractor was eye-catching in both appearance and temperament, but her breast somewhat made people disappointed.

After seeing the female contractor, Su Xiao's eyes widen at sight and silently changed the price of the [silk bra] from the original 1600 paradise coins to 6100 paradise coins.

The female contractor rushed through the crowd to the booth, her eyes stared straight at the [silk bra]. This equipment could be seen from the introduction that it had an effect of adding a cup, and her flat breast finally had a solution to become bigger.

“That....”

The female contractor spoke but suddenly stopping, she blinked and looked at the price of [silk bra] unbelievable.

“It was 1600 paradise coins. I clearly saw it from a distance, how can it become 6100 paradise coins now?”

The female contractor looked at Su Xiao with anger.

“Cough, you may be wrong.”

Su Xiao looked calm and could not be seen from his expression to find out that he changed the price.

“Shameless.”

The woman contracted was angry, she knew that Su Xiao did it on purpose. So she turned around and wanted to leave.

After looking down and seeing her flat breast, the female contractor hesitated.

“I only have 2,500 paradise coins. If the price is higher than this, it will exceed my tolerance. I tend to become stronger between the bigger breast and the stronger power.”

Su Xiao nodded and revised the price of [silk bra]. Although the person really wanted this equipment much, this equipment could not directly increase combat power. It was still surprising to sell 2,500 paradise coins, he could not be greedy.

After discovering that Su Xiao changed the price, the female contractor did not say anything and bought it directly, 2500 paradise coins were got.

“Well? This thing is not bad.”

The female contractor picked up the [destiny coin] and played it in her hand.

“Hey, beauty, I kindly remind you, this thing was dropped from a fake protagonist, the gain is very strong, but you may lose a lot when you got a deduction, and there is a chance of 1% that nothing will happen.”

A kind contractor gave a reminder.

“Thank you, man, but my luck has always been good. I have flashed when opening the treasure box twice.”

After that, female contract directly purchased the [Destiny Coin], this time she even did not even bargain.

“Awful ‘Europeans’.” Su Xiao whispered.

The female contractor heard Su Xiao’s words, her face was full of smiles, and her red lips were slightly open.

“What, is this big man have unlucky hands, so pitiful?”

After sending a kiss to Su Xiao, the female contractor stepped on the high heels and walked away. The slender legs wrapped in black stockings were particularly attractive made the contractors around watch.

Su Xiao did not speak but sighed, flashing twice was indeed strong, this woman’s luck he had nothing to say, of course, except this woman was bragging.

Looking at the items on the booth, in addition to [primary Rc cell stock] and [original absorption], other items have been sold out, it was less than a half hour, nice goods won’t stay for long.

[You receive (anonymous) contractor’s message, yes/no view.]

The remainder of the reincarnation paradise made Su Xiao quite surprised. He actually received a message similar to the mail.

After turning on, Su Xiao was speechless, the contents of the message were as follows:

“Tell you, your two blue items, our ‘Fraternity’ wants it. If you know who you’re talking about, just hand over the two blue items. Otherwise, I will kill you in the derivative world.”

Su Xiao smiled bitterly and shook his head. Which stupid person is this? If it is really a big force to blackmail him, will they choose to be anonymous?

What’s more, even if there was a large force to extort Su Xiao, he will not compromise to them.

He could just fight by his life in the derivative world. They all had one life. Who will be afraid of?

Su Xiao turned off this message he didn’t want to care about the person.

In the next hour, Su Xiao received several similar spam messages, and he ignored them all.

After a long time, another message appeared. Su Xiao was already impatient. He just wanted to delete the message directly and found something wrong. The message was not long.

Su Xiao saw a paragraph after opening the message.

“Friends, I am very interested in those two things. Don’t sell them alone, give me a half hour, I will go there quickly.”

Finally, he met one who was sincere, did not need the person to say that Su Xiao will not choose to sell one of them alone.

The two used will enhance each other, after using the [primary Rc cell stock solution], they could directly learn [original absorption], the combat power will be enhanced a lot.

These two blue items were the best for one type of person, that was, the main attacker with higher physical strength.

[First-generation Rc cell stock solution] was a blood relationship which was tended to close fight, and [original absorption] required physical strength determination when launching it.

If the main attacker uses this skill, he could completely seize the enemy in front of him, while causing good damage, but also trapping the enemy and restoring his own health point.

Even if a deputy attacker with not strong physical strength, if he can get these two blue items, he can turn over his situation and become the team’s main attacker. Status and treatment will be increased dramatically.

The buyer’s message did not make Su Xiao disappointed, as he rushed to the booth in less than twenty minutes.

Chapter 132

The buyer was a white person with blond hair and blue eyes, holding a slender staff, an aqua blue sorcerer’s robe which had mysterious rune.

“Sorry for the wait.”

This buyer was a famous sorcerer, he was different from those arrogant ones. This sorcerer was humble and gave people a kind of favorable feelings naturally.

Didn’t know why Su Xiao suddenly had the feeling of wanting to make friends with him. This feeling just appeared which shocked him, he knew that the person’s charm attribute was not low.

The idea of wanting to make with each other dissipated, the charm attribute of the person did not affect Su Xiao.

Paying attention to Su Xiao’s look, the sorcerer smiled apologetically.

“Friend, don’t misunderstand, my charm attribute is very high, I’m not deliberately affecting your senses. My name is Adam, the head of the Fraternity Adventurous team.”

When he heard the ‘Fraternity’, Su Xiao scowled.

” Fraternity? I seem to have heard of this adventure group.”

Adam smiled and waved his hand.

“It’s just a little famous…”

Adam had not finished his words, Su Xiao had contacted the reincarnation paradise to spend 2 paradise coins to make a tip of the garbage message he received before to float in front of Adam.

Adam was stunned at first, and then he had no choice but to laugh bitterly.

“My team members absolutely, absolutely will not do such a silly thing, wealth and fame beget jealousy, some things will be inevitable.”

Su Xiao did not say anything, this was just to prepare for the bargain.

“Maybe, let’s not talk about this, how much are these two blue items you want to pay.”

When it came to business, Adam looked serious.

“If I didn’t come here, I was going to pay 30,000 to 40,000 paradise coins, but now I may not need to spend some money, you gave me a sharp feeling, you are a master of close fights.”

Adam’s face was full of confident smile, he was a person who had leadership, gentle but dignified.

“Oh? What are you going to pay.”

Su Xiao also smiled, Adam was not the kind of silly person, the person said that meant to exchange things.

“This thing.”

Adam had a skill scroll in his hand and showed its attributes to Su Xiao.

[heart eyes]

Quality: blue

Type: skill scroll of the passive genre. (rare item)

Effect 1: Enhance the perceivable ability to predict the enemy’s attacks during the close fight, even if the attack is from the back, it can be accurately captured.

Effect 2: Capture enemy flaws in a close fight, this effect needs to master close fight. (Mastered, sword specialization: LV.3)

Rating: 69 (Note: Blue items scored from 30 to 70, the higher the score, the more precious the item.)

Introduction: When you fight, you don’t just look using your eyes. When the enemy’s attack is faster than the speed of light, you must perceive it in your mind.

.....

After seeing the skills of [heart eyes], Su Xiao’s move his eyes from it.

Enhancing perception, capturing enemy flaws, and perceiving attacks from behind. This [heart eyes]'s effects were the best for a close fight.

And this thing was a passive skill, it would always be open after learning, which meant that the chance of Su Xiao being attacked in the dark side may be greatly reduced.

“Good skills, the score is also up to 69, but yours is a blue skill scroll, mine is two blue items.”

Although Su Xiao was extremely eager [heart eyes]'s skills in mind, Su Xiao will not show it.

“It can't be said like this, the skill scroll scored by 69 is rare, and it is a passive skill.

Passive skills worth twice than active skills. You should know that, friend.”

Adam was not fooled easily, and the two began to bargain.

Adam's idea was to use the [heart eyes] scroll to change [primary Rc cell stock] and [original absorption].

Su Xiao meant to let Adam pay 10,000 paradise coins, Adam obviously wanted his two blue items.

“The dispute doesn't work. It is better to do this. Let's take a step back. I brought these two items for a teammate. I need these things, please.”

Adam's tone was even demanding.

When the two sides negotiated, Adam should not say this kind of words. Perhaps these two items were too important for his friend, and Adam could not bear the risk of not getting it.

“If he can't get

[original Rc cell stock solution]

, my brother's strength will not be improved, this represents my brother will die in the cruel paradise, that is my good brother who had experienced countless events with me, please.”

Adam begged twice. This was the leader of a Fraternity adventure group that led dozens of people. Adam rarely had this attitude.

In fact, the value of these two items of Su Xiao was lower than [heart eyes] skills, but it was not much lower.

[Heart eyes] scroll's price was unquestionable. If it sells it to Su Xiao, a master in a close fight, needless to say, 40,000 paradise coins. Even 50,000 paradise coins, Su Xiao had to accept reluctantly.

And his two blue items were at most more than 40,000 paradise coins. The [original Rc cell stock solution] was an item of blood relationship, after all, it was from the Ghouls' world with Lv.3, which was the low force world.

“I don't want to raise the price anymore. I admit that these two items are not as good as the

[heart eyes]

scrolls, but you need them.”

Adam nodded and admitted that he was now in the disadvantage.

“If you need, you have to have the consciousness to buy higher price, add five thousand paradise coins, one side was indeed too greedy.”

Su Xiao just finished his words, Adam put the [heart eyes] skill scroll in front of Su Xiao, the meaning was very obvious, he agreed with Su Xiao’s request.

After paying [the original Rc cell stock solution] and [original absorption], Su Xiao won the

[heart eyes]

and 5000 paradise coins.

“How can I call you?”

“Byakuya.”

Su Xiao chose to say his fake name.

“Let’s give contact information to each other. If you have such good goods in the future, please inform Fraternity first. I will not be a poor man like this next time, but I can help you quickly sell valuable items.”

When the deal was completed, Adam looked good, and he didn’t feel bad after paying a higher price.

Su Xiao nodded and exchanged contact information with him. This contact number was very safe, and it could not be used to view the person’s information or track the location.

All the items were sold, Su Xiao checked the paradise coins he had: 47,272 points.

Now that these paradise coins were not used, he was going to strengthen the attribute points first.

Five minutes later, Su Xiao arrived at the strengthening hall in the center of the reincarnation paradise.

Su Xiao entered the property enhancement warehouse. A prompt appeared.

[Welcome to use the property enhancement warehouse, please pay 100 paradise coins to launch.]

After paying the paradise coins, Su Xiao’s various attributes appeared in front of him.

Strength: 14 (already reduced equipment bonus)

Agility: 13

Vitality: 10

Intelligence: 12

Charm: 3

[Hunter can freely assign attribute points: 15 points]

[Drip, the main attribute of the hunter is detected as strength, agility, intelligence. Please enhance these three attributes as a priority.]

There was a total of fifteen attribute points. Su Xiao was first at the strength and agility attributes. He was deeply impressed by the power and agility of Mars.

In the end, the attribute points assigned by Su Xiao were 6 points added to strength, 5 points added to agility, and 4 points added to intelligence.

[The attribute distribution is completed, the enhancement will start, it will accompany with huge pain. Yes/No use anesthesia function, this function is free.]

“Do not use.”

The enhancement warehouse gradually operated, and a kind of deep pain in the bone came. After the experience of two derivative worlds, Su Xiao’s willpower became stronger and stronger.

The skin of his whole body began to turn red, and cold sweat appeared on his forehead, but even then he still bit his teeth to endure and did not make any sound.

Without knowing how long he had been in pain. Su Xiao, who had been strengthened, was sweating as if it was raining, it looked like he just got out from the water.

After strengthening attributes, his attributes became:

Strength: 20

Agility: 18

Physical strength: 10

Intelligence: 17

Charm: 3

.....

The strength and intelligence attributes had a gap of three points. The three main attributes should at most have 3 points gap, it cannot be enhanced if the gap is higher than 3 points.

Just as Su Xiao was preparing to leave the property-enhanced warehouse, the hint of the reincarnation paradise appeared.

[The strength attribute is the affinity attribute of the shadow of the law, the strength attribute has reached 20 points, the hunter can choose one of the following rewards.]

1. Super strong: Power +2.
2. Violent Muscle: Increase the attack speed by 10%.
3. Fighting more became braver: +5 when the strength attribute is being judged. (it only added when strength is being judged)
4. The eternal breath: increasing the chance of getting out of control skills by 20%.

Chapter 133

Su Xiao leaned on the inner wall of the property-enhanced warehouse. He bit powerless because he just strengthened the attributes. At this time, he needed a few minutes to recover.

With the time of rest, he looked at the options in front.

1. Super strong: Power +2.
2. Muscle violent: Increase attacking speed by 10%.
3. Fighting more became braver: +5 when the strength attribute was judged. (it only added only when strength was judged)
4. The eternal breath: increasing the chance of getting out of control by 20%.

Super strong directly increased the strength was a good choice, muscle violent increased attack speed which was suitable for the Berserker type of warrior, Su Xiao was pursuing to directly attack enemy's weakness, kill the enemy by one attack, so the second option was excluded.

Option 3 looked kind of okay, but compared with option 4, it became worthless.

Now was the choice between one and four, 2 points of attribute point were valuable, but Su Xiao intended to get the option four: increasing the chance of getting out of control by 20%.

Like Su Xiao who fought alone, he feared to be attacked heavily after being controlled at most. Once that happened, he will die.

So 'increasing the chance of getting out of control by 20%.' was especially valuable.

In the end, Su Xiao chose the fourth option. The options in front of that one disappeared. He vaguely felt that his body had changes which were hard to describe.

He clenched his fist, several crisp sounds came, Su Xiao nodded with satisfaction, 20 points of strength was totally different from the past.

A sudden increase in strength of 6 points made him feel full of strength as if he could break a mountain with a punch.

Su Xiao frowned because his body could not normally be controlled because the attributes greatly progressed, it seemed that he has to go to the trial field to get used to it.

Now he could not go to the trial field. Su Xiao had other abilities that had not been upgraded. When all the abilities have been upgraded, it would be the most effective to go to the trial field to adapt to all abilities.

Su Xiao did not leave the property-enhanced warehouse immediately. After paying 100 paradise coins, the special metal sealed warehouse was safe, no one except for him could enter.

Taking out the [heart eyes] skill scroll from the storage space, Su Xiao used the skill scroll.

[You have mastered (heart eyes) passive skills.]

[Detecting extent of combination between the shadow of the law and (heart eyes) the passive skill, detecting...]

[When the detection is completed, the extent of combination between the two is over 95%, (heart eyes) automatically included in the list of the shadow of the law's skills.]

Skill four

Heart eyes: Lv.1 (passive)

Effect 1: A significant increase in perception, 5% of chance to perceive an attack behind.

Effect 2: 1% of chance to catch the enemy's attack or flaws during the defense, after successfully capturing the flaw, it will enter the 'Ultra-limit' state.

Ultra-limit: All potentials are released temporarily, lasting for 2 seconds with 24 hours cooldown.

.....

Su Xiao did not feel surprised when he saw the skills of heart eyes.

In the current situation, the skills of the heart eyes were not strong, or somewhat weak, but this was not the case in the real situation.

Heart eyes were now only in level 1, which was the initial stage. Although the extent of combination between the heart eyes and the shadow of the law was high, heart eyes were not the skill of the shadow of the law.

If he wants to upgrade heart eyes, he can just go to the [Skills Upgrade Hall] next door, he only needs to use the paradise coins, and doesn't need the soul crystal (small).

Only upgrading the shadow of the law required the soul crystal (small), and the ordinary skill only needed to cost the paradise coins.

Su Xiao sank for a while, and he hesitated whether he is going directly to upgrade his heart eyes' skills.

Most of the skills learned in the reincarnation paradise needed to be upgraded to a high level to show the effect. If he doesn't upgrade heart eyes' skills, then the two blue items would be wasteful.

Su Xiao walked out of the property-enhancing hall and went to the front of the skills upgrading hall where people were afraid to talk about.

As for why it made people fear to talk about, it was because upgrading skills here was very expensive.

Similar to the attributes strengthening hall, the skills upgraded hall was very majestic, it just like a palace. There were pillars standing in the hall with more than ten meters high, the ground could even reflex one's figure.

Unlike the attribute upgrading hall, it was not desolate. Occasionally you could see some contractors walk around.

Su Xiao just walked into the skill upgrading hall, a girl with silver-hair and rabbit ear welcomed him, and the rabbit ears on the silver-haired girl didn't look like a headgear. The furry rabbit ears occasionally shook, and the black silk stocking wrapped on her long legs was even more attractive.

"Hello contractor, hello, I am a worker, 0103 Bunny."

The girl with silver-hair and rabbit ear ran to the front of Su Xiao, first of all, she bowed to Su Xiao and revealed her white breast.

Su Xiao was a little surprised, he was coming to upgrade skills, not to visit the red-light district, what is with the seduction of this rabbit ear, uniform, and big breast.

“Contractor, this is your first time to come to the skill upgrade hall, right? I am here for the reception, and I will introduce you to the relevant matters for free.”

The girl with silver-hair and rabbit ear’s voice was soft with a sweet smile on her face, making a gesture to ask him to go.

“What services are there..., cough? What functions do you provide?”

Su Xiao coughed and looked at the girl.

“Sir, we are the regular institution certificated by the reincarnation paradise, it’s not what you think, although I know this dress is a bit shameful.

The contractors will meet a lot of dangers in the derivative world and were highly nervous. Therefore, in the facilities of the reincarnation paradise, we will let the contractors be as relaxed as possible. ”

The girl with silver-hair and rabbit ear led the way and introduced Su Xiao the skill upgrading hall in detail.

There were two large areas, one was the active skill upgrading area, and the other was the passive skill upgrading area.

“Sir, this is the passive skill upgrading area. You can choose a skill upgraded room here, but you should be aware that you will sleep temporarily when upgrading your skills. That is normal.”

The girl with silver hair and rabbit ears went with Su Xiao to skill upgrading room and chatted.

“Sir, you must really like rabbits, I am a genuine rabbit ear girl, the charm is very high, it’s cute, isn’t?”

“Au, kind of ok, but I prefer to eat grilled rabbit heads.”

Su Xiao just finished his words, and he found that the girl with silver hair and rabbit ears was looking at him with pity.

The gaze seemed to say that the rabbits were so cute, why do you want to eat rabbits.

Coming to the skill upgrading warehouse, the girl with silver hair and rabbit ears ran two steps and took the initiative to open the skill upgrading warehouse for Su Xiao, the service was very thoughtful.

”Wish you to become stronger quickly.”

The girl with silver hair and rabbit ears was guiding, showing her body, acting cute and introduction, this made the girl with silver hair and rabbit ears very busy.

Su Xiao gave her 10 points of paradise coins as tips.

“Thank you, Mr. contractor.”

The girl with silver hair and rabbit ears smiled sweetly, this time she smiled from her heart.

Su Xiao did not say anything, he turned and walked into the skill upgrading warehouse, the warehouse door closed, and a virtual screen appeared in front of him.

[Please select the skills you need to upgrade.]

Su Xiao only (heart eyes) could upgrade here, directly choose the heart eyes.

[Improve (heart eyes) passive skills need to pay 1000 paradise coins, yes / no pay.]

Seeing the price of upgrading the heart eyes, Su Xiao murmured that it's so expensive, no wonder that the other contractors were afraid of talking about this.

“Upgrade.”

After deducting 1000 paradise coins, Su Xiao felt the light dim around him, his whole body was in the darkness, and even his body gradually integrated into the darkness, leaving only a beating heart which was floated in the air.

At this moment, he seemed to be able to use ‘heart’ to perceive everything around him. He perceived the darkness and slight light in the darkness.

Su Xiao woke up after five minutes.

[Heart eyes (passive skills) has been upgraded to Lv.2.]

Looking at the heart eyes skills, the value was slightly improved, it was not obvious.

Su Xiao continued to improve the heart eyes skills, the feeling of being in the darkness reappeared.

[Heart (passive skills) has been upgraded to Lv.3.]

[Heart (passive skills) has been upgraded to Lv.4.]

[Heart (passive skills) has been upgraded to Lv.5.]

The hint of the reincarnation paradise appeared until the heart eyes reached level 5.

[Your skill (heart eyes) has been upgraded to Lv.5. When this skill is upgraded to Lv.5, you can get additional bonuses. Please select one of the following options.]

1. Slightly increasing the perception.
2. Increasing 5% of perceiving the attack from behind.
3. Increase 1% of capturing the enemy's attack or defense flaws.

Su Xiao decisively chose the second option, ‘increasing 5% of perceiving the attack from behind.

He was purely human, there was no possibility of having eyes on the back of his head.

After the heart eyes were upgraded to Lv.5, Su Xiao did not stop and chose to continue upgrading.

He wanted to upgrade heart eyes skills to the full level today. For a close fight, the heart eyes skill was no different from the miracle.

[Because the heart eyes (passive skill) had been upgraded to Lv.5, the upgrade fee had increased to 2000 paradise coins.]

Su Xiao felt pain in his mind after seeing the upgrade cost, but he could only persist.

Chapter 134

[Heart eyes (passive skills) had been upgraded to Lv.6.]

[Heart eyes (passive skills) had been upgraded to Lv.7.]

.....

[Heart eyes (passive skills) had been upgraded to Lv.10!]

[Heart eyes (passive skill) had been upgraded to max level after the skill is upgraded to max level, you can get additional rewards. Please choose one of the following options]

1. Slightly increasing the perception.
2. Increasing 10% of perceiving the attack from behind.
3. Increase 3% of capturing the enemy's attack or defense flaws.
4. Increasing the state of 'Ultra limit' for 1 second.

.....

He hesitated for a moment, Su Xiao finally chose the second item, choosing the same one, the effect would be more obvious.

After the heart eyes skill reached Lv.10, all the values had changed dramatically. At this time, heart eyes were the blue skill scroll with a price of 50,000 paradise coins.

Skill four

Heart eyes: Lv.10 (passive skill) level Max

Effect 1: Greatly enhancing the perception and perceived range, and the 65% of chance to perceive the attack from behind.

Effect 2: 10% of chance to catch the enemy's attack or defense flaws, after successfully capturing the flaws, it would enter the state of 'Ultra super limit'.

Ultra-limit: Releasing all potentials temporarily, lasting 3 seconds with a cooldown of 12 hours.

.....

Su Xiao walked out of the skill upgraded warehouse, he immediately felt that the world outside was very different.

He also could be heard what two contractors in ten meters away whispered softly.

A woman with cat ears and maid's costume was too tight, she turned and secretly adjusted the underwear under the maid's costume, Su Xiao even heard the stridulation between the underwear and the skin.

He entered a state of super perceived!

A pistol inserted in the waist of a contractor who walked in huge steps fell to the ground, the metal collided with the ground to make a loud noise!

There was a scream in Su Xiao's ear, and his head subconsciously leaned back. He withdrew from the super-perceived state, and the surrounding world returned to normal, but even if he withdrew from that state, he was also very sensitive to the surroundings.

When the heart eyes skills were upgraded to Lv.10, he needed some time to adapt. When he adapted to the changes brought from heart eyes, his reaction in combat would be greatly improved.

Exchanging heart eyes by two blue items and spent 14,000 paradise coins to reach full levels, which was worth it from the effect he got now.

Although heart eyes did not increase his attack ability, it could make him more acute in the battle.

Su Xiao had not tried the skill of heart eyes to capture the enemy's flaws, this should also be a very strong ability.

Su Xiao returned to the exclusive room, after resting in bed for a while and sitting.

There were a few clear crystals in his hand, he was ready to unlock new skills of the shadow of the law.

He was able to unlock new skills of the shadow of the law before entering the ghouls' world, but he did not do that. At that time he was not familiar enough with the skills he had mastered.

Now it seemed that the original choice was wrong, the skills of the shadow of the law were very practical, Qing Gang Yin performed very well in the close fight, and the sword specialization had become his core skill.

Su Xiao was not clear what the core skill of the shadow of the law's profession was, but his core skill was the sword specialization.

Now, he was not eager to improve the sword specialization, he wanted to first unlock the new skills of the shadow of the law.

[Skill 5, not unlocked, unlocking requires soul crystal (small) x1, 1000 paradise coins.]

After consuming the soul crystal (small) x1 and 1000 paradise coins, Su Xiao successfully unlocked the skill 5 of the shadow of the law, it was originally the skill four, but heart eyes replaced the position of skill four.

[You have unlocked skill 5 of the shadow of the law: Extreme Blade]

Skill five

Extreme Blade: X.

Skill effect: You can use this skill to connect with an initial weapon. The maximum level of the initial weapon is white. After locking the initial weapon, you can use this skill to sacrifice the same type of weapon.

When the initial weapon is white, this skill could only sacrifice white quality of the same type of weapon.

After sacrificing the weapon, the value of the blade will reach 100%, the initial weapon would be promoted from the original white quality to the green quality.

Once the initial weapon was connected, it could not be changed. Even if the initial weapon is broken, you can use the skill of Extreme Blade to recover it. (Recovery required soul crystals (small) x5.)

After the initial weapon was connected, the additional attributes of the initial weapon would all be cleared, Extreme Blade skill would give the initial weapon a new additional attribute.

Skill Introduction: We will never abandon the only companion, never, being dead or alive under the sword.

.....

Su Xiao was shocked after seeing the newly unlocked skills.

Silently taking out the dragon flash, Su Xiao looked at the shining blade of dragon flash.

This sword was similar to Samurai Ryuma's Shusui, but it looked very different.

The radian of the dragon flash sword's body was very small. Compared to Shusui, dragon flash had a small section longer, so it looked sharp and slender.

Although dragon flash was only a white-quality weapon, as long as he kept sacrificing weapons, the final quality of the dragon flash will be extremely high.

Moreover, Extreme Blade could only connect to a white weapon. Su Xiao had never seen a white weapon that was better than dragon flash. Dragon flash was originally a blue weapon, but it became a white weapon only because it was damaged.

Su Xiao activated the skill of Extreme Blade, and a hint appeared.

[Yes/No connecting white quality weapons (dragon flash), once connected could not be changed.]

Su Xiao took a breath, the choice was that a group of blue light spread from his hands and wrapped dragon flash.

[Connecting..., drip, finding that dragon flash was a blue-grade weapon, in the judgment...]

[Dragon flash is the extreme value of the white weapon, connected successfully.]

The blue light entered the dragon flash, Su Xiao's face changed. He suddenly had a strange feeling.

For the time being, he didn't check the new attributes of dragon flash. Su Xiao turned back and left the dragon flash behind him.

“Ding.”

The sharp dragon flash cut into the ground, Su Xiao closed his eyes to perceive and felt a blue sword-shaped illusion in his perception.

Su Xiao walked forward and tried to pull away from the dragon flash and change direction.

Even if Su Xiao had walked nearly ten meters away, there was the situation between the two walls, he could still perceive the dragon flash.

Su Xiao was delighted with the new dragon flash, at least he did not need to worry about the problem that dragon flash may be destroyed.

Going to the front of the dragon flash, Su Xiao pulls out of the dragon flash and saw the new attributes of dragon flash.

Dragon flash(the value of blade 0%)

Origin: the shadow of the law

Quality: white

Durability: 50/50 (damage had been perfectly repaired)

Attack power: 6? 17 (attack power is the value when weapon attack in reference)

Equipment demand: the inheritor of the shadow of the law.

Rating: 10 (white weapon extreme score)

Extreme Blade Effect 1: Sharpness +1

Extreme Blade Effect 2: One of the additional attributes which could detach sacrificed weapon. The additional attribute could be replaced when the weapon was sacrificed, and the attached attribute that was replaced disappear permanently. (not selected)

Introduction: Lost, meet, fight, new life!

Price: Unable to trade.

.....

The damage of the dragon flash had been repaired because of Extreme Blade, and there were two more practical abilities.

The effect 1 was to increase the sharpness, which was necessary for each knife and became higher, the sharpness attribute will improve with the upgrade of the dragon flash.

As for effect 2, it was very interesting. It could capture an attached attribute of the sacrificed weapon, but at the same time, it could only have one. After sacrificing the weapon, you could choose to replace the existing attached attribute, or not to replace it.

The effect 1 was the growth ability, the effect 2 was the selective ability, and the sword could continue to become stronger, but it cost price.

Perhaps as long as the paradise coins were sufficient, Su Xiao would soon be able to upgrade the dragon flash to a blue-quality weapon, and there were many swords on the trading market.

He had been looking for a good sword before, but now this good sword was to be personally cultivated by him.

Chapter 135

Su Xiao controlled the urge in his mind, he did not buy a sword, for the time being, he had other things to do.

After unlocking the skill five 'Extreme Blade', Su Xiao was ready to unlock the next skill.

When Su Xiao was ready to unlock the next skill, he found that he was temporarily unable to unlock the next skill.

This line of text appeared below the skill list.

[The unlocking skill has reached the limit. After the three main attributes reach 30 points, the follow-up skills can be unlocked. Otherwise, the body will not be able to bear the follow-up skills.]

Su Xiao was stunned, it seemed that this skill six that could not be unlocked was very strong, his current physique surprisingly can't bear it.

Since it was impossible to unlock new skills, Su Xiao chose to upgrade the sword specialization first.

Now his sword specialization had reached Lv.3, only Lv.3 of sword specialization could let him fight closely with SSS class such as Takatsuki Sen.

He hesitated for a moment, Su Xiao took out two soul crystals (small), he was ready to temporarily upgrade the sword specialization to Lv.5 to see if there would have any changes.

However, he had a kind of feeling that the sword specialization may not be different from the heart eyes skill. The limitation of the sword specialization was not only as simple as Lv.10.

[The 'sword specialization' had been upgraded to Lv.4.]

[The 'sword specialization' had been upgraded to Lv.5.]

The soul crystal in Su Xiao's hand broke and shattered into a large piece of light particles into his body.

He could not help but close his eyes, Su Xiao 'saw' a figure formed by the soul crystals' fragments. The figure was as same as his height and appearance. The figure was standing in the void and practicing the sword. The passing time seemed to stop at this moment.

Cut, pick, cut horizontally, multiple movements change, the movement of the figure was getting faster and faster.

Didn't know how long it passes, the figure finally stopped. After stopping, the figure suddenly rushed to Su Xiao and finally broke into his body.

Su Xiao, who was sitting on the bed with closed eyes, suddenly opened his eyes. At this moment, his eyes were extremely sharp, as if a sword light flashed in his eyes.

His gaze gradually became peaceful, Su Xiao's sword expertise had been upgraded to Lv.5.

Although the sword specialization was upgraded to Lv.5, it did not have the situation that heart eyes skills reached Lv.5 appeared, which made Su Xiao somewhat confused.

Asking the reincarnation paradise, the reincarnation paradise gave an explanation.

[Because the sword specialization is a high-level power system, it needs to reach Lv.10 to give rewards.]

Su Xiao understood, it was because the sword specialization was a relatively strong skill, it would give rewards after reaching Lv.10.

This made Su Xiao expect that what rewards will appear after the sword specialization was upgraded to Lv.10, can cut out a sword light? Perhaps too early, it may be other abilities.

But one thing was certain, the reward that appeared after the sword specialization reached Lv.10 must be strong.

Su Xiao checked the sword specialization.

sword Specialization: LV.5. (passive)

Skill effect: increasing the close attack power by 18% and the proficiency of the sword genre weapons.

.....

Every level sword Specialization upgraded would increase the close attack by 2%. Of course, this was the situation when he used sword genre weapons.

2% did not look much, but if the level of the sword specialization is high, the increasing effect would be very impressive.

After strengthening the sword specialization, Su Xiao played with the remaining two soul crystals (small) in his hand.

He had a total of five crystals, he used one for unlocking one skill, and two for upgrading the sword specialization. About the remaining two, Su Xiao was a bit hesitated, whether he should continue to upgrade the sword specialization or upgrade the Qing Gang Yin.

After hesitating for a long time, Su Xiao decided to upgrade Qing Gang Yin.

Qing Gang Yin performed very well in the battle, and True damage, the pain caused by burning the enemy's energy could be regarded as a pseudo control.

Su Xiao who had no control skills for the time being. He planned to develop Qing Gang Yin deeply.

With an idea, Su Xiao consumed two soul crystals (small) and 2000 paradise coins to enhance Qing Gang Yin.

Something was different from upgrading sword specialization. When upgrading Qing Gang Yin, the soul crystal (small) were broken and directly integrated into the special energy of Qing Gang Yin. Su Xiao clearly felt that the energy in the body became stronger.

['Qing Gang Yin' had been upgraded to Lv.2.]

['Qing Gang Yin' had been upgraded to Lv.3.]

Skill one

Qing Gang Yin: LV.3 (active skill)

Using conditions: After launching (Qing Gang Yin), the hunter consumed 3 mana points per minute, the skill will stop when mana reach 1%.

Skill effect: After launching (Qing Gang Yin), it would burn the enemy's 20 points of mana points each close fight and cause the same amount of True damage. The enemy would suffer a strong pain after mana burning.

.....

The mana cost per minute of the Qing Gang Yin increased from 2 to 3, and the True damage also increased, from 10 points to 20 points.

If fighting with the warrior with less amount of mana, after accepting Su Xiao's attacks for a few times, the person would only fight flatly, the scene was very touching.

After upgrading Qing Gang Yin, Su Xiao relieved. Although he upgraded various skills, his fighting style did not become complicated.

His main means of combat was based on sword specialization, Qing Gang Yin and heart eyes for support.

Su Xiao was good at the close fight. There were too many things to be considered after being close to the enemy so he would not learn a lot of different abilities. He would learn the passive skills that he did not need to use. His fighting style was to rush to the enemy, then cut.

Simple, rude but the effect was obvious.

Sorcerers or other occupations for long distance were different, they learned a lot of skills and used skills while fighting.

The two sides had different fighting methods and different developed directions.

Su Xiao pinched his forehead, he had been busy around after he returned to the derivative world. Now it was inevitable for him to feel tired. Things had already been done. After that, he only needed to buy some sword genre weapon for sacrificing, so he went to the trial field directly.

But his current state was not good, the proper rest could make him gain more in the trial field.

Lying in bed, Su Xiao had already slept in less than five minutes.

Without the pressure of the derivative world, Su Xiao completely relaxed in the exclusive space which was absolutely safe, which made him sleep deeply.

Didn't know how long it took, Su Xiao, woke up by having a peep, if not about this peep, he could sleep for a while.

Su Xiao picked up the clock on the bed, he surprisingly slept for 15 hours.

After taking a cold shower, Su Xiao went out and went to the Trade Square.

His goal this time was a sword genre weapon. It was still unclear how much white weapons had to be sacrificed will Extreme Blade's dragon flash's Blade value be full, but it conservatively estimated that it needs more than two.

There were many sword genre weapons in the trading market, at least a lot of white quality, green quality could be seen occasionally, but the swords were somewhat rare, most of them were firearms. In the early stage, the firearms were far more popular than the close fight weapons.

It could be learned quickly, put low investments got high returns, but in the later period, these people will cry.

Su Xiao's footsteps stopped in front of a booth.

The various weapons in this booth could be described as abundant, with all kinds of sword, guns, and sticks. Su Xiao even saw a rocket launcher with white quality.

"What do you need to buy, here is the worker's booth."

The owner was a middle-aged man with a slightly fat body. Although the middle-aged man was smiled, it was obviously looked a bit horrible. This guy had a pair of mechanical eyes and a red light in his eyes.

"just looking around."

Su Xiao scanned the weapons on the booth and quickly found the target.

[Killing head sword] (white), 850 park coins.

[Broken wolf fang] (white), 900 park coins.

He had previously observed the price of white close fight weapons, and white weapons with a score of 5 or more were above 800 park coins.

As for the score below 5, the property was poor, Su Xiao suspected that those weapons would only get poor blade value after sacrificing.

The price of this stall was very fair. Su Xiao bought the two swords directly and walked to the exclusive room.

Su Xiao would not use the Extreme Blade to sacrifice at the Exchange Square.

Chapter 136

Returning to the exclusive space, Su Xiao put the dragon on the desk, with two white weapons would be sacrificed.

Trying to use the Extreme Blade skill, Su Xiao's hand had a group of black light, and the black iron light formed a swirl was stirring.

The black iron light was close to the two white weapons, the black iron light seemed to be alive, directly wrapping two white weapons.

"Crack?."

The two white weapons, wrapped in black iron light, making the sound of stridulation and the two weapons seemed to be being smashed.

After a few tens of seconds, a trace of white crystals came out of the light and flew away to the dragon flash.

The dragon flash directly absorbed the crystal fragments, the surface released a cold light, the blade edge was sharper, and the sword body became tougher.

Didn't know if it was an illusion. Su Xiao felt that dragon flash was more gorgeous than before, but the appearance of the dragon flash had not changed.

Looking at the attribute of dragon flash, he found that the blade value of dragon flash had reached 76%.

Su Xiao was pleasant, he relieved in his mind secretly. He was afraid that the dragon flash would become a 'foodie', if he could not afford the amount that it needed to absorb, he would be embarrassed.

Now he only needed to buy another one white weapon, and dragon flash could become a green weapon.

Su Xiao looked at the two white weapons on the desk.

After the light receded, the two white weapons were like being inserted into the shredder. The blade was broken, and the handle was also broken.

Trying to pick up the broken sword, and when he just touched the broken sword, the blade broke into a pile of dust.

He shook his head with a bitter smile, this Extreme blade skill was really fierce. While cultivating an Extreme sword, didn't know how many stepping stones should be stepped on the way.

Su Xiao once again rushed to the trading market to buy a white weapon, and he returned to the desk in less than ten minutes.

The black iron light emerged, Su Xiao chose to sacrifice the white weapon, his eyes were full of expectations.

It was still the original step after the dragon flash absorbed those white crystals, the surface showed a green light.

The green light flashed away, Su Xiao picked up the dragon flash and obviously felt the difference from the dragon flash in the past.

It was sharper, but the feel of holding was not changed, the familiar feeling was still there.

The information after Dragon flash upgraded was as follows:

Dragon flash(Blade value 0%)

Origin: the shadow of the law

Quality: Green

Durability: 50/50

Attack power: 10? 29 (upgrade 3? 12)

Equipment demand: the inheritor of the shadow of the law.

Rating: 30 (green weapon's extreme score)

Extreme Blade effect 1: Sharpness +2 (1 point increased)

Extreme Blade effect 2: One of the attached attributes of a detachable weapon which was sacrificed. The attached attribute could be replaced when the weapon was sacrificed, and the attached attribute that was replaced disappeared permanently. (not selected)

Introduction: Lost, meet, fight, new life, grow.

Price: Unable to trade.

.....

Su Xiao touched the edge of the dragon flash with his finger, but he felt pain when he touched it slightly. His skin would be cut open if he put force with little effort, dragon flash was sharper than before for not less than one time.

Put down the dragon flash, Su Xiao took out the sword genre Quinque, which was obtained in the ghouls' world before.

This sword Quinque was made by the store manager's kagune, with a score of 27.

Su Xiao prepared to sacrifice this sword Quinque. He did not need this sword Quinque anymore.

The black iron light reappeared, Su Xiao 'ignored the pain' to put the light closer to this Quinque.

A weapon with a score of 27 was worth at least 6,000 paradise coins.

Now he had heartache and expectation, danger could never be overcome without taking risks. He today threw cautious to the winds.

Leaving the paradise coins needed for the trial field, Su Xiao would definitely also make a sacrifice to let the dragon flash become a blue weapon.

With his current sword specialization of Lv.5 plus dragon flash of blue quality, the sum of the two would be equal to powerful.

What's more, he also had state abilities such as heart eyes and Qing Gang Yin.

A good sword, nice sword skills, and a few passive skills, this was Su Xiao's main fighting means, although the fighting style was somewhat simple, after upgrading these abilities to a high level, his combat power would be definitely not weak.

A lot but not concentrated, Su Xiao still understood that from the only active skills of Qing Gang Yin, it could be seen that the occupation of the shadow of the law was also avoiding his ability to be not concentrated.

Having a lot of skills was really powerful in the early stage, but in the middle and late period, the person would only have the fate of being punched in the ground.

Su Xiao would not pursue the imprudent benefit, he still needed also to consider development in the future.

After five minutes, the sacrifice was successful, the sword Quinque became a pile of dust.

Su Xiao took a sigh of relief after seeing the blame value of dragon flash, the weapon with a score of 27 not only had a frame. Dragon flash reached 71%.

At most sacrificing two or three low-grading swords of green quality weapons, the dragon flash would be upgraded to blue quality.

As for why not buying a green weapon with a high score, just because it was expensive, one for six or seven thousand paradise coins, that would really make Su Xiao poor.

Su Xiao 'decisively' left the exclusive room and went to the trading market again.

"Hey? It's you, we encounter again."

The middle-aged man with mechanical eyes stood up and stopped Su Xiao with enthusiasm.

No wonder that the middle-aged man with mechanical eyes was passionate, Su Xiao bought three white weapons this time.

"Kind of okay."

Su Xiao smiled bitterly, it's not encountering, he came to the market three times in just a half hour, his legs were almost broken.

"What do you want to buy this time, old customer, I will give you a cheaper price."

Su Xiao shook his head. The middle-aged man with mechanical eyes only sold white equipment. He now needed green sword genre weapons.

"Is there any green sword weapons?"

When he heard Su Xiao's question, the middle-aged man with the mechanical eye was obviously stunned.

"It's not me to say, brother, you have bought three white weapons. Are you going to be a middleman broker? I sold it for two hands, it will become three hands when it comes to you..."

The middle-aged man with mechanical eyes kept talking. This guy obviously was talkative.

Su Xiao waved his hand.

"My fighting style is a bit special. Now I need two green swords. Can you get it?"

The middle-aged man with mechanical eye thought for a while.

"I can't, but I know who can give you, come with me."

The middle-aged man with mechanical eyes brought Su Xiao to the edge of the trading square. There were not many people here, and there were a few booths.

The two stopped in front of an old man's booth. The old man was sleeping on the flower bed behind him. There were several pieces of green equipment in the booth. These items were marked at extremely high prices, obviously was not intended to be sold.

“Old donkey, don’t sleep, I bring you a big customer.”

The old man named old donkey was even slobbering, he was obviously unhappy to be suddenly awakened by other people.

“Well? It’s mechanical eyes, what?? Why don’t’ you go to sell your ‘small white flower’ but to me?”

The old man wiped the saliva in the corner of the mouth and put his hand into his shirt with a sleepy look. After scratching in the armpit for a while, he put his hand in front of his nose and smelled it.

After smelling the smell of the hand, old donkey sucked his nose, he looked obviously awake.

“This guest wants to buy two swords of green quality. I feel that you must have some stocks so I will introduce him to you.”

When old donkey heard that Su Xiao wanted to buy two green swords, his eyes widened.

“I have indeed picked up some green equipment recently, the war is about to begin. The prices will definitely rise.”

“Hey, don’t count on that, you will be able to send to the battlefield by paradise if you dare to raise prices.”

The old man’s old face was trembled, as if he thought something horrible, and shook his head, then looked at Su Xiao.

“Green sword weapons, right? Let me find them.”

Soon, two green sword weapons appeared in the hands of the old man.

“A score of 16, a score of 15, a total is 8,000 paradise coins, it can’t be a bargain, recently I got a lot of the green equipment, and now it is about to sell, you can treat this as popular, earn you 200 as a fee.”

Su Xiao recalled the approximate price of green weapons. This old man did not sell with an expensive price, even 100 to 200 paradise coins cheaper than the market. The stalls of the workers were really reliable.

Su Xiao paid the money quickly and walked to the exclusive room with two green weapons.

Old donkey looked at the back of Su Xiao, didn’t know what he was thinking.

“Old donkey, you’re lost?”

The mechanical eye took out a box of cigarettes and handed it the old donkey one.

“No loss, I am a little curious, such a powerful close fight master, how would he choose two low-grading green weapons at the same time, seeing his appearance that he looked not poor. It’s weird.”

Looking at the back of Su Xiao, the old man blew out the smokes.

“Don’t think about him, how about you, old donkey, have you passed the test for upgrading to the contractor? Being the worker is not a long-term solution, it is too difficult for us to become stronger.”

“Hey? It’s not that easy, the attribute points are too low to make so many simulated scenes.”

.....

When old donkey and the mechanical eyes were chatting, Su Xiao had returned to the exclusive space to begin to sacrifice weapons.

It was still the previous steps, but it took a longer time.

Ten minutes later, blue light reflected on Su Xiao’s face.

He finally stopped fighting with white weapons, the weapon changed!

Chapter 137

After sacrificing successfully, Su Xiao picked up the dragon flash.

The surface of the dragon flash faintly flashed a blue light, and the sharp edge made a clear sound.

Su Xiao raised his hand and took out a few swords. The horrible sound of the whistle came.

If he now fights with Mars in the Ghouls’ world, he will definitely cut him to several pieces. Of course, if he suffers from Mars’ attack, he will die.

Su Xiao was full of expectations for viewing the new attributes of dragon flash.

Dragon flash(Blade value 0%)

Origin: the shadow of the law

Quality: blue

Durability: 60/60 (up to 10 points)

Attack power: 17 to 43 (progress from 7 to 14 points)

Equipment demand: the inheritor of the shadow of the law.

Rating: 52 (it could be gradually increased by sacrificing weapons)

Extreme Blade Effect 1: Sharpness +4 (2 points increased)

Extreme Blade Effect 2: Rhythm of RC cells (passive): Physical strength +2. (The attached attribute came from ‘Quinque unnamed’).

Introduction: Lost, meet, fight, new life, grow.

Price: Unable to trade.

.....

Su Xiao was satisfied with the current attributes of dragon flash. In the near future, the dragon flash would definitely not hold him back, as a matter of fact, dragon flash had become big assistance.

Su Xiao put away dragon flash, all the skills had been upgraded, and the attribute points have been strengthened. Then he only needed to go to the trial field to adapt to the current body.

After spending a lot of money, Su Xiao originally had 47,127 points of paradise coins, and now there were only 17,567 points left.

After the consumption in the trial field, he may not have a lot of paradise coins left.

The paradise coins could not be all used in the trial field. He had to prepare for the next derivative world, such as purchasing restoration products.

Leaving the exclusive room, Su Xiao went straight to the trial field.

The trial field was much smaller than the property strengthened hall. This was a room like a monster's big mouth. There were dozens of transmission centers in the room. As long as they were on the transmission array, they would be automatically transferred to the interior of the trial field.

Su Xiao stood on the transfer line, after seeing the scene became distorted, he came to an empty gym.

The scene was randomly generated, this time the scene was good, it was suitable for practice.

[Welcome hunter, to use the trial field, please choose the mode.]

[Assist mode / actual fight mode]

Su Xiao chose the assist mode.

[Assist mode has been selected, please select the summoned mirror level]

There were three options in front of Su Xiao, [low-level image] 100 paradise coins per hour, [intermediate mirror] 1000 paradise coins per hour, [advanced image] 10,000 paradise coins per hour.

The last time he summoned Koshiro which was an [intermediate mirror], Su Xiao was not yet as rich to summon [Advanced Mirror], which was too expensive.

[You have chosen 'Intermediate Mirror', yes/no to summon koshiro's image or randomly summon.]

Su Xiao considered for a while, koshiro was a good enlightenment instructor, but what he needed now was not the enlightenment, but also the valuable experience in the battle.

[You have chosen random summoning, summoning..., have summoned the intermediate image Uchiha Sasuke'.]

Su Xiao heard a hint of the reincarnation paradise, Su Xiao almost spewed out blood.

What situation is to summon Uchiha Sasuke? Characters like this kind of growth genre were powerless in the early stage, but people will be lucky if they are summoned this kind of characters in the later stage.

Su Xiao immediately dispelled this idea. How could the intermediate mirrors summon Uchiha Sasuke in the later stage? Uchiha Sasuke had extreme power in the late stage and almost 'destroyed' the Naruto world.

In Su Xiao's helpless sights, the image of Uchiha Sasuke was gradually summoned.

After the body was completely solidified, Uchiha Sasuke opened Sharingan and said a sentence that made Su Xiao speechless.

"Are you my trainee?"

Uchiha Sasuke dressed in pure white kimonos and dark blue trousers, his chest was bare and purple waistband around the waist and a small tribal badge behind the kimono.

This dress and Sharingan with san magatama, Su Xiao judged the strength of Uchiha Sasuke at a period.

It was the peak period that Uchiha Sasuke had chuunibyuu and was kidnapped by Orochimaru.

Su Xiao's sights turned black, he suddenly wanted to use 'return'.

"Hey, didn't you hear what I said?"

Su Xiao pinched his forehead.

"I heard, I am not your trainee."

"You're not my trainee? Then why do I have the idea of teaching you fighting knowledge."

Uchiha Sasuke's eyebrows tightly frowned, and finally shook his head and did not think about this kind of problems.

The image summoned by the trial field was not a real person, but a simulation of the appearance and personality of the person who was summoned and the knowledge that the character had mastered.

Although Uchiha Sasuke had chuunibyuu, his combat power was not weak, and Uchiha Sasuke also knew how to use the sword. He had paid 1000 paradise coins, it will be a loss if he doesn't learn anything.

Su Xiao checked at Uchiha Sasuke and thought about what he could learn from him.

The sword skill? It was unlikely, the two were not in the same style. Su Xiao used sword skills as the main means of combat, while Uchiha Sasuke used sword skills to assist in combat.

He suddenly had an idea, Su Xiao came with what he could learn from Uchiha Sasuke.

Taking out the dragon flash, and wrapping Qing Gang Yin on the dragon flash.

"Well? Energy wraps weapons? but the method is too rough, and the energy distributes unevenly."

Uchiha Sasuke pulled out Kusanagi on the back waist, using chakra of lightning to wrap Kusanagi.

“When you wrap energy on a weapon, pay attention to three points...”

Uchiha Sasuke began to explain techniques of wrapping energy on weapons to Su Xiao.

“It probably likes this, but unlike my chakra of lightning, the energy you wrap on your weapon is more likely to invade into enemy’s body when you hurt the enemy. If I’m right by perceiving, your energy can also develop sharp features. This is a very peculiar ‘electricity’, but the difficulty of developing was not low.”

Uchiha Sasuke’s words made Su Xiao quite surprised.

“How to develop?”

“I don’t know.”

Su Xiao sighed, it was equal to not saying.

“Your energy is different from chakra. Chakra is combined with spiritual ability and energy. Your is a very pure spiritual energy, but now this spiritual energy is not strong, and it is too early to develop deeply.”

After asking the knowledge of wrapping energy on weapons with Uchiha Sasuke, an hour passed quickly, and Uchiha Sasuke gradually disappeared.

These 1000 paradise coins were worth. Su Xiao gained a lot of knowledge. He again spent 1,000 paradise coins to summon the mirror randomly.

[Summoning..., it had summoned the intermediate image ‘Sasaki Kojiro’ (from the fate/stay night world, the fifth fate/stay night).]

Su Xiao relieved and sat, his eyes revealed a different feeling.

It surprisingly summoned Sasaki Kojiro, The pseudo servant that used a long sword.

After Sasaki Kojiro’s body appeared, he pulled out the sword that was more than one meter five.

Sasaki Kojiro’s height was about 176 cm, and the sword was almost as high as his body length.

A loose purple kimono, blue ponytail, Sasaki Kojiro was somewhat handsome.

“Let’s fight, I am more accustomed to talking by swords.”

Su Xiao did not talk, he directly pulled out the dragon flash, the two men rushed forward at the same time, and rushed to the front of each other in a few steps.

“Tsuba me ga eshi!”

Fizz? There were three attacks appeared in front of Su Xiao. At this moment his vision became dark, only three swords were left in his eyes.

Puchi!

Su Xiao’s body was smashed into several pieces, the person’s sword waved too fast. Fortunately, he was in the trial field. Otherwise, he would already be dead.

Chapter 138

The wound gradually healed and Su Xiao stood up.

“You surprisingly can escape the attack of Tsuba me ga eshi, the way of avoiding makes me very familiar.”

Sasaki Kojiro was standing in the same place as if he was looking at Su Xiao.

Su Xiao took off his broken top. He was extremely unlucky today, and he summoned for two mirrors. One had Chuunibyō after appearing. The other was even more amazing. He killed him once he appeared.

“Haven’t you mastered heart eyes?”

Sasaki Kojiro’s words made Su Xiao stunned.

”Yes, I have mastered the ‘heart eyes’.”

“It turns out that it is, then we may have a common topic. Although your heart eyes had been developed to the extreme, you’re somewhat unfamiliar to use, and I still need to teach you the sword skills, and your strange physical state, it will more suitable to teach you in combat.”

“I agree.”

As soon as he finished his words, Su Xiao had already rushed forward with the dragon flash.

Compared with the teaching method of koshiro, Su Xiao was more interested in this teaching method of Sasaki Kojiro.

He could not only teach him sword skills but also could practice practical skills.

If he’s in the derivative world, it is impossible to fight with Sasaki Kojiro, he was likely to be killed.

The sounds of weapons collided had continued to come.

“Don’t just rely on the eyes, use the sixth sense to perceive the surrounding situation, the eyes are used to capture the enemy’s flaws, just like now.”

In the battle, Sasaki Kojiro deliberately showed the flaw to Su Xiao.

At this moment, Su Xiao’s pupils suddenly tightened, staring at the flaw in the right shoulder of Sasaki Kojiro who was waving the sword.

[‘Heart Eyes’ captures the enemy’s flaws successfully and has entered the ‘ultra limit’ state, it lasts for three seconds.]

With a bang in the brain, Su Xiao felt that everything around him had slowed down, and Sasaki Kojiro who had a pose of keeping his sword out, the dust around floated in the air were almost static.

It was not the world became slow, but his perception was magnified to the limit, his senses were accelerating.

Su Xiao took the sword at a normal speed. At this time, he thought that Sasaki Kojiro was too slow.

The blade cut through the clothes of Sasaki Kojiro, Sasaki Kojiro withdrew a bit and just escaped Su Xiao's sword, and slammed to Su Xiao by backhanding the sword.

The blade slammed into Su Xiao's neck, Su Xiao's body was bent back, he clearly perceived that the tip of the sword swept over his nose, his legs stepped on the ground, and he jumped out.

After he landed, the world returned to normal, the feeling that the world slowed down disappeared.

“Cough, cough, cough?”

Su Xiao breathed heavily, that state had consumed a lot of his physical strength.

“What happened just now?”

“That is the ability of the ‘heart eyes.’ After you capture the flaws of the enemy, you can enter the state of ‘ultra limit’. Don't worry, you can recover your physical strength within five minutes.”

After listening to Sasaki Kojiro's explanation, Su Xiao felt that he had made a big fortunate this time.

.....

Five hours later, Su Xiao was tired and left the trial field. After summoning the image of Sasaki Kojiro, he spent another 5,000 paradise coins to extend the time of Sasaki Kojiro to stay.

The method that Sasaki Kojiro taught sword skills was very ‘special’. Most of the time was to let Su Xiao fight with him and then try to kill Su Xiao.

In the words of Sasaki Kojiro, it is a very convenient way of practicing without dying. The professor's sword may be forgotten, but it is sure to be impressed by what sword is killed.

In this way, Su Xiao was cycling between being killed and recovered. If he can't hold, he will rest for a while, Sasaki Kojiro will explain the fighting skills during the break.

Although did not know how many times of ‘being killed’, Su Xiao learned a lot of combat knowledge, and also adapted to the changes in the body after effects of improved attributes quickly disappeared.

After the staying time in the reincarnation paradise, Su Xiao mostly conducted [real combat training] in the trial field. He did not summon Sasaki Kojiro again, the knowledge he taught had not been thoroughly understood.

[Combat training] All over the mechanical doll made Su Xiao calmer when he faced group fight.

However, the more the mechanical dolls he killed, the more mechanical dolls appeared. Su Xiao was usually besieged to die by mechanical dolls after his physical strength exhausted.

.....

[The time for the hunter to stay had reached the limit in the reincarnation paradise and will return to the real world. Please remember the regulations of the reincarnation paradise.]

[You cannot use ways to reveal anything of reincarnation paradise in the real world. Otherwise, you will be warned, if the warning was useless, you would be forcibly executed.]

[The hunter cannot use the ability which was gained in the reincarnation paradise in the real world, except for personal attributes and passive skills.]

[Most of the equipment or items acquired in the reincarnation paradise are locked, it will not be taken out in the real world, and will be restored after returning to the reincarnation paradise.]

[Transmission begins, location: the real world.]

An unconsciousness appeared, he was hit an attack by the hindbrain, Su Xiao cursed in his mind.

When he regained consciousness again, he was already in his temporary house.

Although he only stayed in the derivative world and the reincarnation paradise for about a half month, Su Xiao had a feeling of being separated from the world.

First, he looked at the trap which was set on the door and near the window, they were not triggered. It seemed that here was safe.

Su Xiao now had three main attributes at around 20 points. As long as he did not go against the military, the average person could not hurt him.

Of course, except for the other contractors in the real world.

However, Su Xiao should be stronger than the average contractors in the real world. In the real world, active skills could not be used, and he could only rely on attribute points and passive skills.

Even he was in the derivative world, Su Xiao was at most able to open Qing Gang Yin because his other abilities were unaffected in the real world.

Su Xiao sat on the sofa and pondered for a while. Now, when he was not going to find the information of his enemy, he guessed through the previous clue that the news of finding the enemy needed to go abroad, it was a very dangerous place. Whether he could find the information was just the conjecture through the clues.

Even for the current Su Xiao, he may die there.

Not enough, he was not strong enough, he had to be patient and could not waste his efforts.

Su Xiao took a breath, the flashing red lights in his eyes receded. He forced himself to calm down.

Except for revenge, Su Xiao was not a dangerous person to society. He is a person who relied on his parent.

After purchasing a laptop with nice equipment and handling broadband, Su Xiao started to watch anime.

Now it was not whether he liked to watch anime, but he also must understand the story of anime.

However, after three days of watching, Su Xiao found that watching anime was also a way to relax his mind and body.

Practicing sword skills, watching anime, being hungry and buying food, continuing to watch anime, sleeping...

Time was lost in a flash, Su Xiao quickly received the call for the reincarnation paradise.

Chapter 139

[Drop, the new derivative world is about to open, the hunter will return to the reincarnation paradise, please make sure there are no witnesses around.]

[Transferring..., the transmission is completed.]

The familiar exclusive room was in sight. Didn't know why, compared with the real world, Su Xiao felt that the contractors in the reincarnation paradise were more realistic.

The dangers in the derivative world magnified the goodness and evil of human nature, the kind people were more kind, the evil ones were even eviler.

Everyone took off the mask of hypocrisy and brought real masks to cover their faces.

[Hunter level: Lv.5, you can be notified 25 minutes before entering the derivative world, the hunter will enter the derivative world in an hour, please be patient.]

Su Xiao left the exclusive room, he prepared to purchase some restored medicines before entering the derivative world.

As for why did not he buy before, it was because there were not many workers who sell the restored products at ordinary times, most of them were contractors, and the price was quite expensive.

Before starting a new derivative world, those workers who have accumulated a lot of recovery products would gather in a specific area in the Trading Square to sell the restorations.

Although the price was not cheap, it was not expensive, it was within the range of acceptance.

After Su Xiao arrived at the southeast corner of the Trading Square, he found that there was already crowded.

“Restoration will be sold at breakdown price, don't miss it when you pass by.”

“The old name of medicine king....”

Su Xiao walked through the crowd, he was looking for a booth, the one that he purchased the restoration last time.

Soon Su Xiao found his goal. It was a worker with a white coat. He was called a medicine can.

Squatting in front of the booth, Su Xiao began to choose the restorations he needed.

“I haven't seen you for a long time, this time I will give you a cheaper price.”

Medicine can suddenly speak, and the smile was in his eyes.

The person surprisingly remembered him which made Su Xiao quite surprised.

“I'm going to enter the derivative world, so I can go buy some restorations.”

During the picking, Su Xiao found several restorations.

[Alchemy Secret Medicine]

Origin: Fullmetal Alchemist

Quality: white

Type: Restoration

Effect: After drinking, it could quickly restore 18% of Hp

Rating: 8

Description: The taste is stranger, and the effect is more excellent.

.....

[Vital source]

Origin: Akama ga kill!

Quality: white

Type: Restoration

Effect: After drinking, it could quickly restore 15% of Hp and restored a certain degree of injury.

Rating: 9

Introduction: Extracting from several plants, it was not allowed to drink continuously.

.....

[Delicious Chocolate]

Origin: Reincarnation paradise, The sweetheart dessert shop.

Quality: white

Type: Restoration

Effect: After eating, you could slowly restore 60% of Hp.

Rating: 7

Introduction: Don't eat it while fighting, because it's too delicious and will distract you.

.....

[Alchemy Secret Medicine] x1, [Vital Source] x1, [Delicious Chocolate] x3, these were what Su Xiao chose.

In his storage space, there was a [Golden Fried Rice] that restored 50% of Hp and a C-type Battlefield Syringe that quickly restored 30% of Hp. These were enough.

“Let me calculate it.”

The medicine can check the price of three kinds of recovery products and Su Xiao's introduction. After short bargaining, Su Xiao spent 3,100 paradise coins to buy these restorations.

Looking at the restorations in the storage space, and the new attributes, Su Xiao even looked forward to the arrival of the next derivative world.

”I’m really looking forward to the next derivative world.”

Su Xiao’s whisper was heard by the medicine can who looked at Su Xiao with amazement as if he was watching a monster.

The general contractor would have an expression of going to an execution ground before entering the derivative world. But the guy in front of him surprisingly had some expectations?

“Brother, being positive, the derivative world is very dangerous. Don’t be careless.”

The medicine can kindly remind, Su Xiao was his old customer after all.

”Thank you, but I really like the feeling in the derivative world.”

After that Su Xiao left the booth of the medicine can, the medicine can shake his head and sighed.

“Ah? Another crazy guy again, the derivative world is simply hell.”

After buying, Su Xiao’s only had 6467 paradise coins left.

After hanging around for a while in the trading market, Su Xiao found a group of people in front of the booth not far away.

“Give me a cheaper price, I only have 20,000 paradise coins left, and I can’t really pay it.”

“No, at least 25,000 paradise coins, I will not sell less than this price.”

“Why are you so obstacle, the next derivative world is about to begin, are you going to bring this treasure into the coffin?”

The two men in dispute were a young man with yellow hair who held a staff and a knight with full armor.

At the booth, a green boutique staff with a rating of 30 was placed.

The sorcerer with yellow hair wanted to buy this stuff, but the bid did not satisfy the seller. He may not have sufficient paradise coins, and the knight was not allowed to lower the price. This staff was indeed worth the price, but considering that the derivative world would open soon, selling it cheaper was also a good choice.

The equipment of the sorcerer, especially the staff and the sorcerer’s robe were very expensive. Although the sorcerer looked good in the bright side, he was somewhat bitter in the dark side.

Su Xiao casually looked at other things on the booth, after seeing the attributes of a piece of equipment, his heart tightened.

It was an egg-sized iron ball. There was a mechanical eye on the front of the iron ball. Su Xiao had found this kind of equipment for a long time, but he did not find it, it was not because the thing was expensive, but because of the lack of the quantity.

Picking up the delicate iron ball, Su Xiao asked:

“How about this’s the price?”

The knight stall had not spoken yet, the sorcerer with yellow hair on the side took the lead.

“Don’t mess up, you can buy at other booths, don’t you see that I am bargaining? You’re fucking annoying.”

The sorcerer with yellow hair treated Su Xiao as a doormat when he was asking price probably was because his bargaining was not smooth.

“5000 paradise coins, no bargaining.”

Su Xiao thought for a while and bought the metal ball in his hand, and did not pay attention to the sorcerer with yellow hair aside.

“Hey, this thing is not worth 5,000 paradise coins.”

The sorcerer with yellow hair suddenly stopped Su Xiao, Su Xiao looked at him with confusion.

“Investigative equipment is rare, but the investigation equipment of green quality is between 4,300 and 4,500 paradise coins. You bought a higher price.”

Su Xiao chuckled, although the sorcerer with yellow hair spoke sharply, he had a warm heart.

“Looking for a long time, I don’t care for these hundreds of paradise coins.”

The sorcerer shook his head.

“It’s bad luck for us to meet this kind of obstacle seller. I have a bad attitude just now, sorry.”

The sorcerer with yellow hair turned and looked at the knight.

“You are a fucking obstacle, your equipment on your body was also awkward, the knight armor with a whip, so talented.”

The sorcerer with yellow hair scratched his head, after messing his hair and stepped on the ground. He murmured that “Don’t blame me, leader.” and took out a green knight sword.

“The last chance, this Knight sword plus 15,000 paradise coins, would you like to exchange?”

The knight hesitated for a while and eventually agreed with this trade.

The sorcerer smiled and took over the staff, he like a child who got a new toy.

“It’s good, right? the boutique staff with a score of 30. Friend, where is your next derivative world? If we’re in the same derivative world, I can take care of you, without paradise coins.”

Su Xiao smiled bitterly and shook his head, the sorcerer with yellow hair was kind, he was a bit talkative and spoke sharply.

At this time, the remainder of the reincarnation paradise appeared.

[The hunter will enter the derivative world after twenty-five minutes: Attack on Titan!]

Chapter 140

“Damn, it's Shokugeki no soma, I'm gonna be rich!”

There was a loud roar came in the distance, and a burst of laughter came.

“What's a lucky guy, he can get a lot of restorations in that world.”

“It's not good luck at all, that is the world which can't use a weapon, who would go to that rotten place to learn cooking, only people had the clearance evaluation lowered than C-level for incessant three times will enter that kind of derivative world.”

“You don't say about that, I have been there, there are a lot of beautiful female characters in that world, but if you dare to do anything bad, haha?, You can go out alive I will eat shit live!”

The person who just shouted should be a Lv.5 contractor. Otherwise, he and Su Xiao would not receive the hint simultaneously.

Su Xiao's eyes revealed blazing light. The anime he had watched include the 'Attack on Titan', although the world in the first two seasons of animation looked very small, it was not.

The world was a large world, the world outside of the three walls was very wide...

After about ten minutes or so, the trading plaza became noisier, some workers who needed to enter the derivative world began to look for people to cover them.

There were a group of people in the trading square were particularly conspicuous. There were dozens of people gathered together, wearing the same costumes, should be in the same adventurous group.

A man with blonde hair and blue eyes at the forefront of the group, the man was gentle and was discussing something with his team members.

Su Xiao stared and found the person was Adam, the guy traded with him the heart-eyes skills.

At this time, Adam was surrounded by at least a dozen workers. These workers looked urgent. They should want to let Fraternity which was led by Adam lead them to pass through the derivative world.

Adam was orderly arranging these people. After recruiting about ten workers, Adam waved his hands to expel other workers.

The workers were unable to join the group looked pity, some of them even wanted to join the group by increasing the price. It seemed that the Fraternity adventurous group had a good reputation.

Although the benefits of protecting workers were not small, Su Xiao did not intend to cover people. His work in the derivative world was too dangerous, the workers who followed him would definitely die.

[Times up, derivative world: After the attack on Titan opened, the world has no abnormalities, the space coordinates are stable, the consumption of the power of time and space is 0.015 ounces.]

[According to the power of time and space has consumed, the contractor's lowest comprehensive evaluation in the world needs to reach D level.]

After the announcement of the reincarnation paradise finished, the surrounding contractors were obviously noisy. Although they were the same batch to enter the derivative world, there were many derivative worlds that opened at the same time so they may not enter the same derivative world.

The familiar feeling of transmission came, Su Xiao's consciously covered his hindbrain, but he was still knocked by a stick, he went in the consciousness twilight state.

In the consciousness twilight state, Su Xiao had some resentment in his mind, the reincarnation paradise was such a powerful presence, why could not change a way to transfer them.

When Su Xiao regained consciousness, he was already standing on a bustling street.

The streets were bustling, and rustling, pedestrians dressed very plain, the apple stalls on the street, the members of Stationed Corps passed by made Su Xiao seem to be in a small town in medieval Europe

.

The flagging on the street was not flat, whenever a carriage passed by, it would raise dust may be because there was less rainfall recently.

The high rising buildings on both sides of the street were the building of the style of opus Francigena in medieval Europe.

Chime, chime?

The high clock tower in the distance made a few chimes, Su Xiao looked up. The time was ten in the morning.

[Entering the world: Attack on Titan]

World difficulty: LV.7. Difficult. (This world had entered a large number of contractors.)

The source of the world: 0% (The hunter explores or communicates with the characters in the current world will grow, the world would be calculated with the task difficulty to form a final score.)

World introduction: Legend, initial giant, eating each other, kingdom destruction. Great migration, the establishment of the 'God's wall' on three sides.

Giant: A huge humanoid creature. The ordinary giant had no wisdom and no purpose. It will subconsciously devour humans and could not move at night. The number which was huge had not been fully counted.

Under the protection of three 'God's wall', the humans in the wall had a peaceful life for a hundred years like a bird in a cage. The resources in the wall were scarce. The giants wandered outside of the wall. The threat of the giants never disappeared.

In 845 A.D., Wall. Maria (the third wall on the periphery) was kicked out of a large hole by the colossal giant. The giants outside the wall entered to the wall. After a large number of human died and injured, they then went to the second Wall. Rose to escape.

During this period, the main character of the plot, Eren's mother was swallowed by the giant. The main character of the plot, Eren, joined the training corps in revenge for the giant and decided to become a member of the recon corps to kill the giants.

In 850 A.D., the second layer 'God's wall' Wall. Rose was destroyed. (This was the breakthrough point of the plot.)

Main mission: Wall. Rose, Dinah Fritz.

Hunting task: Killing the offender contractor 18433, 16770 and 14030 contractor, these three offenders.

When the hunter is near the offender within one kilometer, the hunting function would automatically turn on.

Warning: Do not mention anything about 'the reincarnation paradise' in this world. If the warning is invalid, you will be executed forcibly!

Tip: The main task of this world is an attack and defense task. Please cooperate actively with the contractors except for the offenders.

Tip: It was detected that the hunter did not master the language in this world, you could consume 100 paradise coins to master the language in this world automatically.

The world starts!

.....

After reading the hunting mission, Su Xiao looked somewhat awful. Is reincarnation paradise crazy? It surprisingly arranged three offenders for him to hunt. Fortunately, even if he could not complete the hunting mission, there was no punishment.

In this attack and defense task that required many contractors to cooperate, the reincarnation paradise surprisingly arranged a bunch of hunting targets for him, which made him very helpless.

Su Xiao had heard of attack and defense task. This was a major task that was much more difficult than the chain task of the last world.

In the attack and defense tasks, the contractors were generally on the defensive side to deal with a large number of enemies together.

If the defense task is successful, the task will be completed. If the defense task is failed, the contractor basically only could wait for death. The so-called When a group suffers, all individuals belonging to it will be affected, the lines of the defense were broken, how could people who defended alive?

In this world, the reincarnation paradise gave Su Xiao a strange feeling. The reincarnation paradise seemed to be a little urgent for cleaning up the offenders. Are any things gonna happen in the reincarnation paradise?

He didn't need to think about it now, Su Xiao checked the details of the main task immediately.

[Main mission: the fight of Wall. Rose's attack and defense.]

Difficulty level: Lv.7

Mission Description: stopping the giants who entered the wall. Rose was broken and blocked the hole in the Wall. Rose.

Mission information: Wall. Rose, the second wall, after the outermost Wall. Maria was broken, wall. Rose directly faced the threat of the giants.

Mission period: 10 natural days.

Mission reward: 3 points attribute point, 8000 paradise coins.

Mission penalty: None.

.....

After Su Xiao reviewed the details of the mainline mission, he knew the seriousness of the situation.

The task of Lv.7 difficulty, High rewards, and failure without penalty, these three points meant the task was very difficult.

Hui?.

When Su Xiao thought about the next countermeasures, there was a loud air injection in the distance.

The sound came from the direction of the city wall, Su Xiao looked at the wall which was at least 50 meters high.

At this time, a large head appeared on the outside of the wall. The head was almost as big as a house. The white skull and blood-red muscles leaked out, and the steam rose. It seemed that the temperature on the skull was not low.

Boom!

Su Xiao felt the shock under his foot. A huge rock with a diameter of ten meters flew over his head. After the huge rock landed, it rolled out of the distance and crushed a large building.

It's just an instant, the corpses were everywhere, everything was destroyed.

The colossal giant kicked a hole more than ten meters in diameter on the Wall. Rose, the hole was close to the ground. In the case of a large wall blocked the airflow, the hole which caused air leak made sounds.

In less than five seconds, the colossal giant disappeared without a trace, leaving only a large piece of steam.

Su Xiao looked at the big hole on the wall a few hundred meters away. Now the mainline mission was already obvious. Blocking the big hole and stopping the ordinary giants without wisdom from attacking.

Could the main task of Lv.7 be as simple as that? Of course not.

After five minutes, Su Xiao heard a loud noise on the side.

Ten minutes later, in the direction behind him, there was another loud noise.

The Wall. Rose was kicked out of three holes in the east, west, and south.

These holes must be guarded by the contractors and the aboriginals in the giant world. However, except for the investigation corps, other corps' power was too weak, so the main force was the contractors.
