

R. Paradise 251

Chapter 251

The crypt guard was strong, although his body wasn't that big.

Su Xiao ran a little before arriving beside a machine and slashing an iron pipe.

Wouch!

Steam rushed out while Su Xiao rushed out from its way and the guard directly rushed toward it.

The steam's temperature dropped as it touched the air, although it was still hot, it didn't burn skin.

The steam made Su Xiao disappear from the Guard's sight.

Su Xiao's perception as strong, he can clearly perceive the Guard even with the steam, and this environment was to his advantage.

The steam hit the Guard's hammer, and from time to time, he screamed.

Su Xiao directly leaped and thrust his sword on the neck of the Guard while he landed on his back, before retreating.

The Guard flailed like a headless fly, the wind pressure after each move blew the steam away.

The sword light appeared again and wounded him once more, causing severe pain due to Qin Gang Ying made the Guard's eyes blood red.

Roar!

A beast like Roar left the guard's mouth as he moved his hammer trying to blow the steam away.

Su Xiao appeared on the back of the guard like a god of death. He held the sword and stabbed into his back.

Puchi!

Dragon Flash passed through the guard's chest and penetrated its heart.

The Guard looked down and saw the tip of the sword coming out from his chest and was stunned.

"What!"

Full of anger and unwillingness, but also helpless, because this type of injury even with his vitality was sure to kill him. Although he was about to die, he swung his hammer, attempting to drag his opponent down with him.

Struggling for about two minutes, the guard started losing strength.

He slammed down, and with a thud, his life ended.

Looking at the corpse of the guard, Su Xiao wasn't pleased. This little monster was too strong, and if he encounters a boss of these creatures, how strong will it be?

[You killed a Crypt Guard]

[The cryptians are guarding hidden creatures, and Hunter can choose one of the rewards as follow:

Option 1: 3,500 Paradise Coins.

Option 2: A treasure chest dropped by the Crypt Guard.

Option3: Soul Crystal (Shard) X 1.

Option 4: V-type Alchemy virus resistance +5% (The core of the Bilumak Alchemy Site is full of V-type viruses.)

...

This was Su Xiao's first time getting to choose a reward after killing something and not just the drop.

The first option is excluded because even if the Paradise Coins are precious, there are many ways of getting them.

The Guard is a small monster in this site, and the treasure chest may not be worth the shot.

As for the soul crystal shard, Su Xiao didn't know what it does, after thinking a bit, he guessed that ten of them could create one soul crystal (small).

The last option is interesting.

The Reincarnation Paradise may give him the option of getting an even stronger gas mask after getting to the core, but it also may not, and he would then have to rely on his body to do so.

He didn't hesitate and directly chose the last option; he needed to leave this place, and crossing the core area would most likely be needed to do so.

Su Xiao then directly checked on Bob's situation.

Unlike Su Xiao, Bob was very happy, he was just running, and the three guards were after him with no chance to catch him.

From time to time, Bob would turn around and bark twice.

The Guard was very angered as they continued chasing the dog.

Su Xiao didn't directly engage with the guard, and he just cut off other pipes making the temperature in the place raise.

Bob's IQ increased from the way it was when he was created. He directly rushed into the steam.

The guards unwilling to give up on the chase, directly rushed after him, as soon as they entered, a sword stabbed at one of them from the steam.

Puchi!

A Crypt Guard's throat was directly penetrated, and once the sword connected, Su Xiao retreated.

Unexpectedly, a hummer rushed at Su Xiao from a Guard who through it.

Boom!

The Hummer slammed Su Xiao's chest throwing him back a few steps before a sweet taste rushed into his mouth. His chest felt numb and swollen quickly. After the numbness, pain appeared, and it was as if his chest was pressed by a big stone.

Su Xiao gently touched his chest and breathed. Although his ribs weren't broken, they certainly cracked.

In the steam, the three guards started looking for Su Xiao.

Su Xiao took his sword and slashed the eyes of one of the guards, which made him swing his hammer around.

Boom!

A muffled sound was heard, the guard kneeled down and looked at the head of the other one.

The guard kneeling down shook his head.

"&é"&'... (Unknown Language)"

"&é"&'... (Unknown Language)"

The guards said with a bad tone, and at the end, their voice grew louder.

The one without a weapon opened his mouth and wanted to persuade the others, or so it seemed, but he got a hammer to his nose and bled.

The three started to fight.

This kind of opportunity can't be missed by Su Xiao and directly attacked the one without a weapon.

After three minutes, the fight ended with the guard without a weapon filled with slashes.

The other two were still fighting, even though they didn't have low IQ, they were brutal and ate their injured kind, which was rare for intelligent beings.

After five minutes, the head of the two guards was deformed and covered with blood, but even so, they were still wielding their hammer showing how ferocious they were.

This time, Su Xiao directly attacked both of them and directly chose the last option the same as the last one and got his V-type virus resistance up to 20%

Su Xiao tried killing the other crypt man, but he didn't get any reward of even mana from them.

Looking at his devour ability, it seemed like he reached the limit already and his current mana points were 573 points.

Chapter 252

The flames in the furnace at the center gradually extinguished and the machines stopped working and the steam dissipated.

The machines should have a role in here, and it would be good for Su Xiao to shut them down.

With Dragon Flash in hand, Su Xiao destroyed the machines.

Looking around, Su Xiao found an elevator like thing, which seemed old and simple. It was a metal frame with wires on each side.

Other than the elevator, there was no other route. Su Xiao entered it with Bob and the Emperor.

Su Xiao found a lever and dropped it, the elevator firstly vibrated before slowly started raising.

Sound of metal friction was heard; the elevator seemed to work barely. Su Xiao felt that this thing would collapse at any time. Bob closed his eyes with fright.

As the elevator moved, the surrounding scene changed from black stone walls to metallic texture.

Wouch!

The elevator seemed to sink downward, Su Xiao kept his center of Gravity low so he can still be on the ground before the elevator once again returned to normal.

The ground no longer can be seen, and if it falls now, it would be a big problem.

Fortunately, although the elevator wasn't good, it didn't collapse yet.

After a few minutes, the elevator stopped, and it was after a few hundred meters, which made Su Xiao happy as he was close to the ground now.

A factory-like place was scene as the elevator stopped. The place was filled with test tubes a few meters high. Each holding a strange animal, the type of animal that was really dangerous, and occasionally, you can see a few humans.

Some species had two heads, and some had dozen of hands.

The extra ones seemed to have stitches. Some were joined by metal.

The species didn't seem to be alive as they were soaked in some solution in the tubes.

“Which direction should we go next.”

Su Xiao walked into the factory and asked the little emperor to be the guide.

“Probably, that direction.”

The little emperor pointed to the right.

“Probably?”

“My instinct disappeared here.”

Su Xiao looked at the emperor with a glare and the little guy too a few steps back.

“I didn't lie this time.”

“...”

Hesitating a little, Su Xiao walked in the direction the little emperor pointed at without another choice.

After a while, Su Xiao heard the sound of footsteps in the distance but didn't feel any creature close by. Still, the footsteps were getting closer and closer.

Su Xiao directly moved around, there were many doors like things around, and Su Xiao just chose one and entered.

In fact, not only did the instinct of the little emperor disappeared, but also Su Xiao's perception was greatly weakened. Something was suppressing his perception, which made his perception range only two meters.

After entering the door, Su Xiao found a large number of equipment and test tubes, which should be the work of an alchemist.

The people he head walking entered and Su Xiao's grip tightened around Dragon Flash ready to attack.

But something was strange because they were crypt man wearing a yellowish-white coat with one arm made of metal.

The crypt men looked at Su Xiao as he looked at them, but the strange thing is, they looked at him with surprise, and without yelling, they said.

“Human from the ground?”

Strangely, they spoke the normal language but with a strange tone.

“Correct.”

Su Xiao didn't know what their origin is or if there were enemies in this place, but if they shouted, it would be a problem.

The situation was somewhat unexpected, and the crypt man was surprised as he looked with a happy face.

“Human... Finally, there are human beings coming here. Great.”

Strangely, the crypt man put down the test tube as he looked at Su Xiao and the others.

The footsteps from outside were heard again, and the crypt man's face changed.

“Oh, don't say anything.”

Su Xiao could tell that this guy was afraid of the creature outside.

“The ones outside are the inspection force; you're not their opponent, believe me.”

Su Xiao hid around as the crypt man went, but he was still on guard.

The footsteps gradually went away, and the strange man sighed.

“Human... The human on the ground. Hahaha. Great. Finally, we have the opportunity to leave this place. It has been six hundred years. I was trapped in this ghostly place for a total of 631 years, one month and seven days.

The strange man started to cry.

“You’re a nobleman, my name Sherlock, made by a sinner alchemist, to help him complete his stupid study.”

Sherlock’s attitude was very warm. It seemed it was good for him to meet Su Xiao and the others, but his eyes turned around, his IQ wasn’t low, and this meant that there is a plot here.

“Oh Noble Human, can I ask you where are you going? Is it the temple? Or is it the room of alchemy?”

Sherlock’s eyes were full of expectation.

Su Xiao thought that this guy should be very willing to leave this place, the origin of the other party was already obvious, this was an alchemy creature.

If Sherlock’s words were true, then that means he is a few hundred years old, and the life of the crypt man was only 30 years long, and only alchemy could make him live so long.

One of his arms was made of metal, and there was a metal present on his neck.

He was trapped here for so long, and he should be eager to leave, maybe the little emperor didn’t matter anymore.

“We want to go to the temple.”

“&é”é,” é”(é”é... (Unknown Language)”

Sherlock’s flame of hope seemed to extinguish.

“Is there an emergency passage here, why didn’t you leave?”

Su Xiao put down Dragon Flash into the sheath, Sherlock wasn’t strong, and he can deal with him.

“The emergency passage can only be used by the royal family. I’m an alchemy creature... we’ll be abandoned after being used, the damn alchemist and the royal family.”

The sound of metal creaked out from Sherlock.

“Sherlock, come over.”

Su Xiao said to him, although he didn’t know what Sherlock wanted, him wanting to leave was true.

Coming to the corner, Su Xiao whispered: “My name is Byakuya, we work together to leave.”

Sherlock rubbed his chin and looked at Su Xiao before whispering:

“Then we have the same goal, the big hole in the temple is at least a few hundred meters high, it’s no easy to come down here, and there are hundreds of tools but none to fly.”

Sherlock said with a sigh.

“I have been trapped here for so long while I know how wonderful the world outside is, can you understand that pain?”

Su Xiao put his hand on Sherlock's shoulder.

"It's a tragic experience, and you said that only the royal family could use the emergency passage."

"The emergency passage was originally made by alchemist by the orders of the royal family. The door checks the blood of the one opening it in a special way. The door is actually an unintelligent alchemy creature made by fine gold..."

Sherlock talked endlessly. This guy's alchemy level wasn't low, as he was trapped here for so long.

"Stop, I don't understand. In general, the royal family can open the door?"

"Yes, but it isn't right, the royal blood activates the door, we will know how to open it afterward, but so what?"

Su Xiao was happy.

"That kid, you see him?"

"Who is he?"

"A member of the royal family."

Sherlock glanced, his eyes widened, his face showing ecstasy, but the hatred can also be seen.

"Friend, I must be your most reliable partner, let's get out of here together."

Sherlock was excited, as he trembled.

"Okay, let's go out together."

Su Xiao and Sherlock looked sideways at the little emperor, and the little guy instinctively stepped back.

Chapter 253

Sherlock was a crypt man transformed by an alchemist, and most of his organs were swapped with machines.

According to him, it required the minimum amount of energy for his daily activities. The main source of energy being the refined ore that can sustain him for half a year.

"Do you understand everything about this place?"

Su Xiao wanted to judge Sherlock's intelligence as much as he can.

"Except for some secret location, I know all the other ones, in short, there is no problem if we want to leave. Wait..."

Sherlock moved and took a yellow sheet of paper from the drawer.

"This is a map of the alchemy site, and this is our current location."

Sherlock pointed to the middle rear of the map, and Su Xiao moved forward to look.

He was moving forward toward the core of the alchemy site.

Su Xiao noticed a specially marked position which was the emergency passage.

“We are in the seventh research room, which is mainly responsible for creating alchemy creatures. The emergency exit isn't that far from here, as long as we can make it there. There are several alchemy creatures here same as me, our fighting abilities are close to none existing because we were specially made to help with alchemy ingredients and the sort, but there are ones that were made for battle. If you went to the second room, you wouldn't be alive now.”

Sherlock held the map and allowed Su Xiao only to look, and he kept his guard up against him.

“The Sanctuary of birth? What is born there?”

“Monsters, monsters with the ability to destroy the empire. But in the end, the royalty didn't approve of this due to their jealousy, so they disposed of them and the one left is to be disposed of as well.”

Su Xiao felt a headache now, because this unknown monster may be strong.

“How strong is this monster compared to the crypt guard?”

Sherlock looked at Su Xiao, very surprised.

“Those guards? Are you kidding? The purpose of these guards is not to fight, and you should know the supreme one.”

Su Xiao nodded, and Sherlock continued:

“The Supreme emperor is vulnerable to the monster we are talking about, for up to fight minutes, the monster could turn him into a pile of iron.”

Su Xiao had a headache now.

“It has a powerful perception, and we can't safely pass around it.”

“Don't about it, the thing is asleep, it hasn't been moving for four hundred years.”

“Is that reliable?”

“Of course, I'm a crypt man who has lived for six hundred years.”

Sherlock stood up and looked at himself.

“Go ahead and let's leave this place as soon as possible.”

“Wait, I have to clean up my home.”

Sherlock took out a gray cloth bag and started to pack his things from the room. He put a piece of parchment was put in the bag, and Su Xiao saw a purple flash on the sheepskin.

Putting the bag on his back, Sherlock walked in sizable steps.

“You can follow me, the guards here only patrol three times a day.”

Su Xiao didn't say anything, but he didn't relax.

Sherlock moved in front while looking good.

The seventh room didn't have any other alchemy creature.

It was once a good place a thousand years ago, but now it's ruined.

Once there was an alchemist living in every compartment and experimented on living being here and dying here.

The Royal family poisoned the food of alchemists, and more than 95% were poisoned.

After that, the alchemy site became a restricted area for human beings. Except for members of the Royal family, anyone who enters here is attached to an alchemy creature.

After the monsters were created, the Royal family began to avoid the Alchemist's ability. The end of the alchemist soon arrived, and all of them were chased out by the army of the empire, and only some alchemists survived.

Without the Alchemists, the site was generally forgotten by the royal family.

The royal family destroyed the royal family couldn't bear the power of the monsters. Of course, there should be other reasons.

After a passage full of test tubes, Su Xiao came to the sanctuary of birth.

Unlike what he imagined, there were no experiments here, no powerful alchemy creatures, it was just a cold metal room that was several thousand square meters. The entire room was empty.

"This is the sanctuary of birth, where is the monster?"

Su Xiao looked around and didn't see the monster.

Sherlock pointed at the ground.

"It's just under our feet, don't make too much noise, although it's asleep for 400 years, no one is sure when it would wake up. If we're not lucky, it will wake up soon."

Hearing the keyword 'bad luck', Su Xiao's heart tightened, because his luck was not good at all.

It turns out that the monster wasn't easy to wake up, as they moved, they arrived in front of a diamond-shaped metal door.

There is a face in the lower part of the door with a largemouth.

"This is the emergency exit, little boy, come here."

Sherlock signaled to the little emperor to come forward.

"Me?" The little emperor pointed at himself.

"What... What do you want me to do?"

The little emperor didn't cooperate very much as he noticed the hostility of Sherlock.

“Hands in there.”

Sherlock pointed at the big mouth in the metal door, and the little emperor shook his head immediately.

Su Xiao didn't ask for the little emperor's consent in this, and he directly looked at him while he was retreating.

“If you don't do it yourself, I will make you, and you won't like it.”

The little emperor didn't move, Su Xiao directly moved toward him.

“Don't kill him, and he must be alive.”

Sherlock said in a hurry.

Five seconds later, Su Xiao grabbed the little guy's hands and directly shoved them into the mouth in the door while the latter was screaming.

The little guy struggled, but there was no use.

Wouch!

The eyes on the face that was stuck in the door opened, and scale-like things started to Rotate.

“Let me handle the rest, and I will solve it in thirty seconds.”

Sherlock's hands were shaking; the door for freedom was open in front of him.”

The little emperor found that there was no danger for him and stopped struggling. Su Xiao directly let him go as there was no use to him anymore.

Boom!

Suddenly, the ground vibrated, and Su Xiao felt his feet turn numb, and Sherlock stumbled.

“What happened.”

“The, the monster must be awake.”

Sherlock was shaking.

“Hurry up and open the door.”

“Yes, we need to escape.”

Sherlock quickly turned the eyeball that was on the door.

Wouch!

The metal door opened slowly, but there wasn't any sound of the metal door opening, the sound of cracking came from under their feet, something was coming out.

Chapter 254

Su Xiao got on Bob while the dog hurried into the door.

“Take me with you.”

Sherlock shouted, and Su Xiao hesitated, he chose to grab his collar while the little emperor didn't understand what was happening.

Su Xiao didn't pay attention to the little emperor, he rode on Bob and quickly entered the exit.

The exit was a straight upward slope.

Bob was already running at full speed, trying to get out of there.

Sherlock suddenly screamed: "Byakuya, you should've killed the little guy. Without him, the monster won't be able to leave."

"What do you mean."

"The reason why the Royal family didn't kill that monster is that they had some way to control it, but the cost was too much, that's why they kept him there."

Su Xiao didn't say anything, and he could handle the little emperor at any time.

Bang!

A loud bang was heard from behind them, and a large cloud of dust emerged cracking the entire passage as it looked like it would collapse at any moment.

Boom!

A large stone fell that almost blocked the passage.

Wouch! Wouch!

Crack's spread around the passage, and the passage was about to collapse, it could hold a maximum of twenty seconds.

"Bob, Run Fast."

Su Xiao shouted loudly, and Bob directly did so.

The front was dark, Su Xiao saw the large stone ahead.

Dead end? No, it's a stone blocking the way out. At this time, Su Xiao's perception return to its full power.

Bob rushed quickly, and when he was a few meters away from the stone, Su Xiao pulled his Dragon Flash.

Several white lines flashed in the dark passage breaking the stone apart with smooth cuts.

Light appeared in front of them, while they were in a dark environment for so long, seeing the sunlight caused their vision to blur as the light hurt their eyes.

Su Xiao's vitality was 15 points, way more powerful than ordinary humans.

Although Bob's eyes were affected, they returned to normal after a few seconds.

As soon as they exited, they breathed in the fresh air, and they were inside the forest about 1 Kilometer away from the empire.

With a bang, the passage collapsed. Now Su Xiao only needed to go to the coordinates the Reincarnation Paradise gave him to return.

Just as Su Xiao was in a good mood, Notifications from the reincarnation paradise appeared in front of him.

[The hunter has left the Birummark Alchemy Site, The V-type alchemy virus is no longer affecting the Hunter.]

[The hunter stayed in an environment full of V-type virus for 6 minutes, the V-type alchemy Virus is about to break out. Hunter, Please prepare in Advance.]

[Warning: V-type alchemy Virus Outbreak!]

[Warning: V-type alchemy Virus Outbreak!]

[Warning: V-type alchemy Virus Outbreak!]

[Checking the hunter for resistance toward V-type alchemy virus, the check is completed. The V-type alchemy virus will cause 20% damage to Hunter's life value per minute. The hunter stayed more than five minutes which will trigger Death.]

[Initiating Judgement of Death... Checking the Hunter's antibody for the V-Type alchemy virus. The judgment of Death failed.]

[The V-type alchemy Virus will cause 96% damage to the Hunter and will put the hunter in a sudden Death state.]

...

Reincarnation Paradise's notification was present while he was escaping, but due to the situation, Su Xiao didn't look at them until now. He suddenly spits out a large mouthful of black blood, and his vision turned black, and his ears started humming as he almost fell from Bob's back.

[Honor Pharmacy Potion] Effect: Restore Health by 100% after use.

The potion didn't have any taste, after drinking it, white light covered his body and organs that were eroded by the virus were quickly repaired, and gas visible to the naked eye escaped from his pores.

The virus was horrible, and it would directly trigger Death Judgement after being poisoned for some time.

Su Xiao didn't die thanks having 20% resistance.

If Su Xiao stayed there for a little longer, he wouldn't even have the opportunity to take the potion.

And this virus is out of the scope of magical damage, so the immunity to magic didn't have any effect on it.

“Hey, are you okay? I take it you have a way to deal with the virus.”

Sherlock looked at Su Xiao with concern, but his eyes flashed with disappointment.

‘How didn't he die?’ this was his real thoughts.

Su Xiao looked at Sherlock with a gentle smile and said.

“You seem rather disappointed that I didn’t die.”

“How could, how could I...”

Sherlock didn’t finish his words before he was in the air as Su Xiao grabbed him by his neck and lifted him up.

“Then what is that bottle in your hand, don’t say anything, I could feel danger, and only danger from it.”

Sherlock’s metal arm shrunk back into his sleeve with the bottle in it.

“This is a mean of self-defense, don’t get me wrong.”

Sherlock looked calm as if he wasn’t lying.

“Oh, the means of self-defense. You were separated from human society for years, and you had your eyes on Bobtney now.”

Sherlock took a fancy to Bob.

Su Xiao Grabbed the bottle from Sherlock and tried to see what the Reincarnation Paradise say about it.

Su Xiao threw the black bottle into the distance on a tree.

Ssss!

A green smoke emerged as the tree was eroded by the acid from the bottle.

“It seems you discovered it? Well, you can’t do anything about it, if you kill me, you die.”

Sherlock showed the bomb he had on his chest.

“This alchemy bomb is named the Sun God, and the explosion range spread over half a kilometer, when my body function ceases, it will explode.”

Su Xiao looked at the bomb. Sherlock didn’t lie, which was why he didn’t kill him yet.

He had a vague feeling that he can’t kill Sherlock.

Su Xiao just took the bag from Sherlock’s bag into his inventory. Then he took something out from it.

“This... What’s this strange thing...”

Sherlock could no longer keep calm as he struggled to get away from Su Xiao.

Su Xiao grabbed Sherlock’s jaw and forced his mouth open, and then he put the thing he grabbed from his inventory into his throat. That thing was shaped like a Sea Urchin.

“Oh, Oh, you... Bastard!!”

Sherlock’s face was full of pain, as the sea Urchin shaped object stuck in his throat.

Pip... Pip!

There was a regular electronic sound coming from his throat as if something was counting down.

“Do you like bombs? I will give you one.”

Su Xiao threw Sherlock aside and immediately rode on Bob and started running, after five minutes, Sherlock squatted down and tried to spit out something from his throat.

“Oh!”

Sherlock tried with his hand as well, but the surface of the bomb was that of a sea Urchin which stuck in his throat.

Pip!!

The sound was getting more and more urgent, as Sherlock tried to stuff his hand into his mouth.

Pip!

The sound disappeared. Sherlock’s movement stopped as he pulled his hand from his mouth.

“Was that Human wrong? Are all humans stupid now?”

Sherlock took a deep breath of fresh air.

“Is this the feeling of freedom? I hate humans.”

Boom!

Sherlock’s body directly shattered.

The alchemy bomb flew in the air as the circuit turned red and finally...

Boom!

Flames appeared everywhere as it expanded. In just two seconds, it enveloped half a kilometer.

As if a sun was on the ground, everything in the vicinity started to evaporate.

This was the horror of the alchemy bomb named Sun God!

Chapter 255: 255

Su Xiao was riding Bob when he felt the power of the Explosion behind him.

The fireball on his back was burning like a sun, but fortunately for Su Xiao, he left the half Kilometer range already.

Sherlock has been calculating, and Su Xiao was wary of him.

Su Xiao felt that something was wrong when he met him.

Sherlock didn’t hate just the alchemist and the Royal family, but also the humans. Su Xiao noticed this when he interacted with him.

He saw the notification of Sherlock dying, so he no longer cared.

Bob was still running toward the coordinates for the last mission in this world, which was a dozen Kilometers away.

It's important to complete the return mission as soon as possible, or the thing that woke up just before would be dangerous.

Within a few kilometers from the capital, there was a slight vibration as the war stopped. Everyone thought that an earthquake was about to erupt.

...

Inside a military camp, dozens of contractors gathered together.

"Let's talk about it, how do we leave, the main mission was finished, and we are surrounded by armies, the return mission actually has 5% world source as a reward, which isn't low."

A female contractor with a shotgun said, her face wasn't good looking as she failed the main mission and her attributes would go down by 3.

"I don't know how to complete the returned task. All I want is to leave this place; it seems like an earthquake is about to happen."

A well-received contractor said. Although he was also punished by the -3 of all attributes, he completed several other missions and barely made up for his loss.

This is the benefits of joining a group because there are many side tasks.

"We will die, all of us will."

Everyone looked at the one talking only to see a young wizard wailing.

"This..."

The contractors were a little dumbfounded. This mage was usually arrogant, but now he was sobbing like a little girl.

"Below... There is something coming out, and I never thought that there is a creature with such a terrible power here."

The mage's voice trembled as his legs turned soft.

"What do you mean?"

The appearance of the young mage made everyone scared.

Boom! Boom!

Cracks started to appear on the ground as the contractors started to go flee.

Bang!

The ground was split open, a red palm broke out from the ground, and the joints seemed to be metallic.

The palm pressed on the ground, and a ten meters high body broke out.

The creature had a deep red skin, and his joints were metallic as well as his neck.

The creature looked close to a human being if you ignored the cow head and the sharp fangs it had.

This was a super creature created by alchemy.

“Since the owner disappeared, it has been hundreds of years, the world on the ground... So nostalgic.”

The semi-metallic monster shouted loudly.

Although his figure was mighty, his voice sounded a bit sad, because hundreds of years have passed and his owner is no longer here.

“Master, I have been obeying your order and didn’t kill any Royal family member, where are you?”

The bull-headed monster looked around at the people and didn’t seem interested in killing.

“Help me do a few things, and you will be completely free in the future.”

The little emperor looked at the monster and said.

The little guy was in a bad situation this time, his body below the waist was on the monster’s head; it was like he was fused with it.

This was the price of the Royal family pay when they want to use this monster.

This is why it was abandoned there, the monster had its own consciousness, and every time it was used, there is always a chance that it can break from the control.

“Hey, little guy, you have the blood of the royal family, I have accepted your blood, I will do three things for you and nothing more.”

The monster slapped the ground slightly, and a crater appeared in the ground.

“Three requests... Ok.”

The little emperor was suffering from unimaginable pain because his body was being integrated into the brain of the monster.

“The first request is to kill the Minister, Esdeath, and Byakuya.”

“No.”

“Why?”

The little emperor screamed as he really wanted to kill these three.

“One request is to kill one person, so what you asked are three things.”

The monster answered, and the little emperor’s head looked down.

“Then... kill the minister and Byakuya, Esdeath is fine.”

“Yes, these would be two requests, tell me your last one.”

Every time the monster eat a Royal Family member, he can help them do three things, this was the promise he made with his creator.

The monster was only loyal to his creator; for this reason, the royal family executed all alchemists.

“My last request, I want you to destroy the empire, whether it is the revolutionary army or the empire army, they all can go to hell.”

The little guy made a perverted smile. The betrayal of the minister and everything that happened made him hate everything.

“Yes, I will kill Byakuya, the Minister, and destroy the empire. I won't swallow you entirely before I complete these three things.”

“I will destroy this place first, and then we will go and kill Byakuya.”

The revolutionary army looked at the monster with blank faces, for it wasn't clear what it wanted to do.

They knew his purpose a few seconds later.

This monster was a demon, a destroyer.

The monster walked slowly as red mist gradually drifted around him, the most were very light, and its effect was unknown.

After a few steps, the monster started to run, and he became faster with each step, and finally, only a blur could be seen.

Boom!

The monster smashed the wall like a piece of paper and started fighting the revolutionary army and the empire army.

“Humans still like to fight in closed spaces.”

The monster didn't attack, and it just stood there.

The pale red mist drifted and quickly around the people near.

Everyone fell down, and their faces were gray.

These people were dead, and there was no scream or sound as they all fell.

“What the hell is this?!”

The distant Empire army and the revolutionary army were horrified, and the ice blue-haired beauty also saw this scene.

Esdeath looked at the monster in the distance and turned around and walked for three seconds before someone stopped her.

“General Esdeath, where are you going?”

The minister shouted loudly.

Esdeath looked at him and shook her head.

“Although I’m passionate about fighting, I’m not interested in going to my death.”

Esdeath didn’t want to fight the monster because she knew she would die if she did.

That was the wisdom of a thousand alchemist combined.

...

An hour later, the empire was razed to the ground, and no living creature could be seen, the ground was burned down.

The monster was holding a person in his hand, which was the fat minister.

“Your Highness, I’m...”

“Kill him.”

The little emperor gave him a sick smile.

Wouch!

The minister was squeezed into a pile of rotten meat by the monster like a tomato.

“I helped you destroy the empire, killed the Minister, there is only one request left, which is to Kill Byakuya, who is in a nearby town.”

The monster seemed to have the ability to perceive Byakuya as he looked far away.

Chapter 256: Regression.

Dozens of Kilometers away from the empire, next to a small river.

Su Xiao took the coordinate locator. He felt space fluctuations in the vicinity as the locator was transmitting a certain signal frequency.

[Space coordinate positioning... 10%... 30%... 70%... 100%. Positioning complete.]

[The Hunter completed Main task 2: Coordinate Positioning. The hunter can return to this place at any time, and the time remaining in this world is ten minutes.]

[The coordinate has been reclaimed, and this place will be the one where contractors enter this world.]

...

Su Xiao suddenly realized that he was helping the Reincarnation Paradise get the transfer coordinate so that other contractors would appear here when they enter this world and not the extreme north as he did.

An accurate transfer can be done, but the price would be high.

Therefore, the Reincarnation paradise made Su Xiao locate the coordinate and reclaim it so the other contractors that enter this world will appear here without any price to be paid. The locator should be very precious, and the Reincarnation paradise probably won’t give it to ordinary Contractors.

Which is why it was given to Su Xiao, who is a Hunter.

The attitude of the Reincarnation Paradise toward Su Xiao wasn't clear. His original purpose of being in the Reincarnation paradise was to get stronger, and now his strength was enough for him to get his revenge. But for the sake of certainty, he decided to wait longer.

Moreover, Su Xiao found out that it would be better to take risks in the Reincarnation paradise than to live dully in the real world.

The Return task is completed, and now, Su Xiao was waiting to return to the Reincarnation paradise.

Boom! Boom! Boom!

The ground started to vibrate. Bob's hair stood while he was in front of Su Xiao.

"This is..."

Su Xiao looked at the distance only to see a giant bull-headed monster rushing toward him.

"That thing... It's really fast."

Su Xiao immediately decided to return, the bull here monster was hard to fight.

But when Su Xiao looked closer, he could vaguely see someone on the head of the monster, and he saw a small-headed looking in his direction with a gaze filled with hate.

"The little emperor? Is this the monster Sherlock talked about?"

Su Xiao was hesitant, he won't be able to fight this monster, but the little Emperor on his head was the key.

Su Xiao took out a detonator. He placed a small egg-sized bomb on the little emperor that was hard to detect. That bomb was a white item from the Reincarnation Paradise.

Su Xiao directly pushed the button, and an explosion sounded, and a notification appeared as the monster was planted to the ground.

[You destroyed the core of the bull Lord (1/5)]

[The bull-headed monster is the strongest creature in this world; you can choose one of the following rewards.]

Option 1: 21,000 Paradise Coins.

Option 2: Soul Crystal (Medium).

Option 3: Bullhead collar (purple).

Bull headcollar

Origin: Akame Ga Kill!

Quality: purple

Category: Armguards

Durability: 72/72

Requirement: strength 23, agility 17.

Equipment effect: the wrath of the bullhead lord (active), after turning on this skill, the strength goes up by +15 for 10 seconds.

Tip: The wrath of the bullhead lord (active)'s cooldown is 10 natural days.

Tip: Turning on the wrath of the bullhead lord (active) requires 30% health.

Rating: 138 (Note: Purple equipment scores between 71 to 150.)

Introduction: Turn blood into strength and crush everything.

Price: 37,000 Paradise Coins.

...

The soul Crystal (Medium) was tempting, but the armguard would be more of help to him.

With the +15 strength, along with his current 20 points, he would reach an astonishing strength of 39. Although it can only last for 10 seconds, in a fight, even a second could be a deciding factor.

Imagine at a point, he was fighting someone, and suddenly at a critical moment, his attribute raises suddenly to 39 points.

Su Xiao chose the armguard while at the same time, the space around him started to fluctuate. He chose to return to the Reincarnation paradise.

The monster in the distance got up, and his bloody red eyes were staring at Su Xiao.

Su Xiao's head started hurting, but he wasn't worried at all, he was even thinking about how to enhance his strength even more now.

Roar!

The roar of anger came to his ear, as the monster rushed toward Su Xiao, the ground under him shattered but Su Xiao was missing.

“This human dared to destroy one of my cores.”

The sounds of roars continued, but the monster has no way to locate Su Xiao anymore.

[Transfer completed. the hunter had returned to the exclusive room.]

[The hunter successfully returned to the Reincarnation Paradise. Calculating the award from the Derivative world.]

Derivative World: Akame Ga Kill!

Difficulty: LV.8 (very difficult)

Source Of the world Gained: 27.2%

Number of Mission completed: 2 (Main task 1 and 2.)

Evaluation: A. (Note: The evaluation score can go from E- to S+. The evaluation is based on the source of the world gained and the difficulty of the world as well as the number of mission completed.)

Collecting source of the world...

Collecting completed, start initiating the rewards.

Earned reward: 13 attribute points (including the attribute points gained in the other world) and 10,000 Paradise Coins.

The overall score is A. The hunter gained +2 levels and now is level 9.

The hunter level reached level 9, and the inventory increased to nine cubic meters.

The reward will be directly placed inside the hunter's inventory.

...

[Checking the items that can't be brought to the Reincarnation Paradise... The products are only 1/15 of the finished ones. They can be registered in the Reincarnation Paradise with 5,000 Paradise Coins.]

Su Xiao immediately chose to register them into the Reincarnation Paradise.

The source of the world acquired from the Akame Ga Kill world wasn't that much, but the reward from the Main mission was good.

It's not surprising that many were after the key.

Sitting on the bed in the exclusive room, Su Xiao started checking the Attributes available and the Paradise coins he had now. He has 13 Attribute points as well as 31,057 Paradise Coins.

He gained a lot from this world; he now had a lot of good equipment.

[Mystery Silver Ring (Purple)], [Bull head collar (purple)], [Iceland Prince Token (Blue)]. Three Pieces of equipment were obtained from there, and two of them are suitable for his use. Not to mention the Soul Crystal.

Su Xiao didn't want to do anything now, and he only wanted to sleep.

Bob looked at Su Xiao and at the bed, he seemed to want to hop on the bed as well but was afraid that Su Xiao would be angry. Then he jumped onto the bed, and he was curious about Su Xiao's personal space.

"If you're hungry, eat something from the fridge, thirsty, go to the faucet over there... Not the toilet! Don't drink water from there! Take you to head out and don't mess with any furniture, or else you will be grounded for three days..."

After getting the common sense into Bob's head, Su Xiao fell asleep without even taking his clothes off, and snoring sound could be heard coming from him. This just shows how tired he was.

Bob wanted to mess around but was afraid that Su Xiao would really ground him.

After sleeping for 17 hours, Su Xiao woke up, and he was woken up by the smell of Urine. Otherwise, he would've slept for more.

After taking a cold shower, Su Xiao's head was clearer.

Checking the furniture for damage, he didn't find any, just a large dumbbell smashed and discs full of teeth marks.

Su Xiao looked at Bob while the dog was looking at the dumbbell, it had a fight with it.

After dressing up, Su Xiao took Bob out of the room and directly went to the strengthening hall, which was his personal habit.

Su Xiao used this place many times and was already used to it. He paid the 100 paradise coins to enter while Bob was guarding the door.

[Welcome to the strengthening hall, your current personal attributes are as follow.]

Strength: 24

Agility: 24

Vitality: 12

Intelligence: 24

Charm: 3

[Hunter can freely assign his attribute points, hunter current has: 13 points]

[Ding, the main attributes of the hunter is detected to be strength, agility, intelligence, please upgrade these three attributes first.]

The 3 charm points will stay the same, and he didn't want to waste his points on such a useless attribute.

He didn't like to be friendly with the characters in the other worlds, and he was used to using his sword to persuade them, which was more effective.

And this method requires strength, vitality, agility, and intelligence.

The 13 points were allocated as follows: strength +5, agility +4, and intelligence +4.

[The attribute distribution is completed, the reinforcement starts and the reinforcement will be accompanied by a huge pain. use the anesthesia function, and this function is free: Yes/No]

“No!”

The process started as Su Xiao closed his eyes and sat on the ground. His muscle started twitching, and his skin turned red.

No matter how many times he experienced this, he couldn't get used to the pain, and the pain was increasing each time.

The starting point of a normal human body was low, but it has unlimited potential. Attribute enhancement is developing that potential. If you want to achieve the effect of ten years or more in just a few hours, you need to endure the pain.

When the enhancement was completed, Su Xiao's clothes were soaked in sweat.

Feeling the power in his body, Su Xiao smiled. The feeling of becoming stronger is wonderful.

Now his attributes were:

Strength: 29

Agility: 28

Vitality: 12

Intelligence: 28

Charm: 3

...

Su Xiao left the strengthening hall and went toward the market. He needed the Paradise coins urgently.

Dragon Flash was now 86% from turning into a purple quality weapon.

This will be the last blue weapon Dragon flash will consume, and the next ones need to be purple. And that would be very expensive. Su Xiao wanted to upgrade his weapon now.

Chapter 257: Alchemy

Going to the market, the place was lively, and the sound of people bargaining was all over the place.

Without a doubt, the market holds the largest number of contractors as more than 70% of them are gathered here.

The contractors and workers formed the balance in reincarnation Paradise. The two are indispensable.

In fact, workers were like hunters, the exception is that the workers failed their first mission, which led to the Reincarnation Paradise giving them a choice to be workers and enter a derivative world every two months.

That is an opportunity for the workers to perform well and gain an identity as a contractor if they scored above B.

If the workers are the service personals of the Reincarnation Paradise, then the hunters are the cleaning staff, who are responsible for cleaning the contractors who make offenses.

Su Xiao went to the booth he often used, but he found someone there already, so he simply went to the booth on the side.

Paying for three hours, Su Xiao listed two equipment to be sold.

[Evil Roar (Green)]

Category: Ring.

Equipment effect: Roar (active), after activating this effect, it will disregard the sensation of pain for 20 seconds; during that time, any attack comes increases 5% attack speeds each time. (Increased attack speed max value is 50%, after roar effect vanishes, this addition disappear.)

Rating: 21

...

Roar, This skill was useful, if he didn't have the mysterious ring, he wouldn't sell this ring.

After a bit, Su Xiao marked the ring price as 10,000 Paradise coins.

He wasn't greedy, as the jewelry equipment are rare and moreover, the Roar skill was really useful.

The second one is [Ice prince Token]

[Ice prince Token (blue)]

Category: Accessory

Equipment requirements: Charm 15 points above.

Equipment effect: Prince law (Active), summon three to five extremely north army soldiers, the northern army soldier did not have individual consciousness, may carry out the tedious order.

Rating: 46

...

Seeing this, Su Xiao was hurt, this equipment was good, very good actually, summoning cannon fodder is a good choice, and if he wasn't in need for Paradise Coins, he wouldn't sell it.

It looks like to Su Xiao, 15 charm points are more difficult to get than 50 strength points.

Considering the ability this piece of equipment has, Su Xiao decided that its price should be 30,000 Paradise Coins because it was also a jewelry type.

Labeling his booth as High-Quality Booth, Su Xiao sat there bored.

After a moment, Su Xiao looked at the things inside his inventory, which were not organized and started reorganizing them.

After dozen of minutes, Su Xiao nodded in satisfaction as the items were neatly organized.

At this moment, he saw a gray cloth sack in his inventory which seemed familiar.

“This is... Sherlock's cloth sack?”

Su Xiao took the cloth sack. He totally forgot about it when he took it as he still had to complete the mission.

The cloth sack was filled with Alchemy materials; some of these things were directly taken by the Reincarnation Paradise as he couldn't bring them out from the derivative world.

[Cloth Sack (junk, unranked grade)]

Su Xiao stared at the cloth sack for a while.

He finally opened the sack, and his heart trembled as he saw a purple radiance inside, with a thought, a really soft item appeared in his hand.

He pulled out the soft item as his eyes fixed on it. It turned out to be a scroll.

[Alchemy (complete)]

Origin: Akame Ga Kill

Quality: Fifth Order Scroll (knowledge class skills divided from one to nine)

Category: Skill scroll

Effect: User grasp Alchemy (complete) after use

Requirement: Strength 10 points, stamina 10 points, intelligence 25 points

Introduction: Knowledge is Strength

Price: 39,000 Paradise Coins.

...

Su Xiao was surprised as he examined the scroll; he didn't see this kind of thing before. After asking in the Reincarnation Paradise, he knew that this isn't a combat-oriented skill, it is like sub occupation.

Su Xiao finally opened the scroll.

[Use Alchemy (complete) {Yes} {No}, this doesn't have any influence on the Shadow of the Law occupation]

This was, without a doubt, good news for Su Xiao. He directly chose to use it.

The scroll in his hands shattered and a voice like thunder roared in his ears. He found himself in his sub-conscious staring at the sky unexpectedly while looked at the stars moving.

[Alchemy originated when Humans wanted to turn stone to Gold, after countless researches, alchemy masters discovered that it would take much more for stones to be turned to Gold as they found out the composition of Gold can't be made directly from Stones.]

[After a thousand years of research, Alchemy touched the Human and transformation they can take as a lifeform.]

[Warning: After studying Alchemy, it will cause some plot character from derivative worlds to be hostile to you.]

[Tip: After grasping Alchemy, some scientific researches would be useful to you from the derivative world, which may influence you.]

Su Xiao didn't pay attention to them, and he directly accepted the Alchemy Knowledge.

Biology, Forging, Mechanism manufacturing, and other bits of knowledge that were involved in Alchemy were present.

Su Xiao didn't feel any interest in Biology, and he was happy with Mechanism Manufacturing.

After a long time, Su Xiao regained consciousness. He was still standing in the booth. He already grasped the knowledge given to him.

He didn't grasp it completely as he only knew a few parts currently, as in the foundation of alchemy. Still, it was the knowledge that didn't exist in his world.

Su Xiao still didn't have a big interest in Biology, but he was interested in the other Alchemy skills, which were very interesting.

Chapter 258: 258

Opening the skill list, he found another list of skills besides the Shadow of the Low skill list.

Su Xiao opened that list and looked at the skills which were as follows:

[Alchemy (complete)]

Alchemy Bomb Manufacturing: Lv.1

1: Primary Force bomb (consuming 20 mana points on each bomb, user need black powder and second rate energy circuit and common metal.)

Alchemy Medicine Manufacturing (Unlocked. Needs Lv.10 to unlock)

Alchemy Bio-manufacturing (Unlocked. Needs Lv.10 to unlock)

The one that follows was also unlocked.

...

He could only see three skills for now, and two of which needed him to be level 10 to be unlocked.

Su Xiao was really interested in Alchemy Bomb and Alchemy Medicine.

Now, he could only use the alchemy bomb, which was very good. At least, now he won't need to buy bombs again, and when he makes more than necessary, he can sell them as well.

Su Xiao started studying this skill, and if he wanted to promote it to another level, he needed 500 Paradise Coins as well as experience in it.

[Alchemy Bomb Manufacturing: Lv.1 (Experience: 0/10)]

[1: Primary Force bomb (consuming 20 mana points on each bomb, user need black powder and second-rate energy circuit and common metal.)]

10 Experience points are needed, Su Xiao's mana was sufficient to make the bomb, but he didn't have the materials beside the black powder and common metal.

Su Xiao's heart sunk, as he didn't know where to look for the materials.

He just attempted to make the bomb, and to his surprise, a hint from the Reincarnation paradise appeared.

[insufficient materials, you can pay 50 Paradise Coins to get the Materials {Yes} {No}]

Su Xiao was happy about this; he directly paid the coins and got the Materials needed.

Suddenly an object appeared in Su Xiao's hand, and it was very small.

[Primary Alchemy force Bomb]

Quality: White

Effect: Consume 1 Mana point to activate, the range is half a Kilometer. After the explosion, the bomb caused 40 damage in three meters radius. It's portable and can stick on objects.

Rating: 3 (White items rating is between 1 and 10.)

Price: 40 Paradise Coins.

...

The bomb in Su Xiao's hand was soft with a length of a thumb.

He was thinking that he can add some flavor to it and give it to the ones he wanted to kill while saying it was chewing gum.

Chuckling, Su Xiao held the bomb in his hand, and suddenly, Bob ran to him and bit it.

Su Xiao's face darkened at Bob.

"That thing is very dangerous, don't come close to it again."

Bob's neck shrunk as he seemed to understand.

Su Xiao knew that it wouldn't kill him, but if Bob does this on a stronger bomb, it would be bad.

Su Xiao listed the bomb on the booth for 100 Paradise Coins, after all, it cost him 50 Paradise Coins to be made.

Unexpectedly, a contractor bought it after only five minutes, without any bargain.

This made Su Xiao pleasantly surprised.

He all together had 573 Mana points, and he can make 28 Bomb as it is.

After a flash of light, quickly, nine other bombs were made and directly placed on the booth.

After this, Su Xiao looked at the skill list again, and to his surprise, the Experience points were 10/10, and he could directly promote the skill.

He didn't need to go to the strengthening hall to upgrade it to Lv.2.

After initiating the upgrade, his head was filled with Alchemy knowledge about the bomb, and suddenly a new ability was added after recovered from the muddleheaded state from the excess knowledge.

[Alchemy Bomb Manufacturing Lv.2 (Experience: 0/20)]

1: Primary Force bomb (consuming 20 mana points on each bomb, user need black powder and second rate energy circuit and common metal.)

2: Intermediate Force bomb (consuming 30 mana points on each bomb, user need black powder and Inferior energy circuit and Ma terry metal and explosive Frog Skin.)

...

Su Xiao attempted to make the intermediate bomb, and the Reincarnation Paradise's hint appeared again, this time the materials needed costs 100 Paradise Coins.

The Mana cost wasn't high, and the price was low, so Su Xiao directly started making the Intermediate Bomb one after another.

When he had only 15 mana left, he stopped as he already made 12 Intermediate bombs.

Looking down, he found out that the 9 Primary bombs were sold, which made it seem like a popular product.

Su Xiao hesitated a bit before leaving behind 5 Intermediate Bombs for himself and adding the rest at a price of 400 Paradise Coins for one.

12 Intermediate bombs cost 1,200 Paradise coins, and the Mana can slowly be restored.

Twelve bombs cost 1,200 Coins, which means selling three can recover all the cost, this business is lucrative, not in the short term but the long one.

400 Paradise coins made the contractors hesitate to buy it.

The intermediate Bomb's explosion radius was 5 meters, and it can cause 90 damage with a rating of 7, if it wasn't as such, he wouldn't sell it with such a price.

"Can these bombs be cheaper?"

A male wearing a whole-body armor stood before the stall and said.

"350 Lowest Price."

Actually, even 200 Paradise Coins are enough, but Su Xiao was probing the Contractor.

"350... This..."

The armored guy was hesitating.

"Did you make them?"

"Right, this type of bomb is small and has good power."

Su Xiao was happy; the bombs he made seemed to be more popular than he imagined.

"I can sell all of them for 2,200 Paradise Coins, and this is the lowest price I can give."

The armored guy laughed foolishly as he agreed. When he was about to leave, he saw the Green Quality ring and spoke.

"Can you also sell this ring for 7,000 Paradise coins?"

"10,000 Paradise Coins and that's not negotiable."

The armored guy shook his head as he wanted to bargain more but, in the end, he sighed and bought the ring for 10,000 Paradise coins.

Now, the only thing remaining was the Ice prince Token.

Su Xiao sat down and waited in his place as he used Bob as a pillow to sleep.

Bob, who was sleeping, didn't even make a sound when Su Xiao did this, and he just continued to lay down there.

This made Su Xiao very satisfied with Bob's loyalty. And he can enjoy the company since he was a lone wanderer in The Reincarnation Paradise. Having a loyal partner is good.

Chapter 259

After several hours of waiting, finally, someone wanted to buy the Ice Prince Token.

The item was very hard to sell, as it seemed like summoners weren't powerful in here.

But finally, a girl with a child-like appearance wanted to buy it, but she only had 26,000 paradise coins and didn't have anymore.

Su Xiao agreed and directly gave it to her.

The girl thanked Su Xiao, but in reality, Su Xiao was the one happy to sell the item. After waking Bob up, Su Xiao prepared to leave, but the look on Bob's face seemed to convey 'Master, I'm quite Hungry, when do we eat'.

Su Xiao now had 72,947 paradise Coins, this sum of money can help him buy a good blue quality Sword.

After strolling in the market searching for blue quality sword type weapons, Su Xiao finally found some.

The sword had a skill named Full moon slash, it was quite good, but the cooldown time was long, and it needed to consume Paradise Coins to be used.

Finally, Su Xiao directly contacted the black chamber of commerce. And luckily these guys are fearful of the phantom troupe which he can use this to his advantage.

They decided on the place where they were meeting, and when Su Xiao got there, a guy with a black hood appeared.

"Guest, we meet again."

This was the same guy that Su Xiao did business with the last time.

"This time, you want to purchase a blue quality sword, a top-grade one at that, we actually have three that meets your request."

The guy didn't inquire what Su Xiao wanted to do with the sword as it was his personal privacy.

"Three? Let me look."

Su Xiao was somewhat startled of the resource the black chamber of commerce held. They actually have three top-quality blue swords.

"Wait a bit, and I wanted to ask about the matter from before..."

The Guy asked about the Phantom Troupe.

Although Su Xiao killed Carl, he didn't want to announce this for all to know, he knows that the Phantom Troupe were a loose group, but he didn't know if Carl had any friend there or not.

“I was considering, and they sent me an invitation.”

The Black Chamber of Commerce has the ability to confirm anything.

The black market guy urgently said: “Did you accept?”

“I was considering, if I join, I will decide on your matter according to the situation.”

“Good, here, these are the three weapons, you may choose.”

The guy was obviously disappointed, but he didn't say anything else, as he knew the power of that group.

Three different models of long swords were placed in front of Su Xiao with different supplementary attributes.

Seeing the attributes, Su Xiao decided to buy this one.

[Solomon Beheading Blade]

Origin: Sword art Online

Quality: Blue color

Category: Weapon

durability: 61 / 61

Attack Power: 11 ~ 29

Equipment requirements: Strength 18, Agility 13.

Equipment effect: Beheads (Active): Wields a full blade power when the slash strikes the enemy nape of the neck position, and it attaches an extra injury.

Additional Attributes: Fights a bloody battle (passive): When HP is lower than 50% stamina values + 3, when HP is lower than 30% stamina + 5, when HP is lower than 20% stamina + 10. (This effect is unable to superimpose; effect continues for 5 minutes.)

Rating: 70(note: Blue Equipment rating is between 31 and 70, when the rating is 70, the Blue Equipment gain a special attribute.)

Synopsis: Takes the aggressive weapon and sever heads.

Price: 15,600 Paradise coins.

...

This blade's attributes were normal, but the additional effect was good.

It was good for him since he was working alone and he needed the Stamina, or vitality to be able to fight more.

He also needed to get his main attributes to 30 to get the new skill from the Shadow of the Low.

The stamina skill solves the problem greatly, and he won't be as much in danger as before now.

Su Xiao felt that if he focused only on the three main attributes, then his body won't get stronger and he will be destroyed in the end.

Now, his Vitality was as low as before, and with the new skill, he will be able to preserve more than before.

In the next derivative world, Su Xiao was thinking of putting some points in stamina.

Taking the sword, Su Xiao looked at the guy from the black chamber of commerce and asked.

“Price?”

“This blade is 70,000 Paradise coins.”

Su Xiao's brows wrinkled at a price, and it seemed to guess that Su Xiao won't be joining the Phantom Troupe.

“50,000 Paradise Coins.”

The negotiation starts now.

“Guest, these weapons attributes are obviously...”

“This is a weapon that no one would buy.”

“What?”

The guy stared at Su Xiao and secretly thought that this is troublesome.

“I'm a close combat fighter, therefore I understand what a close-ranged weapon needed to be, what is most important is sharpness, and this sword is obviously not sharp, and it lacks attack power that even some Green Weapon is better than it. It's suitable for a tank, but a tank's sword is single-handed as he uses a shield, but with this sword, he won't live much without his shield.”

Su Xiao happily looked at the businessman.

The businessman was thoughtful before he said: “60,000 Paradise coins.”

“That's it then.”

Su Xiao turned around to leave, he needed the sword, but it won't add much to Dragon Flash, it's attributes aren't good, and it isn't sharp, other than the stamina skill, it has nothing, and the price is too high.

“Wait wait, Guest, how about we discuss this, how about 55,000 Paradise Coins, this is my bottom line.”

Su Xiao stopped and looked at him and said.

“50,000 Paradise Coins and that all I will give, otherwise, you can keep it with you.”

The guy didn't speak as he was thinking.

“If you don't sell, then I'm out of here.”

Su Xiao turned around again and stepped away.

“This sword, you can have it for 50,000 Paradise Coins.”

The Black chamber of commerce member was desperate, and he probably gained about 1,000 Paradise coins like this.

He took this sword when he just started with the black chamber of commerce and wasn't experienced then. He took a loss when he obtained it, as it's price shouldn't be above 20,000 Paradise Coins for a member to take it.

Finally, the transaction went smoothly as Su Xiao paid 50,000 Paradise Coins and obtained Solomon's blade.

This sword's ability was insurance in the derivate world.

Returning to his exclusive room, he made Dragon Flash consumes Solomon beheading blade.

After the metallic light receded, few blue light crystals merged with Dragon flash.

Dragon flash exuded a very dark blue light.

It took Dragon Flash a long time actually to absorb the crystals unlike usually.

Su Xiao was observing the changes with total concentration.

The Blue light around Dragon Flash dimmed slightly as it started to change to Purple. Dragon Flash was transforming from a blue to a purple weapon.

Chapter 260

After dozens of minutes, Dragon Flash's transformation ended.

Glowing with a purple light, Dragon Flash seemed stronger than ever before.

Su Xiao gripped it in his hand, and a familiar feeling ran through his body, making him satisfied.

Dragon Flash +5 (Cutting Edge: 0%)

Origin: Shadow of the Law.

Quality: Purple

Durability: 75/75 (+5)

Attack Power: 43 ~ 84 (+10 ~ 15)

Equipment Requirement: Shadow of The Law Inheritor.

Supreme Cutting-Edge effect 1: Sharpness +7 (+3)

Supreme cutting edge effect 2: Fights a bloody battle(passive): When HP is lower than 50% stamina values + 4(needs to be + 6 to increase 1 point), when HP is lower than 30% stamina +

6(Needs to + 6 to increase 1 point), when HP is lower than 20% stamina + 12(Needs to be + 6 to increase 2 points),(stamina addition effect can't be superimposed, effect lasts for 5 minutes.)

+5 attached effect: Ignore Defenses

Introduction: Loses, meets, war, newborn, growth, regain consciousness.

Price: Can't be sold.

...

Dragon Flashes abilities grew explosively after the upgrade, and it was the difference between a Blue and a Purple Quality weapon.

Su Xiao took a hair and tried splitting it in half which was successfully done if the sword was to hit a head...

Su Xiao was satisfied with the sharpness of the now purple Quality Dragon Flash.

Su Xiao looked at his remaining Paradise coins and found 22,947 Coins.

It won't be easy to upgrade Dragon Flash anymore. The price would rise by a very high degree.

Su Xiao's face darkened at the thought of how much it would take him to increase the Quality of his sword.

He set that aside as he wanted to upgrade some of his skills first; for example, he wanted to promote Qing Gang Yin.

Sighing, Su Xiao consumed three soul Crystals + 3,000 Paradise coins to rise Qing Gang Yin by three levels.

[Qing Gang Yin has reached lv.5.]

[Qing Gang Yin has reached lv.6.]

[Qing Gang Yin has reached lv.7.]

After reaching level 5, no additional effect was added to the skill, which meant that the Qing Gang Yin's limit wasn't level 10.

Within his body, the energy of Qing Gang Yin increased, and the small stream was now more like a small river.

Qing Gang Yin Lv.7 (Active Skill)

Conditions of Use: After activating (Qing Gang Yin), Hunter consumes 4 Mana every minute, after the Mana value is lower than 1%, the skill would automatically deactivate

Skill Effects: After Activating (Qing Gang Yin), each successful attack will eliminate 28 Mana from attack and creates the same level of True Damage, the enemy will feel the pain of his Mana burning.

...

The Mana consumption increased by 1 every minute, but the effect of Qing Gang Yin got even more powerful, and the mana and true damage were close to 30 points for every attack.

If someone had for example 100 Mana with the help of equipment, Su Xiao would only need three hits for his enemy not to be able to use any skill anymore in the fight.

After upgrading Qing Gang Yin, Su Xiao took out the Lucky flame, which wanted to upgrade it so badly now.

Lucky Flame for him was better than purple Equipment, and opening Treasure chest depends on it. [Child of Destiny's care] appeared in Su Xiao's hand, this equipment can upgrade a White or Green Equipment to the next level.

Su Xiao directly inquired in the Reincarnation Paradise about the +7 Effect, and the answer was the +7 wouldn't disappear.

He finally put [Lucky Flame] with [Child of Destiny's care] and directly the hint from the Reincarnation Paradise appeared.

[Use [Child of Destiny's care] on [Lucky Flame] {Yes} {No}]

Confirming that he wanted to use it, Su Xiao concentrated on the Lucky flame.

“Woof!”

The sound made Su Xiao jump away. Bob really didn't know when to make his appearance.

Su Xiao looked at the side and saw dumbbell filled with holes on the side.

“What, you want another Dumbbell?”

Bob's ears moved as he woofed at Su Xiao tearfully.

“Were you hungry?”

“Woof.”

“Endure it, when I finish here, I will take you to eat your fill.”

Bob was still tearful.

“...”

The two of them actually learned how to communicate.

Su Xiao smiled at him, which made Bob directly turn around and continue biting the Dumbbell...

Su Xiao's gaze returned on the Lucky Flames, which now was changing gradually. It looked like it would take some time to finish.

Taking advantage of that time, Su Xiao took out the [Bull head collar (Purple)].

It was an armguard that wrapped the entire arm similar to a knight's.

However, it was obviously more precise than that of an armguard of a knight. Su Xiao directly equipped it and it directly wrapped around his arm directly.

The armguard was scarlet red, and even though it wrapped around his hand, he felt as if his hand was still free.

His arms were the normal size as if he didn't wear it at all, and it was perfect arm guard for speed.

The armguard was actually good as it provided good protection as well as speed.

The Armguard had some cracks in it the needs a master forger to repair, which is why Su Xiao wanted to head toward one.

Su Xiao didn't wait for the Lucky flame to finish its evolution as he directly left the exclusive room he had and directly went to the store as Bob followed him thinking they were going to eat.

Su Xiao spends half an hour to locate the store. The store had an undistinguished appearance, as a wooden plate hangs in the air, written on it.

"If you don't have 5,000 Paradise Coins, then you poor fellow don't need to enter."

Su Xiao was speechless, but he still entered the store only to meet an eccentric character.

"Today we don't do business... You can still appreciate me."

An old-man holding a hammer walked, his upper body was muscular. This old man wasn't tall, and his skin was red, which meant that he was working at a high temperature for some time.

The old-man was bald, not only that, he didn't have eyebrows, his entire head was hairless.

"So, you're not working today."

Su Xiao said with his sword in his waist.

"Let me appreciate that sword, and that may change."

The bald man stared at Dragon Flash as he spoke.

"The sword can't be given, this thing in the other hand..."

Su Xiao took off the Bull Head collar and gave it to the old man.

"Purple Grade Armguard, base attributes are good as well!"

The bald old man examined the armguard and was satisfied with what he saw.

"This armguard is perfect, and I can't upgrade it again."

"I don't need you to upgrade it, there is a crack on it, and I want it repaired."

The bald man understood this and nodded.

"Where?"

"Under the wrist, just above the sleeve."

"This isn't difficult, but the materials are somewhat expensive, the cost altogether is 8,000 Paradise Coins, no bargain."

"Ok, let's sign a contract."

Su Xiao drew a contract from the Reincarnation paradise with the general content stating: If the Bull head Collar was to break after it was repaired, the bald old man would need to compensate him with the market price.

The Old man signed the contract as he didn't find any loophole. He was very confident in his craftsmanship.

“Come take it the day after tomorrow.

The old man walked into his workshop with enthusiasm.

Su Xiao turned to leave toward the dining hall, and Bob was so hungry he was rolling his eyes.

Sitting there, he gave his order and waited patiently.

The lucky flame would be upgraded in about one hour, and Su Xiao was hopeful about the result.
