

R. Paradise 26

Chapter 26

Leaving the beverage shop, Su Xiao thoughtfully walked on the streets of the reincarnation paradise.

According to the information provided by Xi lo lo, his first priority was to go back to the center of the reincarnation paradise and learned about the dozen important buildings.

First being familiar with the reincarnation paradise, then increasing his fighting power, after that was to consume the coins he got.

Now he had a total of 8,400 paradise coins in his hands. It was not only these initially, but he spent more than 3,000 paradise coins to recover from his pain, and he paid 50 paradise coins to Xi Lo Lo. Now he had only these.

After preliminary exploration, Su Xiao had learned the value of the paradise coins.

After the ordinary contractor has experienced the first derivative world, contractors will generally receive 1,000 to 2,000 paradise coins which only can buy one weapon.

But the world he experienced was very dangerous, so the number of paradise coins won was much more, it was more than 10,000.

Walking on the streets of the reincarnation paradise, looking at the contractors who look different, Su Xiao suddenly liked it here.

The reincarnation paradise was like an original forest. The cruelty of it was to tear apart all the false masks and show their true appearance.

Although it was cruel here, it was much simpler.

If someone wants to fight, they can just decide life and death by battle. The arena in the reincarnation paradise was prepared for these people.

After wandering for an hour or so, Su Xiao came to the center area.

Because he did not cover up his appearance, there were many people on this road looked at Su Xiao, but there were no one dumb enough to come and provoke him.

There were several possibilities for not covering the face, perhaps a newcomer, or a very strong monster which did not care to cover up his face.

What Su Xiao didn't know was that people looking had thought of two things, either he was newcomers or super monsters.

The inheritance of the shadow of the law improved his attributes by 14 points.

The acquisition of attribute points was not easy. Ordinary contractors needed to experience 4 to 6 worlds to barely get 14 points of attributes. This was still an unfortunate situation.

Arriving in the central area of the reincarnation paradise, more than a dozen magnificent buildings come into Su Xiao's view.

Unlike the shops of those workers, these dozens of buildings were much taller and had a feeling of standing out.

[Attributes Enhancing Hall], [Equipment Enhancing Hall], [Trial Field], [Arena].

Su Xiao could only see these four buildings clearly, and other buildings were covered by the fog, it should be that he didn't have the permission to see them.

Su Xiao went directly into the [Attributes Enhancing Hall]. Just entering the gate, Su Xiao felt dizzy. When he regained consciousness, he had appeared in a steel cube of several meters.

“Kada, kada.”

There was a mechanical sound, and a screen appeared in front of Su Xiao.

[Welcome to the Attributes Enhancing hall, please pay the fees which are 100 paradise coins.]

In this case, he had already known that everyone would be transferred to a different hall, and then they would need to pay for using the Attribute Enhancing hall.

After paying 100 coins, a notification appeared in front of him.

Strength: 12-1 (equipment bonus is temporarily invalid)

Agility: 10

Vitality: 6

Intelligence: 12

Charm: 3

[Hunter can assign points by themselves, there are 4 points available.]

[Ding, the hunter, has an affinity toward these three attributes, Strength, Agility, and Intelligence.]

Su Xiao was not surprised by the tips given by the reincarnation paradise.

After inheriting the shadow of the law, he received a hint that there will be additional changes when his three affinity attributes reach twenty points.

Each contractor will choose the affinity attribute, but they generally chose it by himself. For example, the contractor with close attack genre will select strength or Agility, while the sorcerer will select intelligence, and so on.

Su Xiao's situation was a bit special.

After inheriting the shadow of the law, his affinity attributes had solidified.

And something even problematic was that his affinity attribute had a characteristic, that was, the difference between the three attributes could not exceed three points. Otherwise, the high attribute will not be increased in the attribute strengthen hall.

This undoubtedly limited Su Xiao's rapid growth. If he only can strengthen one attribute, that attribute will soon reach 20 points.

But it was not without benefits. The development of various attributes at the same time, as long as he can keep up with the pace of the same-level contractors, he will definitely be in the top.

Su Xiao now had 4 attribute points. Considering for a moment, Su Xiao assigned 1 point attribute to the strength, and the rest of 3 points all allocate Agility so that his attributes became balanced.

[strengthening started, because of the great pain came due to the strengthening, you can choose to use anesthesia, this option is free.]

“Do not use.”

Su Xiao replied decisively, Xi lo lo had inadvertently mentioned it before. During strengthening the attributes, it was better not to choose the anesthesia function, which will affect the strengthening effect.

However, most contractors will choose anesthesia because the feeling of strengthening the attributes was similar to death.

If he wants to be stronger than others, he must endure more than others.

The enhancing started, and a deep pain in his bone was felt.

“Will other people choose the function anesthesia?”

Su Xiao’s body skin began to turn red, cold sweat appeared on the forehead, and the feeling of strengthening the attributes was quite ‘exciting’.

....

Ten minutes later, Su Xiao, whose body was soaked in sweat, walked out of the attributes strengthen hall.

Although it was excruciating when strengthening the attributes, as long as he survived the initial pain, the feeling of getting stronger was also very good.

Su Xiao did not know what did other people feel, but he liked it.

Only the strength gained after suffering was the most reliable power. The so-called anesthesia function, he will not choose it. Not today and not in the future.

In fact, Xi lo lo just mentioned it casually. Except for a tiny number of “pervert”, most contractors will choose anesthesia.

After strengthening the attributes, Su Xiao’s attributes without weapons became 12 points in strength, 13 points in Agility, 12 points in intelligence.

If he counts the bonus of the [dead wife’s necklace], Su Xiao’s strength will reach 13 points, which is the same as Agility.

Although Su Xiao was a lot stronger now, he was still not satisfied.

The attributes that suddenly grew, he couldn’t adapt to them currently, and now even walking was a bit awkward.

His consciousness did not adapt to the current powerful body, it required a lot of training, without any shortcuts.

But this was not a problem. The [trial field] in the reincarnation paradise was his best choice now.

Looking at the [test field] in front of him, Su Xiao shook his head.

After he left the other world, he had not rested. While in the other world, he couldn't rest as he needed to complete his mission.

Activating the brand on his arm, Su Xiao disappeared in the place and appeared in the exclusive room. This is the welfare provided by the reincarnation paradise. As long as he is in the reincarnation paradise, he can return to the private room at any time.

The comfortable temperature in the exclusive room made Su Xiao sleepy, lying on the somewhat soft ground. After five minutes, he was already in a deep sleep.

The long-term tension in the other world made him unable to hold on anymore.
