

R. Paradise 281

Chapter 281

The contractors were quickly in place, and this time only one direction required defense, and several leaders were obviously relieved.

After Adam and the god king's leader and others observed the terrain of the cave, the three gathered together to open a strategy meeting.

"I have sent people to the nearby places to inspect, and there are no parasitic animals nearby."

The golden armor of the God-king leader was full of cracks, and it seems that the people who deal with the war behemoth paid the price.

"How are these world coordinates set up? Where is the specific location?"

Flash silver didn't care if there were parasitic animals coming in, but looking for it in the cave.

The world coordinates have been deepened to the bottom of a dozen meters, and the contractor can not find, if they dare to dig out the world coordinates, Su Xiao will not sit idly by.

The strategy after the discussion of several heads is mainly to guess the situation of the third world coordinates.

The position of the second world coordinate is really good. As long as the hole is defended, the Kara natives won't be able to attack, and the difficulty between defending from four directions and from one direction is too far apart.

Su Xiao observed the actions of the contractor through the screen, and he was waiting for the parasite to attack.

As long as the parasitic animal hits, his second coordinate work is basically over. At that time, the contractor has no possibility of fleeing.

Moreover, the war has reached this level, and some contractors were eliminated, and the rest are smart people.

The contractor has already suffered one-fifth of the death and injury, and some of the surviving contractors have been seriously injured. The worst one is only the upper body surviving, and the wounds are uneven. It seems they have been wounded by the war behemoth.

Su Xiao waited for about half an hour on the mountain peak. There was a roar in the distance.

The parasitic beast that came in this time is different from the previous one. The surface of the body is dark, and the skin is rough. It has no human appearance.

Looking at the properties of these parasitic beasts, Su Xiao knows that this is a parasitic beast type three, their overall strength is above the second type.

Just as Su Xiao was about to leave, he suddenly found out that there was a vaguely mutated beast among the parasitic beasts that rushed.

Take a closer look. The number of mutant beasts is quite large and hidden in the parasitic beast.

The Kara natives found that the parasites could not beat the contractors, and for so long, the human alliance did not move, so their courage was a little bigger.

“A combination of parasitic beasts and mutant beasts, ask for more happiness.”

Su Xiao is only responsible for setting the coordinates and defending it from intervening.

In the terrain of the cave, the contractors won't be able to escape. He decided to go directly to the set point of the third world coordinate to see the situation.

It indicates that Bubby is going around the cave, and Su Xiao is heading for the edge of the Asian continent.

According to the previous pattern of the Asian continent, the position below is China. There are some small countries around China, and those small countries no longer exist in the early days of the war.

The position on the Asian continent is Russia. Today, Su Xiao is located at the junction of Russia and China.

The location he wants to rush to is in Russia, at the corner of the coast.

At this time, there is no country, and only the human alliance is left. But even if it forms an alliance, as the host of the Asian continent, the two largest countries have become the biggest forces in the human alliance.

.....

Bubby ran wildly on the scorched earth. His endurance was good as he was running for two hours straight and wasn't breathing hard.

As it gradually deepens above the Asian continent, the temperature gradually decreases, the sun started to set.

Su Xiao only wore a single coat, did not feel the cold, and improved the physical strength, his ability to resist cold was significantly improved.

Exhaling white steam, Su Xiao looked at the location on the map. There are two hours away.

The first two coordinates are very close, but the third coordinate is very far.

“You can't build it together, and you have to divide it three times.”

Tightening the single coat, Su Xiao confirmed the position and then indicated that Bubby to hurry.

The sun was drifting down the snow, the wind is blowing, the ground is covered with thick snow, and every step he takes makes a squeaky and creaking sound.

The sun is a little dim, and the surrounding world has become a world of ice and snow, and the white snowfield makes anyone looking slightly dizzy.

“Bubby, stop.”

Su Xiao looked at the map. After confirming the position, he felt unbelievable.

“Ocean? Does the third coordinate need to be set up on the ocean? And... has come to the ocean...”

Su Xiao looked at the frozen soil at his feet, which was originally the Russian offshore area.

I don't know how many years of snow have been continuously here that the ocean was frozen.

Or the ocean freezing is somewhat inaccurate. There are very complicated conditions for the formation of ice on the ocean. The seawater contains inorganic salts, which makes the freezing point below 0 °C. The surface of the seawater is cooled, the density of the cold water is large, and the lower layer is warmer than the warm seawater, which causes the ocean not to thaw easily.

Of course, this does not mean that the ocean will not freeze. The North and South Poles are the best example and require a special climate.

The sea surface at the foot of Su Xiao is somewhat similar to the situation in the north and south poles. The temperature of the original site in Russia is much lower than the original. If ordinary people live here, they will freeze to death.

Bubtny ran wildly on the ice for more than an hour. Su Xiao had left the offshore area, and he suspected that the ice had spread to North America.

The environment of the earth has become abnormal, and the arrival of the Kara natives has made the earth full of lupus.

The Kara natives are completely parasitic on the planet. When the Kara creates the atmosphere and air suitable for their lives, the existence time of the earth started a count down.

The planet is not a home for Kara natives, but a consumable, and the destruction of Kara star is the best example.

The destruction of Kara Star happened, but the Kara people did not become extinct, this is the best explanation.

This kind of void race uses the planet as a consumable. When a planet breaks down, they wander in space, look for the next planet to live in, then invade. After the success, rename the new planet to Kara. The planet is used as a consumable, and the cycle is repeated.

This kind of race may be very popular, but it will be ruined.

The reason is very simple. The development speed is not balanced. After the occupation of the planet, they can develop rapidly. After the destruction of the planet, the development of the Kara natives who wandered in space began to slow down, so they chose a special development method.

Su Xiao no longer thinks about the behavior of the Kara Natives. He only wants to know to what extent the Kara Star people are now developing.

It is foreseeable that the Kara Natives are by no means on the side of the firepower technology, so there will be no weapons like the Star Gun.

According to Su Xiao's speculation, the Kara Native's technology tree is based on biotechnology, and some are similar to Zerg from StarCraft.

From the parasites and war behemoths and other creatures can see the development direction of the Kara Natives.

The Kara native's Spaceship should not be the kind of steel behemoth. It may be a huge creature. The combination of steel and biology is most likely.

Chapter 282

Thinking of this, Su Xiao secretly whistled. It seems that the 'advanced technology' marked on the world introduction refers to advanced biotechnology.

Kara Native was wandering in space for so many years. If there is no material at all in the development of thermal weapons technology, biotechnology is different, and living organisms can be studied.

When Su Xiao and the enemy arbitrators fought, the other party was one of the Kara Native. If the Kara Natives were developing hot weapon technology, the costumes of the enemy arbiters might be similar to the iron blood warriors, but he wouldn't solely fighting mentally.

The Human Alliance used the nuclear bomb to fight the Kara Star people. If the Kara Star people's hot weapons are really advanced, intercepting a nuclear bomb is completely trivial.

This made Su Xiao feel relieved. He was not afraid of aliens on the biological side. He was afraid of the situation of a large number of hot weapons. The mass destruction of hot weapons was somewhat unpredictable in the early stage, and it was not so strong in the later period. In the highly derivative world, many strong people can ignore nuclear bombs.

For example, a certain baldy.

Thinking about Su Xiao came to the establishment of the third world coordinate, looking around, his face is a bit ugly.

Things are not good; there is no cover on the ice sheet, and here is the edge of the Asian continent, Kara Native can do their best here.

If you let hundreds of contractors guard this place, Su Xiao shook his head, those guys besieged a powerful creature, or defended as a few parasites, if you are fighting with the Kara natives directly...

If the contractors can defend this place for an hour, and Su Xiao writes his name backward.

“This place is... not for the contractor, but for the arbiter!”

Su Xiao stepped on the snow under his feet, and the snow splashed.

He must find a way to do it according to the normal task process, and Su Xiao does not believe that the reincarnation Paradise will make him set the coordinates in a place that cannot be guarded.

Is it because the Human Alliance wants to help guard this place?

It is also impossible. In the absence of interest, the Human Alliance will not fight against the Kara natives on the ice sheet for no reason, and the war between the two sides will just end, and the Human Alliance will need to recuperate.

If this is the central location of the Asian continent, it is still possible, but here is just an ice sheet, and the ice is full of seawater.

“seawater……”

Su Xiao looked down at his feet, and his face was even more ugly. He thought of a possibility.

“If the reward is not rich enough, then the arbitrator will not be the arbitrator, Bubu, dig down.”

Su Xiao produced a somewhat crazy plan, and perhaps the reincarnation Paradise meant for this happen.

After asking about the maximum range of movement of the third coordinate, Su Xiao was more convinced.

The third coordinate can be arranged within forty kilometers around!

Upon receiving Su Xiao’s instructions, Bobtney’s moved, and his two front paws extended their sharp claws and began to dig in the snow.

The snow is very thick, and the thicker it is, the harder it is to dig. After shaving it for more than ten meters, Bubtney it wasn’t alright, he softly spread his legs in the snow pit, and his two front paws are all bleeding.

Su Xiao jumped into the snow pit, stepped on the foot, and then went down to the ice, and Bobtney could not dig a hole too deep in the ice.

Su Xiao took out dragon flash, and inserted it into the ice layer, cut a circle of one meter wide in the ice layer, and cut across in the center of the circular ice layer. He stepped on the ice layer.

A slap of ice splattered, and under the power of Su Xiao at 29 o’clock, the ice layer was easily kicked down.

Half an hour later, Su Xiao was sitting in a vertical downward ice cave, which had been dug dozens of meters deep. He was making holes in the ice.

With dragon Flash to break the ice, the broken ice will be saved into the Inventory. His savings space is nine cubic meters. When the savings space is full, he will use the thread to leave the ice hole and throw the broken ice from the inventory.

An hour later, Su Xiao was sitting in the ice cave full of sweat. He was shirtless, and his body was steaming. He had dug down about two hundred meters.

Although this sounds a bit ridiculous, Su Xiao has succeeded in doing this with his strong physical fitness and the cooperation of various tools.

The most important thing is that Dragon Flash is sharp enough to cut the ice layer like tofu.

With a cigarette ignited, Su Xiao leaned in the ice cave and looked at the screen floating on the side.

The scene in the screen was bloody, the contractors are desperately guarding the hole, the sprawling beast outside the hole, and occasionally see a small war behemoth.

There are more than 100 people left from the contractors, and half of the contractors have died. The war world is too cruel.

From the somewhat numb faces of the contractors, they are on the verge of collapse.

At this time, the face of the god king's leader was blue, and his eyes are full of blood.

Adam was lying in the cave, missing one arm and one leg.

There was no usual laughter on the face of Silver Flash. The clothes on her whole body were ragged, and there was blood leaking from time to time.

The Golden Ghost is even worse. There is only one-third of his body left, and he can only survive with a living device.

Seeing the state of the contractors, Su Xiao's face is expressionless. If it is not the cave terrain he chose, the contractors may have died.

The reincarnation Paradise calculated according to the contractor's ability to exert the strongest ability, and more than 30% of the contractors have not done their best. They intend to use the cards to save their lives. After everyone thinks so, the number of deaths and injuries has skyrocketed.

Without paying attention to the state of the contractors, Su Xiao continued to dig down the ice.

A few hours later, Su Xiao had no idea how deep it could be dug down. Every time he transports ice up, it takes even a few minutes.

Oh~.

Su Xiao's brows wrinkled, the feeling of this thrust of the sword was different from the past, and he continues to cut. He cut a circle in the ice.

The circle was cut to about four-fifths, and a slamming sound came from it. Su Xiao's foothold disappeared as he fell.

With a bang, Su Xiao fell into the icy water.

"finally reached."

Su Xiao took out a small oxygen tube hanging around his waist. This is a must-have item for all contractors. He took a deep breath of oxygen. Such a deep ice hole, oxygen is very thin, not to mention his high-intensity exercise, which consumes more oxygen.

Su Xiao's head is wearing a miner's lamp, and he is equipped with some at the top of the ice cave. The end of his eyes is dark. If he is suffering from claustrophobia, he will definitely collapse.

The ice cave was too small. Su Xiao had put Bobtney back.

"Twelve hours, success, or failure."

Taking out a detonator, Su Xiao contained a plastic tube in a small oxygen tank, took a deep breath of oxygen, and the plastic tube was stained with seawater, which was salty and bitter.

Pressing the detonator in hand, the roar of the ice cave rang, and the explosion continued to approach downward.

Su Xiao will collapse the only way out, trapped in the sea under the ice. If he is unsuccessful, he will become a savior person. He will arrange the world coordinates under the ice to see how the Kara natives look for it.

Since the contractors have can't defend, Su Xiao will find his own way. He will not hold his destiny in the hands of others.

In the giant world, he can drag on dozens, and now he has to drop a few hundred in the world of war.

The arbiter could not directly participate in the war, and Su Xiao placed the coordinates in a position where Kara Natives wouldn't be able to reach.

Chapter 283: Cruel

A large amount of ice fell from above. When Su Xiao dug the ice cave, he intentionally turned two right-angle bends to prevent the crushed ice from falling directly into the sea. The broken ice below was pressed into the sea by the weight of the ice above.

The sound of the explosion above and the collapse of the broken ice quickly stopped, and no broken ice fell on Su Xiao, which shows that his arrangement was successful.

after a few mouthfuls of oxygen, Su Xiao's body went down, and his whole body was soaked in the sea.

Just sneaked into the sea, and there was water pressure around him. He didn't know how deep he could dive. The icy water was eroding the heat in his body.

Dive, keep diving, Su Xiao helped a lot of irons in order to speed up the dive.

Barbecue, white quality weapons, a fist-sized hammer, etc., in the end, Su Xiao did not take the initiative to dive. The weight of his body let him fall automatically.

He has brought in more than twenty bottles of compressed oxygen. One bottle can last for about one and a half hours. This thing is sold in a special booth in the reincarnation paradise. Most contractors will buy some for the occasional needs.

Oxygen does not feel good after absorption and compression, but there is no other choice now.

Su Xiao is more willing to take risks than staying in the world of 'parasitic beasts' forever.

He can't resist the rejection of the world. Once they are defeated, he may not survive in the parasitic world for more than ten days.

The upper ice layer and the snow block the sunlight, the seawater is dark.

It is not easy to break into the ice. It is harder to go out. It is not going to start the work, or Su Xiao will die in the sea, or the mission will fail, but he has no other choice.

Su Xiao looked at the contractor's situation through the screen. More than one hundred contractors are standing or sitting in the cave, everyone was injured, and most of the contractors had physical disabilities.

Su Xiao saw Adam sitting down in the cave, lying in front of a corpse, the body name is Lie, the deputy head of the Brotherhood.

What makes Su Xiao most concerned is the few people who communicate with God king's leader. These people look like contractors, wearing protective clothing, and dealing with the contractor.

“We will soon send reinforcements, the medical forces have been dispatched, and the Human Alliance will not give up any human beings.”

Several people in the Human Alliance have a very good attitude, but when the God king's leader mentioned a possible conflict with the Kara Star, the Human Alliance's answer begins to change.

‘We will handle this matter properly, and you can rest assured. ‘

Did not answer whether it was an aid, nor did it explicitly refuse. This is a wait-and-see attitude. For unconventional contractors, the Human Alliance has adopted a cautious attitude.

Salvation may be, participation in the war is still pending.

Su Xiao slowly sinks in the sea and takes out the third world coordinates. He hesitated for a second and chose to activate.

The fluctuations of space are coming around, the world coordinates are gradually being formed, and Su Xiao is sinking slowly and sinking into the unknown deep sea.

.....

The contractors in the cave immediately received a reminder of the reincarnation Paradise, ordering them to stand near the coordinates of the second world.

Two world coordinates have been formed, and the reincarnation Paradise has been able to interfere with the parasitic world to a certain extent.

The contractors who are already remnants are surrounded by the coordinates of the second world. They have a flower in their eyes. They are already on an ice sheet, and the position is directly above Su Xiao.

The whistling wind blew through.

“It's so cold~.”

A bare-chested contractor shuddered and quickly took out his winter coat in the savings space.

“How is this happening.”

Several representatives of the Human Alliance were paralyzed. They were still in the cave, and they appeared on a piece of ice in the blink of an eye.

Representatives of several human alliances immediately became alert and began to contact the headquarters of the Human Alliance. The attitude was not as friendly as before.

The god-king is angry at this moment, where is he? What is he going to do? Where is the world coordinates?

Not only the God-king but also the silver Flash and Adam are all angry.

“If the world coordinates are set here, then we are dead.”

Adam’s voice was hoarse, and he was being helped by his men. Broken legs and broken arms make him a disabled person and only return to the reincarnation to recover.

The task that the reincarnation Paradise issues to the contractor are to guard the world coordinates.

While the world coordinates are moving, the contractor will receive a notification of the change of the world coordinate position every ten minutes.

This makes many contractors very upset; the task is not only dangerous but also has no clue.

Several people in the Human Alliance contacted the headquarters, and the look of several people began to be unnatural. They have realized that they are on the edge of the Asian continent and may be attacked by the Kara Natives at any time.

“You rebel, we suggest evacuating first. Through the image of the satellite, the large forces of the Kara Natives have arrived. It is expected that they will arrive on this ice sheet in a few hours. You are seeking your own deaths.”

The voice was raised, and representatives of several human alliances turned and left.

“These guys... It seems that our people’s negotiations in the Human Alliance are not going well.”

The God-king leader sighed, and his tone is full of helplessness. He has never experienced this kind of derivative world, only received a mission, and then there are always enemies.

Su Xiao is different. He has long thought of this. He knows more than the God-King. He had expected that he might not stay in the parasitic world for five days.

Actually, this is the case. Su Xiao’s stay in the parasitic world is 36 hours.

When the first coordinate is successfully defended, he will immediately place the second one.

The reason for this is to not react to the Kara Natives.

Five days to get rid of 36 hours, that is, four and a half days, what forces can be developed in four and a half days? The Kara Natives have landed on the earth for twenty years, and there is no comparability between four and a half years and twenty years.

Su Xiao simply chose not to develop strength, and directly hit Kara Natives by surprise.

Judging from the situation of the first two coordinates, Su Xiao’s choice is correct, and the Kara Natives have no time to send large units.

However, with the buffering of the first two world coordinates, the Kara Natives have already reacted.

The third world coordinate is their last chance. If the third world coordinates are set up, they can only be freed in space. The timeline is reset over and over again, and life and death are in their hands of the reincarnation Paradise.

It is conceivable that the Kara Natives will destroy the third world coordinates with a crazy offensive, and they are mobilizing large units at this time. The target is an ice field between two continents with an estimated arrival time of five hours.

In these five hours, the contractor can't be idle. They don't know when there are many parasites on the ice sheet.

The number of these parasitic beasts is small and continuous, and the Kara Natives have no intention to command these parasitic beasts and simply release these parasitic beasts.

On the ice sheet.

Many contractors smothered with parasites, and the contractors fled while fighting. They did not have a fixed guard point.

Silver Flash is screaming at the golden ghost on the ice, and the golden ghost's body is only one-third left. If there is no living device, he is already dead.

“Where to?”

The golden ghost is drowsy, even with this kind of injury, he is still conscious, showing how strong the golden ghost is.

“I want to... escape the battlefield!”

Flash Silver rushed to the edge of the battlefield, ignoring the warnings of the reincarnation Paradise. She had not seen the Arbiter for a long time, at least 16 hours.

Chapter 284

In the dark sea, a fat fish that is more than ten meters long swam. This fatty fish is a kind of mutated fish. What kind of species has been identified, but it is a bit ugly.

The fat fish is struggling in the sea, seems to be suffering, and there is blood in its mouth.

In the throat of the fat fish, Su Xiao climbed out. He was swallowed into the belly by a small fish and was almost digested.

The cause of all this was the miner's lamp on Su Xiao's head. The light attracted the attention of the fish and swallowed Su Xiao.

In his hands, Su Xiao held Dragon Flash. Su Xiao held the handle of the dragon flash and climbed outwards. The smooth and cold touch around him was disgusting.

Su Xiao wants to kill this fish as soon as possible. Once the fish swims for dozens of kilometers, the layout of the world coordinates will be interrupted, and the 12-hour deployment time will be reset. Then his last three hours here will be in vain.

Spending three hours in the dark sea is very tiring.

Su Xiao stood in the throat of the fat fish. He didn't want to break out from the fat fish mouth. It almost bit him into two pieces as its mouth was full of fangs.

A bright sword light flashed, and a fat fish was cut. The fat fish began to struggle. Su Xiao immediately stayed calm and gave up and continued to attack.

What is strange is that the fat fish struggled for about five minutes and stopped.

Su Xiao tried to put a sword in the fat fish body, a large piece of blood spouted, but the fat fish did not move.

Let Su Xiao be confused, but he is dissatisfied with his movements and begins to break in the fat fish body.

After a few minutes.

Hey.

A blood-stained long sword emerged from the body side of the fat fish. After cutting it open, Su Xiao climbed out from the side of the fat fish body. This fat fish should be dead.

There was no imaginary sea water coming in, and Su Xiaofu's headlights on the head looked around.

He was in a wide space, a smell of acid came, and the entrance was dark, and the miner's lamp shone on the head. It was a dark red wall covered with mucous membranes.

Su Xiao Petrochemical, there are many ideas in my heart.

Was he transferred to other locations by the reincarnation Paradise? Or has the fat fish entered somewhere?

After watching for a few tens of seconds, Su Xiao knew the current situation, and he was not transmitted, the fat fish ~ was swallowed by another bigger fish...

Su Xiao stood on the fat fish. He was standing on a wooden raft at the moment, and the bottom was full of pale green liquid, like a small lake.

Pich!

The body of the fat fish is gradually corroded and decomposed. This is the stomach's acid, which can be judged from the sour smell.

From the point of view of the corrosion rate, if Su Xiao does not get out within ten minutes, he will be corroded into a pile of white bones.

More importantly, this unknown giant fish is swimming in the sea, and another 15 kilometers will leave the coordinate establishment area.

I must find a solution as soon as possible. Su Xiao sinks for a while, takes out a long iron bar, and puts a shield on the end of the iron bar. He wanted to row.

Sudden water flow came, Su Xiao began to row in this unknown giant fish. Advance to a position similar to the esophagus on one side.

According to Su Xiao's judgment, this is a carnivorous fish species. Most herbivorous fish species do not have such organs as the stomach. They use the digestive enzymes in the intestine to break down food.

After a few minutes, Su Xiao finally got close to the esophagus, and the fat fish was more than half eroded.

Jumping on the cold esophagus, a slippery feeling came under his feet. Going forward, Su Xiao's heard the reincarnation Paradise's warning, as ten kilometers away, he would leave the specific area.

Su Xiao's footsteps speed up, the fish swims fast, and from the width of the esophagus, the size must be unimaginably large.

Su Xiao took out in the fast running and tried to detect the information of this giant fish.

The information is as follows:

Name: Deep sea whale

Health: 100%

Mana value:???

Strength:???

Agility:???

Vitality:???

intelligence:???

charm:???

Skill 1:???

.....

Su Xiao was dumbfounded,

In addition to the name, the others are question marks. The size of this whale is so great that it has such a terrible attribute.

Su Xiao Ran in the esophagus like a corridor. The current situation is not a bad thing. He encountered a very strong creature when he was out of luck. If he used it properly, there would be no way for the Kara Native to take him.

The best situation now is to communicate with this whale, but this is obviously impossible.

Since it was impossible to communicate, then violent means, Su Xiao quickly ran in the esophagus of the whale, and he quickly ran to the end and came to a closed meat wall.

After confirming the position, Su Xiao smashed on the meat wall.

Wouch!!!

The deafening sound wave came, although the whale made big sputum, no gas exhaled in the throat. This sperm whale has mutated from having lungs to breathe. Otherwise, it cannot survive under the ice.

At the end of the big battle, Su Xiao slammed into the ground, his ears creaked, and his health dropped by a third.

Struggling to stand up, Su Xiao walked sword that had just been thrown out. Regardless of the blood, he rushed out of the wound.

Su Xiao drilled a layer of meat and came to the mouth of the whale. The sea came entered the whale's mouth.

The flow of water in the mouth of the whale is very violent. If he caught by it, Su Xiao might go out of its mouth

Su Xiao didn't want to go back to the sea. If he did, he would die soon. Even in the mouth of the sperm whale, he felt the huge sea pressure.

The hook lock on the arm guard pops up, the hook lock flies rapidly in the water, and is nailed to the upper jaw of the whale.

Tightening the thread, Su Xiao was taken to the upper jaw of the whale.

Lifting Dragon Flash, Su Xiao directly struck and immediately covered his ears.

Hey!!!

The whale screamed, and the flow of seawater in the mouth skyrocketed. This sperm whale has already noticed that there are creatures in its body.

Although Su Xiao was dizzy and uplifted by the quake, he still clenched the thread.

After a few seconds, the sound wave receded, and Su Xiao shook his head and spat out a string of bubbles.

Taking out a lunch box-sized object, Su Xiao had some meat pain. This thing was exchanged from a newcomer contractor when he went to the trading market. It was only white quality, but the other party was not clear about the value of this thing. Su Xiao only Change it with a white weapon.

Put the lunch-like object into the wound of the sperm whale and fix it.

After doing all this, Su Xiao pulled the hook from the upper jaw of the sperm whale, or used the hook lock to return to the throat of the sperm whale, and drilled into the wound of the meat wall and returned to the esophagus.

Su Xiao took the small oxygen cylinder at his waist and took a breath.

one two Three.....

Su Xiao silently calculated in his heart, about a minute, followed by a dull bang, the body of the whale was shocked.

Looking at the current location through the screen, it is still six kilometers away from the setting of the coordinates.

After the explosion sounded, everything around it began to tilt. This whale was not killed but was stunned. A bomb shouldn't have an effect on this giant, but if its the upper jaw of its mouth, then it is different, as it is very close to the brain, not to mention Su Xiao also 'closed' the wound, increasing the impact of the contact surface.

The whale began to sink in the deep sea, and the unknown deep sea was dark and full of dangers.

For Su Xiao, it is a great thing to be able to reach the deep sea without receiving water pressure. His original plan was to find a big fish, let the big fish swallow him, kill the big fish, let the big fish sink into the sea, if the fat fish wasn't too small, he wouldn't have left its body.

Although this whale is not dead, Su Xiao will not continue to attack it. Under that impact, this whale can at least be stunned for more than ten hours.

The whale slowly sinks into the deep sea and gradually disappears into the darkness.

Under the somewhat crazy plan of Su Xiao, the Kara Natives' chance of finding him can't pass the 10%. The world coordinates do not need to be guarded, and they can sink into the deep sea.

There are still seven hours to complete the coordinate arrangement. The completion of the coordinate arrangement represents the victory of the war, and the derivative world will end immediately.

Chapter 285: 285

Su Xiao is in the belly of the whale, holding the world coordinates in his hand.

Looking at the battlefield through the screen, the contractors were standing back to back, their goals have been unified, and that is to live.

Seeing this situation, Su Xiao was relieved. If the contractor collectively flees, he will face a penalty of all attributes -10.

This will not work. Once the contractor can't hold it, there will be a lot of deserters, and what Su Xiao was worried about is that Silver Flash has arrived at the edge of the battlefield.

The head of the team has to escape, and the members of her guilds will not stay for a long time. A group of adventurers will flee, although the number does not reach 50% of the total number of survivors, this will greatly increase the risk.

Su Xiao also has the ability to interfere with the battlefield indirectly. Now, these three opportunities are crucial.

Su Xiao does not need these contractors to deal with Kara natives, as long as these people can not escape, he began to edit information on the war channel, as follows:

Introduction: All contractors can't leave the coordinates within 30 kilometers. If they treat the war negatively, they will always be abandoned in the parasite world and face the rejection of the world.

The maximum number of participants: 113 people.

Time limit: 7 hours.

Purpose: Survival.

Hint: The world coordinates have been placed in the deep sea, and the contractor does not need to defend against world coordinates. Guarantee your survival with maximum ability, and you can hide in the ice or fly to the sky

Speaker: Arbiter!

.....

Su Xiao did not choose to let the contractor drag the Kara natives, as these contractors could not do it.

The contractors are not fools. If Su Xiao releases the order to let them go to death, they will run away.

Su Xiao did not let them go to fight, but can't they hide?

The goal of the Kara natives is the world coordinates, not to kill the contractors. Moreover, as long as the contractors don't escape, Su Xiao didn't care.

Su Xiao only needs to ensure that the contractors have more than 50% of the survivors in place, not to guarantee the safety of the contractor.

This message was released on the war channel, and the god king's leader and Adams were overjoyed. They saw the hope of life.

Silver Flash has already stopped at the edge of the battlefield. She also knows that once she flees, she will be left in the parasitic world forever, and will face the punishment of the reincarnation Paradise.

“God-king, Adam, what do you two think.”

Silver Flash said on the war channel, and her voice seemed very tired.

“Do you still think about it, of course, find a place to hide, silver flash, bring your people back, they all follow you.” The king of God responded with anger.

“If I didn't guess wrong, this is a turning point. The goal of the Kara Natives is not us, but the world coordinates. As long as we hide, we will be able to escape this.”

Adam's hoarse voice appeared.

When she heard the words of these two, Silver Flash stood in the same place and thought.

“Golden ghost, how long can you last?”

silver Flash looks at the golden ghost in his hand.

The golden ghost lowered his head, and the luster of the pupil began to dim. He said intermittently: “Seven... seven hours... no problem.”

“Then, we will hide.”

silver Flash made up her mind and opened it in the war channel.

“Our three adventure groups are hiding in one place. From now on, everyone ensures his survival.”

“agreed.”

“Good.”

The God king's leader and Adam opened their mouths separately. As for the survival of the scattered people, the three did not consider it. They were likely to die in this place.

.....

In the deep sea under the ice layer, Su Xiao nodded with satisfaction after understanding the situation of the contractors through the screen and the war channel.

He is not prepared to let these contractors escape, nor is he prepared to let these contractors live! The reason is simple.

When he first boarded the spacecraft, Adam recognized Su Xiao. Through Adam's introduction, Shen Wang and Silver Flash also saw Su Xiao.

In the giant world, Su Xiao's performance is very eye-catching, single-handedly the other side of the flower adventure group, dragging dozens of contractors,

This has exposed his strength.

After entering the war world, Su Xiao has never been exposed. Adam and the others would doubt him.

Su Xiao has two choices. The first is to pretend to look at the appearance and give up the pseudonym of Byakuya. The second is to destroy the contractor and kill the people.

At the end of the war, the identity of Su Xiao's arbiter will disappear. At that time, if there is a chance, he will kill them. He is best at dealing with the contractors.

These will be dealt with after the war, as the reincarnation Paradise will not allow him to kill the contractors now.

Furthermore, if the status of the arbiter is so easy to expose, then the so-called protection measures in the reincarnation Paradise are too low.

The contractors have their strengths, some of them made holes in the ice, and some are flying high if there is no way to hide in the snow.

The war began to change unexpectedly, and the contractors collectively hid, the scene is very lively.

Compared with these contractors, Su Xiao's position was the hardest to find. He hides in the deep sea. This is the place where the Kara Natives won't be able to find him.

The coordinates will be successfully placed in 6 hours and a half, and the parasite world will end along with it.

Just after the first six-hour passed, the Kara Natives arrived.

A dark 'spaceship' floated over the ice. The spaceship had a strange shape and was black, like black corals in color. The overall shape is somewhat similar to sea urchins.

The Kara Native's spaceship stopped at the height of several tens of meters above the ice. The bottom of the spaceship opened suddenly.

An overwhelming number of Kara Natives jumped out of the spaceship, the number could not be counted, they were black and dark, with rough scales, and the whole shape was human, with a lizard-like head.

“Gul aqi coe, sprike Tassen...”

A roar came out from the spaceship, and a silver-scaled Kara Native appeared, and it floated in the air.

The appearance of this Kara Natives is very similar to that of the Tuka (T/N: It seems like the Arbiter of these Kara people is named Tuka, not the entire race, sorry got that wrong). It was taller, and its name should be Dika if it was translated to normal language, who is the grandfather of Tuka.

The high bloodlines of the Kara Natives are not passed down from generation to generation, and there are often cases of intergenerational transmission. The birth of Tuka has cheered the entire race, as they have their next king.

The Kara Natives with that bloodline have absolute control over ordinary Kara Natives, not because of power, but because of genetics.

Even if the high Kara Natives let the ordinary people die, those ordinary Kara Natives can't retaliate, which is very similar to the Zerg.

The Kara Natives with the silver scales are somewhat similar to the ant queen, which are very important to the race.

The current king of the Kara Natives was 'Dika' who was floating in the air. He was not floating but more like stepping on the air.

At this time, Dika's eyes were full of hatred, as he already felt the death of his descendants, Tuca.

Chapter 286: Fury and Revenge

The development of the war was a bit strange. It has changed from the original survival to personal grievances. Dika can still survive for fifteen years. After the fifteenth, the Kara star people will lose their king, and civil war will start.

This situation has already occurred once in Kara star. At that time, the Kara star people were at each other's throat. After decades of turmoil, they barely stabilized because a new king was born.

Now, the reincarnation Paradise is robbing this derivative world.

Dika has already understood that the Kara Star people have lost, and even if they can destroy those coordinates, the Human Alliance will clear them out of the Earth.

Fifteen years are too short. When you are in the sky, Kara star people can't survive with no leader.

They will become extinct, and Dika chooses to turn the strive for survival into personal hatred and kill the human being who is the Arbiter. He could still feel the energy left by his descendant on the one who killed him, and it's about to dissipate.

Dika screamed at the ice below, and the spaceship behind him roared.

Krrrr...

A gun barrel emerged from the spacecraft. The unevenly shaped cannon was aimed at the ice surface, and many creatures were screaming inside the muzzle.

boom.

Black and red spheres were shot out and kept changing form as they moved forward. The power behind that canon wasn't great at all.

Wouch!

The black and red spheres spread out on the ice. If you look closely, you will find that it is a pile of small-sized creatures that looks like ants.

This is the weapon used by the Kara Star people to break their enemy's defense. These creatures can almost penetrate any defense, whether it was an energy shield or a strong metal.

The sound of crawling and chewing came as the ant-like creatures began to eat the ice layer quickly. After a few minutes, a large crater, several tens of meters wide, appeared. The seawater appeared in the pit, as it surged upward.

Dika looked at this scene coldly, his enemy was deep in the sea, and he was getting there no matter what.

Dika's figure flashed. He directly reappeared above the crater. It seems like the Kara Natives or the ones from the king's descendants could teleport.

“Disc!”

Dika screamed at the sea below the ice cave, the meaning behind his word is obvious; he wanted the Kara People to jump down there.

All of the Kara star people had fear in their eyes. The sea below is too cold. If they jump, they will freeze to death.

Dika didn't give them a choice as he used some kind of energy and made the lizard-like people jump down whether they liked it or not.

Splash! Splash!

The Kara Natives directly jumped down into the water.

The water level in the ice cave rose rapidly, which added the water pressure.

The Kara natives were crazily jumping into the water, as the water level rose again, they almost blocked the entire cave.

When they touched the water, the Kara natives didn't dive directly, and they formed groups to resist the cold using the heat from their bodies.

The Human Alliance saw this scene as they all thought that Dika was crazy.

Dika wasn't crazy, and this was an effective method used by their race to survive even space, let alone some freezing water.

The Kara Natives had creatures that could dive into the sea, but it took time to create them, as they are germ like creatures.

The groups of Kara Star people formed directly joined each other, and their numbers started getting bigger and bigger.

The sphere they were forming expanded crazily as more and more of them rushed toward the giant sphere.

The Kara Natives feared the humans, as they didn't know how they did it, but they damaged them more than any other race they encountered.

The current Kara people were not confident in their victory. The Human Alliance has just beaten them.

The forming of the sphere took about half an hour, and finally, Dika, who was looking at this, made his move, he directly went toward the sphere floating. The sphere opened up as Dika directly went inside before the sphere closed up again.

All of the Kara Natives jumped into the sea and moved. Their only target was Su Xiao, and this was their king's wish.

The Spaceship was still floating in the air while no Kara Native remained inside.

In the sea, The huge sphere started moving under the ice.

Bubbles started appearing as the Kara Natives were releasing the air in their chest, which caused them to sink.

As the ball started to sink, it became prey to many fishes in the deep sea.

This was their last counter-attack. Their king, Dika, issued the order to use every last of their power just to kill one person.

The number of the Kara Natives were in the millions, if Su Xiao didn't choose to go down into the deep sea with the world coordinate, it would've been destroyed already.

After an hour or so, the Kara star people casualty started increasing due to the coldness of the water and the pressure, but they didn't retreat at all.

Their numbers were just too much, even as their casualties increased, it didn't appear to affect them much. And the only thing that would make them go back up was to defend the Spaceship if it was attacked.

Oh~.

The Sphere was going down faster and faster.

At the center of the biosphere, Dika's eyes were cold, as his space ability allows him to perceive the fluctuations below, which is a coordinate type device being installed.

Once the device is installed, the Kara Star people would be defeated. Dika has no longer care about this. He wants revenge, that human who sentenced them to death.

Su Xiao saw this scene through the screen. He was surprised by the madness of the Kara Natives.

He can't make a move to guard the coordinates. Otherwise, it will be very bad. Although he can't guard it, he can move it.

Walking in the esophagus of the whale, Su Xiao came to the stomach of the sperm whale and looked at the stomach acid pool.

He tried to put the coordinate device into the acid, and he discovered that the acid didn't do anything to it.

So he directly threw it into the pool of acid.

As the world coordinate device splashed into the acid, it started sinking.

There are three hours left until the world coordinates are set.

Chapter 287: A slippery Enemy!

Two hours later, the huge sphere made up of Kara natives sank to the bottom of the sea. The sphere shrunk compared to before as many Kara star's people died.

The sphere was a few meters away from the whale which Su Xiao was in.

Fluctuations of space appeared and disappeared in an instant.

Inside the whale's body, Dika, full of silver scales, appeared in the esophagus of the whale, not far from Su Xiao.

Su Xiao was not optimistic. The Kara Natives' tenacity was out of his expectation. They have used the power of numbers to reach the bottom of the sea. You could say that the people of the Kara star were almost extinct by this time. There was no meaning to destroy the coordinate device anymore.

Su Xiao saw the Kara native who is similar to Tuka in front of him. He is contacting the reincarnation Paradise and tried to get it to strip off his arbiter's identity temporarily. But the answer was no.

That was out of the rules, and the Reincarnation Paradise won't ignore the rules.

"This result is...something beyond my expectations."

Su Xiao looked at the Kara Native in front of him. He suddenly thought that the other party might not understand the human language.

"Our defeat is a matter of time. The energy of the bio-nuclear has dried up, and the spacecraft cannot return to space. Before we are defeated, I will kill you."

It was not surprising that the Kara Star native could speak the human language, considering that the other party has been on the earth for twenty years.

"Well? You learned the human language."

Su Xiao surprised to see this.

"You just said that you want to kill me, let me think about it..."

Su Xiao's pretense was indulging, and he vaguely guessed something, and his face smiled.

“Before I killed Someone called Tuca, it is very similar to your looks. If you don't guess wrong, it is your descendant, your son?”

Su Xiao's words made Dika's eyes even colder.

“Tuca... my good descendants who should've inherited my responsibilities in the future, he should not have died. You are the one who should've died.”

Dika's voice was low and cold.

“It turned out to be the case. Your descendant Tuca is very strong. After I cut his limbs, he still survived for a long time. I wanted you to know how he died in the end.”

Su Xiao's gentle smile, he deliberately angered the Kara Native before him, so the other side would take the initiative to attack him.

Dika was already furious, as his face turned black from anger.

“I didn't plan to kill him, I was just on my way to clean a few animals on my way but, he appeared in front of me and attacked, so I just killed him. She should've returned to the earth in a very special way by now.”

As Su Xiao's voice fell, Dika disappeared from his place and appeared above him.

Su Xiao stood still in the same place, as he activated his shield, his strength was 20 now, so his shield ability improved greatly.

boom.

Dika slammed his fist on the shield, and Su Xiao's body flew forward, and the shield shattered.

The power behind this punch was terrifying. If Su Xiao was directly hit, he would've been seriously injured.

After rolling two times on the ground, he stabilized his body and squatted on the ground. Su Xiao lowered his head and shook his shoulders.

“Oh, lucky.”

Su Xiao was really happy. He thought that he might fail the mission, but the other party took the initiative to attack him.

However, Su Xiao noticed that his opponent might not have attacked him completely because of anger. It seems he was after him, not the coordinate device.

Compared to directly attacking him, if he destroyed of world coordinate device, it would've been simpler, as Su Xiao will not live for too long after that.

Unfortunately, Dika is not aware of this, and his purpose was just revenge.

Su Xiao's angering him served its purpose, as he no longer talked nonsense. He held Dragon Flash in his hand as he prepared himself for the fight.

The prompts appeared one after another. As the Kara Natives attacked Su Xiao, he could now fight back.

“Arbiter Rule!”

Su Xiao released a low shout,

A ten-meter barrier appeared around them, and unless Su Xiao dies, Dika won't be able to leave it.

The situation was reversed as Su Xiao turned from the prey to the Hunter now.

There were 43 till the world coordinates would be set, he can stall for that long if he had no way of killing his opponent fast enough.

Dika clenched his fists as space power covered them. If a punch connected, no matter what defense Su Xiao got, it would be penetrated.

Su Xiao took a breath, and he was fully concentrating, as he perceived the situation around him. The enemy was proficient in space ability. He encountered this ability for the first time.

Wouch~.

Deca disappeared, Su Xiao lowered his body, held the sword, and his eyes glanced around quickly.

A wind pressure hit the back of his head, and his short black hair was blown up by the wind as he immediately evaded sideways.

The fist wrapped in silver scales grazed his cheeks, as a little blood mark appeared on his cheek.

Su Xiao immediately reacted, as he evaded, he reflexively attacked with his sword.

boom.

Suddenly Su Xiao felt pain from his back, and a fist appeared from his chest.

The fist went in from behind and emerged from his chest.

“puff.”

Su Xiao spits out a large amount of blood, breathing became difficult, as his right lung was crushed.

With this kind of injury, Su Xiao couldn't lose consciousness, or he might die. He relied only on his strong soul as he stayed awake.

Directly, Su Xiao used Dragon Flash as he stabbed his abdomen. The sword passed through him directly, piercing Dika in the process.

Dika couldn't react in time and was directly penetrated with the sword.

Seeing this, he became furious.

“Humph.”

This enemy was fearsome, he directly disappeared. Blood gushed out from the hole in Su Xiao's chest.

Looking at his injury, he remembered how Akainu pierced ace, and it was the same kind of injury. Dragon flash's 'Bloody fight' triggered, Su Xiao's physical attributes temporarily increased by 12 points, this effect lasted five minutes.

Suddenly spitting a few mouthfuls of blood, Su Xiao pulled out the dragon from his lower abdomen, take out a bottle of medicine to drink it.

Instantly, 70% of Hp were restored, and he was cured.

Su Xiao immediately released Bobtney, Bobtney just appeared a little aggressive. Still, after seeing the seriously injured Su Xiao and the enemy's bloody hand, Bobtney immediately wanted to rush the enemy.

“Retreat to the side.”

Su Xiao summoned Bubutney not to let the other side fight, but to need the halo effect of the goddess, to restore 1 point of health per second.

The enemy was too fast, no, it is wrong to say too fast, the enemy can teleport, fast is not enough to describe it, the enemy could appear behind him, which made Su Xiao couldn't react to him at all.

Su Xiao released the thread from his gauntlets as if he was making a trap.

Dika slowly retreated as he seemed to wait for something, his hand holding the wound on his stomach.

Although Su Xiao wanted to rush at Dika, he was powerless, and his injury was too heavy.

Wouch~.

The enemy disappeared again, Su Xiao immediately jumped forward, and a fist blew the wind from his back, Su Xiao escaped the attack.

Pishhh...

The threads tightened, as Su Xiao pulled them.

Puchi!

Blood scattered in the air, as Dika has disappeared again. This guy teleported again.

Dika stood in the distance, with several wounds on his body, as he breathed heavily.

One, two, three... Su Xiao silently calculated time in his heart.

When the number reaches seven, the enemy disappears again. Su Xiao directly waved his sword as the thread immediately tightened at the same time.

Su Xiao's sword hit air while the thread did not entangle his enemy.

The Puch hit the side of his body, as Dika was on his side.

Chapter 288: 288

Dika sent a heavy Punch.

boom.

Su Xiao's left shoulder was hit, and his left arm was softly hanging down.

Enduring the numbness, Su Xiao's muscle tensed as he activated the gauntlet's skill.

'The wrath of the bull Lord, Strength +15 for 10 seconds. '

'Hint: The wrath of the bull Lord cooldown is 10 natural days. '

'Hint: It takes 30% of the HP to activate the wrath of the bull Lord. '

Su Xiao's blood was coming out of his body due to his injuries. His Strength increased to 44 from the 29 that he had, and this will continue for ten seconds.

Su Xiao's body moved as his eyes were lit with fire from activating the skill.

His long sword attacked and broke any object that blocks its path.

Wouch.

The Sword cut a little bit of Dika's skull, who directly screamed and teleported away.

Tick, tick!

Blood dripped down his fingertips, as Su Xiao gasped, while the effect of the skill subsided, and the power disappeared from his body.

Looking up at his enemy, Dika's right cheek was slashed, revealing his skull.

You could even see his brain from the injury he received.

Dika pulled a piece of cloth from his body with one hand and wrapped it around his head. This is to prevent his brain from falling out during teleportation.

Dika's right arm was cut off, and only one remained. The threat he previously posed on Su Xiao was greatly reduced.

Su Xiao has a big hole in the chest. His left shoulder is injured, and his left arm was hanging softly. It is no longer possible to use the thread on the gauntlet.

After two rounds, both parties were greatly injured.

Su Xiao directly retreated toward the edge of the Barrier and leaned against it.

He didn't believe that Dika could teleport out of the enchantment, This barrier was, after all, made by the Reincarnation Paradise.

"Let's continue."

Su Xiao's mouth bled as he spoke. The person in front of him was similar to him, and he was after revenge.

"Good."

Dika clenched his fist as he prepared for the next attack. The Kara Star People respected a few, and these few were the strong, whether it was Tuka or Dika, both respected Su Xiao.

At the beginning of the fierce fight, Su Xiao has been on the defending side, never actively attacking, the enemy can teleport, and active attack is a waste of Stamina.

Bubtny hid not far away, ready to help Su Xiao if needed. He didn't dare join the fight, and he wasn't as strong as these two. He could only activate his aura, healing 1 Hp every second, and wait to activate other skills to heal Su Xiao.

Su Xiao didn't launch any attack after seriously injuring Dika, even though he might kill him if he did, he would die along with him. He was afraid of death, but it wasn't worth it fighting Dika.

Su Xiao didn't get close to Dika, because he was afraid that if Dika could teleport him out of the whale, they would both die.

The fight continued as Dika tried everything while Su Xiao avoided him, the Aura of the goddess aided Su Xiao heal as he waited for his enemy to attack. After Dozen of Minutes, Su Xiao recovered a great chunk of his health.

Two minutes before the coordinates would be set, Su Xiao was leaning against the barrier with blood coming out of his side, and there was a big hole in his lower abdomen. Three times, He was almost moved to the sea by Dika, but at the most difficult time, he would use his sword and attack Dika disrupting his teleport.

It takes at least 2 seconds for Dika to teleport, which was long enough for Su Xiao to counter.

Dika can teleport every 7 seconds. In the three seconds after a teleport, he can teleport again with the help of fluctuation of the previous teleport.

Su Xiao constantly gathered the enemy's information in the battle as he couldn't read Dika's status.

At this time, Su Xiao could not get up, as he used all potions he had, Bubtny was laying in the distance injured.

Dika is not easy, even with one arm is cut off, one-third of the head is missing, and more than ten deep scars on the torso, he could still fight.

Even with a hole on his chest that made his heart and other organs visible.

Dika's intestines landed on the ground as he was struggling toward Su Xiao.

The barrier was full of blood smell, as the place was filled with gore.

Every time he took a step toward Su Xiao, Dika paused for a while, leaving a large amount of blood in the esophagus of the whale along the way.

Su Xiao tried to sit up, he tried several times but failed. He directly stored Dragon flash into the inventory. The broken elf appeared in his hand. He only had the strength to raise his arm.

Trembling his arms and lifting the broken elves, Su Xiao fired a few shots, but because the hands were not stable enough, only one hit made its way toward Dika.

Dika was shot in his shoulder and was stunned for a long time.

Su Xiao and Dika no longer had any strength. Bubtny wanted to stand up and protect his master. He tried but failed several times. Its legs were flat on the ground, as the blood stuck his original smooth fur together. His eyes were full of unwillingness.

Unlike the ordinary Teigu creatures, Bubtny is more inclined to normal creatures, with flesh and blood.

Su Xiao was leaning on the barrier, and he put the broken elf away, only ten seconds left for the coordinate to be set!

Su Xiao shook his arm and took out a cigarette. The blood on his finger covered the cigarette as He took a deep breath.

“I won.”

Smiling and looking at the enemy, Su Xiao exhaled the smoke.

Dika didn't hear what Su Xiao is saying, as his brain was hurt too much, causing serious damage to his hearing function.

All the surviving contractors received this prompt, they rushed out of the hiding place, cheering, screaming, and some even covered their faces and wept.

The space battlefield is hell, it is the Shura field, it was filled with flesh and blood, but it finally ended.

The contractors were sent away one after another and entered a temporary space.

Su Xiao also received a lot of tips. In his not far away, Dika made an unwilling roar, and his body was gradually decomposed. This is the forced execution ability of reincarnation Paradise.

Su Xiao's arbiter ability disappeared, the screen floating around him disappeared, and his attire returned to normal.

He wondered why the reincarnation Paradise would allow him to join the contractor in a cabin to the world.

The memory of Adam and the others who saw Su Xiao before were being replaced, and eventually were replaced by some other things, such as chatting with a contractor in front of the cabin.

The revised memories are all about the Byakuya's identity, not the existence of the arbiter.

In the memory of surviving contractors, the Arbiter disappeared into thin air.

A: 50,000 paradise Coins.

B: Purple treasure chest × 1

C: Gold Honor Scroll

Note: Gold Honor Scroll: It can improve the skills of a class, skill class ability, basic, proficient, specialized, mastery... insufficient authority, cannot view the following levels.

Note: Gold honor scrolls can increase the ability of 'specialized' to 'mastery'.

.....

When seeing option C, Su Xiao's heart thumped, his "Sword specialization" is the ability to specialize the sword skills. If he gets this, his sword specialization will be promoted to the mastery of the sword!

What is the concept of a sword master, Su Xiao was not sure, but he will find out soon enough.

Chapter 289: 289

When seeing option C, Su Xiao has decided to give up the first two options. The Sword was his core skill, and this could help him improve greatly, he wasn't going to miss this chance.

After choosing C, on Su Xiao's hand, a shining scroll appeared.

It held no grade, but the words "precious" was marked on it with gold.

Su Xiao will be living in this space. His current state is really bad. If he exceeds an hour like this, he will die due to excessive blood loss.

After selecting the reward, the reminder of the reincarnation appeared one after another.

The power of space wrapped Su Xiao, as the reincarnation paradise gained absolute control over the 'parasite' world.

Su Xiao appeared in the Human alliance territory in a street filled with people

Everything seemed to stop still.

Su Xiao snorted, he needed treatment now, instead of arriving at a safe place.

The reincarnation Paradise is not prepared to send him back immediately. As an arbiter and contractor, he has the right to appreciate the fruits of his victory.

A light blue transparent curtain was formed around and spread rapidly around the entire derivative world.

All the objects and buildings that the curtain passed through were changing rapidly. Some old people become young, some buildings disappear, and some buildings appeared out of thin air.

The time of the entire derivative world began to fall back and returned to the initial stage of the parasite world.

The difficulty of the derivative world began to decline, from the original Lv.10 to Lv.3, the same difficulty as Tokyo Ghoul, but the parasite world is weaker than Tokyo Ghoul.

The air becomes fresh, and the pungent smell disappeared.

The feeling of being transmitted appeared, Su Xiao became dizzy; this familiar feeling made him spit blood.

World of War: Parasite

Difficulty: LV.10

The source of the world: 30%.

The number of completed tasks: 2.

Comprehensive evaluation: S-

Start collecting the source of the world...

The source of the world is collected, and the rewards are started.

Rewards: 16 attribute points, 13,000 Paradise coins.

The overall evaluation is S-, and therefore for the world of war, hunter's level +0.

Once the settlement is completed, the reward would be automatically deposited into the hunter's inventory.

Tip: The hunter has received two S-level evaluations, and the third S-level evaluation will be rewarded.

.....

Su Xiao slammed into the floor of the exclusive room, lying next to Bobtney.

Su Xiao chose to recover together with Bobtney. Two green lights appeared in the exclusive room to wrap Su Xiao and Bobtney.

Su Xiao floated in the air, surrounded by emerald green spots around his body. These green spots gradually disappeared into his body, his injuries recovered at a speed that was visible to the naked eye, the bloody hole in his chest and lower abdomen healed, and his shoulders that were sent flying had re-grown. Su Xiao sighed as his body finally returned to normal.

After five minutes, the green light disappeared, and Su Xiao and Bobtney's injuries all recovered.

Su Xiao landed smoothly while feeling tired. He had not rested for 36 hours.

Su Xiao heard a thud as he looked aside, he found Bobtney asleep, this fellow fell asleep while he was being healed, and even after being dropped down, he didn't wake up.

Evenly breathing sounds, it seems that Bobtney will not wake up for a short time.

Su Xiao also felt dizzy; he directly threw his body on top of the bed and fell asleep.

He was really tired as he was asleep as soon as he laid down while the room was quiet and peaceful.

The inability to directly participate in the war made him highly tense, and the strong enemies encountered in the arrangement of coordinates were difficult to deal with. Still, the three world coordinate devices were successfully arranged.

At the third world coordinate, Su Xiao dragged down more than 100 contractors. Those contractors have nothing to do but hide, so their reward should be cut by a third.

As it could be said that they only participated in the first and second attacks.

At the end of the war, Su Xiao knows a little about the reincarnation Paradise. It didn't break the rules no matter what.

There is still a lot of unknown secrets in the Reincarnation Paradise.

The contractors returned to the Reincarnation Paradise, and the tense atmosphere was lifted. The measures made on the workers were also lifted, and the prices quickly returned to normal.

The survivors of the war have become stronger, and the number of the three adventurous groups has decreased drastically. Although the number of people has decreased, their combat effectiveness has increased.

Although the war is cruel, it is also the fastest way to become stronger.

.....

Su Xiao was sleeping for more than ten hours. Bobtney awakened him. The latter was Hangry.

After getting healed, having a good sleep, and washing the blood away from his body, Su Xiao felt refreshed.

Chapter 290: Stronger and Stronger

Leaving the exclusive room, Su Xiao went straight to Xia's restaurant. He didn't eat much in the last 36 hours, and he felt he could eat a cow.

Xia stood bored on the counter as she sighed.

"This shop is broke, sigh ~."

Xia took out a tablet, but before she could do anything, she was surprised by Su Xiao, who just entered the restaurant.

"Huh? You survived."

Xia looked at Su Xiao in surprise.

"Is it strange that I survive?"

Su Xiao picked up the menu on the table, ordered more than a dozen dishes, and threw the menu to Bobtney.

Bobtney's dog's face seemed happy as his furry paw fluttered on the menu choosing dishes.

Although a dog choosing his order was a bit strange, Xia still kept a note of what Boutney ordered.

After Bobtney ordered dozens of dishes, Xia's face began to feel bitter. It was a good thing to have customers, but having someone who eats this much was a blessing.

"Do you have what you wanted?"

Su Xiao looked at Bobtney.

"Wang."

"up to you."

Su Xiao can already understand some Bobtney's dog words, and beast language is about 6 levels, the max level is 10 ~.

"That..."

Xia laughed and interrupted Bobney's ordering.

"I don't have sufficient ingredients; I only have these."

Xia was slightly embarrassed; she does not store too many ingredients; after all, there are usually no customers.

Bobtney looked at Xia and said clearly: 'What a restaurant. '

Xia felt that she was despised by the dog, although the dog looked mighty, and its IQ was not low.

Xia glanced at her thin arms and legs, and then looked at Bobtney's body shape, and decided to bear it.

Xia began to prepare dishes in the back kitchen, and Su Xiao and Bobtney sat down waiting.

An hour later, Xia leaned on a seat as she was completely exhausted, and sweat poured out from her body as if she run ten kilometers without rest at full speed. It seemed that she and Su Xiao had done something indescribable, but the truth is, she was just cooking.

"I feel so tired just from cooking, God... my waist."

Sweat stained Xia's hair as it dropped on her face, but Xia couldn't help smiling when she saw Su Xiao's 100 Paradise coins' tip on the table.

"Generous guest."

.....

Su Xiao walked in the reincarnation paradise, patted his belly contentedly, as he was headed straight toward the attribute enhancement hall.

His three primary attributes will soon reach 30 points, and the new ability of Shadow of the law will be unlocked.

This time Su Xiao should properly improve Vitality/Stamina, at least to reach 20 points.

Reaching the Attribute Enhancement Hall, Su Xiao paid 100 Paradise Coins to get the right to use an Attribute Enhancement Chamber.

Strength: 29

Dexterity/Agility: 28

Vitality/Stamina: 18

Intelligence: 28

Charm: 3

A total of 16 points can be assigned freely. Su Xiao directly distributed them as followed: strength +3, agility +4, intelligence +4, and Stamina +5.

This time he focused on strengthening Stamina. Stamina should not be too low. Strength, agility, and intelligence attributes should be carried by Stamina. If the three main attributes are too much higher than the Stamina, his physical function will collapse.

It's better than throwing a punch with 50 points of strength while his stamina is only 10 points. As he punches, his arm would be injured as it won't be able to sustain the power behind the punch.

Su Xiao ignored the prompt and chose to start strengthening.

The attribute strengthening chamber started doing its job. Su Xiao sat on the ground with his eyes closed, his muscles protruded, and his skin gradually turned red.

Just when Su Xiao was preparing for the severe pain, the unbearable pain did not appear.

Although strengthening attributes is still not easy, it is much better than the previous times as he didn't feel like dying now.

Su Xiao was a little confused, but then thought of something, perhaps this happened because he strengthened his Stamina/Vitality.

After a long time, the strengthening chamber stopped operating, and the redness filling Su Xiao's skin receded. He took a deep breath as he clenched his fists.

Kakaka ~.

Enormous power emerged inside his body. But there is no reward for reaching 20 points in Stamina without the effect of his items.

That seemed to happen only with his main three.

His status became like this.

Strength: 32

Dexterity/Agility: 32

Vitality/Stamina: 23

Intelligence: 32

Charm: 3

Although 3 charm points seemed too little, his other attributes were high.

His Stamina was 23 without items, and with the ones he had, his stamina would be 25 points.

His three main attributes all exceeded 30 points. Su Xiao asked the reincarnation paradise about the reward as he didn't get any right now.

The answer from Reincarnation Paradise was that his three main attributes need to reach 50 points, and the rewards he would get at that time were very different from reaching 20 points. The rewards of each attribute could significantly enhance his combat effectiveness.

Su Xiao looked at the list of skills of Shadow of the law. Sure enough, there was a new skill he could unlock, and that wasn't cheap as he needed 5000 paradise coins along with a soul crystal.

Instead of unlocking this new ability, Su Xiao left the attribute enhancement hall and returned to his exclusive room.

Returning to the exclusive room, Su Xiao sat on his bed.

At this time, Bobtney was very energetic, with a pair of big black eyes glancing around. The dumbbell was sacrificed, not even the handle was not left. It walked to the sofa, looked at the sofa blankly, and seemed interested in this thing.

Su Xiao didn't notice Bobtney, and he has to improve several skills to improve the ability of the shadow of the law.

Take out all the soul crystals he obtained and put them in front of you.

Soul Crystal × 2, Soul Crystal × 1. (T/N: Just guessing, the first are small and the second is medium.)

Su Xiao picked up two soul crystals, as he was ready to improve Qing Gang Ying's ability first. Qing Gang Ying has already reached Lv.7, which was very powerful.

Consuming two soul crystals + 2000 paradise coins, Su Xiao upgraded the Qing Gang Ying skill by two levels.

Su Xiao felt the strange energy growth inside his body, and he could feel that he will experience a qualitative change as this skill reach level 10.

Qing Gang Ying: LV.9

Use: After Activating, 5 mana would be consumed per minute and will automatically deactivate when the user's mana is below 1%.

Skill effect: After Activating, each melee attack will destroy 34 mana points from the receiver and cause True damage of the same value. The receiver would experience a great amount of pain due to the mana burning effect.

.....

Qing Gang Ying's damage was getting more and more horrible. Just Imagine doing 34 damage, no matter if you hit the enemy directly or on his defense.

However, the mana cost of 5 points per minute is also a headache. Assuming Su Xiao has no talent ability, his current mana would be only 320 points, and Qing Gang Ying can last up to an hour at most.

After strengthening Qing Gang Ying. Su Xiao picked up the scroll he received from the war, which can raise his sword specialization to sword mastery.

Sword art is Su Xiao's main attack power. Each level increase will increase his combat effectiveness.

Su Xiao directly decided to use it.
