

R. Paradise 311

Chapter 311: Rokushiki

As a worker in the Galley-la company, Su Xiao can use the dormitory. When he walked in, the smell hit his sensitive nose. It was smelly. Sweat, Feet, and wine smells were mixed along with a faint salty smell of the sea.

This reminded him of the high school days.

Dozens of workers were playing cards while shouting.

Su Xiao's brows wrinkled. This wasn't a good place to rest. It's not he was picky, but this place was full of noise.

Turning away, Su Xiao directly left as he looked for a place to stay. He found a nearby hotel, although it wasn't luxurious, the bed was tidy, and there was no smell in the room.

A sound came from the bathroom... It was just Bob taking a bath.

Su Xiao sat down as he took the Soru training method from his space. Although Reincarnation Paradise recognized the technique, it can't be directly learned or taken out of One Piece's world.

[Rokushiki: Soru training Method (complete)]

Quality: Purple

Type: Technique

Learning requirement: 25 Strength, 30 Agility, 25 vitality.

Rate: 141 (Tip: Purple equipment rate vary between 71 and 150)

Introduction: With this method, you can learn Soru, which can be upgraded within the skill upgrade hall.

Tip: This item will disappear as soon as you leave One piece's world. This was made by Kalifa. You can't make one yourself.

...

The paper in Su Xiao's hand was not a skill scroll. It can't be learned directly. To learn Soru, he needs to train normally.

Was learning the Rokushiki hard? After looking at the Soru, Su Xiao knew that it wasn't hard to learn, but the hardest thing was to make the body able to practice the techniques.

The Marine and CP need to perform cruel training before being able to learn any technique from the Rokushiki. The body needs great strength to perform these techniques.

Su Xiao's agility and Strength already met the requirement, while his vitality barely made it as his current vitality was 25 points.

At least he has no problem learning Soru, but learning Tekkai is most likely impossible now.

Looking at the method, Su Xiao didn't know whether Kalifa just writes like this usually or if she did it on purpose. Her writing was just too ugly.

Kalifa was acting as a secretary currently, how can her writing be so bad? Then it can only be on purpose.

“Well, she tried to be clever!”

Su Xiao directly spent 10 Paradise coins to change the writing to something easy to read.

After a short time, Su Xiao knew how to practice Soru, which took him about ten seconds.

That's right. It's that simple. This wasn't related to Su Xiao's IQ. It's just that practicing Soru was simple.

The main method to use Soru is: Step more than ten times in an instant, exactly 0,36 seconds and use the force generated to move at a speed that can't be followed with the naked eye.

Although Soru was fast, there were some disadvantages.

One of them is controlling the force you use, or else you will just rush into a wall or directly rush into the enemy's weapon losing your life directly.

Another one when Soru is used, the user can't change his course.

After half an hour of thinking, Su Xiao stood bare-footed and stepped on the ground.

But just after two times, Su Xiao moved from hit place directly.

This one was a failure. Su Xiao continued to practice Soru repeatedly without getting tired.

Bob was lying down while looking worriedly.

If Bob could speak, he would say: “Master, when I have money, I will take you to the best Psychiatric to treat you.”

Su Xiao continued without stopping. It was really difficult to step ten times in the same place in an instant while preventing himself from rushing forward.

A rough knocking on the door was heard. Su Xiao directly moved and opened the door only to find a few big men with fierce eyes looking at him.

One of them glared at Su Xiao and said: “It's the middle of the night, stop making sounds, or I will kick you out.”

The big man said while his chest muscles moved, and his fingers cracked.

“Well, let's talk like civilized men. Indeed I'm wrong for disturbing you in the middle of the night.”

Su Xiao said gently.

“Ha? Civilized man? I'm...”

Five minutes later, several men could be seen walking down in a hurry while their faces were messed up. Su Xiao shook the blood on his hand as he returned to his room.

If the others talked normally, he would've stopped practicing, but since they came to threaten him, then they just experience whose fists were harder.

Su Xiao practiced Soru and progressed slightly.

When it reached 1 o'clock, Su Xiao took a rest as haste would make problems instead of progress.

The next morning, Su Xiao directly washed up and changed into new clothes before heading toward Dock No.1.

After staying for a while, Su Xiao left and started practicing Soru again. As long as he masters it, he can approach his enemies faster.

After warming up and failing, again and again, Su Xiao wasn't discouraged. He can succeed through Failure.

Sweat soaked Su Xiao's clothes, so he directly removed his shirt.

Taking a deep breath, Su Xiao stepped quickly in the same place.

“Soru!”

As he whispered, Su Xiao made a few afterimages as he rushed toward the sea.

He moved two meters higher than the water before splashing down into the sea.

Swimming back to the shore, Su Xiao was overjoyed. He succeeded just now. Although he still had a long way before he masters it, it's a good start.

Su Xiao continued to practice, but he wasn't successful again.

Sitting down in an open space, Su Xiao looked at the sea while thinking about the reason for that one-time success. Was it because he said the name out loud?

Closing his eyes for some time, Su Xiao thought about this before opening his eyes.

“Let's continue.”

Standing up, Su Xiao once again stepped on the ground quickly.

Suddenly, Su Xiao nearly fell as he felt pain in his ankle, which left him puzzled. Is this because I practiced too much, which caused my body to be unable to bear it any longer. It needs physical power beyond what a normal human can use after all.

One piece's world can't be underestimated. The physical strength of humans here is beyond normal.

Su Xiao sat down and rubbed his ankle till the pain subsided.

His stomach growled. When he looked up, he found that the sun was in the middle of the sky. He was unknowingly practicing for the whole morning.

Chapter 312: Magical Cooking

Su Xiao put his shirt on his shoulder and took out a map to confirm where to go.

He was going to eat, but he wasn't just eating. He was going to look for a master hidden in Water 7. Of course, whether he is a true master or not, it's up to him to judge.

Half an hour later, Su Xiao arrived on the east side of Water 7. He saw a boat on the shore.

This wasn't a boat meant to sail the ocean, and it was a restaurant build on the boat.

A dining table was arranged, three people can sit at the same table. On the other end of the table, pots and pans were neatly arranged.

No one was eating. There were no guests. A thin old man who was sleeping and drooling as he leaned on a bed. This old man was 1.2 meters high. His hair was gray, and he was missing a few teeth.

The old slept sweetly while holding an empty wine bottle in his hand. He didn't seem on guard, but Su Xiao didn't dare to move too close to him.

This old man was like a lion, although he was old, he seemed strong.

Su Xiao got onto the boat. He didn't go wake up the old man as he waited instead.

After ten minutes, the old man seemed to have trouble breathing before he spat his saliva and woke up.

The old man opened his eyes stupidly as he raised the bottle of wine and wanted to drink, but unfortunately, the bottle was empty.

"Huh?" The old man looked at Su Xiao with sleepy eyes.

"I don't welcome guests at noon, come back in the evening."

The old man didn't seem interested as he closed his eyes and gone back to sleep.

"I heard there was a super chef here who like to drink very much. I specially brought a good bottle of wine to drink."

Su Xiao took a bottle of wine with three big words on it: 'wǔ liáng yè'. (Famous drink distilled from five different grains)

The old man shook his head after seeing the drink in Su Xiao's hand. He never saw that kind of wine before, but he heard about the drink distilled from five different grains.

"Come back in the evening..."

When the old was about to finish, Su Xiao opened the bottle, and the wine fragrance filled the place.

Compared to the winemaking methods in One piece, the method of making this wine was unique, which made its aroma mellow and attractive.

"This is... What is this wine?"

The old man swallowed as he struggled to get up and walked toward Su Xiao.

Seeing the old man's pace, Su Xiao was a little bit ashamed. The old man seemed to have it hard and couldn't move well. His legs seemed about to break.

"Let me taste it, and I will cook for you."

Su Xiao passed the bottle to the old man who took it with shaking hands then took a sip.

As the liquor passed his throat, the old man's face turned red immediately as his eyes widened.

"Mm."

The old man directly swallowed a large mouthful of wine.

"Good wine."

The old man's body was shaky as he drank almost half of the bottle at the same time.

The old man fell to the ground with a blessed face, but still, the bottle found its way to his mouth. Su Xiao was speechless.

He ignored the old man as he looked inside to see a photo of a man and a blond boy struggling with a face full of bruises.

The man in the photo was this old man, and the blond boy is Zeff.

Redleg Zeff, who once sailed for a year in the Grand line before returning and opening a restaurant.

According to Su Xiao's estimation, the blond boy was strong, really strong because, in the photo, the sea behind these two was the sea of dreams of all chefs. It was the All Blue!

Of course, this is just Su Xiao's guess. If he was right, then this old man isn't simple, he probably knows about the Busoshoku Haki (Armament Haki) and Kenbunshoku Haki (Observation Haki). After waiting for an hour, the old man woke up again.

"You're already old, and you can't drink much now."

The old man shook his head. Maybe he seemed weak, but he definitely wasn't weak.

The old man trembled and walked to the stove, he picked the kitchen knife and started cooking.

Su Xiao wasn't very interested in cooking. Even though his cooking wasn't bad, he didn't want to take that path.

A few minutes later, a steaming plate of seafood noodles was placed in front of Su Xiao.

"I won't drink for free, try this."

The old man returned back shakily and sat down. He took the bottle of wine and drank with bliss all over his face. The fine wine from earth conquered this old man.

Su Xiao was hungry. So he didn't refuse and directly put the seafood in his mouth. He remained still for about three seconds.

He used to think that the food orgasm was just exaggerated, but this food was so delicious if a female ate it, that reaction would definitely happen. This is the most delicious food he ever ate.

"Hahaha, My cooking is good, do you still have wine?"

Su Xiao shook his head. He shouldn't just give the wine. He should negotiate.

“It’s a pity.” The old man stopped talking as Su Xiao finished his meal and was ready to leave.

“Little devil, you’re here for more than just food.”

Su Xiao stopped on his track as he looked at the old man.

“I’m a swordsman.”

Su Xiao directly moved when he said this.

The old man licked his lips as he tasted the remnant of the wine and was a little bit interested.

“Little Devil!”

The old man shouted, and Su Xiao turned around puzzledly.

“Focus is needed when training the body. You can’t train while you’re anxious. You are too anxious. Your ankle is injured. Come at night. I will make some a meal for you.”

Su Xiao was secretly pleased, but his expression remained the same.

“Thanks for guiding me.”

Su Xiao took another bottle of wine and placed it on the ship’s side.

“Didn’t you say that you don’t have anymore?” The old man looked at Su Xiao thoughtfully before grinning.

“This kind of wine is very rare. I only have a few bottles.”

The old man doubted his words because he had never seen this wine before.

“Come often.”

“Ok.”

Su Xiao turned and left. He was determined that the old man wasn’t simple.

Su Xiao continued practicing Soru all afternoon. With the old man’s advice, he started taking breaks after two hours.

At five-thirty in the evening, Su Xiao returned to the old man for the appointment.

Seeing Su Xiao, the old man who was cooking, pulled a large bowl of soup out.

“Try it.”

As he looked at the soup, Su Xiao vaguely saw mushrooms and several other herbs inside.

Taking a sip, it didn’t taste good. It was slightly bitter but not poisonous.

After a few sips, Su Xiao breathed a sigh of relief. Suddenly, a notification from the Reincarnation Paradise appeared in front of him.

[You drank the secret medicinal meal, your Hp increased by +10 permanently, and your vitality increased slightly. Because it's less than 1 point, it can't be displayed. This item can only be used once to increase the vitality.]

Warmth appeared in Su Xiao's stomach. He felt his body relaxing. His sword ankle was healed as well.

“My medicinal meal is good, even Shiki and Roger would come to my restaurant to eat.”

The old man seemed to see through Su Xiao's purpose.

“I like the wine you have very much. You can come every night, I will help you make medicinal meals, and you give me a bottle of wine.”

Su Xiao didn't care that he was seen through. Instead of lying and all that, he might as well choose mutual benefit. At noon, he gave the old man some benefit, so the old man helped him. Now the old man helped him, so he will give him wine.

He took a bottle of Moutai, which is a top grade drink, and handed it to him. He still didn't know the old man's name. He simply gave him a name, the Diet man.

He wasn't interested in his name or origin. As long as he knows that the other party was strong and can give him good meals, it didn't matter.

“Oh, it tastes great, although it's not the same one from before, each had their own characteristics.”

The diet man was very satisfied with the mouthful of Moutai. The same can be said about Su Xiao. He was satisfied that the fatigue from training directly disappeared as soon as he drank the soup.

There are still three days before the Straw-hat pirates arrive here. Su Xiao wants to get as much as he can in before they come. At the very least, he will grasp the Soru.

Chapter 313: Trade!

In the abandoned Dock, a silhouette flashed quickly, leaving behind a trail of wind. “Soru!”

The figure was fast, but it had no control of direction, which resulted in a direct crush into a boulder with a bang.

Su Xiao stood up as he shook his head. Soru was too fast. He couldn't gain control over it.

After two days, he learned Soru!

It wasn't difficult to learn, but it was very difficult to use it in combat. It requires a long time to adapt and gain control over the speed, distance, and direction.

After learning it, Su Xiao had a little understanding of it. This technique was one that used the reaction force to rush toward an enemy, if used well, it can be deadly.

When using Soru, the hardest thing was to see what's ahead of you, because the speed makes it difficult to discern his surroundings.

Shaking off the dust on his clothes, Su Xiao looked at the Soru in his Status.

Rokushiki: Soru: Lv.1 (active)

Skill effect: Move 5 to 18 meters forward at high speed during which the user reaches the maximum speed his agility can maintain.

Tip: Each use of Soru consumes 20 Stamina, and cooldown time is 30 seconds.

...

Moving forward at high speed, this is the main function of Soru, but what he was confused about is the Stamina. What was stamina? He could only see the Hp and Mp. He didn't see Stamina before.

After inquiring about it in the Reincarnation Paradise, He was told that Stamina was a value derived from Vitality, and this value was invisible, but he could feel it himself.

Everyone has Vitality. When it reaches a low level, fatigue will be felt. That's why the Stamina was related to Vitality.

Su Xiao understood that Stamina was the same as Endurance.

It seems that continuous use of Soru leads to fatigue, and because Soru was low leveled, he can't use it constantly.

Su Xiao didn't care about that. He wasn't going to use it here anyway because if he uses such an unpolished technique, he would be looking for death.

If he wants to integrate the Soru in his combat, he would need to increase it's level to 5 at least.

The training came to an end as Su Xiao moved back.

It has been five days since he entered one piece, and tomorrow, the Straw-hats would arrive. If he remembers correctly, they will cause a commotion here before moving to Enies Lobby.

Of course, this was just the information from the anime. No one knew what will happen when there are new factors in the story.

But one thing was certain, Nico Robin would be taken by the CP9.

The CP9 was strong. He was confident that he could deal with two at the same time, if he faced three, he could only escape, if more came after him, he wouldn't have a chance even to escape.

Their powers were different. Some were very strong, while others were weak, just like Fukurou and Lucci.

Su Xiao could guess that Lucci could kill Fukurou withing two minutes. In other words, Su Xiao was mostly afraid of Lucci. If he meets him, there is a 30% that he would win, else he would die.

Although his chances were low, Su Xiao still had hope in killing Lucci. His main fighting method was Swordsmanship. As long as he seizes the opportunity, he is very likely to land a few strikes on Lucci. Even though Lucci's tekkai was strong, Su Xiao can cut steel easily.

Su Xiao returned to the hotel while thinking about this. Many workers were coming off working tired, but you can see the happiness on their faces.

Being able to live a happy life in this world is a blessing in itself.

The sun was at the same level as the sea, turning it red while the clouds in the sky were like fire lighting the sky. The entire water seven was colored pale yellow.

The warm color made people relax. As Su Xiao walked through Water 7, he arrived at an abandoned warehouse.

Many empty wooden boxes stacked inside the warehouse.

Su Xiao jumped on a wooden boxes pile to look around while Bob did the same and stood behind him.

Su Xiao lit a cigarette as he waited.

About half an hour later, a slender figure walked into the warehouse.

When Kalifa entered, her footsteps stopped. She saw a man smoking on a pile of wooden boxes opposite the main door.

“I brought what you want.”

Kalifa held a sword in her hand, and it was obviously a long one.

Kalifa heard a sound of a wire being released, and the sword in her hand directly flew in the air. Su Xiao grabbed the sword and after confirming it's quality, he put it away.

“I've fulfilled my end of the deal, remove the bomb.”

Kalifa's tone was urgent. She was very hungry. She was living on fruits and juices for days now. She didn't even dare drink too much. If the bombs were triggered, she would've died.

“No.”

Su Xiao flatly refused. Kalifa squinted slightly.

“You... Don't go back on your words, or I will fight you.”

Kalifa flickered, and when she appeared again, she was front the wooden boxes.

“What are you talking about? It's you who broke the condition. I said to come alone.”

Su Xiao didn't remove the bombs. They were still in her body and can still be activated at any time. His gaze was on the warehouse door.

“Kalifa, calm down.”

A low male voice came from outside, and a two-meter tall man entered, he was Rob Lucci, who stood in front of the door.

Su Xiao slowly got up and put his hand on Dragon Flash.

Su Xiao unsheathed the sword as the sound of a cold metal rang, and a cold light appeared on the surface of the sword.

Su Xiao looked at Kalifa. Obviously, Kalifa brought him a good sword, but she invited someone else, with her IQ, she wouldn't make such a mistake unless...

“It turns out... You didn't just come to ‘sincerely’ trade.”

Like the sunset, a smile appeared on Su Xiao's mouth.

Chapter 314: Coveted Technique!

Lucci stepped forward, dressed in his work uniform with a white dove on his shoulder. “We've seen each other before,” Lucci said with a blank expression.

Su Xiao's face changed.

Two people were outside, one of them was Kaku and the other person, Su Xiao didn't meet before. Su Xiao guessed it was Blueno.

The warehouse was surrounded. Su Xiao directly took several Bombs in his hand while getting ready to blow the ones inside Kalifa.

Although he was surrounded, he didn't panic. As long as he detonated Kalifa's body, the Galley-la company would be alarmed, by then, Lucci and the others could only retreat or stay here and expose themselves.

Perhaps Lucci knew this too and didn't do anything else.

“I could feel four of you, could it be you're here to deal with me now? That's quite stupid for spies.”

Kalifa was a spy. The others came with her, which made it obvious to anyone who didn't know their identity. Lucci wasn't surprised by this.

Lucci made a gesture, and the four gathered inside the warehouse. As he guessed, the last one was Blueno.

“Remove the bomb from Kalifa's body.”

Lucci stood in front of the three. He seemed ready for negotiation.

“Say the deal first.”

Su Xiao sat down on the wooden box and stared at them. He was still vigilant.

Lucci groaned for a while before he nodded and pulled a den den mushi from his pocket and threw it toward Su Xiao.

After receiving the Den Den Mushi, Lucci directly said.

“Someone wants to talk to you.”

Hearing Lucci's words, Su Xiao thought a little before he finally picked it up.

“Buru-Buru-Buru-Buru...”

Waiting for ten seconds, the call connected, and the face of the snail changed to that close to a human face.

“Moshi Moshi, can you hear me?”

An arrogant voice transmitted through the Den Den Mushi.

“Yes.” Su Xiao answered.

“Are you the guy named Byakuya, you’re only a...”

“Shut up, Spandam.” Another arrogant voice interrupted Spandam coldly.

“Why are you ordering me? We have the same position, Ah! It hurts... I’m wrong... Don’t slap me.”

Noises came through the Den Den Mushi for a while before someone spoke again.

“Hello, I’m Zero.”

The person said with a strange voice.

“Zero?”

Hearing this name that could be associated with the CP department, Su Xiao thought of something.

“It doesn’t matter who I’m, but you need to know one thing, from now on, you’re a member of the world government.”

Su Xiao frowned. The person talking was forceful.

“Oh? Do you think these four can keep me here?”

“Of course not, you have that kind of bomb that could attract the attention of everyone once detonated.”

The answer confirmed that the other party believed that Lucci couldn’t catch Su Xiao.

“Byakuya, a Native of East Blue, aged 25 to 30 years old. Once served as the escort of the king of the Goa and fled once he killed that same king. Eventually arrived in Water 7.”

Zero read the information as if he was holding a treasure. Su Xiao wasn’t surprised; the world government intelligence gathering was just that good.

What he actually didn’t know, the age and name weren’t real.

“Then? You know what I can do.”

There was laughter from the Den Den Mushi, but it was kind of creepy as if the one laughing was an old witch.

“Of course I know, but are you going to keep being on the run? I have investigated what happened, and I know that your only crime was killing the king, which can lead me to just one possibility, Revenge.”

Su Xiao didn't say anything. The other party was smart and could think of many scenarios, which is good for him.

“Join the CP department of the world government. You will have a probing period before you can be a full member.”

Su Xiao didn't know why the other party invited him to join the CP. Weren't they trained from a young age?

“Will the CP department invite someone with unknown origin?”

“Not under normal circumstances, but the bombs you have are important, these bombs have a great strategic significance, you're a special talent, so you're treated specially.”

Su Xiao suddenly realized something.

He remembered the time when The Reincarnation Paradise reminded him of something. It said that when he masters Alchemy, some of the forces of another world will put him as a top priority for recruitment, and if he refuses, it's very likely that he would get kidnapped because of it.

The world government had research facilities specialized in these things.

“It seems that my bombs make me special.”

With this affirmation from Su Xiao, Zero's tone was no longer cold.

“The bombs you make are very good, and their structure isn't complicated, if they are produced in large quantities, they will be of great use.”

“Mass production? Although it's a good idea, don't bother thinking about it.”

“Why?”

Zero's tone was cold.

“Alchemy bombs can only be made by me, it's impossible for anyone else, and it doesn't matter if I give you the recipe, no one can make it.”

The Den Den Mushi didn't make a sound before saying.

“Devil Fruit ability?”

“No, it's a secret technique. I studied this technique for more than ten years. This was the reason why the King of Goa killed my family. He wanted this technique, but, in the end, he couldn't use it. I can only use it, and I can't pass it to others.”

“This is to say. The Alchemy bombs can't be produced in large quantities?”

The voice was a little disappointed.

“No, as long as I have the raw materials, I can mass produce them myself. Of course, this requires the support of the world government.”

“Really?”

“Yes, I can make as much as I want, but I still need their support.”

“I need a specific number of the bombs you can make per day.”

Su Xiao groaned a little. If the world government can provide Raw materials for him, and potions to restore mana, he can make an alchemy bomb in just 40 seconds. Assuming that he can work for 16 hours a day, in theory, he can make about 1,440 bombs per day.

“With enough resources, I can make 1,300 a day.”

Zero was stunned. He was overjoyed by this information. Such a powerful bomb can be even remotely controlled, it was amazing.

“You’re now a full member of the CP0. I will send someone to pick you up right away.”

More than a thousand a day made Zero really excited. A dozen of these bombs can blow up a building, and it can even be controlled from a distance, which made it even better.

“Zero-san, I don’t seem to accept joining the CP department.”

With this technique in his hand, Su Xiao would, of course, rip them off.

Chapter 315: Kalifa Almost Spat Blood

“What’s your condition? You’re a special talent, as long as your request isn’t excessive, the CP department will give it to you.” Su Xiao groaned for a while.

“I want a sword from the O Wazamono series.”

Hearing this, Kalifa, who wasn’t far away, almost fell down.

“Ahem, your request is too much. Even an admiral needs to submit an application to get one, and in this situation, it’s almost impossible.”

“Then a devil fruit, a Paramecia or Logia, Ancient Zoan is good as well.”

Zero was dumbfounded. He didn’t expect Su Xiao’s condition to be so... Isn’t this robbery.

“Byakuya, you need to make possible requests.”

“I like collecting Swords, and I’m a swordsman. I can make it a deal, for every 1,000 Bomb, the World government would provide a good sword either from the ungraded ones or the Ryo Wazamono series. This shouldn’t be a hard request.”

The Ryo Wazamono were swords made a long time ago, and the whereabouts of most of them is unknown. Many tried to make a sword of the same quality before, so there definitively more swords.

The O Wazamno series was different, as the swords were hard to make and also very rare.

“Your salary is a bit... amazing”

He hesitated a little, but 1,000 Alchemy bombs were worth much more than a Sword for the world government.

“For every 5,000 bombs, the world government would provide a series of Swords for you, but the condition is that the swords would only be for you.”

Su Xiao understood Zero’s intentions. But it’s enough as the swords would turn into a pile of scraps after ten minutes from getting them.

“That’s it then, As a member of the CP0, you will get the reward as you help the world government make the bombs and give the secret technique.”

Su Xiao will provide the recipe because if the one making them isn’t an alchemist, he won’t be able to make them.

“I can do that.”

As Su Xiao agreed, his Main quest changed.

[You made a deal with the world government, the strongest force in this world. The Reincarnation Paradise will change your Main Quest.]

Main Quest: Go to Ennies Lobby.

Difficulty: Lv.

Quest details: Another Quest will be given as soon as you reach Ennies Lobby.

Quest Duration: Five days.

Reward: N/A

Failure penalty: You will be forced to return to The Reincarnation Paradise without any reward.

...

The previous quest was completed directly, which gave Su Xiao 1,400 Paradise Coins, which wasn’t high due to his reputation being not high enough.

Su Xiao’s identity changed to [CP0 Full member (scientific research)], which made him interested.

“Three hours later, someone will pick you up from Water 7. The one beside you will protect you as You’re now a very precious talent of the world government.”

As a CP0 Scientist, Su Xiao’s status skyrocketed.

“Zero...-san, Can I know who these four are around me?”

Su Xiao looked at Lucci and the others as he said that.

“Lucci and they are members of CP9; your problem with them is trivial.”

Su Xiao knew that leaving Water 7 now isn't wise, so he thought about something.

“Sir, if I'm not mistaken, the goal of these four is Iceburg, right?”

The Den Den Mushi stayed silent.

“You don't need to worry about this. Your mission is to return to Ennies lobby right away.”

Su Xiao chuckled. He wasn't planning on leaving yet. He won't leave the feast here and leave.

“Zero-san, isn't it better for me to act with Lucci together? I can adapt to the way the Cp works.”

“No, your job is different from them.”

“Sir... Are you going to force me to join the scientific research department? That will affect my mood to make bombs.”

Su Xiao was testing the waters. He didn't know how much the World government wanted his bombs, so he wanted to know.

“Give the Den Den Mushi to Lucci.”

Zero's tone wasn't very good, but he said nothing else.

Su Xiao threw the Den Den Mushi toward Lucci and walked out of the warehouse. After some time, he returned, and Lucci directly threw the Den Den Mushi back.

“I accept your proposal, I should let you adapt to the way the CP department work and their ability, but as a guarantee, you need to show your trust and loyalty to the CP.”

A blue capsule was thrown toward Su Xiao, after checking it, Su Xiao knew that it was a chronic poison.

Su Xiao directly put it into his mouth and swallowed it. Lucci and the others almost choked as a crisp sound came out of Su Xiao's mouth. Although everyone knew what was in the blue capsule, it shouldn't be crisp.

“This is chronic...”

Before Zero said anything else, he heard Kalifa speak: “Sir, Byakuya already swallowed the blue poison.”

“Oh!!” Zero was surprised. After a few seconds, he said: “Well, it seems that you understand the situation. I like people like you. Lucci and the others will protect you, and the poison would only be effective after a week, which is enough for you to come to Ennis lobby.”

Zero directly hung up. It seems as if Su Xiao's act increased his trust in him.

Did Su Xiao really swallow that poison? Of course not. The moment he put it in his mouth, it was directly transferred to his Inventory.

However, He can see from the CP's attitude that they were eager to get the Alchemy bombs. Otherwise, they won't make such a deal.

As for the reward he would get for the bomb, Zero clearly said that he wouldn't have the right to give them, he could only collect them.

In other words, Su Xiao would be the only one to have them while the World government can get them back.

So Except for the Status of being a CP0, the world government didn't give him a thing.

But Su Xiao wasn't surprised. First of all, these words would not return to them after he gets them, and he can go anywhere in Water 7. The CP9 would act as his bodyguards now.

Secondly, mass-producing alchemy bombs would raise his proficiency. So, it would benefit him as well because he would be able to upgrade the manufacturing of the Alchemy bomb to the next level.

But that only if the world government can find the materials needed to make the bombs.

The ones he is using were strange and hard to find, but there should be substitutes in the world. After all, one piece belongs to the category of large worlds. Unlike the other small world, even the difficulty was way higher.

Su Xiao never imagined before that because he mastered Alchemy, he would be treated this way by the world's strongest organization.

Su Xiao's identity changed instantly, which made the four around him except Lucci stunned.

"Lucci, did he really become... a member of the scientific research department of the CP0?"

Kalifa was the most shocked, based on her position Su Xiao had a higher position than her...

"Yes, Byakuya is now our colleague. Although we aren't in the same department, we are tasked to keep him safe."

Hearing Lucci's answer, Kalifa almost spat blood.

Chapter 316: Faction Change!

"This..."Kalifa clenched her fists, making her fingers crackle.

"You want... Me to... Protect him?"

Kalifa wanted to confirm this.

"Yes, even if we sacrifice our lives to protect him."

Lucci gave a clear answer that didn't leave any doubt, with no expression on his face.

"He's an important researcher. The bomb he makes is amazing and perfect for our missions."

After trying to dismantle the alchemy bomb, Blueno knew how terrifying it was.

“Our superior’s orders are absolute.”

Kaku patted Kalifa’s shoulder, trying to comfort her.

“I...” Kalifa lowered her head while her shoulders shook.

Lucci looked at Kalifa without a word. The latter took a deep breath and calmed herself down.

“Yes, our mission is above everything else.”

Kalifa tried to make the dissatisfaction in her heart disappear, but every time she tried, she would remember how she was humiliated.

“The mission is our top priority.” Kalifa tried again.

“Byakuya, please help Kalifa remove the bomb, we are on the same side now.”

Lucci didn’t use a commanding tone to talk to Su Xiao, as they had the same rank now.

“Of course.”

Su Xiao jumped from the wooden box and walked toward Kalifa. Suddenly he pressed a hand on her chest.

Kalifa gritted her teeth and said: “Where do you think you’re touching?”

“Do you still care about this level of contact, after all, ‘we did’ before.”

Su Xiao directly started unbuttoning Kalifa’s jacket as he spoke.

“Cough.” Lucci coughed lightly.

“Are you lifting the bomb like this?”

“Yes, I can only make the bomb smaller on her stomach, but the composition of the bomb is toxic, it will kill her in less than half a month.”

Lucci looked at Blueno for confirmation, which he received a nod from the latter.

“Let’s go out first.”

Lucci directly walked out with the others to guard the warehouse.

Su Xiao directly touched Kalifa’s skin with his finger, he could feel the layout of the bombs easily, but it wasn’t easy to negate them.

He didn’t expect this outcome before. As for the first bomb, he could only try to extract the poison from her now. If she died mysteriously, the CP department would come after him.

As he touched Kalifa, Su Xiao started pouring mana into her body and checking the bomb.

After a long time, Su Xiao opened his eyes, looking at Kalifa and said.

“Take off everything. I need you to be completely naked.”

Kalifa’s eyes twitched.

“Even the underwear?”

“What are you saying, the bomb is corroding your stomach if you don’t want to die, take it off.”

Kalifa took a deep breath and did as he said. After convincing herself that this was to save her life, she calmed down.

Su Xiao pointed a finger about her navel by about 10 centimeters and directly poured a large amount of mana into her body.

“This cool energy...”

“Don’t talk, slow down your breathing, no forget that, hold your breath.”

Su Xiao closed his eyes. It was easy to locate the bomb, but it wasn’t as easy to lift it off.

Half an hour later, Lucci and the others were hearing strange noises from the warehouse, which made them speechless.

A few minutes later, the warehouse door opened as Kalifa walked out with a tired face.

“Give me food.”

After saying this, Kalifa fell to down, just as Kaku wanted to help her, Lucci stopped him.

“Byakuya, Kalifa troubled you. Our identity can’t be revealed currently, so please don’t speak about anything of this.”

After saying this, Lucci looked at Kalifa and said.

“Inform Byakuya of our plan for that day.”

Their real purpose was to steal the design of Pluto, the ancient weapon. They were acting for five whole years just to get it.

And a few days before, they receive a mission to arrest Nico Robin, who was now with the straw-hat pirates heading toward Water 7.

Finding Nico Robin surprised the world government, which directly issued this mission to the CP9. Even if they couldn’t get Pluto’s design, they had to arrest Nico Robin.

The reason why the world government didn’t do much about Pluto’s design being in Water 7 was that it was written in the ancient language that only a few could read in the world now.

But Nico Robin was one of these few, if anyone got the design and captured Nico Robin, that person can build the ancient weapon.

Even if that possibility was one in ten thousand, the world government wouldn’t tolerate such a thing.

This is why the world government wanted Nico Robin dead at all costs.

It didn’t matter if Nico Robin died, or if she went to any other place, the only place she couldn’t set foot on was Water 7, and she was on her way there.

Lucci ordered Kalifa to inform Byakuya about their plan to arrest Nico Robin. The matter about Pluto shouldn't be disclosed yet.

Kalifa got up, looking exhausted.

"I... I will."

After she looked up, she found that Lucci and the others were already far away.

"Well, how about we talk while we eat, I know a restaurant nearby."

Su Xiao stepped forward. This made Kalifa directly step back subconsciously. Kalifa was a spy, a CP9 agent. Something must've happened in the warehouse for her to have this kind of reaction.

Su Xiao brought Kalifa to the old man's restaurant. The latter welcomed him and was very enthusiastic as he looked at Kalifa. To be more precise, he was enthusiastic about having a beauty as a guest in his restaurant.

After eating, Su Xiao and Kalifa went to uninhabited shore. Although the two were close in the eyes of almost everyone, they weren't here for a date.

"Ok, talk about the plans."

Although he knew what their plan was, he still needed to go through this process. Otherwise, they would suspect him.

Kalifa roughly told Su Xiao about their plan to arrest Nico Robin. Before she even finished her words, a new Quest appeared in front of him.

Side Quest: Arrest Nico Robin

Difficulty: Lv.6

Quest Introduction: Escort Nico Robin, to Ennies Lobby.

Quest condition: If Nico Robin dies before reaching Ennies Lobby, the quest would be a failure.

Duration: 3 Days.

Reward: 5,000 Paradise coins.

Quest failure Penalty: Reputation with the world government: -700.

...

Su Xiao directly accepted the Quest. After all, these were 5,000 Paradise Coins for free.

After that, Kalifa said: "You will only have to hide this information, you don't have to do anything else. Otherwise, there would be chaos."

"What?"

Su Xiao stared at Kalifa, who recovered her strength after eating. She was provoking him now.

"You know what, I didn't fight you yet, I can get some experience in the Rokushiki while we fight."

Su Xiao pulled out Dragon flash, directly pointing it toward Kalifa.

Kalifa was so happy. She finally had the chance to teach him a lesson.

Chapter 317: The night before the Feast!

Fifteen minutes later... Kalifa was lying on the ground full of sweat while tied with a metal wire as she breathed heavily with a torn skirt covering her lower body. "Let me go." Kalifa struggled.

"I can let you go if you explain how Soru works to me."

Kalifa groaned for a while. Su Xiao was now a member of the CP, and it wasn't against the rules to tell him about the Rokushiki.

"I can do that."

Loosening the wire, Kalifa looked a little depressed. She couldn't fight Su Xiao even while he didn't have the bombs inside her body.

"You have a primary grasp of the Soru?"

"Yes."

Kalifa started to explain Soru, but in exchange, she wanted two alchemy bombs.

Soru didn't hear the Reincarnation Paradise's notification. He was so immersed in Soru that he entered a strange state of mind.

When the explanation ended, Su Xiao found out that Soru's level increased from 1 to 3. He can now use it to move greater distances with much better accuracy.

Although he can't use it in combat, escaping with it was no longer a problem.

"I can only tell you this, as this is my current understanding of Soru."

Kalifa tidied her clothes as she said.

Su Xiao took out two alchemy bombs and threw them to Kalifa. The latter was scared out of her mind as she quickly caught the bombs.

"Hey, this is a bomb, do you want to kill me?"

Kalifa's forehead was filled with cold sweat as she looked at Su Xiao with fear.

"Alchemy bombs are very stable. They won't explode when they're hit unless they are squeezed hard. If you want to use them... Focus your mind on the bomb and control it with your thoughts."

"Thoughts?"

"Yes."

Kalifa stared at the bomb and muttered.

"Explode, explode, explode ..."

When she started muttering, Su Xiao almost laughed out loud, seeing this. She had such a funny (cute) side.

“Control it with your mental power, not voice.”

“Oh?” Kalifa was surprised as she once again focused on the bomb. Suddenly the surface of the bomb turned red as it was about to explode.

“This is really... a magical bomb.”

Stopping the bomb, Kalifa stored it away, and her eyes turned toward Su Xiao seriously. She wanted to tell him about the plan.

“The operation will start at 9 am tomorrow. The goal of this mission is to arrest Nico Robin, also known as the devil’s child, with a bounty of 79 million berry when she was a child.

Over the years, the CP tried to capture Nico Robin; however, as she grew older, she became better at hiding and escaping while also getting stronger. She often joins pirates to evade the CP department hunts.”

Kalifa didn’t mention their mission to get the ancient weapon Pluton for now.

“This time, Nico Robin joined the Straw Hat group, and according to how she previously acted, she would escape using them. But the weird thing is, she is coming to a dangerous place like Water 7, which usually she would avoid at all cost...”

Su Xiao waved his hand.

“The point is?”

Kalifa was a little displeased, but she couldn’t do anything to Su Xiao. He was her nemesis, which left her helpless. She can’t compete with power, as for IQ... It made Kalifa desperate. She almost warmed his bed before.

Taking a deep breath, Kalifa continued: “Our purpose is to capture Nico Robin. Of course, Lucci will take care of this, and you will know when it happens. And there is another side mission as well.”

The other mission is definitively about Pluton. When they go to get it from Iceburg, Su Xiao will find out, so she just left some information now.

“Simply put, we capture Nico Robin tomorrow morning.”

“Yes.”

“See you tomorrow, then.”

Su Xiao turned around and headed toward the Hotel while thinking about the action he should take tomorrow.

If the information from the CP department is correct, the Straw-hat pirates will arrive tomorrow by noon.

There would be a festival tomorrow with a great number of contractors coming to join the fun. Most likely, some would want to kill other contractors, and some would go for the plot characters.

As he entered his room, Su Xiao directly went to bed to rest and prepare for tomorrow's feast.

The next day at eight in the morning, Su Xiao left the hotel with Bob and directly went to Dock No. 1, where he would meet the others.

When he arrived, Su Xiao was surprised to find Lucci and Kaku building a ship.

“You guys...”

Su Xiao was the one guarding Dock No.1. It wouldn't bring any doubt to his identity if he talked to them.

“One hour left.”

Kaku wiped his forehead, and Su Xiao was still surprised.

“You guys want to finish this ship?”

Kaku stopped for a moment before smashing a nail down. A few seconds later, he said.

“We started working on this ship for about a month now, this is the most satisfying ship we made, me and Lucci, so we want to complete it and let it sail.”

Bong! Bong! Bong!

Kaku and Lucci continued working on the ship.

For the CP agent to be this diligent in their work was surprising, they were undercover for five years and still wanted to finish this boat.

The five-year career would come to an end, and they would have to become agents again. Lucci was without any expression, while Kaku seemed unhappy.

Perhaps he wanted to be a shipbuilder rather than a CP agent.

Well, the CP training was harsh, and most of their members were orphans or trafficked there to become agents.

After the horrible training and elimination, they became the ultimate ace of the CP9.

Su Xiao found a chair and sat down. It didn't take long for Kalifa to arrive for her daily inspection.

Kalifa went toward Su Xiao and sat on his lap intimately while shoving a not in his pocket.

After a while, Kalifa opened and closed her mouth, as if she was talking, but no sound comes out as this was just a way to clear suspicion.

After a few minutes, she just stood up and walked away as her mission was to stay with Iceburg in the mayor's building, so the latter won't find anything strange.

Su Xiao opened the note, and after reading it, he got up and left Dock No.1.

Lucci and Kaku were still building the ship. It would be finished soon, and perhaps, this was the last time they build a ship.

Chapter 318: The Capture!

Walking along the road, Water 7 was busy. Today was different from normal as a big Tsunami was coming toward Water 7! This was named the Aqua Laguna, a high tide that would engulf part of Water 7 each year.

This was supposed to be a disaster, but with mankind's wisdom, they turned it into a fortune.

As the tsunami hits the city, everything would be washed, and due to that, Water 7 won't have any kind of disease.

With this happening each year, rarely can a case of disease outbreak happen in Water 7.

Aqua Laguna had other benefits, and because of this, the people of water 7 didn't abandon their island.

Aqua Laguna holds an extraordinary significance to Water 7's residents. They hold a celebration each year before it strikes.

They put costumes and masks and head toward the city center.

Every year, they gather in the center of the city and start praying to the god of the sea to bless them.

The same was true this year, similar to previous years. People started getting dressed and put on their masks.

The gathering was a form a tribute to the god of the sea, a kind of sacrifice. You can see this from their masks, which were solemn.

Su Xiao came to a tavern close to the gathering and pushed the door open. The tavern was full of guests, which caused Su Xiao to hesitate.

He went out again before looking in a map, then thought: "Yes, this is the place."

The sign outside caught Su Xiao's attention. It said Aqua Laguna celebration, Drinks for half the price.

So that's why there were so many guests inside.

Entering the tavern, Su Xiao saw Blueno, who had acted as a Bartender for this mission.

"Blueno-san, another drink."

A drunk man knocked on the bar with his empty glass with impatience.

Blueno took the glass and filled it when he returned it. He saw Su Xiao sit down in front of the bar and directly asked.

"Guest, what can I get you?"

"Rum."

Blueno nodded and handed him a glass before knocking on the bar and attracting everyone's attention.

"It's nine-thirty, almost time for the celebration, the Tavern will be closed."

Hearing Blueno's words, the guests weren't happy with this.

"Close it later, were drinking now."

"Yes, you stupid guy, it's half the price, and we still didn't empty your cellar yet."

The place was filled with laughter, and Blueno smiled at this.

Although reluctant, the guest got up and left after paying up. Blueno directly cleaned the messy place up.

"You will never come back here... Is it necessary to clean it?"

Su Xiao sat down in front of the bar and kept drinking, while Blueno didn't say a word as he cleaned.

After the tavern was spotless, Blueno took off his jacket and neatly folded it before putting it on the bar.

Blueno closed his eyes as if he was meditating, as soon as he opened his eyes, he turned from a bartender to a spy.

He somewhat used to this life.

"Come with me, we can't be seen by the people, many know me, and we can't expose ourselves."

Entering a room behind the tavern, Su Xiao saw two sets of clothes lying on a wooden box. They were the celebration of common clothes.

Su Xiao picked the mask, which was full white with two holes made for the eyes, and the robe which covered the body shape.

"We can wait here, if the Straw-hat enters the city, we would be informed."

Su Xiao nodded, took a chair, and sat down, seeing the costumes prepared by Blueno, Su Xiao could guess his plan. They would wait for the straw-hat on the island, and as soon as they land, they will capture Nico Robin.

After two hours of waiting, there is no news about the straw-hats.

"Puru-puru-Puru-puru..."

Blueno's Den Den Mushi suddenly rang. Picking up, Blueno said.

"Got it."

Blueno hangs up after getting the message, which was a code number.

“The straw-hats landed on Water 7. They are in the back-street direction. Nico Robin is shopping with a blue-nosed Reindeer.”

“They don’t have anyone else around?”

“There are several suspicious people and other forces that should be after Robin.”

Su Xiao didn’t say anything and directly got dressed.

“Your dog.”

Blueno looked at Bob.

“Not a problem, it can follow us.”

Bob barked twice. They were good partners, and Bob was good at hiding, he always found ways to hide.

When they were in the warehouse, Bob pretended to be a sculpture. In short, Bob could hide anywhere and plan sight without anyone noticing.

Blueno didn’t say anything. Su Xiao had a higher-ranked position than him. He couldn’t order Su Xiao. He also needed to protect the latter as he was an important researcher. He didn’t know why Su Xiao was even participating in this mission.

Leaving the tavern, the two went straight toward Robin’s location, at this time, Blueno’s Den Den Mushi rang again.

Both directly entered an alley, and Blueno picked up the call.

“Based on their route, they would pass by here shortly.”

Su Xiao looked around, the face mask affected his vision but not that much.

After a while, one person and one deer appeared in their sight. Robin and Chopper.

Su Xiao and Blueno directly walked in.

Chapter 319: Conditions!

Because of the masks, Robin didn’t notice anyone following them. She was scanning her surroundings carefully. Su Xiao could tell that this was a habit developed by Robin as she was hunted down by the Marines and world government for years.

Robin was tall. She had beautiful, healthy skin and soft black hair that dropped over her shoulders. Her dress was black, highlighting her hourglass figure.

“Mr. Ship Doctor.”

Robin was still not a valid crew member, so she was still using these nicknames.

“huh?” Chopper looked at Robin. He was a reindeer who ate Human human fruit, which granted him an IQ no different from a human.

“There is a bookstore there.”

Robin pointed at the bookstore in the distance.

“Really?”

Chopper directly rushed out. Medical books were a temptation Chopper couldn't resist.

The scene made Robin a bit sluggish, but she still smiled. The Straw Hat Pirates were different from other pirates, if possible...

Robin shook her head. She couldn't stay with them. When she arrived in Water 7, she already decided to part ways.

Although that would make them resent her, she must do it so they won't get hurt.

That's right, Robin already thinks of them as her friends, her Nakama!

Chopper rushed to the bookstore, before stopping and asking Robin: “Can we go together?”

Robin chuckled as she looked at Chopper with a smile.

“Of course, let's go!”

“Great!”

At this moment, two figures were still following from behind as they passed by Robin, each from one side. At this moment, the noise from the crowd disappeared from Robin's ears.

“We're CP9.”

Blueno said, which made Robin stiffen in her place, and her mouth was slightly opened as a light breeze blew her hair.

“The reindeer will be taken with us as well.” Su Xiao said.

“No.”

Robin's shoulders shook.

“You don't have the right to choose, Blueno. You can go, I will hold Nico Robin.”

Blueno turned around.

Robin's teeth were clenched as she held out a dagger out and whispered.

“Do you want to take my dead body back?”

Blueno stopped.

“Robin, it's a great bookstore, there are many books there.”

Chopper shouted from a distance.

Robin tried to smile at Chopper.

“Well, I will go buy a mask from over there first, and if you couldn't find me, return to the ship first.”

Chopper returned to the bookstore hesitantly. For some reason, he didn't want to be separated from Robin, and he didn't know why. It seemed as if they separated now, he would never see her again.

“Then... Then I won't go.”

Robin's heart tightened as she said: “It's okay, remember to help me find some history book. I will be back shortly.”

The chopper was relieved and directly ran into the store happily, but what Chopper didn't is that Robin had a dagger in front of her chest.

Su Xiao couldn't let Robin die before she is in Ennies lobby, because if he did, he would be directly teleported to the Reincarnation Paradise.

He can make a fortune in this world and get greatly stronger, but if he was to be forcefully summoned back to the Reincarnation Paradise, it would a big loss for him.

Seeing Chopper enter the bookstore, Robin was relieved as she followed Su Xiao from behind.

Robin already knew that this what awaited her from the moment the CP9 approached her. She knew that there was no way to escape.

Robin stared at Su Xiao's back indifferently; somehow, she felt tired. She was on the run since she was eight years old and was betrayed countless times.

She didn't know when she started cunning people and scheming to protect herself.

There was no pirate group that would reject her. After all, she knew how to read the ancient text, and Roger's legend was inseparable from these Poneglyphs.

“I'm so stupid.”

Following behind Su Xiao, Robin murmured, she was laughing at herself. If she used the Straw Hat as she did with others, she wouldn't be here. But she couldn't bring herself to do that. She could imagine those people drowning in their own blood.

Su Xiao took Robin to an abandoned warehouse. After entering, Su xiao took the mask and the robe that hindered him.

“What are you doing?”

Su Xiao's action surprised Blueno.

“It's alright.”

Blueno quickly understood what Su Xiao meant and nodded.

Robin saw Su Xiao take off his mask, and her arms trembled.

The CP9 was secretive, and their members wouldn't like anyone knowing what they look like. Which meant the other party didn't intend to let her live.

“Nico Robin, you are under arrest.”

Blueno spoke, but he didn't take off his mask, so he sounded somewhat dull.

"I can go with you, but I have a condition."

Robin's body stopped trembling. She was tired and didn't want to hurt anyone to survive any longer. She no longer wanted such a life, so a smile appeared on her face.

"You are not in a position to negotiate."

Blueno directly rejected.

"No, I have a lot of knowledge, which is what the world government desires, not just the Poneglyph, but also other things. That is the reason the World government never tried to hurt me."

Robin drew the dagger and placed it on her neck, which showed her determination.

Blueno's face changed, and the situation wasn't good at all.

Su Xiao's suddenly wrapped Robin in metal wires.

Tightening the wires around Robin's body, Su Xiao made it so she can't move at all.

"Blueno, can you stop bleedings?"

Su Xiao's words confused Blueno.

"Why?"

"If you need her alive, we can just cut her limbs off and take her."

When Robin heard this, her throat felt dry, and her hands trembled.

Blueno looked at Su Xiao in amazement. He had a feeling that Byakuya was a special agent. No, he was even more brutal than one.

As a matter of fact, Su Xiao could pretend to be even darker than this. The special agent was nothing to him.

A crisp sound came from Robin's mouth as the blue liquid flowed out of Robin's lips.

"You can control my body, but can you do the same for my mouth? My mouth is full of poison, currently."

Robin still had this method. Considering that she escaped from the World Government since she was a child, it was surprising actually.

There are two poison capsules in Robin's mouth, the shell of each capsule was strong, so it didn't matter if she swallowed them by accident.

But, if she broke the capsule open and the poison was swallowed, Robin would die in ten seconds, which was her last resort.

Chapter 320: Bombing all the way!

As Robin always dealt with Pirates, she had this method as a last resort to prevent herself from being humiliated or tortured. "It seems that you could escape all these years for a reason. What do you want?"

Of course, Su Xiao knew what she wanted.

"Oh!" Robin spat the poison from her mouth, leaving her with just another poison capsule in her mouth as the last straw.

"I want you to let go of the Straw hat pirates. I will trade my life with theirs. As long as you promise to let them go, I will come with you willingly."

Su Xiao thought for a second then smiled.

"You... What are you going to do?"

Seeing Su Xiao's smile, Robin felt a chill pass through her body as she stepped back unconsciously.

"Blueno, it's up to you, there are a few 'guests' I need to entertain. I'll go say hello."

Su Xiao slowly pulled Dragon Flash, as he felt a few contractors coming from the Abandoned warehouse.

Blueno looked at Su Xiao in confusion before he heard the sound of footsteps.

"Byakuya, wait, I will deal with them..."

Su Xiao didn't stop or even care about Blueno's words as he left, which made Blueno awkward.

Su Xiao was an important scientific researcher for the world government, he shouldn't die, neither can they let Nico Robin escape.

"Nico Robin, CP9 agrees to your request, but you must not resist or try to escape while we escort you to Ennies lobby, or else, the Straw-Hat pirates are done for."

Robin nodded as this was the result she wanted when she made her condition.

"Well, I won't run away, but... Is that man a scientific researcher?"

Robin looked at Su Xiao's back as she couldn't understand when we're the researchers so scary.

"You don't need to know that, now stay here."

Blueno struggled as he talked, before finally whispering: "Soru!"

Boom!

Blueno suddenly stopped as if he hit an invisible wall. He stabilized himself with a bloody nose, as he said.

"This... What happened?"

A transparent shield appeared around the abandoned warehouse trapping Blueno and Robin.

A few hundred meters away, a teen about ten years old sat on three stories high roof while dangling his legs down.

“The CP9 agent is stupid, he directly hit the shield, but his actions are somewhat cute.”

The young man smiled proudly. If it wasn't for his voice, most people would think he was a girl. Because her appearance was just too beautiful to be a guy (T/N: A traap!! Weeeell...).

Although it was strange describing a young man as beautiful, this was the case here. (T/N: Cringy, I feel stupid writing this.)

The young man was like a puppet with long silver hair dropping over his shoulder. (T/N: Seriously, stop describing, no one cares!! I literally don't want to write this now.)

“Little Sissy, are all of them trapped?”

A lazy female voice was heard by the teen, whose face turned dark as he almost attacked the woman.

“Don't call me that I have a name, and it's Li!”

Li looked angrily at the woman behind him as a pair of weak, mellow hands wrapped around his neck.

“Don't get excited, Little Sissy!”

The woman, with a pair of 36D, squatted behind Li and said with a charming and lazy voice.

The woman had red crimson eyes, her face was abnormally white, and her nails were somewhat sharp.

“Hey... Don't touch me, you Bichi!” (T/N: Japanese there!!)

Li was being held by the woman when the latter heard him call her Bichi. Her face became cold.

“What did you just call me?”

The woman's hand reached into Li's clothes, which froze as the sharp nails touched his skin.

“No... Nothing, Lilith-nee.”

“Really, but your blood is so tempting.”

(T/N: Ok, this is getting weird, first a trap, then a bichi, who so happen to be a Shotacon!!!)

Lilith's eyes turned redder as she inhaled Li's scent.

“Ha, ~ ~”

A cold chill runs through Li's spine.

Li was getting red as he blushed.

“We'll be fighting soon. There are enemies here.”

Although Li was blushing, because he was too young, his body didn't react much to Lilith's advances.

Lilith put her tongue and licked Li's neck while reaching with her hand to his lower abdomen. (T/N: Weeeeeell, Su Xiao were the hell are you, this is getting out of hand, please show up and release me from this torture!)

Li's heart shook as his 'little brother' was about to get exposed.

"The enemy is here!" Li directly said.

(T/N: Thank god, Su Xiao, from this day on, you are my savior, I believed in you.)

Lilith's actions stopped as the red in her eyes receded.

"These stupid genes almost did something stupid again."

Lilith calmed down as she sighed a relief. Her condition gave her trouble sometimes. She looked at Li before saying: "How many?"

Li pointed his finger.

"One, his main weapon is a sword. I can't tell his strength attribute, his agility as well, his Vitality is 25 and his intelligence... can't be detected.

Lilith was shocked hearing this.

"I can understand when you can't get his strength and Agility, but how come you can't detect his intelligence as well? And what's with the distribution of points? Is he going for versatility?"

Lilith directly said.

"Contact the others and make them block the enemy, it doesn't matter if they die, just try to stop him."

As soon as she was done saying that, Li's face paled.

"They... Were taken down... It took only... 5 attacks from his sword."

"What?"

Lilith was horrified. Most of the time, she would form an adventurer group with Li and her as the main force, while getting a few casual contractors just to sacrifice them or use them.

"Not good, we ran into someone strong, we need to run away."

Bang! Bang! Bang! Bang!...

Six shots directly connected with Lilith's abdomen and chest. Blood flew from various positions as she was knocked down.

"Sniper!"

Lilith grabbed Li on the ground to use him as a shield.

All the six bullets had really high damage, which made Lilith think that there was a sniper.

Li was angry at Lilith, she wanted him to be a shield, but he didn't say anything, because if he did, a conflict would be created, and that would result in their death.

“Shining Shield.”

A transparent shield wrapped around them.

“Get up. It's not a sniper. We met the gunner. The guy is an all-rounder.”

Li broke free from Lilith's grasp, directly tearing his clothes and revealing his white back.

“Gunner? It would've been better if it was a sniper, where is he?”

Lilith couldn't sense Su Xiao's position as she laid on the ground.

“At...” Li was about to speak, but suddenly a white object was thrown at them.

Li sensed the object which looked like chewing gum.

“Damn, it's a bomb.”

Li quickly fell to the ground and curled his body while inside the Shield. He looked smaller than a turtle.

When the bomb landed on the roof, it turned red quickly before it exploded.

The impact directly blew Lilith, who rolled a few times across the roof before stopping.

At this moment, Lilith felt cold. She was practically half dead when she saw who her enemy was.
