

## R. Paradise 331

### Chapter 331

After entering the seventh cabin, Su Xiao quietly locked the doors from both ways before he injected a needle into Franky's back. Franky maybe a Robot, but he couldn't turn his back into one, so it was still flesh and blood.

After confirming that Franky won't be waking up soon, Su Xiao loosened the iron chain around his body.

Tapping on Franky's chest gently, Su Xiao tried to open it.

But he was troubled, it didn't want to open, and he started thinking: Should I destroy it?

Looking carefully, Su Xiao found a switch in Franky's side rib.

Su Xiao moved the switch gently, causing Franky's chest to open. There were three bottles of Cola present inside.

Su Xiao didn't move the Cola, he only looked inside his chest, after some time, Su Xiao didn't find anything.

Franky's body started consuming cola faster as his body shuddered a few times before it stopped.

It seemed to be an emergency measure.

Su Xiao continued to search, but beside major organs, Franky's chest didn't have anything else.

As he didn't find anything there, Su Xiao frowned, Franky's body was big, where can he hide it?

Su Xiao put a hand on Franky's arm and started using his perception to see what's inside.

He did the same for the other hand and legs but found nothing.

So now he searched the chest, arms, and legs, but there was nothing.

Su Xiao was puzzled. Did this mean that the thing he was looking for wasn't on Franky? It was unlikely, according to his information, Franky carried it with him.

Su Xiao started thinking. If he hid it inside his body, where would he choose to hide it.?

First of all, it wasn't something big. Secondly, because it existed for a long time, it was worn out.

It was small and fragile. So, considering this, it would be impossible to hide it inside the chest, legs, or arms.

Where is the least likely place for him to get injured? Suddenly, Su Xiao's eyes turned toward Franky's back.

Pressing with a finger on Franky's back, Su Xiao started looking inch by inch. Suddenly, he felt something when his finger reached his waist and was stunned.

“This is?”

Su Xiao continued pressing his finger and soon found that there was an artificial skin around there.

Lifting the artificial skin, Su Xiao saw a lock in place.

The lock needs a password for it to open, and that code needs three numbers to be unlocked. So the total number of the combination was 987, which equals 504. He shouldn't depend on luck. Su Xiao started recalling some information.

Tom's birthday was on March 16.

Iceburg's birthday was on January 3.

Franky's Birthday was on March 9.

Su Xiao first tried Tom's birthday by typing 316. After entering the passwords, a number appeared.

It appears that he can only try five times, and now, it is four. Else it may self-destruct with what's inside.

If he guessed correctly, the password is probably related somehow to Tom, who has so much influence on Franky.

Franky set the password to only three numbers, so it probably means a birthday.

Su Xiao tried a second combination, 313. It was a combination of the three's birthdays starting with Tom.

The password was still wrong, and he had three chances left. Su Xiao tried 331, but it was still incorrect, and he is left with two tries now.

Su Xiao left their birthdays behind. He thought that the password maybe not a birthday.

Something more important than the birthdays... The day of the sacrifice!! The day Tom sacrificed himself for Franky.

Su Xiao had a headache. There was no mention of when Tom died in the Anime.

With this being the case, Su Xiao started recalling everything about that event.

First of all, Tom was convicted for building Roger's ship, after that, he helped the world government build the sea train to lessen his sins, but the world government even with that found excuses to kill him.

Tom wasn't executed on the spot, but after being shot and wounded, he was escorted to Enies Lobby for his execution.

It was summer when Tom was Executed. It can be concluded by the clothes of the citizens and the Cp agents at the time. It was late summer.

Su Xiao stayed in Water 7 and personally experienced the temperature and weather in there.

Tom was sent to Enies Lobby for his execution in the late summer.

Tom's sin wasn't that serious. He was only an accomplice. The problem is that he helped build Roger's ship. Which meant he would be put to Trial first before they sentence him.

Moreover, since it's an execution in Enies Lobby, it wouldn't be chosen arbitrarily, especially since it's the execution of the legendary Shipwright Tom. And there was some racism between Humans and Fishman as well.

There were many clues. Late in the summer, execution in Enies Lobby, then his body is sent to Fishman island to be buried there.

Su Xiao thought quickly, and finally, he typed 831.

Click!

The password was right, and the lock was opened. Su Xiao took something out from and returned something else. After checking the Item's attribute, Su Xiao nodded in satisfaction before closing the lock again and returning Franky to his original position.

After that, Su Xiao returned to the roof of the train again after returning the glass back in the window.

Directly walking lightly on top of the train, Su Xiao directly went toward the fourth Cabin, doing the same as before. He dried himself up before throwing the wet clothes into the sea.

He reinstalled the glass into the window and left a long sigh of relief.

Su Xiao suddenly found Bob behind him, looking at him intently.

“What, you're hungry?”

“Wuff!”

Bob wasn't hungry. It was just lamenting that the human world was too complicated.

“You're not hungry?”

Su Xiao looked at Bob in astonishment. He recently found that Bob's IQ seemed higher than usual.

Although Bob's IQ wasn't as good as a human, he definitely wasn't stupid either.

“Bob, how many are these?”

Su Xiao stretched five-finger, and Bob's head went down, he didn't want to answer such a retarded question.

“Huh, he doesn't seem too smart.”

Bob rolled his eyes as he felt that his IQ had been insulted like never before.

Chapter 332: Spider Queen

Su Xiao pushed Bob to the edge of the bed as he sat cross-legged. Because Bob was sleeping there, his legs warmed up quickly.

The situation in the Seventh cabin won't be noticed in a short time. So, he took out all the treasure chests and scarlet cards he had from before. He had a blue treasure chest and three scarlet cards.

Among the three scarlet cards, the edges of two of them were tinted in gold. Su Xiao directly used two scarlet cards. Two red swirls appeared beside him, giving him the opportunity to get six items.

Seeing these bloody red vortexes, Su Xiao was stunned. Usually, the vortex was black.

Bob, on the side, rubbed his head on Su Xiao's leg with eyes saying: "Open another one and let me try.

"Do you want to try?"

Su Xiao patted Bob's head.

"Wuff!"

Bob responded.

"Fine then, you can have one."

Directly Bob put his head inside the bloody vortex while Su Xiao put his hand inside.

These two contractors were men. They won't have something as ridiculous as a brat inside.

Fumbling inside for a while, Something touched Su Xiao's hand.

Although the object seemed smooth, it was small.

Su Xiao drew his hand out and directed a prompt from the Reincarnation Paradise that appeared in front of him.

[You obtained Elven Secret Medicine!]

Elven Secret Medicine

Origin: Reincarnation Paradise

Quality: Blue

Type: Potion

Effect: Restore 1% Hp every second for 2 minutes. (time is doubled when in a forest.)

Rate: 70

Description: Although the tree elves are arrogant, their craftsmanship is convincing.

...

Happiness filled Su Xiao. He actually found such a good potion inside an ordinary guy's scarlet card.

Healing 1% Hp every second for 2 minutes, this means that it healed 120%, and if used in the forest, it will become double of that, which means 240% Hp.

This potion was very suitable to be used in battles. Su Xiao can drink the potion in a critical time, and combined with Bob's aura, the Hp he restored per second would make people desperate.

And it was a small bottle as well, so if the situation is urgent, Su Xiao could directly put it in his mouth and bite on it when it's needed.

The bottle was made of resin, which wouldn't hurt his stomach if he swallowed it, and it would be just be digested.

Looking at the emerald bottle in his hand, Su Xiao nodded in satisfaction. This was a very good life-saving trump card, especially if he was fighting in a forest.

Obtaining this made Su Xiao get confident. He once again reached into the vortex and grabbed two items at the same time.

[You obtained a Cucumber!]

[You obtained a disposable Cup!]

Su Xiao was petrified. He threw the cup on the bed as it was most likely used...

Su Xiao threw the cucumber as well and rubbed his hand on his pants...

“Wuff!”

Bob barked as he looked at Su Xiao anxiously.

It seemed as if Bob just went to a supermarket, the items he got were a watermelon, garlic, and once a bag of eggs.

Opening the scarlet cards always depended on luck. You can obtain items that worth a fortune as well as items that aren't worth a cent.

What remained was a Treasure Chest and a scarlet card. Su Xiao preferred scarlet cards, actually.

Bob held the scarlet card in his mouth as he mentioned for Su Xiao to open it.

“Well, let's get some luck then.”

Su Xiao took the scarlet card and lit a cigarette using the Destiny redemption.

With the Destiny redemption used, Su Xiao's luck gained an additional three points that last for 2 minutes.

[Use a level 9 scarlet Card: {Yes} {No}]

Lilith was a level 9 contractor. Therefore, her scarlet card was also level 9.

“Use it.”

A blood-red vortex appeared again, this was bigger than the previous two, and the color was darker and more blood-like.

Si Xiao directly put an arm inside and grabbed an item directly and pulled it out.

{You obtained the Tyrannosaurus Eyeglasses (Ordinary)}

Su Xiao nearly collapsed, but he consoled himself by saying: ‘You can't always obtain everything, the next time won't be this unlucky.’

Once again, Su Xiao put his hand and grabbed an item.

[You obtained \*\*\* (ordinary)]

“&&\$.”

Su Xiao cursed before calming down. Seeing his master sad, Bob rubbed his head on Su Xiao's shoulder, trying to comfort him.

“All right, all or nothing!”

Su Xiao's hand directly entered the vortex again as Bob looked at him anxiously.

Su Xiao touched a hard object, which was somehow big and heavy.

Opening a scarlet card always depended on luck. It was almost impossible to determine the item by just touching it.

Directly taking out the item, Bob didn't dare believe it when he looked at the item Su Xiao grabbed.

“Bob, it seems like this is my lucky day.”

At this time, Su Xiao took a long sniper Rifle, about two meters long. It was jet-black sniper rifle, on the side of the rifle, Su Xiao saw an engraved red spider design.

[Spider Queen]

Origin: Hunter X Hunter

Quality: Purple

Type: Heavy Sniper Rifle

Durability: 50/50

Attack power: 40 ~ 71

Requirement: Strength 27; Agility 31; Intelligence 10

Equipment effect 1: Infrared Detection x8 scope (active): When using this skill, the scope hidden inside Spider Queen would come out, it will directly aim at the target and calculate the distance and other factors, The bullet trajectory won't be out of the calculated trajectory.

Hint: The skill costs 100 Mana, the effect lasts for 20 minutes.

Hint: The skill's Cooldown time is 5 hours.

Equipment Effect 2: Accurate Trajectory (Passive): Fire accuracy increase by 12%.

Rate: 149 (Rate of purple equipment is between 71 and 150)

Description: The will of the Spider Queen won't allow resistance. When it aims at you, start praying.

Price: 41,000 Paradise Coins.

...

Su Xiao felt happy he obtained such a strong Sniper Rifle, and then he felt lucky that he caught Lilith off-guard or else he might've lost an arm.

He would've consumed many potions to just restore his Hp if he fought her when she used this terrifying Sniper Rifle.

Su Xiao carried the Spider Queen in his hand to get a feel. It was very heavy for a Sniper Rifle. No wonder it needed 27 Strength.

The bullets used by this Sniper Rifle was about 20 Mm Bullet.

After a little inspection, Su Xiao discovered that this Sniper Rifle was a high-tech one, as long as he aimed with it, it wouldn't be that far from target even with his terrible aim.

Chapter 333: Your Words Back At You

But the issue here was the bullets, these bullets were special, and Su Xiao didn't hear of ones like that. They were 13.77 caliber bullets and exclusive ammunition for this Sniper Rifle.

Asking the Reincarnation Paradise, Su Xiao discovered that it cost 50 Paradise coins for a cartridge, which means 20 cartridge costs 1,000 Paradise coins. The single-cartridge contains 20 bullets.

Suddenly Su Xiao thought of something, what if he ambushed the contractors and the plot character from afar?

Even if these people succeeded in rushed to Enies Lobby, Su Xiao would be able to put them down using Dragon Flash.

The Infrared detection x8 scope skill will auto-aim for Su Xiao, which will make it really easy for him. He won't be required to master a Sniper Rifle. The more developed a weapon is, the easier it was to use.

Su Xiao combat strategy was about to be completed.

If the enemies are closing up and are too much for him to take on with a sword, Su Xiao would retreat and use Broken Elf, and the enemies started moving back and retreating, he would use Spider Queen. With this combination, the enemies won't have a chance to escape.

The Spider Queen's attack power was very high, and it was several times higher than Broken Elf. Even a single shot can kill.

Putting up Spider Queen, Su Xiao couldn't wait for the final battle in Enies Lobby.

The harvest was pretty good this time. Seeing that there were about 30 seconds left before the destiny redemption effect wore out, Su Xiao directly opened the blue Treasure chest. The Treasure chest flashed with bright light.

Su Xiao's heart was about to jump out. It actually flashed! However, the color was lighter than the last time.

[You obtain 3000 Paradise Coins.]

[You obtain 1000 Paradise Coins.]

[You obtain 500 Paradise Coins.]

[You obtain 2100 Paradise Coins.]

[You obtain 860 Paradise Coins.]

[You obtain 5100 Paradise Coins.]

A big list of prompts from the Reincarnation Paradise full of Paradise coins appeared in front of Su Xiao.

Perhaps the dim light meant that he would obtain Paradise Coins? That's probably it.

The Paradise Coins he obtained from the treasure Chest amounted to 12,560 Paradise Coins.

For opening a treasure chest, the much was amazing. Su Xiao looked at the lighter in his hand and couldn't help think that the name of this thing was appropriate Destiny Redemption.

After opening the treasure chest and the scarlet cards, Su Xiao discovered one thing, this open-world is too dangerous.

He was tempted to hunt down contractors, but he suppressed this temptation. He would only hunt contractors that violated the rules or provoked him, and he would take the initiative without provocation.

After opening the treasure chest and scarlet cards, Su Xiao laid on the bed comfortably while the sea train sped toward Enies lobby.

Because the bed was a little too small, Bob was resting on Su Xiao's belly.

No one could get close to Su Xiao, except Bob, let alone resting on his belly.

Su Xiao took a nap to rest before the commotion starts.

Even if Lucci and the others suspect him, what evidence do they have? Since he is one of the CP0 now, Lucci can't do anything without evidence, even if his status was just words.

It didn't take long before the last Cabin was noisy, and the sound of footsteps became more hurried.

Su Xiao laid down calmly while Bob didn't move.

Boom!

The door of the room was knocked open, Lucci and the others rushed in and stood around Su Xiao in high alert. They were facing away from Su Xiao as if protecting him, but their eyes were looking around trying to find something out of place, but they found nothing.

“Byakuya, there are ‘Enemies’ on the train, we broke into your room without permission only to protect you, please don't misunderstand.”

Kalifa Explained.

“Really, Thank you so much.”

Su Xiao was still lying on the bed with his hand behind his head.

“Ahh!”

Suddenly a scream sounded as Bob bit Kaku's lower back.

Bob wasn't merciful with his bite as he shook his head, trying to take a piece. Bob revealed the wolf side of him.

As long as he bites someone, he won't leave him even if his head was cut off. Only Su Xiao can make him stop.

“Tekkai!”

Kaku snarled and was about to punch Bob.

But at this time, he found a pair of extremely cold eyes staring at him.

“Do you want to... Hurt my partner?”

Su Xiao got up and stared at Kaku.

“Kaku Stop.” Lucci directly ordered.

“Bob.”

Hearing Su Xiao, Bob loosened his mouth as bloodstains dripped from his mouth.

“Kaku, someone suddenly broke into my room, so my partner here wanted to protect me, please forgive me.”

Su Xiao was using Lucci's words against him.

“No... Don't worry.”

Kaku gritted his teeth as he responded. They chose to directly open the door instead of knocking on the door, which was hostile toward Su Xiao.

Franky was attacked, and the CP9 directly thought of Su Xiao, so they directly entered his room, searching for any clue.

“So, did you find this enemy?”

Su Xiao sighed.

“We're still investigating.”

Lucci blocked Su Xiao's sight as Kalifa, and the others took the opportunity to look at the Window.

The door was always guarded, so only the window can be used to go out.

“We indeed were a little reckless right now, so we're sorry for that.”

Lucci took out a pendant. He picked the Pendant from the string, while the stone was carved with the word Blessing.

Lucci grabbed it in a way that when Su Xiao would take it, he would definitively touch the stone.

“Forget it. I don't care.”

Su Xiao didn't touch the pendant, which made Lucci's eyes flicker slightly.

“Please accept it.”

Su Xiao was a little awkward. What's wrong with that thing, was the surface highly toxic or something?

Raising his hand to take the pendant, all the present CP9 members looked at Su Xiao intently.

As his hand touched the pendant, nothing happened at all. He even played with the pendant in his hand.

“This thing is rough, but at least the stone is carved.”

As Su Xiao put the pendant into his pocket, Lucci didn't find anything abnormal and directly said: “We're about to reach Enies lobby, so be ready to get off and come to the third cabin.”

The four of them left the room and closed the door. A smile appeared on Su Xiao's mouth as he took out the pendant and put it inside his Inventory.

After not finding any clue inside his room, Lucci gave him a Kairoseki pendant, to test whether he had a devil fruit or not.

They were about to arrive. And when they do, Su Xiao's opponent would no longer be CP9 agents, but a more cunning world government officer.

Chapter 334: Arrival!

Toot-toot!!

The sea train slowly moved toward Enies Lobby while Su Xiao looked out of the window from his cabin.

Enies lobby consisted of three islands connected together, the first one was the main island, and most of Enies lobby was built on it, it's where prisoners are executed.

There was no night-time on this island, even when a storm as strong as the Aqua Laguna hits, the sun is still shining above this island.

There is a large courthouse inside the island where most of the prisoners get their sentence by a few judges situated there. But most of the time, there would be no need for judges as all the people coming are convicted already.

After the trial, people would be sent to the tower of justice, and this is where the Straw-hats fought against the Cp9 in the original story.

The Gate of Justice is situated behind Enies lobby. The area around the gate was filled with whirlpools that make it hard for any ship to sail there, and only when the gate opens would the whirlpools disappear.

After the prisoners are sentenced, they would stay in the low levels inside the tower of Justice, while officials in Enies lobby would call the Marine to inform them about the prisoners that are to be sent to Impel down, and that's when the Marine would pass by the gate of Justice.

The World government would relax as soon as a criminal enters Enies Lobby, as they didn't think anyone would be bold enough to go there to save someone else.

But in the near future, a few youngsters would stun the world by entering Enies lobby and get out alive while saving their target, catching the world government unprepared.

Su Xiao got out of the see train, along with the others.

Lucci and the members of the CP were surrounding Franky and Robin to prevent anything from happening.

“Hello, is this Mr. Byakuya.”

A beautiful girl with long pink hair greeted Byakuya, she was tall and wearing a red suit and black gloves.

“I’m.”

Seeing the girl, Su Xiao found her familiar. Finally, he remembered her. She was from the Marine.

“I have been waiting for you. My name is Hina, and I’m a Marine Captain of the Marine Headquarters.”

The beautiful Marine captain held a cigar in her hand as she said with enthusiasm.

Su Xiao was a little puzzled, why are there Marine picking him, wasn’t he going to the CP0?

Not waiting for Su Xiao to ask, a notification from the Reincarnation paradise directly appeared before him.

Main Quest: Reach Enies Lobby (Completed)

Side Quest: Arrest Nico Robin (Completed)

The Side Quest didn’t have any follow up quest but and directly disappeared after he got the 5,000 Paradise Coin reward. As for the main Quest, it was as follows.

Main Quest: Enies Lobby’s decisive battle

Difficulty: Lv.12

Quest Detail: Participate in the Decisive battle in Enies Lobby, and get the design of Pluton. The Quest starts in three days.

Quest time limit: 4 days

Success Reward: 5 attribute points, 14,000 paradise coins.

Failure penalty: -28,000 Paradise coins

...

After reading this, Su Xiao’s eyes lit up, he already won.

Su Xiao nodded thoughtfully. When he took the design from Franky’s body, he already guessed that it was a quest item, due to the strange description it had.

Quality: None

Type: Blue-print

Rating: None

Description: The Blue-print of the ancient weapon Pluton, you need to master the ancient language to read it.

...

There was no quality and no rate, under normal circumstances, it would at least be a purple quality item.

Su Xiao didn't waste time. He was already a step ahead of all contractors. When the other didn't receive the quest detail yet, he already had the quest item with him.

The contractors could see the location of the design when the battle starts, and he would still need to fight.

As long as the design was on him, the contractors would definitively come after him.

Su Xiao looked at the Tower of justice in deep thoughts.

"Mr. Byakuya, Mr. Byakuya."

Hina shouted several times with an unpleasant expression.

"Oh?"

As he was thinking, Su Xiao didn't notice Hina talking to him.

"Hina is very angry."

"Oh."

Su Xiao replayed nonchalantly.

"Did Mr. Byakuya think about the proposal? We have already agreed with the CP department on this matter. With your talent, you're not suitable to stay in Enies lobby."

Su Xiao frowned at Hina's words.

"Then what do you suggest?"

"There is a secret Marine base near Enies lobby. We are going to send you there. Please be assured that it would only take half an hour to get there."

Su Xiao thought that this is some deal between the CP department and the Marine.

"You already know about my request?"

"I do, for every 2,000 bombs made, we will provide Mr. Byakuya with a Meito sword."

Hina simply nodded as she recited his request. It seems like this matter was already agreed on by the Marine Officials.

"Ok, but I have a request. I want to return to Enies lobby in three days."

Hina didn't answer directly. She walked aside with a Den Den Mushi before she returned.

“Mr. Byakuya, We agreed with your request. Let's go now.”

Su Xiao glanced at Enies Lobby. He didn't want to leave, this was the main battlefield, he was forced to leave because of the situation, and he won't be able to take advantage of knowing the place in the war.

Su Xiao followed Hina into the warship, but his eyes shrunk as he saw an elderly woman on the ship.

“Why is she here? This isn't good.”

She was the Crane, Tsuru, who was known for having a very high IQ throughout the Marine, and she is really difficult to deal with.

Su Xiao would like to meet an Admiral and not face this old lady.

“So This is Mr. Byakuya, the researcher that we will escort. Hello, I'm Tsuru.”

The Old Lady's voice sounded old, but her eyes were as bright as they could get.

After looking up and down at Su Xiao, Tsuru felt something off and needed to investigate.

Chapter 335: Hina's Bitter Heart!

“Hello, I'm Byakuya.”

Su Xiao didn't say anything else, even if the other party's IQ was too high, she won't figure anything if he didn't say much.

“We're ready to go.”

Vice-admiral Tsuru directly gave the order to set sail. The journey was a short half an hour toward the Marine base.

Su Xiao was guided inside a room where he sat alone, and he started thinking about how to obtain more benefits from the technology he had.

“Wuff!”

Bob suddenly barked, which lade Su Xiao to look at him in doubt.

Bob sat on the ground, looking pitiful while his ears no longer standing straight.

Bob's stomach was twitching, and it seemed like he wanted to vomit.

“Are you... Seasick?”

Although Bob's getting Seasick made Su Xiao surprised, he couldn't do anything about it. At least it wasn't a long journey.

The door to his room was suddenly pushed open. Tsuru, along with Hina, entered the room.

“Byakuya, what are the materials to make the bomb? Before we reach our destination, we'll send someone to get them.”

Hina handed a pen and a paper to Su Xiao, who directly wrote down the materials.

The content of the paper was: Black Gunpowder, Low-level Energy circuit, Matry metal, Aqua regia, explosive frog skin.

After writing the materials, Su Xiao directly handed the paper to Tsuru.

The more she looked at the materials, the more she frowned. Finally, Tsuru asked.

“I know the Black Gunpowder, but what is this Low-level energy circuit, and this Matry metal? Aqua regia? Explosive Frog Skin?”

Hina leaned over, looked at the list, and was directly stunned. She couldn't recognize most of the materials. Actually, she only knew the black gunpowder.

“The Low-level energy circuit is a wire, with R7P3T conduction properties. It is very sensitive to energy, and only using it would the bomb be remotely controlled...”

Tsuru, who didn't understand at first, finally got what the Low-level energy circuit was with the help of Su Xiao's explanation.

“Aqua regia is a mixture of nitric acid and hydrochloric acid, optimally in a molar ratio of 1:3. Aqua regia is a yellow-orange fuming liquid, so named by alchemists because it can dissolve the noble metals, gold, and platinum, though not all metals, the name was given to it because of the strong corrosiveness it held...”

Tsuru listened intently while Hina stood beside her.

“I have explained them thoroughly, so it shouldn't be hard to find them, also if you guys can't find some of them, you can look for something with the same properties.”

Su Xiao looked at Tsuru and smiled. This is his field of expertise, and even if her IQ was high, it's useless here.

Tsuru was slightly embarrassed as he coughed and said: “I think I understand.”

“Oh? Ok, then when looking for the substitute of the explosive frog skin, you must look for the following properties: Strong water resistance, good conductivity, No toxin...”

Su Xiao continued to explain while Tsuru was getting a headache.

Five minutes later, Tsuru's eyes were dropping while she felt her head about to explode.

Right now, Tsuru was sure that Su Xiao wasn't making this up and indeed had great talent as a researcher, even though she didn't understand most of what he said.

“Hina, did you remember everything?”

Tsuru looked at Hina, who was writing from the start and smiled.

“Yes... but there are a few things that I couldn't follow.”

Tsuru sighed. She wanted to give Su Xiao a hard time to figure him out, but it seemed that the situation was reversed now.

“What did you miss?” Su Xiao looked at the paper in Hina’s hand, wanting to help her.

“Then, let’s continue.”

“Continue...”

Hina’s mouth opened wide while her head was about to explode.

“Yes, this is one-twentieth of the formula that you recorded. Although it will take some time, the process can’t be neglected.”

Tsuru’s lips twitched before she got up and started walking out.

“Hina, I’ll hand this task over to you, I will contact someone to pick up the materials for us.”

Hina opened her mouth, but nothing came out.

“Miss Hina, let’s continue.”

Su Xiao continued to dictate the recipe, and Hina was recording them down.

Ten Minutes later, Hina’s eyes were dull, and her mind was filled with various chemical and math formulas.

“That one...”

Hina spoke weakly.

“Huh? Why are you tired. We still have four-fifths of the recipe to record. We can continue after a short break if you want.”

Hina’s eyes were dark. There are still four-fifths? The only thought on her head currently was to run away. She was willing to fight anyone but not stay here and record more formulas. This is simply torture.

“Although it’s rude of me to ask, can Mr. Byakuya right them himself? I’m a marine who doesn’t understand a thing about scientific research, look I even wrote some formulas wrong.” (T/N: If you don’t know about them, how did you know they were wrong in the first place?)

Hina looked at Su Xiao with expectation.

“This...”

Su Xiao looked at Hina, who smiled at him and said.

“Please.”

“Ok.”

Su Xiao took the pen and paper, and Hina directly walked out of the room.

Coming out, Hina rubbed her head slightly while looking up, only to find Vice-Admiral Tsuru looking at her.

“How did it go?”

The dissatisfaction was apparent in Tsuru’s eyes, and Hina felt bitter in her heart as she thought: ‘You can’t stand it after you ran away?’

“He isn’t easy to deal with.”

Vice-Admiral Tsuru sighed.

“What?”

Hina looked at Tsuru and asked suspiciously.

“Nothing, but Hina, what kind of feeling does this Byakuya gives you?”

This question made Hina ponder a little before she replied.

“He feels and smell like blood, even after taking a bath and changing clothes, he still had a bloody smell on him. And he often looks at my chest and throat.”

Tsuru laughed lightly and said: “It’s not strange for men to look at your chest.”

Tsuru looked at Hina’s huge 36D and shook her head.

“No, he isn’t looking like that; he is judging the location of my heart. Rather than being a researcher, I feel like he is a fierce and cunning pirate.

Hina sounded sure about this.

“Good perception.”

Tsuru patted Hina’s shoulder and said.

“That guy’s temperament is like Shiryu’s, but the two of them are different. While Shiryu is killing just for the joy of it, this person has a clear purpose. Although he isn’t as strong as Shiryu, he would be harder to deal with if he isn’t controlled well. He is a double-edged sword. His talent as a researcher is beyond doubt, and he exceeds the world’s standards when it comes to making bombs... But I don’t feel any kind of goodwill or loyalty from him.”

Tsuru tested Su Xiao.

“Tsuru-san, what should we do?”

Hina was closer than most people to Tsuru, so the way she addressed her was closer as well.

“Let’s watch for now. Someone will keep watch on him on that island. That person is always there on that island.”

## Chapter 336: Vegapunk

The warship slowly got to shore. Su Xiao walked out of his cabin followed by Bob.

An island came to his sight. This island was covered by trees, and no one seemed to live there.

Su Xiao could see the watchtowers vaguely amongst the tree. He could only see less than a dozen watchtower. But he could tell that they were scattered all over the island.

The island seemed ordinary with no one living on it, but once an enemy approaches, they will open fire. And by the word open fire, he meant the cannons hidden in trees all over the place.

Jumping into a small boat, Tsuru, Hina, and Su Xiao moved slowly toward the island. There was no dock for a large warship to stop by, so the only way in is by small boats.

Reaching the shore, Su Xiao jumped down to the ground. It seemed as if no one was around, but he could tell that at least a hundred Marine was waiting in the forest.

“Byakuya, I can only send you here, someone will lead you next. Hina will be responsible for your safety, and if you need anything, you can ask her.”

Tsuru only escorted Su Xiao to this island in fear for other forces trying to reach out to him on the way.

Vice-Admiral Tsuru took the boat back directly, making Su Xiao relieved. Finally, he didn't have to compete with Tsuru in the IQ department. He already had a headache.

“Let's go.”

Hina walked forward while Su Xiao looked around. The Marines lurking nearby weren't hostile.

As soon as they got into the forest, the air became fresher. No large animals were around since they were probably wiped by the Marine.

Su Xiao sensed at least a hundred gun aimed at him, while none was aimed at Hina.

With Hina's lead, they finally could see a large building made of steel from afar. This was a large laboratory.

Two people were waiting at the entrance, one of them was tall while wearing a yellow suit, yellow sunglasses, and white coat written on it was the word justice.

The man's face was full of wrinkles, and you could tell he was a lazy person from his expression.

Su Xiao's heart froze as soon as he saw him.

It was one of the three current admirals, Borsalino, or known as Kizaru, someone who ate the logia fruit of light, proficient in Haki, and wasn't a weak swordsman.

“Yo, finally you're here.”

Kizaru spoke slowly, as if he wasn't in a hurry, contrary to his speed, which is the speed of light or almost there.

“Old man, this guy's temperament seems wrong, not anything like a researcher.”

Standing next to Kizaru stood a fat white boy named Sentomaru, the captain of the Marine's science force.

Sentomaru, who is proficient in Haki, instantly noticed Su Xiao's wrong temperament.

Kizaru took a picture and looked at it before shaking his head.

"No, this is the researcher we had to pick up."

Kizaru's eyes narrowed slightly. He certainly felt something wrong with Su Xiao. In fact, he wouldn't have come personally if it wasn't for this exact reason being reported.

"Admiral Borsalino, the target has been escorted."

Hina saluted Kizaru.

"Well, Sengoku told me that this guy is called Byakuya, before entering the laboratory, I have to make sure it's the right guy."

Kizaru looked at Sentomaru, who directly took a video Den Den Mushi.

"Byakuya-san, can you show us the bomb you make?"

Sentomaru pointed the Video Den Den Mushi toward Su Xiao, who already prepared for this kind of situation.

He directly took out the bomb and starting changing its shape.

Kizaru looked at the bomb strange.

"Can anyone control that bomb?"

"It can be controlled to a certain extent, but it's not that flexible."

Su Xiao threw the Bomb toward Kizaru then told him how to control it.

Although the bomb on reacted slightly to Kizaru, he was still satisfied with this.

Kizaru directly detonated the bomb in his hand. As the fire spread all around them, Kizaru was unscathed.

"It's power is also satisfying."

The Den Den Mushi on Kizaru's person rang. It took Kizaru a while to find it and respond.

"Moshi Moshi!"

"Sengoku is talking."

Kizaru took the Den Den mushi and walked away. Before long, he returned and put the Den Den Mushi away.

"Byakuya, today, you can adapt to the new environment, and tomorrow you will go meet someone."

Su Xiao shook his head.

“There is no need for rest.”

Kizaru raised his eyebrow and looked at Su Xiao.

“You’re really a hard worker. You can go meet him now.”

As the group entered the laboratory, Su Xiao noticed how complicated it was. You can even call it a maze at this point.

After a few minutes, Kizaru took them toward a certain block.

Sound of metal moving and being hit reverberated all over the hallway, as Su Xiao entered the block, an experimental platform entered his sight.

A seven meters tall man was lying on top of the platform, his upper body was shirtless, and no flesh could be seen on top of his chest.

He was modified.

Seeing this, Su Xiao’s eyes lit up. The man on the platform was Bartholomew Kuma, one of the Shichibukai.

Beside him was a thin-looking man about one meter eighty who seemed busy.

“Dr. Vegapunk, are you still modifying Kuma.”

Hearing Borsalino’s shouting, Vegapunk seemed unhappy.

“Don’t be noisy. I’ll be done right away.”

Vegapunk dared to talk to an Admiral like this because he had his own worth that the world government can’t do anything to him. Let alone an admiral. He could even berate Sengoku if his experiments were disturbed.

Kizaru looked normal as if this happens all the time. The technology mastered by Vegapunk was 500 years ahead of this world’s, so the world government can’t go without him.

“Doctor, I brought him here.”

Vegapunk, who was modifying Kuma, looked up.

“The man who made the bomb is here? Where?”

Vegapunk looked excited.

“This guy.”

Kizaru pointed at Su Xiao.

“Hello, I’m Vegapunk.” Vegapunk stepped forward and looked at Su Xiao up and down. “What kind of technology made the bomb? Is it like a devil fruit? Genetic modification?”

Su Xiao was stunned. It seemed that Vegapunk wasn’t simple at all.

“No, it’s alchemy. Alchemy is...”

Su Xiao gave Vegapunk an initial explanation about Alchemy while Vegapunk listened with interest. The others seemed to blackout as they didn't understand a word.

“To say the alchemy is mystic is completely wrong. Alchemy is the exploration of nature and the human body.”

Vegapunk nodded thoughtfully.

“The materials you need are all available, they are perfect alternatives, but can these things make the bomb?”

“No problem at all.”

The material problem is solved by Vegapunk, but the problem now is Mana. He needed to find something that can restore Mana.

“There is another problem though, my energy is limited, and it takes a lot of energy to make the bombs.”

“You don't have to worry about that. I invented something because I lacked energy, and it prevented me from continuing my research.”

Vegapunk picked a test tube and handed it to Su Xiao.

Quality: Purple

Type: Potion

Effect: Restore 100% Mana after drinking.

Rate: 150

Description: This potion can be consumed continuously without side effects.

...

Su Xiao was stunned, a high-level world was indeed different.

“Then it okay. I can produce alchemy bombs now.”

Su Xiao can benefit greatly from helping the world government with making the bombs, after all, making bombs raise his proficiency.

It shouldn't be hard to actually raise several levels, but what is the upper limit?

Su Xiao specifically asked the Reincarnation paradise about leveling up before, and because it was a knowledge-based ability, he can upgrade it even if he wasn't in the Reincarnation Paradise as long as he had Paradise coins.

After the Alchemy bomb reaches level 10, Su Xiao can unlock the Alchemy pharmacy, which was something Su Xiao desired most.”

Chapter 337: Manufacturing

Su Xiao's expression didn't change even when looking at Kuma being modified because Hina and the others were in the room, and he shouldn't show emotions.

“Dr. Vegapunk, Kuma’s transformation should be completed in a few days because the Fleet commander urged me to return as soon as possible.”

Kizaru was still an admiral, and he had his duties. He can’t always stay here.

“It will take about a week or so, and you can’t leave before that, the PX plan needs your fruit ability to be perfect.”

“Ah, what a Headache!”

Kizaru nodded lazily then looked at Su Xiao.

“Byakuya, your laboratory is ready; I hope you like it. That’s where you will work in the future.”

Kizaru walked toward the laboratory with Su Xiao while Vegapunk continued his work.

Su Xiao’s laboratory wasn’t that far, just two rooms away.

Su Xiao entered his workspace and found a few precision machines and a pile of materials on the table and a comfortable chair beside it.

Su Xiao directly walked toward his chair and looked at the various materials. Although the names of the materials were different, they had the same properties as those needed for the alchemy bomb.

Su Xiao took a few materials and directly started making the bombs. A few seconds later, a bomb appeared in his hand.

The Alchemy bomb this time was slightly different from before, due to the different materials. The bomb was milky white, and its texture was harder than before.

Su Xiao directly looked at the properties of this new bomb.

Quality: White

Type: Consumable

Effect: Consume 1 Mana Point to activate at any time. The explosion radius is 6 meters and causes 96 damage. The bomb can change shape and stick on most objects.

Rate: 8

Description: This item can’t leave this world.

...

After checking the bomb’s effect, Su Xiao was very satisfied. Although the damage output was lower, it’s still excellent for other people.

Su Xiao directly threw the bomb toward Kizaru and said.

“Because the materials are different, the bomb is different in color, but the quality didn’t decline.”

Kizaru looked at the bomb before handing it toward Hina.

“You can try using your technology to make it, but it’s unlikely to succeed.”

“No, we already confirmed that Dr. Vegapunk’s technology couldn’t make this kind of bomb.”

Su Xiao raised his brows... It seems like the marines already tried.

“We won’t disturb Byakuya... Dr. Byakuya.”

Kizaru’s voice came out a little strange, but Su Xiao didn’t care.

“There is something else...”

Kizaru and Sentomaru stopped in their tracks.

“I’m hungry.”

They were stunned. Hina directly reacted.

“Sorry about that. I forgot about Mr. Byakuya’s breakfast.”

“My partners as well, and he eats a lot, so prepare five, no, prepare ten servings...”

Su Xiao tried the power of food in One Piece, and in a secret base of the Marines, the chef should be exceptional.

“Breakfast will be delivered in ten minutes; may I ask Mr. Byakuya if you prefer a light breakfast or...”

Hina became a little secretary. Every researcher had the benefit of having bodyguards and caretakers.

Hina was now the caretaker and bodyguard for Su Xiao.

Her Fruit allowed her to create metal binds trapping her enemy inside and anything that it touches.

Her being with him has a different meaning than being his bodyguard. It was to control Su Xiao if he turned hostile at any point.

Su Xiao took off his coat and started stretching after Kizaru and Sentomaru left the room.

Su Xiao not only needed to make a large number of bombs, but he needed the marine to reuse him again.

The stronger his bombs became, the stronger he will get, and he won’t be afraid of the Marines.

A large pile of materials was placed in front of him, and as soon as they’re used up, someone will come and add more.

Su Xiao picked the materials. Soon, white light flickered in his hands as the materials gradually dissolved and changed into an alchemy bomb.

Putting the first one aside, Su Xiao repeated the process rapidly.

Soon, he already made 26 bombs which were placed beside him, and Su Xiao's mana was already low.

Su Xiao picked up the potion and drunk it. His mana was filled in a few seconds.

“Mr. Byakuya, your breakfast is ready.”

Hina arrived and said softly as not to disturb Su Xiao.

“Bob, you eat first, I will eat later.”

Su Xiao picked the materials again and proceeded to make bombs. The process wasn't hard, and each time he made a bomb, he understood the alchemy bomb further.

This was an accumulative process that would provide Su Xiao with the experience needed to make stronger bombs.

“Wuff!”

Bob directly barked as he sat in front of the food without eating.

“Mr. Byakuya, let's eat first, you can return to bomb-making later.”

Su Xiao laid down the materials in his hand and walked toward the dining room inside the building.

“Today's food is sea king meat from the Secret Island.”

Su Xiao took a piece and took a bite. The meat was delicate but not greasy.

“Why aren't you eating?”

Su Xiao looked at Hina.

“I've already eaten.”

Growl!!

Hina's stomach responded, which made her very embarrassed.

Hina's status was special. She can't have any kind of friendship with Su Xiao. She didn't even have any relationship with her superiors.

“It's okay.”

Su Xiao ate slowly, but Bob started devouring the food with a smile.

Ten minutes later, bob was on the ground with a swell on his stomach and closed eyes. He was really happy currently.

Several marines started tidying the table as Su Xiao got up and went to continue making bombs.

The materials were decreasing rapidly as more and more potions were consumed by Su Xiao. Three hours later, more than 300 alchemy bombs piled up on the table.

With the continuous process, Su Xiao's speed became faster, and from the original 40 seconds, it went down to 31 seconds.

With each bomb he made, Su Xiao's became better.

Su Xiao was immersed in his work with only Bob inside the room. No one else dared to stay in the room. After all, there are more than 300 bombs here, and it could probably kill anyone who didn't have a logia fruit.

If he detonates these bombs, no one but Kizaru will survive.

Chapter 338: Sun God Wrath

Five hours of constant crafting, Su Xiao made 500 bombs, and if they were detonated, the consequences would be disastrous. The Marines asked if they should transport the bombs many times now, but each time they were rejected by Su Xiao. He didn't want to be distracted.

Su Xiao heard a strange sound and looked at the source only to find Bob gnaw the cables around the room. The equipment here is worth more than 30 million Berry, which would be the most expensive thing Bob bit.

“Bob, you're not allowed to chew on something that holds electricity.”

“Wuff!”

Bob cheerfully released the cables and proceeded to nibble other equipment without electric current.

Even if he ruined any equipment, the Marine would just change it, and he didn't use any of them anyway.

The door was pushed open, Kizaru and Hina entered his room.

Hina saw the pile of bombs and took a step back, and although she knew they wouldn't explode, she was still afraid.

Even Kizaru was preparing himself to turn into a light at any second because he didn't know when Su Xiao would go crazy and decide to detonate them all. Even Armament Haki would be useless against all these bombs.

Each bomb could deal 96 damage, and with 500 of them, the damage could kill most people with over 40 thousand damage, not to mention the heat that will be produced with that kind of explosion.

Dozen of Marines entered the room with carts and placed the bombs inside.

Su Xiao could make 500 bombs each day, which means he can make 4,500 bombs a month. It was an ability that the world government and the marines coveted.

The World government didn't know that three days later, Su Xiao will join the fight in Enies Lobby.

After the marines pushed the carts away carefully, Su Xiao just continued making bombs and looking at his Proficiency in making them. He benefited greatly from today.

Alchemy Bomb Manufacturing: Lv.3 (Proficiency: 567/50)

He didn't know how many levels it can go, but he will continue making them.

“Mr. Byakuya, your dog...”

Hina said awkwardly. Many machines were ruined by bob, and she couldn't reprimand the dog for it.

**"I don't need the equipment, just take them all away."**

Hina let out a sigh of relief and immediately sent someone to remove the equipment from the room. Bob looked at this and thought: 'Stupid humans, Bobtney doesn't just gnaw the equipment.'

Bob looked at the bench inside the room and directly went toward it.

As he bit into it, a clicking sound was heard.

Tears came out from his eyes as the bench was just too hard, and it almost cracked his dog teeth.

**"Awo!"**

Blood could be seen flowing out of his mouth as he looked at Su Xiao with the grievance. Su Xiao could only chuckle at this. Finally, there is something he couldn't eat.

Finding that Su Xiao ignored him, Bob wasn't happy, and five minutes later, he was fighting with the bench.

After leaving a few teeth marks on it, Bob walked with his chest high, but tears were threatening to come out as his teeth hurt.

The procedure of making bombs continued with Su Xiao consuming more and more potions that the bottles piled up beside him.

Su Xiao grabbed some materials beside him, but his hand only touched empty air, but they ran out.

He already made an additional 1200 bombs today, which is 1700 in total. He made them faster than he thought.

Su Xiao now could make a bomb between 27 and 30 seconds, and his best record is 26 seconds currently.

He already forgot how much mana he used. Now his physic already integrated with him completely.

Su Xiao tried to mobilize his mana, and it directly surged without any resistance.

Hina and a few marines opened the door to Su Xiao's laboratory.

**"This... There is a lot."**

Hina was wearing a black suit and a white shirt. Her hands were covered with black gloves. The black suit highlighted her white cheeks and long pink hair.

**"A total of 1700 bombs and I can make another 300 if there are proper materials."**

Hina hesitated for a bit.

**"Otherwise... You will continue tomorrow?"**

**"no, I can do it today. You don't need to treat me as a weak scientist."**

Su Xiao looked at Hina, which directly made her uncomfortable.

“Okay, I will send the materials.”

More than a dozen marines took the bombs and returned with a large number of materials. Su Xiao started making them.

After more than 2 hours, Su Xiao made another 300 bombs.

He made a total of 2,000 Bombs in a day.

After Hina sent someone to take away the bombs, Su Xiao leaned on his seat and wanted to sleep.

“Mr. Byakuya, you go and rest.”

Hina was about to turn and leave.

“Didn’t you forget something?”

Su Xiao’s voice wasn’t high, but this made Hina embarrassed.

“That... The swords are ready.”

“And?”

“They... They’re on their way. Please rest assured that we will not let you down, and the sword will come tomorrow morning.”

Su Xiao didn’t say anything, with the current situation, the Marines weren’t as stupid as reneging on their deal.

Su Xiao stood up and walked into his bedroom and closed it. He was ready to start the upgrade.

After looking at the skill which currently had 2073 proficiency, Su Xiao directly made his choice to start the upgrade.

[Alchemy Bomb Manufacturing reached level 4]

[Alchemy Bomb Manufacturing reached level 5]

[Alchemy Bomb Manufacturing reached level 6]

...

[Alchemy Bomb Manufacturing reached level 20!]

[Alchemy Bomb Manufacturing has reached the max level; you can unlock Medical alchemy only in Reincarnation Paradise.]

[High-level Alchemy Bomb Manufacturing Unlocked]

[Top Grade Alchemy Bomb Manufacturing Unlocked]

[Sun God Wrath Manufacturing Unlocked]

Seeing the last formula unlocking, Su Xiao about to fly from happiness. He already saw what it could do.

The effect is half a kilometer in radius, and it almost made a miniature sun after exploding. That's the reason it was named Sun God Wrath. It's as if Apollo, the sun god releasing his wrath.

But Su Xiao doubted that it was efficient, because the bomb treats everyone equally, so he wouldn't leave alive if he activated it in the explosion range.

But it seems like the top grade Bomb was one of the components of the Sun God Wrath.

Perhaps the top-grade bomb was practical?

Even though Su Xiao reached the max level for bomb manufacturing, he wasn't just going to stop making bombs for the world government.

The world government is filthy rich, and they can provide Su Xiao all the necessities for making bombs. So he wasn't going to refuse to make more.

Chapter 339: Art is... An Explosion!

[Alchemy Bomb Manufacturing reached max level. 'The Hunter' can choose a reward from the following list:

1: Time Reduction: Reduce making time and material for the Alchemy bomb.

2: Range increase: Increase the range of the alchemy bomb's explosion.

3: Power increase: The power of the alchemy bomb's explosion.

4: Precise control: Control the alchemy bomb with high precision.

...

Four options, he had to choose one of them.

Just seeing the last option, Su Xiao decisively gave up the other three ones. Although increasing the power and range is good, but precision is almost the best option for him, as he relies on Swordsmanship, adding precise control over the bomb would make him gain an edge in battles.

After choosing the last option, a loud of knowledge filled his head.

The alchemy bomb manufacturing made his bomb-making ability soar.

First, the [High-grade Alchemy bomb] had an intermediate-range and high damage output.

Second, the [Top grade alchemy bomb], making it consumes 80 MP, needs coal gunpowder, top-grade magic circuit, Secret Gold, Scorching Ashes, superconductive fuel, and baillat fragment ore.

Su Xiao frowned deeply. He didn't see any of these materials before and suspected that the world government wouldn't be able to provide them.

However, the one-piece is a high-level world, the possibility of these materials being here is high.

Su Xiao directly decided to ask for these materials and stop making intermediate Alchemy bombs, as he was curious about its effect.

Finally, Su Xiao looked at Sun Wrath and was extremely surprised.

Sun wrath: Consume 500 Mp for each one, needs a solar crystal, Scorching secret Gold, and a soul Crystal (small).

Su Xiao was speechless. It needs a soul crystal. That crystal was too expensive and hard to find.

Su Xiao's eyelids got heavier as he laid on the bed before drifting to sleep.

The next morning, someone knocked on Su Xiao's door. Su Xiao got up sleepily and opened the door to find Hina outside.

Hina was stunned before turning her head away and said.

"Mr. Byakuya, please wear some clothes."

Su Xiao closed the door again and put some clothes. Looking at the bed, he saw Bob still sleeping and directly said.

"Bob, Get out of bed."

"Wu!"

Bob replied with sleepy eyes.

"Hey, stop sleeping."

"Wu!!"

After another reply, Bob drifted back to sleep.

"I will eat everything!"

Bob's head directly rose, his eyes wide open, and he seemed full of energy. He sniffed a little, finding that there was no food, he laid back on the bed.

"Wuff!!"

Bob didn't want to get out of bed, he played all night long and returned very late and wanted to sleep more.

Bob was forced out of bed, Su Xiao directly made his way to the laboratory, but didn't start making bombs. Hina saw this and asked.

"You're not..."

Hina didn't want to seem like she was forcing him and was embarrassed to ask.

"This type of bomb isn't good, tell Kizaru I need to seed him."

Hina had a headache. Su Xiao was very important; currently, she couldn't threaten him or oppose him.

After ten minutes, Kizaru arrived with a face full of sleep.

"Dr. Byakuya, you need me?"

Kizaru was slightly uncomfortable. Last night he barely rested, and now he was forced to wake up early.

“I don’t want to make this type of bomb.”

Su Xiao directly made Kizaru wake up. What he heard wasn’t good for them. Last night, Su Xiao made 2,000 bombs for them, and the Marines transported them to the headquarters. After various experiments, it could be said that the world government was in love with these bombs and demanded them in quantities; this made Sengoku work overtime due to paperwork, and it gave him a huge headache.

Kizaru’s headache was just starting. Su Xiao was an important researcher, and he couldn’t do anything to get on his bad side.

“The swords that Dr. Byakuya wants are on the road...”

“No, the bombs I made yesterday were too low-grade, after making 2,000 of them, I was enlightened, and now I can make far stronger bombs.”

Hearing Su Xiao’s words, Kizaru was stunned.

“You need new materials?”

“Right, Some more rare materials.”

Su Xiao made a list of the materials needed for the top grade bomb and Sun Wrath. He wasn’t afraid that these people would know the materials, because without the alchemy skill.

Making an alchemy bomb without the alchemy skill is just fantasy.

Kizaru visited Vegapunk quickly after getting the material list and returned after a long time.

“The material for the first bomb can be delivered in two hours. The materials of the second bomb will be delivered in 5 hours, but we aren’t completely sure we can get all of them.”

Su Xiao didn’t say anything as he waited while making intermediate bombs.

After two hours, the materials for the top-grade alchemy bomb were delivered by the Marine. The materials weren’t exactly the same, but they had the same property of what he needed.

Su Xiao touched the materials, and a white light flashed. The materials started decomposing and disappearing.

Although it seemed strange, Kizaru and the others weren’t surprised. This was the effect of the Reincarnation paradise; the system protects the identity of the contractors by making each and every skill they had normal in the other worlds.

Making a top grade bomb took about five minutes. A bomb with the size of a cigarette case appeared in Su Xiao’s hand.

Seeing the size, Su Xiao was in doubt as he directly looked at the properties of the bomb.

[Top Grade Alchemy Bomb]

Quality: Green

Type: Consumable

Effect: Consume 1 Mp to activate (Activation range is one Kilometer), the explosion causes 270 damage in a ten meters radius. The shape of the bomb can be changed at will, and it can be recolored.

Rate: 30

Description: This item can't leave the current world.

...

The range and power increased by three times. Su Xiao tried changing the shape of the bomb, which directly reacted to his will.

Su Xiao directly changed it to a snake-like shape and then tried changing its color, which was changed directly to silver-gray, then to white.

Su Xiao put the bomb onto the bench slowly while Kizaru and Hina just stared.

“How powerful is that thing?”

Kizaru picked the white snake up with shining eyes while Hina took her Den Den Mushi and went out of the room in a hurry.

“It's three-time stronger than the previous bomb, and it can be separated.”

“Separated?”

Kizaru was puzzled.

Su Xiao mentally commanded the snake, and it directly separated into two.

“Although I can be separated, once one part detonates, the others will detonate as well.”

Su Xiao was very satisfied. The Top grade bomb was just that good. This bomb was so much more flexible than the previous one.

Seeing the bomb now, Su Xiao directly thought of someone in Naruto's world. Deidara, that guy uses clay to make bombs, and his bombs can take different shapes.

“How much can you make of these bombs?”

Su Xiao hesitated a little, each bomb takes 5 minutes, and he can get to 3 minutes after some practice, which means he can make 200 bombs at most.

“About 200 bomb a day.”

Kizaru didn't say anything. He just sends the rest of the materials into the room. Su Xiao may just surpass Vegapunk in Manufacturing bombs.

Su Xiao was startled by Kizaru's reaction. They had yet to see the Sun wrath, what would happen if they saw it.

The chip in his hand was getting bigger. If he was to take the Pluton Blueprint out, he could request almost everything from the world government.

Su Xiao thought of a funny idea. What if he gave the blueprint to Kizaru or someone from the Marine, and the Contractors had to actually fight Kizaru for it? How will they respond?

Kizaru, along with 40,000 Soldier and Kuma were here, what will they do against all of these?

Chapter 340: You Run Too Fast!

With a flash of light, a top-grade alchemy bomb appeared in Su Xiao's hand.

More than ten Alchemy bombs were placed on the bench beside Su Xiao. Vegapunk visited a few hours before and examined the Top-grade bomb. He was extremely happy and excited and then left. It seems like he got some new ideas.

Su Xiao sat on his seat and made bombs. He slowed the process because he won't get any experience from it. He wasn't a slave to the World Government, after all.

Su Xiao started pondering about the use of the Top-Grade alchemy bomb.

It was a flexible bomb that can take any shape he wanted and any color as well. On top of that, he can even divide it.

It wasn't easy to detect, and the damage was actually pretty good as well.

Su Xiao could deploy the bomb with many strategies, but he couldn't think much right now.

Roja had no idea whether the bomb would cost him a lot of Paradise coins or not when he returns to the Reincarnation paradise.

Knock!!

Hina knocked on the door before she entered and held a wooden crate.

"Did you get the materials?"

Su Xiao looked at Hina in anticipation. He was really eager to see the Sun Wrath's properties.

"The materials we got could only make three bombs."

Hina placed the wooden crate on the bend, and three of each item inside it.

One was the solar crystal substitute, one was the Scorching secret Gold substitute, and finally, a soul Crystal (small).

Seeing the three soul crystals (small), Su Xiao's eyes glowed. How did the Marine get their hands on the soul crystal?

"Where did you get this?"

Su Xiao held a soul crystal (small) and asked.

"I don't know. They came directly from Mary Geoise."

"Mary Geoise..."

Su, Xiao stopped talking. Mary Geoise was the Celestial Dragon's home. They were just that wealthy.

If he could get his hand on their wealth, he would be the wealthiest in the current levels in Reincarnation paradise. But the Celestial Dragons would always move with bodyguards.

Holding the substitute for the materials, Su Xiao's interest was picked.

Of the other two materials, Su Xiao was interested in the Solar Crystal substitute. It seemed like a piece of meteorite.

Feeling the warmth from the black rock, Su Xiao directly looked at Hina and said.

"Hina, go get Kizaru."

Hina looked at him with doubt before saying.

"The admiral is currently assisting Dr. Vegapunk, perhaps..."

"Both of you said that you would save me when I'm in danger, and currently, I'm."

The Sun Wrath's Explosion had a range of half of Kilometer if he makes a mistake, not even his ashes would be spared.

Hina hesitated a little before she went to get Kizaru.

In a while, Hina came back with Kizaru along with Vegapunk.

As Su Xiao explained the Sun Wrath to them, Vegapunk asked.

"Is it really as powerful as the sun?"

Vegapunk looked excitedly as Su Xiao.

"Yes, I asked Mr. Kizaru here, so if I make a mistake, he can help me escape the range of the explosion."

Everyone looked at Kizaru, who narrowed his eyes and asked.

"If you make a mistake, how much time do we have before the explosion?"

"Between 0.8 and 1 second."

Kizaru directly said.

"We can't make it here. The world Government invested over 5 billion Berry in this place."

If the experiment failed here, their loss would be too big to compensate.

"We need to be in a place with controlled temperature, even a tiny change in temperature can cause the bomb to explode."

Kizaru didn't know any place like that.

"We can use the sanctuary, the environment there is good," Vegapunk said.

“The refuge shelter...”

Kizaru directly made the decision. They went toward the Shelter underground. Even if it was blown up, nothing would be lost.

As they reached the Shelter, Kizaru said.

“Dr. Vegapunk, if anything happens...”

“I appreciate the concern, but if something wrong happened, you can take Mr. Byakuya and me and run.”

Kizaru sighed and looked at Hina.

The latter directly turned around and started running. She wasn't interested in the bomb-making process. Her life was much more important.

Su Xiao placed the materials on the table and said.

“I'm starting now.”

Su Xiao started moving his finger between the three materials.

The materials were decomposing with each touch with a Kaka sound.

The metal got really red as if it was about to explode, which made Kizaru's pupil shrink as he held Su Xiao and Vegapunk's Arms preparing to run.

“Don't be so anxious. This is normal. If there is anything, I will shout immediately.”

Su Xiao put down the metal, and Kizaru relaxed.

“Really so fearful.”

Without paying attention to Kizaru, Su Xiao continued making the bomb.

When the solar crystal was at its strongest, Su Xiao added his mana to the materials as they turned even redder, and the temperature rose.

After the materials merged, Su Xiao started making the Sun Wrath.

White light flashed in his hand, and suddenly a heatwave hit the three people present.

In Su Xiao's hand, a fireball, like a small sun, appeared. It flashed constantly, suddenly the soul crystal (small) played its role by stabilizing the other materials. Otherwise, the bomb would immediately explode.
