

## R. Paradise 431

Chapter 431: Information

The so-called Secondary Invincible Shield was not invincible, but its defense was strong.

This was not something Su Xiao should worry about. No enemy at this stage could break this shield.

One second seemed to be very short, but it could save his life if used properly.

From the eyes of the Emperor staring at the sheath, it could be seen that [The Divine Twilight] had saved him several times.

"You must cherish it and use it often."

The Emperor seemed to have lost his heart, but there was nothing he could do.

From this point, it could be seen that the Emperor was a natural leader.

The set of original sin and the blood of the artificial human was more important to the team, at least for the team. It was more valuable than the value of [God afterglow].

Sheila looked at Su Xiao with hatred, her mouth opened and closed, and she could not think of what to say for a long time.

Both sides made a fair deal, one was willing to fight, and one was willing to suffer.

"Brother White Night, have you heard about tomorrow's auction?"

"Auction?"

Su Xiao, who was playing with a new sheath, looked up. He had not heard of the auction in the reincarnation paradise.

"Yes, our God-Emperor and the Black Fan Chamber of Commerce are jointly held. Tomorrow at eight o'clock in the morning, the location is at the central hall."

Hearing the location of the central hall, Su Xiao thought that the God-Emperor and Black Flag were two rich people.

He had heard of the central hall. The location was near the trading square and not open to the public. It was only open to the public after the contractor rented it.

The rent was 20,000 paradise coins per hour. This was only the rent, not the cost of the equipment.

If all the expenses were calculated, the cost of holding the auction would be more than 500,000 paradise coins.

"Auction equipment?"

"No, no, no, auction all the things you can imagine, equipment, skills, bloodline, recovery products, soul crystals, only you can't think of."

Su Xiao was more interested.

"This is the ticket for the front row. The original price is 3000 paradise coins. I will give you a discount, 2000 paradise coins."

Su Xiao bought it directly,

He saw the certificate of the reincarnation paradise on the ticket.

"Remember to come to participate. That crazy boy often talks about you."

"You are talking about me? You want to kill me."

"Haha, you guessed it right."

The Emperor walked away in a carefree manner. She looked at Su Xiao. Her hand shrunk into her sleeve, and a slender finger was revealed from her sleeve. She pointed at Su Xiao, which was the middle finger.

"If you provoke me again, I will kill you the next time I meet you in the derivative world."

When she heard Su Xiao's words, she chuckled.

"Don't mess around."

The Emperor looked at her seriously.

"This guy is serious."

The Emperor had some understanding of Su Xiao. He knew Su Xiao's character of pulling out a sword without a word. He could move the sword without moving.

"The dangerous guy is similar to those madmen in the adventurous group."

"It is not similar. He did not join the adventurous group, which I still can't figure out."

The two siblings walked away. Su Xiao yawned. The reason why he revealed his killing intent was that he had a feeling.

This was not an illusion. At that moment, she did think so.

The auction would be held tomorrow, and the God-Emperor and the Black Sail Merchant Guild would be holding it together. The scale of renting the central conference hall must not be small.

Su Xiao had 96306 paradise coins in his hand, almost 100,000. Su Xiao was ready to participate in the auction tomorrow to try to buy soul crystals or good equipment.

Back in the exclusive room, Su Xiao lay on the bed easily.

The strengthening and sale of equipment had been completed, and he was ready to use the remaining paradise coins at the auction tomorrow.

He opened the alchemy list to check 'Alchemy Pharmaceuticals.' He obtained a lot of Philosopher's Stone in the steel refining world.

Those Philosopher's Stone was made into intermediate level alchemy secret medicine, which increased his proficiency in alchemy pharmaceuticals.

Those potions had disappeared. He originally wanted to sell them, but contractor in the steel refining world were scattered all over Yamei. It was too difficult to find them.

In the end, Su Xiao did see many contractors. Those contractors were enemies and could not sell potions.

Alchemy Pharmaceuticals had been upgraded to Lv.6, and his proficiency was more than 1,000 points. Su Xiao estimated that these proficiency points were enough to upgrade 'Alchemy Pharmaceuticals to the maximum level.

Each level was 500 paradise coins, and Su Xiao began to upgrade Alchemy Pharmaceuticals.

[Magic Pharmaceuticals has been upgraded to Lv.7. ]

[Magic Pharmaceuticals has been upgraded to Lv.8. ]

[Alchemy Pharmaceuticals has been upgraded to Lv.9. ]

[Alchemy Pharmaceuticals has been upgraded to Lv.20! ]

[Alchemy Pharmaceuticals has been upgraded to the maximum level. ]

After spending 7,000 paradise coins, Alchemy Pharmaceuticals reached the top, and the remaining 50 proficiency points disappeared.

[has unlocked the formula of 'Advanced Alchemy Secret Medicine.' ]

[has unlocked the formula of 'Burning Medicine.' ]

[has unlocked the formula of 'Special Alchemy Secret Medicine.' ]

Alchemy Pharmaceuticals had four new formulas locked. This was not all the formulas of Alchemy Pharmaceuticals.

The higher-level formulas needed Su Xiao to develop himself, but he did not want to invest too many resources in alchemy. It would lead to a deviation in his development direction.

Looking at the attributes of the 'Advanced Alchemy Secret Medicine' formula, the Advanced Alchemy Secret Medicine was green in quality, and its HP recovered a little.

Ignoring the formula of the 'Advanced Alchemy Secret' formula, Su Xiao directly looked at the 'Special Alchemy Secret Medicine' formula.

Su Xiao attempted to make the [ Special Alchemy Secret Medicine ] so that the prompt of Reincarnation Paradise would appear.

[Insufficient material, 5,000 paradise coins to replace the required materials. ]

The cost of 5000 paradise coins and 300 mana values could be seen as how high the cost of [certain alchemy secret medicine] was.

After hesitating for a while, Su Xiao chose to make it.

A light green light flashed in his hand, and the paradise coins quickly turned into materials.

Five minutes later, a medicine bottle appeared in Su Xiao's hand. The transparent bottle was filled with light red liquid, about the length of an index finger.

[Special Alchemy Secret Medicine]

Origin: Reincarnation Paradise

[Quality: Blue]

[Type: Recovery]

[Effect: After drinking, it will quickly recover 65 of HP. ]

[Rating 68]

[Description: High-level products of alchemy, combined with a small amount of biological knowledge, use without side effects. ]

The amount of recovery can not be picky. More importantly, the recovery speed is a sign of rapid recovery.

Su Xiao was not going to sell this kind of potion in a large amount. He wanted to stock up and use it himself.

5000 paradise coins and 300 points of mana values to make one bottle. He could make three bottles every day. He only stayed in the reincarnation paradise for three days.

If he just returned to the reincarnation paradise, he could make more than a dozen bottles.

These were not the paradise coins that needed to be spent. If calculated according to the actual situation, he could only make five or six bottles.

More than five bottles in stock could be chosen to sell. After all, this was profit, and if he made one bottle to sell one bottle, he would not have to worry about the problem of liquidity.

'Alchemy Exploding Medicine' and 'Alchemy Medicine' are good. Although the super-level explosives and potions produced are not the strongest, they are the most practical and convenient to make.

Putting away the special-level alchemy secret medicine, Su Xiao looked at the other two potions.

'Burning Potion' The formula creates a kind of strong burning bullet. Like a maggot in the tarsal bone, the flame cannot be extinguished. Although it is not weak, it is expensive. The cost of each bottle is 8000 paradise coins.

'Dragon Power' The formula is very interesting. This potion has a shelf life.

He tried to make the 'strength of the dragon,' and the hint of the reincarnation paradise appeared.

[The materials are insufficient. Do you want to spend 2000 paradise coins to replace the materials? ]

After spending 2000 paradise coins and 180 mana values, Su Xiao began to make the dragon's strength.

A crystal bottle appeared in Su Xiao's hand. The crystal bottle was narrow and wide, and the potion inside was golden.

Chapter 432: Comprehend

[Dragon Power]

Origin: Reincarnation Paradise

Quality: Blue

Type: Consumable

[Effects: Apply this medicine to the surface of the skin, Strength +2, Constitution +2, Special Status Resistance +20]

[Rarity: Seven days]

[Storage: 100]

[Rating: 70]

[Description: Don't drink it. Although it will bring a powerful buff effect of strength, agility, and physical strength +15, the user will die within 30 seconds. ]

Su Xiao looked at the Dragon Strength Potion in his hand. This thing could be used three times and was applied to the back of his hand.

This thing has a characteristic. If you directly drink it, you will die within 30 seconds. Even the gods can't save you. In these 30 seconds, you can get a strong buff. Three attributes +15 points.

This thing has two uses. It can be used as a bonus at normal times, but it can also die with the enemy in a situation of certain death.

Su Xiao smiled. If he encountered a certain death situation, he would drink this thing. Even if he died, he would not let the enemy feel good.

[Hint: Alchemy biology has not been unlocked. ]

[If you need to unlock Alchemy Biology, Alchemy Pharmaceuticals must be upgraded to Lv.10 (already achieved), and pay the soul crystal (small) 2 + 30,000 paradise coins. ]

Alchemy biology should be the highest level of combat potential in alchemy. It can give birth to a class similar to a summoner.

The bullhead lord that I saw in the Zhanchi world was a product of alchemy biology.

Unfortunately, the purpose of Su Xiao learning alchemy was to save paradise coins, [special-class alchemy bomb] and [special-class alchemy secret medicine] had solved this problem.

Even if he unlocked the alchemical biology, the first thing he could create would be cannon fodder.

If he wanted to create a powerful creature, he would need to make an effort. If he invested those resources into his saber, the benefits would be greater.

Su Xiao was not going to continue to improve his alchemy studies. He just needed to make special bombs and potions for his use or sale.

Sun God, Apollo. He was going to make one in the future.

It used to blossom at the last light. This was just a nice way of saying it. It was more vulgar. When he was going to kneel, he would give the enemy a surprise.

"Woo ---."

The sound came from the side, and Su Xiao was stunned.

He turned his head to look at the bed. Bobowang was sleeping soundly. He did not know why this idiot made waves.

Su Xiao frowned. Then he thought of something. Bobowang might have had a nightmare.

"Hey ---, wake up. Why are you sleeping in broad daylight?"

Bobowang woke up with tears in his eyes. At first, he was a little confused. Then he turned to look at the dog. He dreamed that he was chased by big slippers at least 450 yards.

After giving Bobowang a piece of meat bone, the dark clouds of Bobowang's nightmare were swept away.

Su Xiao picked up the dragon flash on the side, and the dragon flash came out.

A flash of light flashed. The surface of the dragon flash was bright and clean. It seemed that the new scabbard effect was good.

Holding the dragon flash in his hand, he stood in the space of the exclusive room, and Su Xiao began to practice the sword daily.

He had a feeling before, after knowing the truth, his heart seemed to be released, and his sword skills were improved, but he was too busy before, and he had no time to recall that feeling.

Su Xiao danced faster and faster, the cold light overflowed, and the two meters around him became a restricted area.

The hair of Bobowang floated near Su Xiao, and the hair broke inch by inch.

Su Xiao danced faster and faster, and sweat oozed out of his body.

"Bobo, go out and play first."

Because Bobo was nearby, he could not release the killing power.

Giving Bobowang 1000 paradise coins as pocket money, Bobowang happily ran out of the exclusive room, probably to buy snacks to eat.

The reincarnation paradise was very safe. Bobowang was Su Xiao's follower and could sense Su Xiao's position, so he was not worried about getting lost.

Although Bobo was sometimes stupid, he did not have the passive skill of "letting go."

After Bobowang went out, Su Xiao no longer cared about his surroundings.

The blade flashed, and the furniture in the room was cut off.

Su Xiao should go to the trial field, but this experience was fleeting, and he did not want to interrupt.

Zheng!

The light blue sword radiance was cut out, and a deep mark was cut on the roof.

As Su Xiao waved his sword, a storm of sword radiance emerged in the exclusive room, and all the items nearby were smashed.

The more Su Xiao waved his sword, the more carefree he felt. He had never felt this before, which was related to his previous state of mind.

The sword technique was grinding the heart, body, and will. His previous heart of revenge could not be tempered, and revenge dragged the development of his sword technique.

Everyone has their talent, and some are good at making certain things, some are smart and cunning like a fox, and some are born with the ability to command.

Su Xiao did not have these talents. Although he often planned, his plan was simple and rough, to exert his force to the maximum.

He never blindly thought about how brilliant his plan was. The reason why his plan was successful was that he was strong enough.

Since there was no talent in scheming, he would make up for it with force.

Su Xiao's way of survival was a suitable strategy to strengthen the force.

Although Su Xiao did not have the talent mentioned above, he had another talent, which was the talent of using a knife.

Clang!

The blade radiance was everywhere, and the items around were broken.

Su Xiao stopped dancing. Although it had not been long, he was already covered in a hot sweat. A carefree feeling appeared.

After a long sigh of relief, Su Xiao looked around. The surroundings were full of sores. None of the furniture was complete. The sofa that had suffered a lot had been cut into three pieces.

[Hunter has ended his understanding of sword skills, which has improved his sword skills. ]

Seeing this hint, Su Xiao was not surprised. He casually slashed forward.

Clang.

The light blue sword light broke away from the edge of the dragon flash, and the sword light turned and instantly hit the wall wound.

The sword light was not the consumption of mana but the consumption of physical strength.

Although Su Xiao's physical attributes were not low, he could not consume recklessly. Physical value and life value were two concepts. The physical value would be exhausted, and the life value would be exhausted.

The two were somewhat related, and the consumption of life value would also consume physical strength.

Looking at the damage caused by the blade light, Su Xiao nodded. Although it was not as strong as the attack power of the close-range slash, it was not weak.

The blade light could only inherit the sharpness of the dragon flash slightly. Whether the blade light was sharp was related to Su Xiao's sword technique level.

Looking at the master of sword technique, Su Xiao was happy in his heart, higher than expected.

[ Saber Master: LV.21.(Passive) ]

[Skill Effect: Increases the attack power of a saber-type weapon by 89 and greatly increases the skill of saber techniques. ]

[Lv.10 additional ability]

[All Life Rhythm(Advanced): This ability can not be strengthened in the reincarnation paradise and can only be comprehended by the hunter. ]

Lv.20 Auxiliary Ability

Blade radiance: It can be used for mid-range attacks: the blade's sharpness and level correspond to its level. There is no interval between use.

...

Perhaps because of the blue steel shadow energy, the sword light that Su Xiao slashed out was light blue.

The sword light had a lot of potential for development, but Su Xiao had not seen any skills related to the sword light. If he wanted to develop it, it needed his brain hole.

Just as Su Xiao was studying the sword light, the door of the exclusive room was pushed open. Bobowang, who was holding a dozen bags, stood at the door. One of the bags contained cigarettes, but it was snacks.

Bobowang looked at the scene in front of him and was stunned. The bag in his mouth fell to the ground. It looked at Su Xiao with worship and seemed to say: As expected of my master, even the hobbies are the same, and the demolition is more thorough than mine.

Ignoring Bobowang, Su Xiao spent 600 paradise coins to buy furniture again.

The sword skill greatly improved. Su Xiao lay on the newly bought big bed and slept. He used a lot of his strength to dance before.

At 7 o'clock the next morning, Su Xiao washed up and took Bobowang out of the exclusive room. He was going to participate in the auction, maybe he could meet some old friends 'there, but those' old friends' almost died in his hands.

Chapter 433: Sale

On the way to the central venue, Su Xiao found many contractors were rushing in the same direction.

Half an hour later, Su Xiao arrived near the central venue. It was already a sea of people.

Without the mandatory rule of the reincarnation paradise, it was impossible to maintain the order of the scene. Most of the scattered people, contractors, were unruly people.

"The 80th-row ticket of the central venue. 500 paradise coins for one, first come, first served."

"There are 50 rows of tickets in the venue. The price is 800 paradise coins. No bargaining."

Several contractors were selling tickets at the entrance of the central venue. These people were selling high priced tickets. These people must be 'yellow bulls.'

Generally, auctions used a deposit system, but the God-Emperor Adventurer Group and the Black Sail Merchant Guild took another route and chose to sell tickets.

They were willing to spend hundreds of paradise coins to buy tickets, which meant that the contractor had the financial resources to participate in the auction.

If they did not have enough paradise coins in their hands, no one was willing to spend hundreds of paradise coins to watch the fun.

According to the calculation of 1000 paradise coins per person, if 500 contractors participated in the auction, the Emperor and the Black Fan Chamber of Commerce could recover the cost.

The contractor that Su Xiao saw alone was more than 500 people, more than 5,000.

Unfortunately, the profit of the tickets could not be counted in the hands of the God-Emperor and the Black Fan Chamber of Commerce.

Among them, the taxes of the reincarnation paradise accounted for a lot, plus the publicity and venue fees, the God-Emperor and the Black Fan Chamber of Commerce could collect the cost at most.

However, the place where the auction made money was not the ticket but the commission of various items.

The time now was around 7:30, and there was still half an hour before the start of the auction.

The contractor entered the central venue one after another. Su Xiao walked with the crowd to the venue.

"Hello, customer, please show the ticket."

A member of the God-Emperor adventure group stood at the door, shaking the pole and standing straight. It was an honor to hold an auction in the reincarnation paradise.

Su Xiao took out the ticket bought from the God-Emperor. After handing the ticket to the other party, the face of the contractor changed slightly.

"It turned out to be Mr. Byakuya, and please come in."

This contractor had a smile on his face.

It seemed that the God-Emperor had instructed them before.

There was no such vulgar scene as a VIP channel. There were only two entrances to the central venue: the front and back doors.

The front door was for guests to enter and exit, and the back door was for transporting items, so let alone VIPs, even PVI had to enter through the front door.

Walking into the central venue, the venue was like a large lecture hall, and the auditorium formed a semicircle around the stage in the center.

The central venue could be said to be resplendent. After all, it was the cost of 20,000 paradise coins per hour. It would be strange if not for luxury.

Su Xiao went straight to the front row, and his seat was No. 8.

No. 8 seat was at the front and was closest to the stage. Su Xiao could see the items directly, and the contractor, who was outside the 10th row, could only look through the big screen.

The eighth seat was arranged well. There was a round table in front of a three-person sofa, and there were fruits and delicate pastries on the round table.

Su Xiao sat on the sofa, Bobowang sat on the side, and the contractor nearby looked sideways. The first 50 seats were not sold to the outside.

"It seems that the God-Emperor has earned a lot."

Su Xiao leaned on the sofa and looked at the crowded contractor behind him.

"Woof."

Bobowang called, his eyes staring at the snacks on the round table, asking Su Xiao: Can this be eaten? Will it be embarrassing?

Su Xiao chuckled.

"It cost 2000 paradise coins. What is there to eat?"

Su Xiao picked up a red apple and took a bite. The juice was sweet and full.

Death liked to eat apples, and coincidentally, Su Xiao also liked it.

Bobowang ate the snacks on the table and lost interest after only eating a small piece, which was far worse than its snacks.

More and more people gathered in the venue. The first seat was empty, which should have been reserved for the Emperor.

The second seat was the boss of the Black Sail Merchant Guild. This was a fat man with a ruddy face. Although he was approachable, this guy was not a good person.

The third seat was Sheila, and from this point, it could be seen that strength was far more reliable than money.

Other than the first three seats, the remaining three to fifty had no special meaning, just first come, first served.

"Big brother, this venue is not bad. This time, 'God Emperor' earned a lot."

"You know a hammer. The rental center venue needs a high permission level. 'God Emperor' robbed a derivative world and got a very high-level item. There is a rental right after selling it to the reincarnation paradise."

"Big brother is wise."

"Second, brother is mighty."

"Third, brother, you are too modest. You are also good."

There were only three national brothers in the entire Reincarnation Paradise.

The three people walked to the front row bravely and spiritedly. Their position was No. 49.

"Big brother, that guy is also here."

"Who?"

"The fierce man with the knife."

The three people on the national team saw Su Xiao eating an apple. The three people were eager and seemed to want to set up a formation.

After weighing the pros and cons, the three people sat down honestly. The price of pretending to be rich was too high. They might die.

"Yo ---, I didn't expect you to beat up the three of them so well."

Sheila opened her mouth. Her brother was not by her side, and her poisonous tongue level was straight to MAX.

"Bitc\*, what do you know about hammers?"

"Bitc\*, you don't even know about hammers."

"Have you forgotten about the 'despair' of being ganged up on by my three brothers?"

These three consecutive strikes were eye-piercing, and the contractor looked at them with great interest.

"You three buffoons, have you thought about that matter? The treatment is very generous, as long as you are willing to return."

The Emperor walked over from the side and stopped her poisonous tongue.

"Boss, the three of us are used to fighting alone. Thank you for taking care of us before."

The three of them, who had always been amusing, became serious and addressed the Emperor as 'you.'

"After all, everyone has their ambitions. If you encounter trouble that you can't solve, you can come to me. After all, we were brothers before and after that."

The Emperor stepped forward and patted the foot.

"He's stronger than before."

"Hahaha."

The national football boss scratched his head.

"His muscles have grown a lot, and his IQ has regressed."

Sheila held a glass of orange juice in her hand. There was no other meaning in her words, but it was more like the ridicule of his old friend for many years.

"Sheila is as beautiful as a flower."

The three national staff members spoke in unison. For some reason, this sentence made Sheila very angry.

"Don't you have a newcomer, period?"

On the side, Su Xiao was eating an apple to watch the show, and Bobowang even took out a milk-flavored fried rice flower.

"Byakuya, are you interested in a fight after the auction?"

A forthright shout came, and he knew who it was from the voice. It was the combat healer who had learned the wrong initial skill.

"Not interested."

Su Xiao flatly refused Mad Grandma's proposal. If he wanted to fight, he would fight in the derivative world. That would be exciting.

"It's a pity, but I hope to meet you in the derivative world."

"Then see you in the derivative world."

Su Xiao had fought with Mad Grandma before. Although Su Xiao would sell the items to the God-Emperor Adventurer Group, he and Mad Grandma were personal grudges.

#### Chapter 434: Auctions

The venue was full, and some of the contractors who had grudges were even more lively after the meeting.

The God-Emperor Adventurer Group and the Black Flag Chamber of Commerce did not stop this situation. This was the characteristic of the reincarnation paradise.

Strength was the main reason. Only with strength could one have the right and financial resources.

The time soon reached 7:50, and the auction was about to begin.

"God Emperor, you are doing well, holding such a big auction."

A man dressed as a cow walked to the front row with a cigar in his mouth.

"You..."

The Emperor did not look too good and looked at his subordinates.

The subordinate immediately contacted the people at the front door and shook his head helplessly after receiving the feedback.

The other party had tickets, so they could not stop him.

The Emperor had this kind of reaction because the person who came was from the Phantom Troupe. Zuo Lunnan came uninvited.

"God Emperor, you are too stingy. It's just a ticket, but you don't sell it to us."

Zuo Lunnan sat on seat number 15 and crossed his legs.

"Stingy? Ask my thirty-four subordinates who have died in battle first."

The Divine Emperor took a deep breath. The other party had already come in and said that everything else was useless.

"It's just a dead soul under the spear. If you have the ability, find me for revenge. I'll be waiting for you at any time."

Zuo Lunnan sat in his seat with a calm expression. The enmity between the Divine Emperor and the regiment could not be reconciled.

"Big sister, can I kill you?"

A crisp child's voice came, and the face of the No. 2 No.

"Gulu, you madman!"

She turned to look at a little girl behind her. She didn't know when the other side had arrived behind her.

"I almost killed you last time. Big sister, your heart is soft."

The little girl was dressed in a red child costume, with a lollipop in her mouth and an Arabic number 6 tattooed on the back of her white hand.

Her name was Gulu,

She liked to eat sugar and liked to kill people. The contractor, who had died in her hands, had more than three digits, and the brigade number was 6.

"Pervert murderer, I'm not interested in talking to you."

"You are so heartless. You have already been so 'intimate' with me."

Hearing Gulu's words, Sheila felt a faint pain in her chest.

Before the three derivative worlds, she met Gulu. In the battle, the other party's hand had grabbed her heart. If the God-Emperor hadn't arrived in time, she would have died.

Gulu walked to the man next to him and sat down. Like a child who was still childish, he curiously looked around.

"Zuolun, the one who burst your bladder last time was that guy? Does it look very appetizing?"

"It's him. He was the one who sold Carlo's number."

"I'm even more interested. What's the situation with that husky? He's so cute."

Zuo Lunnan no longer spoke. Gulu was a little moody. Even if he was a member of the regiment, Gulu could still kill him if he went crazy.

Although the regiment's appearance made the God-Emperor Adventurer Group a little unhappy, the auction still had to continue.

As for the Black Sail Merchant Guild, they shrank back to the backstage after the people of the regiment appeared. Facing the madness of the regiment, they could only tremble.

After they provoked the regiment, only five derivative worlds passed, and more than 20 of the Black Sail Merchant Guild members died.

The lights in the venue suddenly went out, attracting the contractor's exclamation.

The curtains on the stage gradually opened, and the spotlight shone on the stage.

"Hello, everyone, hehe ---"

A circus-clown-like host stood on the stage. This was a Black Sail Merchant Guild member who had cheated contractors twelve times in a row.

"Bastard, return the money!"

"Clown, don't let me meet you in the derivative world."

"Change host! Is the brain of the God-Emperor and the Black Flag Chamber of Commerce in water?"

The tide of angry scolding came, and the boss of Black Sail Chamber of Commerce laughed.

"God Emperor, it seems that the effect is good."

"Yes."

The clown on the stage looked around the venue, listening to the tide of angry scolding.

"Everyone, don't be excited. I am not the host. I am just announcing that today's process is a parking certificate. We have signed a temporary contract with the park."

The clown opened his chest. There was a mark on his chest.

The curses below disappeared. The reputation of the Black Flag Chamber of Commerce was not very good. If not explained in advance, it would affect the auction. Even the clown with a bad reputation was restricted. This made people feel very relieved.

The clown funnily ran off the stage. A man in a suit walked up to the stage.

"Hello everyone, welcome to this auction. This auction..."

"Don't talk nonsense. Let's start the auction!"

A muscular man in the front row roared. The muscular man was holding a piece of raw meat and chewing it.

"Cough ---, that's good. As a contractor, everyone should skip the process and start the auction!"

After the host spoke, the first item was sent to the stage.

Seeing this item, the audience was in an uproar.

"How is this possible? This guy is..."

"Hey, hey, this auction is getting more interesting."

The reason why the audience was so shocked was that the first item was a human.

That's right, it was a human, and it was an elf with human blood.

"Elf, a female, has signed a contract with a follower, 100,000 paradise coins starting bid."

The basic attributes of the female elf were announced, and only a part of the skills was displayed.

The female elf stood on the stage, crossed her arms, and timidly looked at the bidders below the stage.

Mad Grandma was a little unhappy. This was the auction item of the Black Fan Chamber of Commerce. Their God Emperor would not sell this kind of thing.

"One hundred and thirty thousand paradise coins!"

A loud shout came from behind. Although they could use the number plate to enter the price, they did not shout out the momentum.

This elf was used for fighting. As for whether it could develop further or not, in the end, it would depend on the contractor.

If you make too much of a request, the servant will try his best to resist, and the contract will be removed. Not all the servants are as loyal as Bobowang and can die for the master.

This servant was not weak in combat, and there would be no backstabbing situation, so she was very popular with the contractor.

The first item naturally gave people a sense of surprise, and it was obvious that the Black Fan Chamber of Commerce had done it.

The female elf was finally sold for 170,000 paradise coins, and the bidder was a female contractor.

The female elf was very happy. She was a little afraid that the male contractor would buy her.

"Don't be afraid. You will be under my protection in the future."

The female elf held the female elf's hand. The female elf nodded quickly, and the favorability rose greatly.

"See? If you demolish the house again, I will auction you."

Su Xiao looked at Bobowang. Bobowang raised his head and looked at him with contempt.

Bobowang was not convinced. You also demolished the house yesterday.

The second item was a mage weapon with a purple quality.

The mages in the auction hall were on fire. Magic staffs were rare, and purple quality was even rarer. The atmosphere of the auction reached its peak.

This was not an item from the Divine Emperor and the Black Sail Merchant Guild. Other contractors provided it. After the bid was successful, they won.

Starting from the third item, the item's price began to drop, which was prepared for the ordinary contractor.

Su Xiao had spent some paradise coins before, and now there were 8076 paradise coins left.

The fourth, the fifth, and the items were sold one by one.

The ordinary contractor was very excited, and the contractor in the front row was not in high spirits. They did not like these things.

Chapter 435: Trial of Survival

The auction continued, and just as Su Xiao was sleepy, the host on the stage winked backstage.

"Everyone, the highlight is coming. Everyone, prepare your paradise coins."

A female worker with exposed clothes carried a tray with two large pistols.

The two pistols, one black and one white, gave Su Xiao a sense of familiarity. He seemed to have seen it somewhere.

"Black sandalwood, white elephant teeth? Why did these two guns appear in the reincarnation paradise?"

"This kind of weapon..."

"I want these two guns, the weapons I dreamed of getting."

The contractor looked at the two guns with fiery eyes.

Su Xiao's eyes flashed. He was interested in the two guns.

The broken elf was only a green weapon. Although it had been strengthened, it still could not keep up with his pace. The attack power was too low.

Now he used the spider queen in mid-range combat, but the spider queen was a sniper rifle.

As for the blade light, it was not a conventional method. It had to be used at a critical moment.

Su Xiao was a little tempted, but after the attributes of the two guns were displayed, his heart was half cold. It was not that the attributes were too bad, but it was too good.

[Black Sandalwood, White Elephant Fang]

[Origin: Reincarnation Paradise, Worker Forging]

[Quality: Purple]

[Attack Power: 27 to 53]

[Type: Double Spear]

[Reloading: 30(each), automatically reloading. Each reloads consumes 30 points of mana, and the reloading interval is 10 seconds. ]

[Durability: 46/4 6]

[Equipment requirement: Strength 27 points, Agility 35 points. ]

[Equipment effect 1: Retreating Magic(Passive). Attacks, demons, and magical creatures have additional 12 points of Judgment damage. ]

[Equipment effect 2: Sweep(Active/ Switch), can switch to continuous shooting mode. ]

[No cooldown time. ]

[Special effect: Precision(Passive), 7 accuracy. ]

[Rating: 150(Note: Purple equipment score is 71 to 150. Purple equipment with a score of 150 will have an additional special effect. Additional special effect: Precision. ]

[Description: Please do not be deceived by the appearance of these two pistols. The combo mode will surprise the enemy. ]

[Price: 46300 paradise coins. ]

...

The attack power of these two pistols could only be described as terrifying. Especially when dealing with demons and magical creatures, the judgment damage was lower than the real damage.

If they were to start firing at demons and magical creatures, they would either die or be crippled.

Seeing this gun, the mages on the field felt a chill run down their spines. They were all in the category of magical creatures.

Su Xiao's heart began to beat faster, and these two guns just made up for his lack of mid-range.

He was a loner. He could not have any obvious shortcomings. When he was in the steel refining world before, he felt that the broken elf was starting to get tired. In mid-range, he had to take out the heavy spider queen.

Although he wanted to buy this gun, there was a problem in front of him. The price of this gun was about 7 to 100,000 paradise coins. With the familiar appearance of the people, it was not surprising to sell more than 100,000 paradise coins, but he only had 80,000 paradise coins.

Looking at everyone's expression, you must be very greedy about these two weapons. Although a forging master made this, its power is obvious.

90,000 paradise coins at a low price. Everyone is actively bidding.

Hearing the low price of 90,000 paradise coins, Su Xiao was speechless. He looked at the host on the stage.

"Guest, don't show such a dangerous look. You can't be strong here."

The host joked with Su Xiao, but he did not notice that the boss of the Black Fan Chamber of Commerce was constantly winking.

Big Fatty Qian almost fainted from anger. The host on the stage was on the side of the Black Sail Fleet.

He had noticed Su Xiao before, and he had also heard of the name White Night. In the conversation between Mad Grandma and Zuo Lunnan, he knew that the Black Sail Merchant Guild might have underestimated the other party's strength.

This Killing God could not joke around casually, and the Black Sail Merchant Guild might have another enemy.

"110,000 Paradise Coins."

"115,000."

"120,000!"

The bidding began. These two guns were the vision of too many people. Now that there was a chance to get them, the auction price naturally rose.

After the price reached 120,000 paradise coins, it stopped, and the increase was small.

After hesitating for a moment, Su Xiao decided to buy this gun. Although he did not have enough paradise coins, he had other ways.

"70,000 paradise coins."

He wanted to leave 10,000 paradise coins for a spin. This gun was good, but he could not take out all the property in his head.

The host was shocked. The auction was always going up to raise the price. It was the first time he had seen a lower price.

Big Fatty Qian opened and closed his mouth as if he wanted to say something but was stopped by the God-Emperor on the side.

"Don't worry. I have made a deal with him twice. Although White Night kills without blinking, he won't do anything shameless."

The host on the stage was a little embarrassed. Su Xiao was sitting in the front row. He would have ignored the other person if it were for the back row.

The bidders below the stage were amazed. They were also the first to see the auction at a low price.

Of course, Su Xiao would not intend to buy an item worth 120,000 paradise coins with 70,000 paradise coins. He would not do that kind of brainless thing. He was taking things.

Since he opened his mouth, he had the confidence to buy these two guns. Otherwise, he would not open his mouth.

Su Xiao held a crystal between his fingers and looked at the Emperor.

"There are not many paradise coins. Use this thing to pay."

The host saw the soul crystal in Su Xiao's hand. At first, he did not care. There were five soul crystals(small) in the auction this time.

But when he looked carefully, the host found that something was wrong. The volume of the soul crystal in the other party's hand was not right.

"This is? Soul crystal(middle)?"

The host stepped down quickly and personally took the soul crystal in Su Xiao's hand(middle).

Although the price of the soul crystal was not too high, it was too rare and had always been in a state of shortage.

To obtain the profession panel, one needed a soul crystal, to upgrade the profession skill, one needed a soul crystal, to forge high-level equipment, and to learn a high-level scroll, one needed a soul crystal.

A large amount of demand and low output led to the scarcity of soul crystals. In the trading market, not to mention soul crystal(middle) and soul crystal(small) could not be seen.

The difficulty of Su Xiao obtaining the soul crystal was not too great. After all, there was the way of the honor store.

The host held the soul crystal in his hand. For a moment, he was in a dilemma. He looked at the Emperor and Big Fatty Qian for help.

And the eyes of the two people at this time were clearly saying, "Idiot, knock the hammer!"

The host understood and directly hit the hammer.

"Congratulations to Mr. White Night for successfully bidding."

70,000 paradise coins and soul crystals(middle) were directly deducted, [Black Sandalwood and White Elephant Tooth] appeared in Su Xiao's hands.

Holding the two guns in his hands, Su Xiao was very satisfied. The cold touch came. The feeling of the two guns was good. The power must not be weak. He did not know who tasted their power first.

The Emperor and Big Fatty were also very satisfied. Although both of them had obtained soul crystals(middle), their team had been in a state of hunger for this kind of material.

Soul crystals had a price but no market. It was not empty words, and the fact was so.

After buying the two guns, Su Xiao was not interested in the next item. Although he knew that there was still a big event, he did not have enough paradise coins. It was not his style to only watch and not buy.

Su Xiao directly got up and left the auction house. The Emperor sighed and left the God of Wealth.

The two guns rotated in his hands, and Su Xiao returned to his exclusive room.

The profit of the steel refining world had been transformed into strength, the attributes had been greatly improved, the swordmaster had risen three levels in a row, and some of the mid-distance battles were solved.

There was still a day and a half before the survival trial. In this day and a half, Su Xiao began to do business.

He still had 10,000 Paradise Coins left, and after making two bottles of [Special Alchemy Secret Medicine], his [Special Alchemy Secret Medicine] reached three bottles.

Su Xiao set up a booth to sell it at 6,000 Paradise Coins per bottle in the trading market.

Sure enough, the [

As expected, it was quickly sold out.

He already had five bottles of [Special Alchemy Secret Medicine] and a pile of [Special Alchemy Bomb] in his storage space on the third day.

The material preparation was complete, the time to stay in the reincarnation paradise was about to reach the limit, and the survival trial was about to begin.

[Stay time for three days. The survival Trial will begin in one minute. The number of participants will be 501. ]

Completed the survival trial, the hunter will be promoted to the second rank.

...

[Survival Trial initiated, location, T12 K planet: Devour Island.]

The feeling of teleportation appeared. This time, the teleportation was different from before. It was very strong, and the surrounding space seemed to be about to split open.

Bobowang, on the side, was greatly embarrassed. When it was teleported, it would also be hit by a stick.

Chapter 436: Bad News

He didn't know how long it took.

It was dark in front of him, and Su Xiao, who had a faint pain in the back of his head, regained consciousness.

When he opened his eyes, Su Xiao did not get up for the first time. Dragon flash appeared in his hand, and he began to observe the surroundings.

The surroundings were empty. This was a ruin. The ruins should have been a small town, but he did not know why it was razed to the ground.

There were a few bones scattered on the ground. From the shape of the bones, it could be seen that this was an upright creature, but there were no human characteristics.

The flat and long skull, the sharp front claws, and the backbone were full of thorns, and more importantly, the remains had a slender tail.

The vision behind Su Xiao became vast. The ruins were not big, the horizontal length was about half a kilometer, and the surrounding was an ocean.

This was an island. Could this be Devour Island?

Su Xiao felt that it was impossible. There were too many contractors around. Five hundred contractors gathered here, and he was exactly 501.

"Fuck, unlucky, it is the most dangerous Devour Island."

"Didn't the boss say that the Island of terror was Devour Island? What should we do?"

"Be careful. Maybe the same batch of contractors is very strong, raising the difficulty of survival trials."

The contractor talked about it, and the 500 contractors gathered together and did not have a conflict.

Su Xiao found a rock and sat down. This was the peace zone, and the reincarnation paradise prohibited contractors from fighting.

Bobowang ran to Su Xiao in the distance and lowered his head with a wronged face, revealing the back of his head.

"Don't worry. This trouble will disappear soon."

Bobowang looked up and seemed to ask Su Xiao.

"It won't be long before you get used to it."

Bobowang was desperate.

Su Xiao was used to the feeling of being teleported.

[Hunter has arrived on planet T12K. The survival Trial is about to begin. ]

[Planet Difficulty: LV1.14. ]

[Nightmare (Difficulty Level: Easy, Difficult, Nightmare, Purgatory, Asura. ]

[Source of the World: 0 ]

[World Description: Hunter is free to explore. ]

[Hint: Hunter, please do not enter the Red Earth Region. The Red Earth Region is more difficult than Lv.17. ]

[Hint: Hunter, please do not enter the depths of the Black Forest. The difficulty of the Black Forest is beyond Lv.20. ]

[Trial Mission: Survive for ten days. ]

[Hunting mission: None. ]

[Warning: Please do not communicate with Void Creatures that may appear. Void Creatures are mostly unstable and have unknown dangers. ]

[Trial, begin! ]

Su Xiao immediately checked the details of the trial mission.

[Survival]

[Difficulty Level: Lv.16]

[Mission summary: Survive by all means. ]

[Quest information: Survive for ten days. Obtaining food, water, and other things will be a huge problem within ten days. ]

[Quest deadline: 10 days]

[Quest reward: Upgrade to Tier 2 Hunter]

[Quest penalty: No penalty. ]

With the difficulty of Lv.16, it could be seen how difficult the survival mission was.

Not only that, Su Xiao was deeply surprised after seeing the mission information. What was the situation with food and water? His storage space carried a lot of materials.

As for the free punishment for the mission's failure, Su Xiao thought that this was complete nonsense. The failure of the survival mission meant death, and what punishment did he need?

When Su Xiao was thinking about the situation of food and water, he found that the actions of several contractors around him were very abnormal.

These contractors took out the weapons from the exclusive room. Not only that, but they also took out their backpacks and tried to store more food.

There was a lot of food and water in Su Xiao's storage space. With his current attribute, the amount of food he ate every meal was amazing. If he wanted to exert a strong power, he must have enough energy.

Not only Su Xiao, but Bobowang on the side was also a foodie.

"The situation is a bit bad."

Su Xiao's face was not good. He put the Dragon Slaying Flash on his waist, and at the same time, he took out the black and white double guns and inserted them into the holster on both sides of his thigh.

He also took out the Spider Empress sniper rifle. He could not carry this nearly two meters long sniper rifle, which would affect his movement.

Su Xiao could not carry it, but Bobowang could.

After tying the spider queen to Bobowang's back, Su Xiao took out a square backpack and packed a few alchemy bombs and five bottles of secret alchemy medicine.

After hesitating, Su Xiao took out another bag and packed some food. This food was enough for him and Bobowang to eat, and he could not carry more.

Food and water would become scarce materials from the other contractor's performance.

Reincarnation Paradise might temporarily seal the storage space, just like in real life.

Su Xiao was more worried that if the survival trial was just as simple as the survival of an island, it was impossible to have the difficulty of Lv.16.

The roar came from the sky, and a super-sized plane gradually approached the ruins and finally landed.

This plane looked old, but its structure was advanced.

The contractor and the others did not move. Their eyes focused on the plane.

"Gaba Skeletal Trojan(unknown language)."

A 'pilot' jumped off the plane and looked at the contractor. He said something.

This pilot was short, about 1.2 meters to 1.3 meters. Even more peculiar was that he had a head that looked like a mouse.

If one looked closely, one would find that this pilot looked between a mouse and a human. The head of a mouse, the size of a human, the limbs of a mouse, the tail, etc.

Su Xiao could not understand what the mouse pilot was saying, but this did not stop him from walking quickly to the plane.

[Announcement: All contractor needs to board the plane in five minutes. ]

A blood-red announcement appeared. This announcement did not say what would happen if it went against it, but the blood-red font was self-evident.

"Gugu Lupa Pama."

The mouse pilot adjusted a watch on his hand and seemed to be changing his language.

"Can you understand? This damn translation equipment. Old White's maintenance skills are so weak."

The mouse pilot was so angry that he jumped up and down.

The contractor and the others stopped and focused their eyes on the mouse man.

"Hmm? It looks like I can understand."

The Ratfolk nodded in satisfaction as he looked around at the contractor.

"All cultivators, welcome to hell, haha."

When the contractor and the others heard this, they looked at the Ratfolk with cold gazes. They were all contractors who had passed the Advancement Quest, and they were all First Order high-level contractors. They all had a bit of a temper.

"Who are you?"

A contractor looked at the Ratfolk coldly. The other party's attitude was malicious.

"Who am I?" "Good question. I am the referee for the trial. You can call me Lord Mouse or Void Brute."

Lord Mouse's eyes flashed with red light. They were two electronic eyes.

"This batch of quality is good. I hope the survival rate can be more than 5. How can paradise let the first-level contractor come to Devour Island? This doesn't seem right."

The big mouse seemed to know the reincarnation paradise very well, or it was the staff of the reincarnation paradise.

"I don't want to say more nonsense. The necessary things have been prompted by paradise. I only have one sentence, do not leave Devour Island during the trial. Otherwise, all will be executed."

The contractor did not speak, but some contractors did have this kind of desire to go back to paradise. There was no rule that they could not leave Devour Island during the trial.

Since the so-called Devour Island was very dangerous, it would be better to leave directly after arriving at Devour Island.

"Hey, the one was wearing red clothes over there. You look very unhappy."

Lord Mouse looked at the contractor, who had a calm expression.

"It has nothing to do with you."

After saying that, the contractor was about to board the plane.

"It has nothing to do with me? Laughable, if you don't like me, I will let you die!"

Lord Mouse pulled out a laser gun from his waist and aimed it at the contractor.

Weng ---.

The laser gun began to accumulate energy. In a very short period, the energy was filled up. A beam of light shot out and directly entered the contractor's body.

Puchi.

That contractor exploded into a bloody dance that filled the sky, not even leaving behind a single residue.

"Let me remind you, more than a dozen judges like me at the edge of Devour Island."

Chapter 437: Wait a Minute, I...

One-shot instantly killed a contractor, and because of the other party's gaze, this Lord Rat could be said to be extremely vicious.

After killing a contractor, the laser gun in Lord Rat's hand shattered, along with one of Lord Rat's arms.

The arm fragments fell to the ground. Lord Rat's arm was not flesh and blood but metal structure.

"Those who disobey the order will die. Do you understand this time? That guy will be the end."

Rat Lord did not even look at the broken arm. Its broken arm was gradually being generated, and countless nanorobots repaired the arm.

Su Xiao, who was in the distance, witnessed this scene. This Rat Lord gave him a very difficult feeling. At least, it was not something he could fight against now.

Rat Lord no longer paid attention to a contractor. It was just killing the chicken to warn the monkey to avoid more trouble later.

Sitting in the plane's cockpit, Rat Lord took out a bottle of wine and drank it.

"Ah ---, damn paradise, it pulled me here as a coolie. If the Great Sage Rat were here, the paradise would not dare to order me like this."

Recalling the years when he and that Sage Rat roamed freely in the void, Great Sage Rat laughed. The wine was the most special thing about that Sage.

Great Sage Rat also began to like wine for a long time.

In the void, wherever he liked, he would snatch whatever he liked, beautiful women, treasures, wine, everything.

"Sage, where did you go? At least give us subordinates a coordinate. What a willful great sage."

...

Su Xiao casually found a seat to sit down on the plane, and the contractor also sat down.

The cabin door closed, and the plane quickly took off and went to an unknown place. If he guessed correctly, the plane should fly to Devour Island.

Su Xiao tried to perceive outside the plane, and as expected, he failed. This plane was made of special materials and could block perception.

The destination of the plane should be Devour Island. According to Su Xiao's guess, this planet should be between the real world and the derivative world.

The name of the T12K planet was unheard of. Still, the reincarnation paradise could send him directly to this planet, which meant that the reincarnation paradise had some control over this place. Still, it was not as thorough as the control of the derivative world.

This could be seen from the location of the transmission.

He was not directly teleported to Devour Island but was going to take a plane.

Flying at high speed, the cabin was silent. Five minutes later, a contractor broke the silence.

"Friends, I am the vice-captain of the Vast Sea Adventurer Group. I have a piece of information about Devour Island that I can share with you, but there is a condition."

A temporary contract was displayed. The content of this temporary contract was that several people formed a small group to deal with survival trials together.

A few contractors were tempted and quickly walked up to chat.

With this beginning, the cabin became lively, there were people from the alliance, and there were also people who exchanged information.

Su Xiao sat in his original position and did not move. Not to mention that he did not want to join a temporary gang. Even if he joined, it was still unknown whether those people dared to accept him.

There was no contractor in several seats near Su Xiao, those contractors did not want to approach Su Xiao, and the inadvertently killing intent made people very scared.

The nearby contractor remembered Su Xiao's appearance, and at the same time, he marked him in his heart with "Extremely Dangerous," "Don't provoke," and other labels.

Allying was very common. Out of the five hundred contractors, at least three hundred people chose to ally. These people were divided into many small groups.

In front of the cabin, several hooded women, contractors, discussed in a low voice.

"Are you sure?"

"I'm not mistaken. It must be that guy. I can recognize him even if he turned to ashes."

A female contractor gnashed her teeth and looked at Su Xiao from time to time.

"Don't expose it first. That guy is strong and abnormal. After Devour Island, find a way to kill him."

Several female leaders of the contractor spoke. Although her voice was calm, she could not help but recall the scene.

A man with a long sword rushed to them. No threat, no abuse. The other party did not even talk much.

Their control skills were ineffective. The mage's concentrated fire could not be killed, the front row could not hold, and the sniper bullets were easily dodged.

"Byakuya, this time, I will not lose again. The blood revenge of the 32 sisters must be avenged."

There were six women, namely Leng Yue, the Red Spider Lily adventurous group leader, the smart woman, the sniper bee, the wet nurse Candy, and the newly recruited master, Tanona.

After nearly being wiped out by Su Xiao, Leng Yue suddenly realized that it was useless to have more people. They needed elites.

After the giant ended, the ordinary members of Red Spider Lily left one after another. This was a normal situation.

The moment of the decline of Red Spider Lily came from the original medium-sized adventure group to a small adventure group.

Leng Yue was not discouraged. She found that this was more conducive to the development of the team. At least the distribution of resources was more abundant.

In the next few derivative worlds, several people of Red Spider Lily began to try to dig the derivative world, unlike before.

Although she had experienced several crises of nearly being wiped out, the strength of several women of Red Spider Lily quickly increased, and they were all stuck at one point in time for the promotion task. This was certainly the masterpiece of the black-bellied woman.

Now Leng Yue was ready to find Su Xiao for revenge. She felt that she was strong enough.

There was a sentence that she might not have heard: "Is it not good to live? Why do you want to die?"

Su Xiao leaned on the seat and did not seem to find anything. He had long noticed the eyes of hatred.

"It seems that the trial this time will not be lonely. Which group of enemies is it?"

Su Xiao had a headache. He was not worried about how strong the enemy was but that he had too many enemies. He could not remember which group the other party was.

No matter which group of enemies, the other party would find him after arriving at Devour Island. When the two sides met, they would fight. He killed the other party or was killed by the other party. It was so simple.

[has arrived above Devour Island. ]

[Warning: Due to the special nature of the survival trial, the storage space function is about to be sealed. Please take out the required items as soon as possible. ]

[Warning: Due to the special nature of the survival trial, the storage space function is about to be sealed. Please take out the required items as soon as possible. ]

[Warning: Due to the uniqueness of the survival trial, the storage space function is about to be sealed. Please take out the required items as soon as possible. ]

Three blood-red warnings appeared in a row. Su Xiao had taken out all his weapons, so he ignored this warning.

"Sh\*t, the storage space is almost out of use. There are still two minutes left."

"Under normal circumstances, you can recover after completing the survival trial. The trial is not as simple as you think."

The contractor and the others took out their weapons, carrying supplies in big and small bags.

The storage space was the ability that all contractors had. It was only now that the contractor found how precious the storage space was.

[Announcement: The launch is about to begin. the contractor needs to spend 100 paradise coins to buy a parachute bag. ]

Some of the people in the cabin already knew that there would be such a situation, so they calmly paid 100 paradise coins.

Although Su Xiao did not know that there was such a situation, he would always prepare about a thousand paradise coins, so he decisively paid 200 paradise coins, and the extra 100 paradise coins were Bobowang's umbrella bag.

[Announcement: All contractor needs to return to their seats in ten seconds. ]

There was still no warning, but the font was blood red. If you disobey, you will die miserably.

The contractor all sat back in the seat. Su Xiao found that there was a contractor nearby with a pale face. The other side did not have a parachute bag on his back. The answer was self-evident. The other side did not have enough paradise coins.

"Friend, can you lend me two paradise coins? After the trial, there must be a big reward."

That contractor began to ask for help from a contractor nearby. Everyone shook their heads. The storage space was locked, and there was no need to trade paradise coins.

Chapter 438: Soil

Bang.

A muffled sound came from the back of the cabin. A seat under the contractor opened, and he directly fell out of the plane.

"Ah!"

The shouts gradually disappeared, and the plane began to drop the contractor.

"Hey, wait, I haven't dropped an umbrella yet. Paradise, I beg you, can you give me a free one?"

The contractor without an umbrella had a pale face, and his eyes were filled with horror.

Bang, bang...

The contractor was thrown off the plane after another and soon arrived at the contractor without an umbrella.

He looked at the hole in the chair next to him. There was an island below. The island was not small and surrounded by the sea.

"Wait a minute, Paradise, listen to me. I helped you complete so many tasks..."

This contractor was thinking too much. In Su Xiao's view, the reincarnation paradise followed the rules and regulations and would not favor anyone. How many contributions would be gained?

The contractor, who did not have an umbrella, felt that the seat under his buttocks began to loosen.

"Wait a minute, I..."

Bang.

The seat was opened, and the contractor, who had no umbrella bag, was thrown out of the plane.

"Reincarnation Paradise, I'm RNMMP!!!!!"

The sound was getting farther and farther. Su Xiao estimated that this brother was dead. Maybe he would fall to the ground and become a scarlet card?

This was a high altitude of 4000 meters, and there was no possibility of survival without an umbrella.

"Woof."

Bobowang was very nervous. After all, he had never heard of parachuting.

Su Xiao was not nervous. This was the fun of exploring the reincarnation paradise. Without a big heart, he could not wander in the reincarnation paradise.

Bang.

Su Xiao's bottom was empty, and he and Bobowang were thrown off the plane.

His body fell quickly.

Su Xiao and Bobowang were not far away. Even if the weight was different, the landing time was roughly the same.  $H = 1/2 GT^2$  the law of physics.

Su Xiao quickly fell, and the strong wind blew his short hair.

Below was a very large island with a diameter of at least several hundred kilometers. Rather than this being an island, it was more like a small country.

"Bobo, glide in that direction."

Su Xiao pointed to a small town below. In the sky, the small town was at most the size of a cigarette box.

Liiii!

The crisp sound of birds came, Su Xiao looked up at the sky, and his pupils contracted.

A black eagle at least five meters long hovered in the sky. The black eagle looked mighty, and the black feathers on its body were like steel.

This black eagle was hovering high in the sky. By looking at its size, one could tell that it was not an ordinary creature.

The black eagle flew above Bobowang. Bobowang's fart was about to go cold, and the other party wanted to catch it.

"Ow ---"

Bobowang let out a dry howl, and the black eagle was stunned.

"Li!"

"Woof! Woof!"

"Li ---"

The dog and the eagle began to negotiate. It seemed that the negotiation was not good. The black eagle rushed to Bobowang aggressively.

Su Xiao pulled out the black and white guns on both sides of his thigh and aimed at the black eagle. Bobowang made an unexpected move.

"Li!"

Please don't misunderstand. This time it was not the black eagle but Bobowang.

The black eagle diving down was confused and began to circle Bobowang. It seemed to want to know what kind of species this was. The cry just now was somewhat like its companion.

Bobowang could be said to have miraculously become one with the enemy. God knows how a dog made that kind of cry. It seemed that it was forced.

"Ah ---!"

A scream with a lone voice came from nearby. Su Xiao looked at the source of the sound. It was the contractor who did not have an umbrella bag.

In the absence of Brother Wu San, this brother had already been scared to death of how desperate it was to fall freely in the sky. If he survived this disaster, this brother would prepare several parachutes.

"Brother, save me. We can also land with an umbrella bag."

Brother Wu San tried to get close to Su Xiao but failed several times.

"Goodbye, no, farewell."

The cry of the other side attracted the attention of the black eagle. Bobowang had become one with the enemy. The black eagle would not attack it for the time being, and Su Xiao was not easy to mess with. So the black eagle was attracted by the contractor.

"Farewell? What do you mean?"

Because of the angle, Brother Wu San did not see the black eagle.

The sharp wind breaking sound came, and it was too late for Brother Wu San to feel the crisis.

The sharp eagle claw pierced Brother Wu San's body, revealing the bloody eagle claw. The black eagle pecked down with its beak, and the hooked beak pecked at Brother Wu San's neck, tearing off a strand of flesh.

Blood splashed high up in the sky, and the pain almost made Brother Wu San faint.

After all, Brother Wu San was a contractor who had completed the promotion task. Although he was in a desperate situation, he did not give up.

"Ice Touch."

Ka ---.

The ice-covered Brother Wu San and the black eagle. The two froze together and then fell.

The dangers of the survival trial were reflected here, and they were faced with danger even before they reached the island.

A conservative estimate was that the black eagle's agility attribute was above 40 points, and its strongest attribute was not low either.

This was just a creature they encountered by chance, and there must be even more terrifying creatures on the island.

Su Xiao and Bobowang quickly fell, and when they fell 500 meters, the umbrella bag automatically opened.

The momentum of falling slowed down, and Su Xiao turned from the original rapid falling to falling.

Su Xiao had thought too much before. He wanted to land in a small town, but parachuting was not simple.

Now the landing point was according to fate. There was a prairie below and several tall trees on the grassland.

Su Xiao could not control the parachute. He could only pray not to hang on the tree. The trees were so tall that they were at least dozens of meters tall.

There were five trees on the grassland. Su Xiao flew straight to one of them and rushed into the branches. A large number of branches broke.

Crash.

Su Xiao broke through the branches and almost hung up on the parachute several times. Although it was thrilling, he miraculously landed and was not hung up.

This put Su Xiao in a good mood. According to his luck, although there were only five trees on the grassland, he belonged to the type that was bound to be hung up.

Cutting off the umbrella belt on his body, Su Xiao stepped onto the ground.

The feeling of free falling in the air was not good, it was not easy to deal with the attack, and it was better to step on a solid body.

Su Xiao looked for a long time and did not see Bobowang.

"Woof!"

A familiar cry came. Su Xiao looked out and saw that Bobowang was hanging on a tree, looking like he was hanging from a southeast branch.

The umbrella was strangled on Bobowang's throat, and Bobowang rolled his eyes. His gaze seemed to say: Master, come and save me. I'm hanging up.

Su Xiao estimated that the height of Bobowang being hung was at least ten meters, and it was not a good choice to climb up.

Not to mention that climbing the tree was not easy. There must be a lot of snakes, insects, rats, and ants on this tree.

Dragon flash came out, and a light blue sword light was cut out.

The sword light cut accurately from above Bobowang, the umbrella belt was cut, and Bobowang screamed and fell to the ground.

Bang!

Bobowang fell to the ground with his face first and fell the ground in a backward posture.

Bobowang was stunned by the fall. After getting up, he rushed straight to the big tree. Crack! Crack! Crack! Wood shavings flew everywhere.

With Bobowang's temper, he would never give up until this tree was gnawed down. This time, it was indeed the other party who made the first move.

Su Xiao did not care about Bobowang biting the tree at first, but after a few seconds, he found something wrong. There was an extremely horrible feeling below as if a needle was stabbing his eyebrows.

"Bobo, run!"

Su Xiao ran to Bobowang, and Bobowang immediately stopped biting the tree and ran quickly to Su Xiao.

Su Xiao turned over and rode on Bobowang's back, quickly pointed out the direction, and Bobowang ran for his life without hesitation.

Boom!

A large crack appeared on the ground, and a big mouth of a blood plate broke out of the ground. Its mouth was full of sharp fangs, densely packed in a few rows.

Su Xiao threw out an alchemy bomb without looking back. The alchemy bomb exploded, resounding through the grassland, and the fire soared.

With the explosion's impact, Su Xiao and Bobowang ran far away.

A centipede with a diameter of two meters stretched out its face, its body length unknown.

After Bobowang ran far away, Su Xiao felt dizzy. A few seconds later, the scene in front of him began to change.

[You have escaped from the perception of Mislead. ]

The hint of the reincarnation paradise let Su Xiao know what happened just now. At this moment, the scene in front of him changed. It was still the grassland, but the grassland soil became blood red.

In introducing the reincarnation paradise, Su Xiao clearly remembered this sentence.

[Hint: Hunter, please do not enter the Red Earth Region. The Red Earth Region is more difficult than Lv.17. ]

The place where Su Xiao landed was the Red Earth Region!

Chapter 439: Difficulty Surviving

A faint fishy smell came from under his feet, and the red soil seemed to have been soaked in blood.

All the vegetation that grew in the Red Earth Region was unusually tall, green grass was dense, and several big trees in the distance were dozens of meters tall.

Bobowang walked slowly in the Red Earth Region, and there was no longer the previous unrestrained.

Su Xiao looked at the back with lingering fear. The centipede hiding in the soil was too horrible. He had been swallowed alive if he did not notice an inexplicable sense of crisis.

There was no map, no position, food was lost, and freshwater could last for one day.

The food was lost when parachuting because Bobowang had to carry an umbrella bag, so he held the food in his mouth and then lost it when he negotiated with the black eagle.

Gulu ---.

Bobowang turned to look at Su Xiao, and his eyes clearly said: Master, I'm hungry. -

"Bear with it. I just ate it on the plane. It's only been an hour. With your fat, it's no problem to eat for two days."

Bobowang's body was strong enough to last for two days, but this required freshwater.

The water was enough for Su Xiao and Bobowang to drink for a day. Bobowang could hold on for two days, but Su Xiao could not.

It was not that he was spoiled, he needed to fight, and fighting would consume a lot of physical strength.

Su Xiao did not have high-calorie food. Those small and high-calorie foods were generally white in quality and very rare.

A contractor would keep that kind of food for an emergency. No one would take it out to sell.

There was a large barbecue in the backpack behind Su Xiao, food, but this was also a recovery product.

[ BBQ Sauce ]

Quality: Green

Type: Restoration

[Effect: Recovers 80 of HP within half an hour after consumption and will recover a small number of injuries. ]

Rating: 21

Description: 1900 Paradise Coins

The restorations can also satisfy hunger.

Su Xiao would not eat this thing as a last resort.

From this point, he could see the importance of intelligence. If he knew that food was so precious before, he would buy a large amount of food for recovery.

No one would tell the secret information about the survival trial to outsiders. They would only tell each other in the adventurous group.

What if there was no food? Was there a need to ask? Of course, it was to rob.

It could be foreseen that food and water would become the main reason for the war between the contractor and him in the next ten days.

There were still ten days to the trial. If there was no food, Su Xiao's combat power could last for two days. After two days, he would become weaker and weaker.

The grassland in the Red Earth Region was endless. Su Xiao did not know how far he went forward. Su Xiao vaguely heard the sound of water. There was water and food!

"Bobo, stop."

Su Xiao carefully listened to the direction of the sound of water. After arriving at the Red Earth Region, the perception was no longer credible. The giant centipede could mislead perception, so what it perceived was not necessarily true.

The sound of water came from the left, and Bobowang quickly ran to the left.

Not far away, a small river appeared.

This small river flowed between the grassland, and the grass was half the height of a person growing nearby.

Buzz ---.

A bee flew by. This honey bee was not small. It was the size of a thumb.

This thing could be eaten, Su Xiao might be sure that he had seen this kind of bee on Earth, but it was much smaller than this.

The bee flew very fast. If the nerve reflex speed were not enough, it would not be able to catch this 'little one.'

Su Xiao pressed his hand on the handle of the dragon flash, the sword light flashed, and the bee's wings were cut off.

Be careful to pinch the bee that is falling. Su Xiao did not want to try the poisonous sting of this 'little guy.' It was not good to be stung.

Pinching the head of the bee and removing the internal organs, Su Xiao directly threw the bee into his mouth, and Bobowang on the side was stunned.

Although this bee was raw, it tasted good and was very chewy.

"You want to eat?"

Su Xiao looked at Bobowang. Bobowang shook his head quickly and took two steps back.

Su Xiao thought to himself, this kind of bee was delicious in the world, almost extinct on Earth.

There were four of these bees. Su Xiao only caught two. The other two flew too fast.

Seizing the opportunity to replenish his energy, Su Xiao consumed too much energy every day.

Pushing aside the water grass, a fast-flowing river appeared.

The water of the river was very clear. This appearance did not deceive Su Xiao. He took out a transparent empty bottle and filled it with some water.

He raised the water bottle. The clear water changed color after being reflected by the sun, and it was a little faint red.

Countless parasites were in the river. If he drank a mouthful, it would be difficult for him not to die. The river water was more terrible than the poison.

There was no hope for clean water, the water was not clean, and the possibility of finding food was not high.

A black shadow flashed in the water. Su Xiao suddenly burst and stabbed into the water.

Smack ---.

A strange sound came. Su Xiao used the dragon flash to pick up a strange fish in the water.

The strange fish was about half a meter long, with a big head and a small body, and many 'passengers' hanging on its body.

Even if not for hit by Su Xiao, this strange fish would not live long, and there were at least dozens of creatures living on its body.

Throwing the big fish back into the water, even if Su Xiao starved to death, he would not eat this thing and die faster.

A serious problem appeared: the Red Earth Region water could not be drunk, and the creatures killed could not be eaten.

He took out a compass from his backpack. Su Xiao bought this thing for 600 paradise coins. In the words of the stall owner: This thing can also be a guide even in outer space.

Unfortunately, this white-quality guide needle that could be called a guide in outer space failed, and it had turned into an electric fan at this time.

Su Xiao looked at the sun in the sky. The sun was high in the sky. Today was a good day.

Finding a wooden stick on the ground, the sun made the wooden stick produce a shadow. Su Xiao put a small stone on the top of the shadow.

Taking out the pocket watch, Su Xiao waited for ten minutes. The shadow of the wooden stick moved a little, and Su Xiao put a stone on the top of the shadow.

Connect the two stones on the ground and get in the direction.

"It might be in the east and west..."

This was the way to distinguish the location of the Earth. Su Xiao did not know if it were useful here. After all, it was not certain where the sun of this broken planet rose from.

Su Xiao confirmed the direction, looked for stones and branches around, and piled these things together to form a coordinate and ensure that he could move vertically in one direction.

With the direction and road signs, Su Xiao rode on Bobowang.

Now the first thing was to leave the Red Earth Region. This place was completely a restricted life area. The terrifying creatures suddenly appeared, the river water could not be drunk, and food was scarce.

Not to mention surviving for ten days here, it was already extremely lucky to live for two days.

After riding Bobowang for a distance, the coordinates behind disappeared. Su Xiao once again identified the direction and set up new coordinates.

After five consecutive times, Su Xiao finally arrived at the end of the grassland. The endless green disappeared, and a winding mountain appeared in front of him.

This mountain was not steep, and there was a faint red on the rock. It seemed that he had not walked out of the red earth area.

Not long after entering the mountain, Su Xiao found something. He found a pile of carbon ash.

Chapter 440: Indigenous

He jumped down from Bobowang's back. Su Xiao walked to the pile of ash. The ash was already cold. It should have been left a long time ago.

There were bones scattered around the ash. The answer was self-evident. Intelligent creatures were moving around.

Picking up a broken bone on the ground, Su Xiao saw a row of teeth marks on it. These teeth marks were left by flat teeth creatures, and this kind of creature's bite force was very strong.

It could even bite off the bones and suck the bone marrow inside.

Knowing how to make a fire and cook the food, the teeth marks on the bones could tell that the same creature did not cause this, then there was the possibility of a group.

Su Xiao was hesitating whether to track this creature. The other party might have food and clean water.

Just as Su Xiao was thinking, a short scream came from the valley in the distance.

The scream stopped as soon as it appeared, and the person who screamed accidentally had died.

"Bobo, catch up."

Without food, Su Xiao could not hold on for too long. Instead of hiding and hiding, it was better to try his luck.

According to the direction of the scream, Su Xiao quickly ran into the valley.

The vegetation in the valley was very low, and he could see the situation in front of him from far away.

Su Xiao arrived near the scream, but no other creatures were around.

After searching around for a while, Su Xiao found a broken sword from a pile of shrubs.

After picking up the broken sword, Su Xiao's eyes narrowed slightly. This was the debris of a blue quality weapon, which meant that the one who screamed just now was a contractor.

Not far from the broken sword, Su Xiao also saw a pool of blood.

There were slight traces of fighting nearby. Su Xiao analyzed that this was a melee-type contractor fighting with an unknown enemy, but he was soon defeated.

A few drops of blood that spread to the distance appeared. Su Xiao hesitated for a moment and quickly followed the blood.

The original blood was very dense, and it began to break after a while. Ten minutes later, the blood completely disappeared.

At this time, it was time for Bobowang to appear. The smell of blood was like a lighthouse in the shadow of Bobowang.

The tracking began. According to the direction Bobowang pointed, Su Xiao advanced.

What Su Xiao did not know was,

He was walking out of the Red Earth Region by accident. Although it was still not easy to survive, as long as he went outside the Red Earth Region, it was not so difficult.

Su Xiao stopped after tracking the blood for an hour. He was lying on a hillside, and a tribe appeared in the distance.

Yes, it was a tribe. This was a small basin, and dozens of low triangular wooden tents were built in the basin's center. The wooden tents were covered with hay, and a roughly carved deadwood stood in the center of the tribe.

It looked like a vine-type creature. This should be a totem. Looking at the tribe, it had been a civilization.

Dozens of human-like creatures were walking in the tent. These creatures were similar to the primitive people, but their skin was black and red, and their faces were painted with different patterns. Some of them even had animal teeth on their noses.

Unlike the primitive people, these natives were tall, the shortest was about two meters, and the taller was even two and a half meters.

"Tuturu Kaba(unknown language)."

"Bubu Bubu ---(unknown language)."

Bobowang, who was lying beside Su Xiao, perked up his ears. Someone seemed to have called him just now.

"Dumbass, lower your head."

Su Xiao pressed Bobowang's head into the grass. Bobowang gnawed on the grass. Bobowang, who was already very hungry, was surprised to find that eating grass was also good.

If you are hungry, eat the grass, eat a grasshopper, drink dew when you are thirsty...

In the basin, the two red-skinned indigenous people were discussing something. The more they discussed, the more intense it became. In the end, they even pushed each other.

The reason why the two indigenous people had a conflict was because of a pair of bloody jeans.

This tribe could not produce a pair of jeans at a glance. With the contractor being caught by these indigenous people, Su Xiao had already seen a contractor who had been caught, and there was more than one person.

Two bodies with their heads cut off and their internal organs hung in front of the tent, and it looked like they had to be processed.

According to Su Xiao's guess, these two people should be contractors, and the previous screams might be from them.

Not far from the two corpses, there was another contractor. This contractor was still alive, but there were several bloody holes on his body, but he would not die in a short time.

This contractor had been stripped into a naked pig, and his face was full of despair. His little brother was fluttering in the wind.

This contractor was dead for sure. His hands and feet were tied, hanging on a wooden stick.

The more Su Xiao looked at the other person, the more familiar he was.

Ignoring the blood on the other person's face, Su Xiao patted Bobowang's head. Wasn't this brother Wu San?

After freezing with the black eagle, the other person was not dead, which was already a miracle.

Su Xiao thought that he was unlucky enough. Now it seemed that there was someone else.

Brother Wu San was the real unlucky one. Before entering the survival trial, the paradise coins he left as an emergency were all used up because of a special contract.

Every time before entering the derivative world, the reincarnation paradise would collect 100 paradise coins for the contractor to master the language.

This kind of low-level mistake would not be made by Brother Wu San. It was just an accident. He was the only one who did not have a parachute among the 500 contractors.

It was unlucky enough that he was not thrown out of the plane without a parachute, and what was more unlucky was that he was attacked in the air.

Brother Wu San was not a weakling. Relying on his strength, he removed the layer of ice when he was about to land and pressed the black eagle below him.

Although he was almost killed, he survived stubbornly. This moment was enough to move everyone.

Unfortunately, the bad luck was not over. Brother Wu San and two contractors landed one after another. What was a pain in the ass was that the two contractors once had a conflict with him.

The Great Escape began. When Brother Wu San was about to shake off the two contractors, the red-skinned native flashed onto the stage. The short scream was actually from Brother Wu San. It was the 'roar' that was unfair to fate.

The things that happened after that were simple. Three contractors had been defeated, and two of them had died on the spot. They had been processed into rations. Brother Wu San had been stripped naked and turned into the meat dish of the red-skinned native tonight.

A red-skinned native was searching for a backpack near Brother Wu San. It was the backpack of the two dead contractors.

The red-skinned native took out two small bottles from his backpack. After smelling them, he laughed. Inside were salt and chili noodles. The red-skinned native did not recognize chili noodles, but it recognized salt.

Brother Wu San almost fainted from anger when he saw this scene. Why did the two bastards bring seasonings when they were trying to survive?

"Hey ---."

Brother Wu San's voice was very weak. The red-skinned native looked at Brother Wu San.

"Don't put chili noodles when you roast me tonight. I don't like that thing."

The red-skinned native clearly couldn't understand. It kicked Brother Wu San in the face.

These red-skinned indigenous people had a fierce feeling. Except for their kind, they looked at other creatures as if looking at food.

The request to put less spicy sauce noodles was rejected, and Brother Wu San was also kicked out.

Su Xiao saw this scene. He did not intend to save the other party, but these red-skinned indigenous people could not be let go. The reason was very simple. The other party had clean water. He had seen it before.

It was impossible to communicate peacefully, so he would use a knife to communicate.

Su Xiao was lying on a hillside. Although his stomach was already growling, he did not move. It was not the time yet.

Bobowang, who was originally lying near Su Xiao, had disappeared. The passive skill [You Can't See Me] played its effect.

The sky gradually darkened. Some of the natives who were hunting outside returned. Su Xiao calculated that there were 43 people among the red skin natives.

These indigenous people were a bit strange. They were all adult males, and there were no females or children.

This situation showed one thing, this was not a large concentration of the red-skinned indigenous people. It might be a temporary camp when hunting outside.

There was another possibility that these indigenous people were a small tribe expelled from the big tribe, and the females were all taken away.

Su Xiao was partial to the latter. From the traces nearby, these red-skinned indigenous people lived in the vicinity for at least a few months, and they couldn't go out to hunt for such a long time.
