

R. Paradise 441

Chapter 441: Have an Enemy

The sky was getting darker and darker, and a bonfire was rising in the tribe of the red-skinned natives. A group of natives was singing and dancing around the bonfire.

The atmosphere of the natives was good, but the umbrella man beside him was very depressed.

"It's going to end like this. I'm unwilling."

Although the umbrella man was going to face the fate of being slaughtered, he was not afraid. He had seen a scene ten times more terrifying than this.

"Woola ---"

A native shouted, and the flames roasted his cheeks until they were red.

Woo ---

The sound of the wind breaking was heard, and half of the head of the native suddenly flew up. And his head was broken, and his body staggered.

Suddenly being attacked, the native was confused, reaching out to touch the red body on his face.

The one-eyed saw the blood on his hand, and the red skin native who was shot staggered a few steps before falling to the ground.

Su Xiao saw this scene through the spider queen's scope. The optical red detection scope was eight times(active) with night vision, and it also had a silencer.

It was perfect for sniping the enemy at night.

Moreover, [Lankai Windbreaker] also has a bonus at night

[Equipment effect 1: Night Mist(passive) can reduce the chance of being discovered at night, Strength +4, Agility +5.]

Counting the bonus of various equipment, Su Xiao's current strength was 49 points, Agility 50 points, Stamina 44 points, and Intelligence 42 points.

With the strength attribute of 49 points, Su Xiao directly ignored the recoil of the spider queen.

The spider queen shot the contractor in the head, but the sniper of the red-skinned native failed to blow the head.

The gun just now did not completely break the head of the red-skinned native, only half of the head of the other side, half of the head of the red-skinned native was not dead, and he was still crawling on the ground.

Su Xiao took out [Havana's Eye] to check the enemy's attributes, which was a great help to the battle later.

[is comparing the intelligence attribute of both sides..., compared to completion, our intelligence is 1.076 times that of the enemy, obtaining 86 of the enemy's information.]

The information was as follows:

[Name: Yosenman]

[HP: 100]

[Mana: 390]

[Strength: 32]

[Agility: 29]

[Stamina: 48]

[Intelligence: 39]

[Charm: 2]

[Skill 1: Wild(Passive): HP +100.]

[Strength +10, Stamina +10.]

Skill 2: Bloodline Vine Totem(Active). Yosenman can burn their life force to unleash powerful combat power. Specific effects are unknown.

Skill 3: Unknown.

Skill 4: Unknown

...

After learning the information about the enemy, Su Xiao's eyes jumped.

Compared to the giant centipede before, the red-skinned native was only at the level of the little monster, but this little monster was too strong.

In the basin below, the people of the tribe fell, and all the red-skinned indigenous people stood up and looked around like hungry wolves.

Their first reaction when they were attacked was not to panic but to kill the enemy.

With the night stealth effect of the sniper scope, night vision + silencer, and the Lankai Windbreaker, the red-skinned indigenous people could not find Su Xiao in a short time.

Bang.

Su Xiao fired another shot, and the indigenous people who observed everywhere were living targets.

This time, Su Xiao chose to shoot at the neck. A ball of blood exploded in the basin. The head of the red-skinned native could resist a shot, but the neck could not.

This gun broke the neck of a red-skinned native, and the head flew out into the distance.

"Roar!!"

An angry roar came, and a red-skinned native's pupils flashed with red light. He suddenly turned to look at Brother Wu San.

Brother Wu San was originally full of ecstasy, but when he found that a native was looking at him, the joy on his face froze.

"Hey, this has nothing to do with me. Listen to me, you..."

Puff! A wooden spear pierced Brother Wu San's eye socket. The tip of the wooden spear had been burned and had been slightly carbonized. It was extremely sharp after being polished.

...

The tribe of the red-skinned native was in a small basin, surrounded by valleys that could block the cold wind.

This kind of terrain could be called a paradise for snipers. The only thing that could hide in the basin was the wooden tent, but the night vision function allowed Su Xiao to see where the red-skinned native was.

Bang, bang, bang.

Su Xiao fired three shots in a row, and three blood balls splashed. Two red-skinned native people were broken in the neck, and one was hit.

The red-skinned native who was hit in the chest was not dead. Although the ribs were exposed, they seemed to be fine.

This kind of physical strength and survival power was horrible. Su Xiao needed to pay some price to deal with these indigenous people.

Bang, bang, bang...

Su Xiao began to shoot without regard for the consequences. It was not that he wanted to be exposed, but the red-skinned indigenous people had already scattered and rushed to the basin.

These red-skinned indigenous people would not be passively beaten all the time. After the initial confusion, they had already determined the approximate position of the enemy.

Bang, bang, crack.

The bullets were empty. Su Xiao took out the spare clip. He still had three spare clips. Now the storage space was banned. The bullets were just a piece of scrap iron in the trial with the spider queen.

After changing the clip, Su Xiao pulled the bolt, and the bullets were loaded.

He did not continue to shoot. The natives had already rushed to the basin. Now the chance of being exposed was too high.

The red-skinned natives shouted and rushed to the hillside. It was already eight o'clock in the evening. Under the hazy moonlight, the natives could not find where Su Xiao was.

These natives had the habit of making a fire at night. When they roasted food, they would also usually gather around the fire. This showed that they did not have night vision, so that Su Xiao would shoot.

Fighting with enemies with night vision at night was courting death.

Su Xiao saw two natives running around the nearby hillside through the spider queen's scope.

In the case of blocked perception, it was best to have night vision devices. There were indeed some in the storage space, but it was useless to take them out.

"Bobo?"

Su Xiao was looking for the location of Bobowang.

A pair of bright eyes suddenly appeared in front of Su Xiao. In this situation, where the lights were blind, Su Xiao was shocked.

After handing the spider queen to Bobowang for safekeeping, Su Xiao began to approach the two red-skinned indigenous people not far away.

Under the moonlight, Su Xiao could only vaguely see the two people. He slowly approached the two people behind them.

The two indigenous people held torches and shouted from time to time. The sudden attack made them very angry.

The light blue light flashed, and the sound of the blade cutting flesh came.

Although the body of the red-skinned native was very strong, the sharpness of the dragon flash was 9 points, not to mention that Su Xiao's strength attribute was 49 points.

Puff, blood sprayed on the face of the red-skinned native on the side.

A knife cut off the neck, but Su Xiao frowned.

When the dragon flash cut the neck of the red-skinned native, it was like cutting a thick piece of rubber, almost unable to cut off.

Feeling the warmth and stench on his face, the red-skinned native subconsciously wanted to shout, but he did not find Su Xiao's specific location.

Puff, another cut off the neck, Su Xiao shook off the blood on the dragon flash and stepped back quickly.

Every time he killed a red-skinned native, the talent of the devouring spirit could devour 15 points of mana values. Unfortunately, there was no treasure chest dropped, and he did not obtain the source of the world.

The two red-skinned natives were just an insignificant branch of this world. It was impossible to obtain the source of the world by killing them.

It was also good to harvest 30 points of mana values. What Su Xiao wanted were food and water. Of course, it was better to have a treasure chest.

Every native swallowed 15 points of mana values. If these red-skinned natives were all killed, the devouring spirit would be able to devour to full.

Dozens of red-skinned natives were not easy to deal with. If it were daytime, Su Xiao would turn around and run. There was still a chance at night.

Just as Su Xiao was ready to continue looking for the natives, a sound of wind breaking came from behind him.

A wooden spear stabbed Su Xiao subconsciously dodged.

The wooden spear brushed past his shoulder, leaving a trace of blood.

The dragon flashed in his hand and turned around. Su Xiao stabbed the red skin native behind him.

The dragon flash stabbed the red skin native in the chest, but it did not care. The pain of Qing Gangying was directly ignored by it, and this guy seemed to have no pain.

Pa!

The neck of the red-skinned native suddenly burst into a blood dance. Su Xiao's whole body was cold, and he subconsciously fell to the ground.

There were other contractors, and they were snipers. The sniper rifle had a silencer!

Su Xiao lay on the ground for a while, and there was no bullet coming. Su Xiao was a little puzzled.

Dozens of meters away, Bobowang's front paw grabbed the gun of the spider queen, and the other front paw was on the trigger. A big watery eye observed Su Xiao lying on the ground through the scope.

Bobowang was very puzzled. How did its master get down, and he was not injured.

The spider queen's gun butt was pressed against Bobowang's chest, just scared Su Xiao half to death -- Bobowang fired the gun.

Bobowang controlled the spider queen on the ground, and a strong feeling appeared. The spider queen's method of use was too simple, and Bobowang learned it under his ears and eyes.

Bobowang learned to use a gun, which was no longer something that slippers could punish.

Chapter 442: Brutal

After Su Xiao lay on the hillside for a while, he felt something was wrong.

In the past, when a sniper locked on him, he had a feeling of sharpness on his back. If he described that feeling carefully, it was like someone holding a sharp weapon aimed at his eyes at a close distance, and it could stab him at any time.

Now there was no such feeling. His first thought was that his perception was blocked, and he dispelled this idea in a flash.

Perhaps someone at the same level could block his perception without shooting, but it was impossible to shoot after shooting.

Su Xiao got up and looked around. The surroundings were dark, and the range of vision was reduced to the extreme.

Although he was confused in his heart, several red-skinned indigenous people had held torches and searched not far away.

In the case of a sniper, Su Xiao certainly would not act rashly. It was courting death.

Su Xiao returned to the vicinity of Bobowang in the night. He was going to take the spider queen.

As soon as he arrived near Bobowang, he saw that Bobowang was observing the enemy through the spider queen's scope.

Connecting the previous situation, an idea appeared.

"You fired the gun?"

Finding that Su Xiao's eyes were a little wrong, Bobowang quickly shook his head. The gun shocked Su Xiao.

Although Bobowang strongly denied it, there was a shell next to its front paw.

"Uwalala(unknown language)."

The red-skinned native let out a roar in the distance, and all the red-skinned native people began to concentrate.

Su Xiao would not let this happen. It would be more difficult to deal with the red-skinned natives after they gathered together.

According to the number of torches, there were twenty-one red-skinned natives who could fight. Most of the red-skinned natives were shot or seriously injured by Su Xiao with the spider queen.

Su Xiao picked up the spider queen. Bobowang did shoot before, but this did not mean that it could control this gun well.

The spider queen's recoil was terrifying. Bobowang only fired one shot, and her HP fell to about 15. Blood oozed from the white hair on her chest.

Bang, bang, bang.

Su Xiao accurately shot three consecutive shots.

The three indigenous people fell to the ground. Although not all of them were shot, these indigenous people lost their fighting power in a short time.

Bang, bang...

Su Xiao no longer hid and shot in a half-squat position.

The torches in the distance stopped one by one, and every torch stopped moving, representing a red-skinned native falling to the ground.

The red-skinned native could survive in the red earth area. Of course, they had their unique points, and with this method of sniping, the red-skinned native immediately found Su Xiao's position.

It was only a matter of time before they were found, and now it was the key to weakening the number of red-skinned native people as much as possible.

"Bart...(unknown language)."

After a round of shooting, there were still fourteen red-skinned natives who could fight. These natives screamed and rushed to Su Xiao.

Bang.

After shooting the last bullet in the Spider Queen's chamber, Su Xiao threw the Spider Queen to Bobowang.

"Hide well."

Bobowang had already become one with the grassland.

The red skin native, the remaining thirteen people were 40 meters away from Su Xiao. Considering the terrain factors, they were expected to close in five seconds.

Su Xiao pulled out the black and white double guns on both sides of his thigh. There was no time to shoot now. He directly switched the double guns to continuous shooting mode.

The muzzle moved forward, and both hands pulled the trigger simultaneously.

Tu-tu-tu-tu-tu-tu-tu...

The black and white guns suddenly burst out with the firing speed of a submachine gun.

The two guns were loaded with thirty bullets each, and after firing at the same time, they formed two bullet locks.

Under the continuous shooting mode, the bullets were instantly shot empty.

Pa, pa, pa, pa...

A rapid muffled sound came, and the native who rushed in front directly shot the quilted chain into two pieces.

The blood mist fluttered, the broken limbs scattered on the hillside, and there were ten people left in the battle of the red-skinned native.

Because it was the first time to use the black and white guns, Su Xiao did not expect that the speed of these two guns was so fast some bullets hit the enemy's body.

The eyes of the red-skinned indigenous people were red, and there were only ten people left in the tribe that originally had dozens of people.

The indigenous people stepped on the ground barefoot, making rapid footsteps. It seemed that the momentum was going to swallow Su Xiao alive.

He inserted the black and white double guns back into the holster, and dragon flash came out.

The green steel shadow energy was very conspicuous at night, and Su Xiao opened the green steel shadow energy to the maximum.

"Three, two, one."

After counting three times in his heart, Su Xiao detonated the alchemy bomb not far in front of him.

Boom!

The fire was soaring, making the night like day.

The strong wind came head-on, Su Xiao blocked in front of him with one hand, and his eyes stared at the center of the explosion.

Two indigenous people had their legs blown off, and the remaining eight rushed to Su Xiao.

"Wu, ta, ta!"

A native shouted and rushed to Su Xiao with his white teeth full.

The white teeth were very conspicuous. For these indigenous people, the teeth were very important. Without healthy teeth, it meant death. They cleaned their teeth with charcoal every day.

Although the indigenous people were fierce, they did not rush forward like a swarm of bees.

A native rushed to Su Xiao, six natives surrounded Su Xiao, and an old native stopped not far away, holding a blowpipe in his hand.

These natives fought with dangerous beasts all year round, and there was no need to communicate with each other at all.

The ancestors of human beings were the same, but these skills had been lost in the evolution along the way.

When human beings got civilization, they also lost things, such as special bite force, survival force, enough to resist the strong body of beasts, etc.

Aware of this formation of the red-skinned native people, Su Xiao was secretly vigilant, and at the same time, he was glad that he had used a long-range weapon to reduce the number of the native people.

The native in front of Su Xiao was very strong. It could be said that it was the strongest among all the natives.

This native held a stone axe in his hand. The stone ax was made of a black material, which should be some metal ore.

The attack of the stone axe native had no rules, but there was a wild and fierce feeling.

The axe came head-on, and the bulging muscles and strong wind made people fear the axe.

Su Xiao dodged the attack sideways, and the stone axe was close to the tip of his nose.

Su Xiao was deliberately doing this. Too big of a dodging action would waste time.

The stone axe fell to the ground.

Boom!

It was as if explosives were buried in the mountain rocks, and the gravel under this axe splashed.

As soon as Su Xiao dodged the stone axe, he stepped forward and stepped on the stone axe that was cut into the mountain rock.

The stone axe native exerted strength in both hands, but the stone axe did not move.

Su Xiao stepped on the stone axe with one foot, and the dragon flash in his hand slashed forward. This was typical slashing, but the angle was extremely tricky.

If the stone axe native let go of his hand to dodge, he would cut off the hands of the stone axe native. If he did not dodge, he would cut his throat.

Puchi.

Blood sprayed, the dragon flash crossed the throat of the stone axe native, and three fingers flew up simultaneously.

The stone axe native did not dodge, and while resisting Su Xiao's chop, he also grabbed the dragon flash with his hand.

After cutting off the throat and three fingers of the stone axe native, the chop stopped, and the body of the stone axe native was too strong.

Su Xiao exerted strength again, and the remaining two fingers of the stone axe native broke.

With a click, something unexpected happened.

Before the stone axe native's fingers were cut off, it bit on the dragon flash.

Although all the fingers were cut off, the stone axe native blocked Su Xiao's attack, and it was cut off the artery and vein + five fingers.

Chapter 443: Suffocating Death

The stone axe native Si Si bit the dragon flash, and Su Xiao couldn't take back the sword.

And don't forget, in addition to the stone axe native, six native people with wooden spears around Su Xiao. These wooden spear natives did not have the spirit of a knight. They believed in rushing up.

The stone axe native bit the dragon flash and six wooden spears stabbed at Su Xiao.

Su Xiao kicked the lower jaw of the stone axe native, and with a crisp sound, the lower jaw of the stone axe native was deformed.

As soon as he pulled out the dragon flash, the pain came from his chest and thigh, and two wooden spears ran through Su Xiao's body.

He did not know what material the wooden spears of these natives were made of, but they were sharper than metal after being polished.

Puchi, puchi, puchi.

Another three wooden spears pierced Su Xiao's body, and only one of the six natives pierced the air.

It was inevitable to be injured in the battle, not to mention that Su Xiao was being besieged.

After the five indigenous people stabbed Su Xiao, they immediately pushed him to the high ground. If his feet left the ground, Su Xiao would die.

Su Xiao did not change his expression at this critical moment and looked at the two indigenous people on the left.

The bright sword light flashed across the night sky. Su Xiao cut off the head of a native, and the other cut on the chest of the nearby native.

The aborigine whose head was cut off fell to the ground, and the other aboriginal continued to raise the wooden spear in his hand as if he was not injured.

The blood flowed down the wooden spear, and the pain-filled the nervous system.

Regardless of the pain in all parts of his body, Su Xiao shot out the broken line and firmly entangled a native.

Although the wounds on his body were expanded, those indigenous people lifted Su Xiao to more than ten centimeters high.

Holding the dragon flash in both hands, Su Xiao cut off a wooden spear, this wooden spear pierced his lower abdomen, and the power was the greatest to go up.

The five survivors began to retreat. One of them was entangled by the broken line and did not retreat far.

Su Xiao looked at the natives around him, and a smile appeared on his face. If he did not die, then the enemy would die.

The dragon flash stabbed forward. The blade cut through the brain of a native.

At the same time,

A bomb fell out of Su Xiao's cuff.

Boom.

Although the bomb exploded, it did not have an impact but burst out a dazzling light. This was a flash bomb.

The flash bomb at night was like a small sun, and the eyes of several indigenous people were white, and tears poured out uncontrollably.

Puchi, puchi.

The sound of cutting flesh came from the strong light, Su Xiao killed two indigenous people, and he also cut off all the wooden spears on his body.

Stepping on the ground, Su Xiao just wanted to rush out of the encirclement, and the numbness came from his neck.

Three indigenous people had combat power, two holding broken spears and the older native standing in the distance.

The older native made this attack. It was good at long-range attacks, and the weapon was blown arrows.

Su Xiao took a few steps back, and the numbness began with his neck, quickly spreading to half of his body.

Touching the neck position, a wooden thorn stabbed into his skin. The wooden thorn should be a thorn of some plant, with animal feathers tied to the tail.

[You have been eroded by the 'Toxic Green Arrow Frog nerves.' Abnormality resistance detected
physique attribute detected.]

[Physique attribute passed.]

[Abnormality resistance failed!]

[You receive 10 True Damage per second, the effect lasts for 50 seconds.]

[Your nervous system has been paralyzed by 7. The effect lasts for five minutes.]

The blow dart native had not made a move before. Even if the other natives died, it did not care. It was waiting for an opportunity to hit the enemy.

Su Xiao's body was numb, and his movements were no longer flexible.

There were three natives left. Two of them did not have weapons, and the other was the most dangerous native. From the attire, it might be the leader of the natives.

"Tuna sprinkler(unknown language)."

Blow Arrow waved his hand, and two indigenous people with broken spears began to approach Su Xiao.

It was very difficult to deal with a tribe alone. If not for the lack of food and water, Su Xiao would not fight with these indigenous people.

This was a battle of survival. The trial world was so cruel, either choosing death or choosing to rob other people's survival resources.

Although 'The Arrow Poison Frog Poison' was very hot, Su Xiao could solve this poison. He needed time now.

Whether energy or poison, Qing Gang Ying energy, everything that invaded his body, would find a way to expel these 'outsiders.'

Su Xiao's mana values merged into his blood and body, and the green steel shadow energy was the same.

Unfortunately, the poison of the Poison Arrow Frog was not energy. The green steel shadow energy could not cure this poison for a short time. Although it could be removed, it required time.

Su Xiao quickly converted mana into green steel shadow energy. A few seconds later, his legs regained some consciousness.

It was undoubtedly good news for his legs to recover intuition. Although the left body still had no consciousness, Su Xiao's pace was a little deformed, but he had the capital to fight the enemy.

The two indigenous people rushed quickly. The blow dart in the rear held the blow arrow and aimed the blow arrow at Su Xiao.

This made Su Xiao very uncomfortable. With the threat in the distance, he could not fight with ease.

Just as the two indigenous people approached Su Xiao, a roar came from the distance.

The two indigenous people immediately turned their heads. That was the roar of their leader. The blow dart was full of anger. Bobowang attacked it.

Bobowang's hidden ability was unquestionable. It sneaked behind the blow dart native and took a bite at the buttocks of the blowdart native.

This bite was very important, allowing Su Xiao to clean up the two wooden spear natives.

The time was fleeting, and Su Xiao rushed to the two wooden spear natives.

The fierce hand-to-hand battle began, Su Xiao half of his body was numb, and the movement of waving the sword was inevitably deformed, and the wooden spears in the hands of the two wooden spear natives were cut by him before, and the threat was greatly reduced.

Three minutes later, the two wooden spear natives fell to the ground, and Su Xiao was not feeling well. There were bruises on his cheeks, and blood dripped down the corner of his mouth.

The battle on Su Xiao's side ended, but Bobowang was extremely hot.

Bobowang bit the butt of the blow dart, his body curled into a ball, and cleverly used his two furry front paws to protect his eyes.

The blow dart frog was desperate. If it punched with its fist or kicked back with its foot, the dog would not let go. It even used the arrow frog blow dart to stab Bobowang, but it was useless.

Bobowang obtained it with a dark purple quality scroll, it was a high-level creature, and the poison of the arrow frog was like a drizzle to it.

Bobowang bit the butt of the enemy, and Su Xiao attacked directly.

Although the blowdart aboriginal was long-range, the physical strength was surprisingly high, and the melee ability was not weak, but it had Bobowang on its butt, and the melee ability could not be used.

The blow dart aboriginal shook Bobowang on his butt to fight with Su Xiao. Although the picture was a little funny, the battle was extremely fierce.

Su Xiao was half numb, and he could not use the sword skills, so he could only exchange injuries.

Half an hour later, the blowdart aboriginal covered his bloody throat and fell to the ground with a face full of fear. Bobowang still had a bloody nose and a swollen face on his butt.

Bobowang's mouth was swollen and high, almost as thick as a neck, very cute, and the gaze seemed to ask: Master, am I brave?

Bobowang was very brave. He was brave, but he also learned Su Xiao's ruthlessness. No matter how the enemy beat him, he would not let go.

Chapter 444: High Risk Reward

[You killed the Yosenman Chief.]

[Yosenman Chief is a key figure in the Red Earth Region. You have obtained 8 of the source of the world, and now you have obtained 8 of the source of the world.]

[You have received the chief package.]

Su Xiao lay on the hillside. He had not rested for long when he suddenly heard rapid footsteps.

Struggling to sit up, Su Xiao looked around.

On the hillside in the distance, a vague figure ran to the distance. This figure was extremely obvious at night. His whole body was white and naked.

This was Brother Wu San. It had to be said that Brother Wu San's survival was very tenacious. He was stabbed in the eye socket by a wooden spear before, and he was not dead yet.

Although he was not dead, the misfortune along the way made him half dead.

After witnessing the battle between Su Xiao and the red-skinned native on the hillside, the only thought of Brother Wu San was to run.

The three red-skinned native people could press him on the ground and rub him. The fierce man on the hillside dealt with dozens of people simultaneously and finally won.

Brother Wu San was so scared that he did not dare to breathe.

After the battle on the hillside, Brother Wu San recovered some strength. Although the fierce man seemed exhausted, he did not want to take the risk.

His first reaction was to run away, and the farther he ran, the better.

It was good to be alive. That guy was so strong that he did not want to get close to the battlefield of the other side.

...

When Su Xiao noticed Brother Wu San, he had already run far away.

"Ha ha ha, I am alive. I will be blessed if I survive a disaster. F*ck... Ah!"

Brother Wu San began to shout proudly after running to a safe distance. It seemed to be venting the depression in his heart, but shouting turned into a screaming, and the sound was getting farther and farther.

"Over there, it seems to be a cliff..."

If Su Xiao remembered correctly, it was indeed a cliff over there. He observed the nearby terrain during the day.

Brother Wu San just escaped from the native tribe and 'committed suicide by jumping off a cliff.

Bobowang looked in the direction where Brother Wu San disappeared. His face, which was almost swollen like a ball, was slightly melancholy.

The gaze seemed to say: This guy knows how to play.

First, let's not care about Brother Wu San's 'wonderful journey.'

After lying on the ground and resting for a while, Su Xiao's body regained consciousness.

Picking up the [Chief's Package] on the side, this was something similar to a treasure chest. He had obtained this kind of item once in the war world.

This special 'treasure chest' had a lot of randomness. It could have a very valuable item or a worthless item.

Putting away [Chief Package], the current situation was unsuitable for opening the box. Su Xiao pulled out a few broken spears inserted into his body. The pain stimulated his nerves, and his eyes turned black.

After sewing the wounds and bandaging them, Su Xiao breathed a sigh of relief.

Looking at the empty tribe in the distance, the enemy had been solved, and at the moment of harvest, he was hungry.

Walking down the hill, Su Xiao looked around the tribe with a strong flashlight and killed the red-skinned natives who were seriously injured.

There were dozens of tents in the tribe, and the search was not simple.

There was dried meat in each tent, but this dried meat looked suspicious. Su Xiao did not eat this dried meat.

Looking for tents one by one, he soon came to the largest tent in the center.

Although this tent was also simple, there were many things inside.

After searching for a while, Su Xiao gained a lot. He found a 'Roasted Whole Pig.' Although he was unsure if this creature was a pig, it could be eaten. This was an item that had been certified by the reincarnation paradise.

[Charcoal Roasted Pig]

Quality: Blue

[Type: Recovery]

[Effect: After use, 100 HP will be restored within an hour, and the fatigue will be relieved.]

[Rating: 56]

[Description: Although the name is strange, this is a delicacy made from medicinal herbs and charcoal. Only the leader of the tribe is qualified to enjoy it.]

...

Not only did Su Xiao find a [Charcoal Roast Little], but he also found a few bamboo tubes of freshwater.

He took a small sip. This freshwater was very sweet. It should be mountain spring water.

Food and fresh water were temporarily solved. Su Xiao was not in a hurry to eat and drink but continued to search in the open. He wanted to leave here as soon as possible.

The strong smell of blood might attract other creatures.

After searching for a while, Su Xiao found a jar.

The jar was very rough, but this should be a treasure for the red skin and earth.

Su Xiao shook the jar. There was something inside. To be safe, Su Xiao put the jar on the ground and took a few steps back, breaking the jar with a stone.

The jar was broken, and a few crystal stones rolled out. Su Xiao was happy.

Five soul crystals(middle) and a small bamboo tube rolled out of the jar.

Five soul crystals(middle) could already be called a huge sum of money, and high risk also brought high returns.

As for the small bamboo tube, in a sense, its value was even higher than the soul crystal.

[Unknown Creature's feces powder]

[Rarity: White]

[Type: Material]

[Rating: 5]

[Description: The feces of a certain creature in the black forest has been processed into a powder.]

...

From the information, this thing was not very useful, but the truth was that this was not the case.

This must be the feces of a terrifying creature. The score of feces had reached 5 points, which was incredible.

The smell of this terrifying creature would make other creatures afraid. Most creatures would not dare to approach if this kind of feces powder were sprinkled near the camp at night.

In this way, Su Xiao could get enough rest, and the possibility of surviving for ten days was greater.

After looting, Su Xiao quickly left the basin and went straight to a valley in the distance.

This was the place he chose during the day. There was a cave in the valley, and there were no traces of living creatures living in the cave.

Five minutes later, Su Xiao arrived in front of the cave. The small traps set up near the cave entrance were not triggered, which made him feel relieved.

Spray the feces of an unknown creature at the entrance of the cave. This kind of feces is very precious and needs to be used sparingly.

However, even if it is conserved, this kind of feces can only be used five times. The amount sprinkled is too little and useless.

Moving a few big stones from nearby to block the cave entrance, Su Xiao breathed a sigh of relief in the cave.

The cave was not deep, only about five meters deep. Sitting on the dry straw mat laid out during the day, he finally came to a safer place.

Exhaustion filled his whole body, and Su Xiao now wanted to fall asleep.

"Woof."

Bobowang stared at [Charcoal Roast Little], and his saliva was already flowing out.

Su Xiao cut [Charcoal Roasted Little] in half. Although this was not small, it was only enough for him and Bobowang to eat.

Anything you eat when you are hungry is delicious, not to mention the taste of [charcoal roasted pig] is really good.

Half of [charcoal roasted pig] went into his stomach. Su Xiao picked up the bamboo tube on the side and gulped down the mountain spring water in a few mouthfuls.

Bobowang also did the same action. One man and one dog could be said to be synchronized.

The food was solved and also absorbed enough water. Su Xiao began to feel sleepy, and so did Bobowang on the side.

Lying on the hay did not take long for Su Xiao to enter deep sleep. As for vigilance, he could only resign himself to fate. There is a lot of blood loss, penetration, exhaustion, and the remaining poison arrow frog in his body.

It was already a tenacious life that he did not die. It was impossible to be vigilant when sleeping.

He needed to survive for a total of ten days. Su Xiao only survived for less than a day.

If the difficulty of survival in common areas was 2, the Red Earth Region was 10. As for the black forest, it was at least 50.

[The remaining survival time is 227 hours, and the number of surviving contractors is 462.]

Chapter 445: All of a Sudden

Boom!

The feeling of the earth-shaking appeared, stone chips fell from the top of the cave, and Su Xiao, who was sleeping soundly, suddenly opened his eyes.

He turned over and sat up, and the sense of weakness and fatigue was swept away.

The cave was a little dim, the hole was blocked, and there was no abnormality.

Boom, boom!

The loud noise came from the distance, conservatively estimated that it was half a kilometer away. Su Xiao breathed a sigh of relief.

Taking out the waterproof pocket watch to check the time was already 11 o'clock at noon.

Today was the second day of the survival trial, and although the first day was a bit awkward, Su Xiao survived the most difficult day.

When he had just arrived to Devour Island, he was very unfamiliar with this place. Not only Su Xiao but also a contractor.

[The remaining time is 215 hours. The number of contractors' survival is 456.]

The contractor, who could live through the first day, had a certain understanding of Devour Island. The main reason why many casualties appeared on the first day was to parachute.

Some of the contractors encountered creatures on Devour Island when they landed, and it was inevitable that the death rate was higher.

There would be a lot of deaths on the first day, and it would decrease rapidly on the second day.

From the third day, the number of contractors' deaths began to increase, and the number of deaths after that would be more and more. The last two to three days should be the cruelest.

If he wanted to find food and fresh water, he had to explore Devour Island. It was inevitable that he would encounter native creatures or meet with other contractors.

In the cave, Su Xiao moved his muscles and bones. The natives he dealt with yesterday were very strong, but this was related to his condition.

It consumed a lot of physical strength to cross the whole grassland, and he did not drink any water for the next ten hours. It was good to have the combat power at that time.

He had to leave the Red Earth area as soon as possible. There was too little food here. If he had enough physical strength, although it was not easy to deal with those indigenous people, it would not be as bitter as yesterday. It was a terrible experience to be hungry and weak.

Outside the cave, there was still a constant roar. Su Xiao moved the stone of the hole, and the light shone into the cave. His pupils enlarged a little to adapt to the sudden light.

He slowly walked out of the cave.

The roar was clearer, and the sound came from a plain on the right side.

Su Xiao climbed up a hillside and looked down at the plains where the roar came.

Seeing the scene in the distance, Su Xiao subconsciously squatted on the hillside.

On the plains in the distance, the densely packed red-skinned natives were charging and shouting, conservatively estimated that the number was more than 10,000.

Bobowang, who was in a daze, followed behind Su Xiao. Bobowang had a habit: he liked to howl when he got up.

Bobowang stood on the hillside like a snow wolf. The breeze blew its soft hair, and its head was raised.

When it inadvertently saw the scene below, Bobowang had already prepared a '* ao ---' and held it back. It saw the dense indigenous people.

Bobowang was so scared that he almost peed out and quickly retreated to the back of the hillside with an expression that scared the baby.

Shouts of killing came from the distance. The enemy of the red-skinned native was not a human but a creature that Su Xiao had never seen before.

This creature was like a giant scorpion, about three meters long, covered with a black exoskeleton, thick feet stabbed into the ground, and a big pincer in the curved tail and mouth.

After Su Xiao saw this creature, he immediately thought of the Zerg.

It was no wonder that Su Xiao thought this way. This kind of giant scorpion creature was completely born for fighting. It had two hearts and no brain, this fatal weakness.

Taking out the [Eye of Havana], because the distance is a little far, Su Xiao is unsure whether the detection can be successful.

[Checking...]

[Because of the distance, only 87 of the information was obtained.]

The information was as follows:

[Name: Scorpion]

[HP: 100]

[Mana: 50]

[Strength: 16]

Agility: 14

Stamina: 8

Intelligence: 5

Charm: 1

Skill 1: External Bones Level 1(Passive), Defense +2

Skill 2: Acid Blood Level 1(Passive), Blood has corrosiveness.

Skill 3: Void Insect Tribe(Passive) can survive in extremely harsh environments and can digest 80 of organic matter.

Skill 4: Group combat(Passive). After the number of sting scorpions exceeds 300, Strength +2, Agility +2. After the number exceeds 1000, Strength +3, Agility +3, Strength +5. After the number exceeds 10000, Agility +5.

...

[Hint: The hunter has come into contact with the two main forces of the Red Earth Region. Intelligence in the Red Earth Region has been released by 20.]

[Red Earth Region is naturally generated. Food is scarce, and freshwater is scarce.]

[Red Earth Region has 70 of the region occupied by the two types of creatures. They are respectively

[The two types of creatures have fought in the Red Earth Region for over three hundred years.]

[Yosenman Tribe occupied 31 of the area, Void Insect Tribe occupied 39.]

...

Seeing this information, Su Xiao had some understanding of the Red Earth Region. Two creatures here were the most difficult to provoke, which were the Yosenman Tribe and the Void Insect Tribe.

The number of Void Zerg was huge, and the number of sting scorpions on the plains alone was more than 100,000, which could be called the sea of insects.

Although he knew the distribution of forces in the Red Earth area, this was not much help for survival, but the future was dark.

Su Xiao now wanted to leave this broken place. In layman's terms, This damn place is too poor. There is no food.

It was not easy to leave the Red Earth Region. Not to mention the two forces in the area, the harsh environment alone was enough to kill.

After observing for a while on the hillside, Su Xiao was ready to go around the battlefield on the plain.

But at this time, the roar gradually came from both sides, and Su Xiao's face changed dramatically.

"Could it be..."

He stood up and looked into the distance. He did not know when, but many red-skinned natives and sting scorpions had rushed over from both sides.

He was not at the edge of the battlefield but the center of the battlefield. It was just that the battlefield was too big, so he did not notice for a moment.

He saw a place full of enemies, and the red-skinned natives and sting scorpions rushed over from both sides like a tide.

"Bobo is hidden well."

Su Xiao opened the buttons on his collar. Although he did not want to be involved in this war, he could not avoid it now.

Since he could not avoid it, he would kill his way out. His current state was very good.

Zheng!

Dragon flash came out. Su Xiao did not drive the green steel shadow to the maximum. It could be imagined that this war would not end for a while.

A sting scorpion with a sour smell rushed over. The sting scorpion had no intelligence. It only followed the queen's instructions and killed all the creatures with two feet.

The sting scorpion rushed to the side of Su Xiao. The long sword crossed, and the trajectory of the sting scorpion was skewed.

It hit the mountain rock, and a green mark appeared on the shell of the sting scorpion. The knife was cut in half, and the cut was smooth.

Whoosh ---.

A wooden spear was thrown from a distance. Su Xiao was familiar with this kind of wooden spear. It was a red skin native.

Su Xiao dodged the wooden spear sideways, pulled out the black spear on the outside of his thigh with one hand, and fired a few shots.

The red skin native was directly killed, which made Su Xiao a little puzzled.

He thought of the possibility that he might have dealt with the elites of the red skin natives yesterday. The physical strength of those guys was abnormal as if they were made of iron.

These red-skinned natives on the battlefield were much weaker, not to mention dozens, even hundreds of Su Xiao could easily deal with them.

The red-skinned natives collided with the sting scorpion-like two waves crashing together.

Flesh and blood splashed, broken limbs flew, the hatred between the red-skinned natives and the Zerg lasted for hundreds of years, and they would fight to the death when they met.

In the center of the battlefield, the blade storm bloomed here, and all the enemies who dared to approach Su Xiao were cut into pieces, whether it was the red-skinned natives or sting scorpions.

Chapter 446: Fierce Spirit

Su Xiao wanted to kill his way out, but there were too many enemies, and the surroundings were densely packed with enemies. He could not even see the scene in the distance.

The shouts of the red-skinned native and the roar of the sting scorpion connected on the battlefield. Both sides were quickly dying and dying, but neither side retreated.

If one side were defeated, the land would be taken away, and the living environment would worsen. This was a battle between races.

Red blood and green fluid mixed. Su Xiao looked around like an eagle, and all creatures who dared to approach him were killed.

He did not kill the other side, but the other side also wanted to kill him. This was a battlefield, and there was no reason to say.

Now it was impossible to kill out. How to survive in the battle was the most important thing.

The light flashed, the two sting scorpions were cut off simultaneously, Su Xiao turned around and kicked sideways, and the head of a red-skinned native was deformed.

He quickly took out the [Dragon Force] potion. He smeared the potion on the back of his hand.

[Dragon Force]

[Origin: Reincarnation Paradise]

[Quality: Blue]

[Type: Consumable]

[Effect: Apply this medicine to the surface of the skin. Strength +2, Constitution +2, abnormal status resistance +20. The effect lasts for ten minutes.]

[Rarity: Seven days.]

[Storage: 100.]

[Rating: 70]

[Description: Do not drink it. Although it will bring a powerful buff effect of Strength, Agility, and Constitution +15, the user will die within 30 seconds.]

...

With a physical attribute of 46 points, Su Xiao, who had been fighting for ten minutes, was not panting.

There were broken bodies piled around him. Su Xiao stood on the towering pile of corpses like a martial god on the battlefield.

The red-skinned natives around looked at Su Xiao with fear, their calves trembled, and they did not dare move forward for a while.

The red-skinned natives did not dare to go forward, but the sting scorpions did not care about this. They did not even have a brain. This kind of fear had nothing to do with them.

Several sting scorpions climbed up the pile of corpses.

Several white marks flashed in the air before they got close to Su Xiao, and the sting scorpions were cut into several pieces.

Su Xiao jumped off the pile of corpses and jumped into the sting scorpions.

Clang.

A circular slash appeared, and the body of the sting scorpion cracked where the slash passed. Su Xiao cleared out a circle with five meters around him.

Holding the sword with both hands, Su Xiao took a deep breath.

A light blue blade cut out of thin air, leaving the edge of the dragon flash.

Zheng, the dragon flash, gave out a crisp sound unique to metal.

The blade light flew into the large army of the sting scorpion, and wherever the blade light passed, the sting scorpion was cut down like wheat.

After the blade light, a passage with a diameter of two meters and a length of ten meters appeared. The passage was full of green blood and the sting scorpion that was still struggling on the verge of death.

Su Xiao just wanted to break through from here, and in less than two seconds, the sting scorpion had filled this 'passage.'

Su Xiao seemed unparalleled on the battlefield, not to mention getting close. He could be killed at a glance.

The sting scorpion would not come near for a short time, and he turned to look at the red-skinned ghoul.

"Wow ---" ---

The red-skinned natives were not ready to approach Su Xiao. These red-skinned natives began to walk around Su Xiao. Their enemies were sting scorpions, not Su Xiao.

Finding the attitude of these red-skinned natives, Su Xiao frowned.

Last night, those red-skinned natives did not show this emotion of fear, and those guys could even ignore the pain caused by Qing Gang Yin.

Now the red-skinned natives were different. Although these red-skinned natives were much weaker, they would scream when they were injured, and they had emotions of fear and panic.

Compared to those red-skinned natives yesterday, these red-skinned natives now were closer to humans. The killing machines that were specially cultivated yesterday were like killing machines.

The war was still going on. Although the red-skinned native was scared off by Su Xiao, the sting scorpion rushed over again.

He killed all the creatures approaching Su Xiao, let alone this kind of war weapon.

The attributes of the sting scorpion were very weak. If they stood in a row, Su Xiao would kill them in a row, but the number of sting scorpions was too many, overwhelming.

There was no hope of breaking through, so he could only continue to kill until the war's end.

Su Xiao's four attributes were more than 40 points, and the master of sword techniques was Lv.21, so in the war, his combat power was terrifying.

Moreover, Su Xiao used a sword, and he was not weak in the face of many enemies.

The killing moment began, and there were more and more beast corpses near Su Xiao.

Half an hour later, Su Xiao had forgotten how many sting scorpions he had killed, hundreds? No, it might have been thousands.

...

In the distance of the battlefield, six women, contractors, were lying on the hillside nearby.

"It's starting again. I just dodged a battle yesterday. Do these two races fight every day?"

A weak wet nurse hid behind the hillside, observing the battlefield with a telescope.

"We must leave the Red Earth Region as soon as possible. After this war is over, we will cross the battlefield. If the information is correct, the other side of the battlefield is the common area."

Another woman, a contractor, spoke. She carried a sniper rifle on her back and had a cool and elegant temperament. Except for a few members around her, she rarely spoke to outsiders.

These six people were all members of the Red Spider Lily adventurous group. Like Su Xiao, their landing location was also the Red Earth Region.

On this day, the women of Red Spider Lily realized the horror of the Red Earth Region. They were all injured. If not for the wet nurse, they would have lost members.

"Leader, there seems to be something wrong on the battlefield."

Candy, who was holding a telescope, looked at the center of the battlefield. She found humans fighting on the battlefield, and the nearby area was full of corpses.

"This is..."

Candy's voice trembled, and some bad memories appeared.

"Leader, that man has appeared!"

"Which one?"

"It's that knife-man."

Leng Yue's pupils contracted. She snatched the binoculars from Candy's hands and looked toward the center of the battlefield.

"We finally found that guy. Kill him now."

Sniper Bee took the sniper rifle on his back and aimed the scope at the center of the battlefield.

The vice-captain, Xue Meigui, lowered her head. She kept silent.

The scheming, black-rimmed woman pushed her glasses, her eyes empty as if she was thinking about something.

"Saber man? Is that the guy you mentioned before?"

The newly recruited master, Tanona, came forward. Her figure was not strong, and she was even a little thin. She had a head of wine-red hair, and her body emitted a jasmine fragrance.

Lona was a little excited. She had heard the members mention how strong the saber man was, but she did not believe it. She did not believe anything she had not seen with her own eyes. She wanted to fight with the saber man.

Lona was different from the other members of Red Spider Lily. She had a wild ambition in her heart. She got Leng Yue. This was a master with a special sexual orientation.

Leng Yue had been observing the situation on the battlefield, and her face was getting uglier and uglier.

"Monster! He is so strong that he is a little abnormal."

Leng Yue clenched her fist and punched the grass.

The cynical woman took the telescope and shook her head after observing it for a while.

"If there is no good opportunity, we will die if we go up now unless he falls into the cliff and dies."

The bee only used the scope to look at Su Xiao and quickly moved away. She had a feeling that if she continued to aim at the other party, she would be exposed.

Lona saw the reaction of several people and was somewhat puzzled. She grabbed the telescope. The black-bellied woman did not let go. Lona had some doubts.

"It is better to be prepared in your heart. This is our mortal enemy. We must be separated by life and death. We can not reconcile the kind."

Lona nodded, but she did not care in her heart. Her strength was even slightly stronger than Leng Yue's.

Chapter 447: Taboo

Lona searched on the battlefield through the telescope. She quickly found Su Xiao.

The limbs of the sting scorpion flew, and dark green blood splashed.

A man holding a long sword was fighting on the battlefield. Although he was the enemy, the man looked relaxed.

When he dodged the enemy's attack, he would also deal a fatal blow to the enemy.

The long sword flashing with purple light seemed to be able to cut off any object. The special light emitted by the blade was recognized at a glance.

It was a special light that only strengthened and above.

Suddenly, the man on the battlefield stopped as if he was brewing something.

Clang.

A large number of sting scorpions were dead and wounded. Lona swore that she had never seen a contractor attack with sword energy or saber light.

Lona was stunned. She estimated that if she fought with that man...

Lona shook her head. She could not let that happen. She could not. Otherwise, she would be dead.

"This is our enemy?"

Lona looked around at the people around her. The expression on her face seemed to say, "Are you kidding me?"

"Yes, this is our enemy. He was not so strong before."

The cynical woman bit her thumb nail and thought quickly in her mind.

Candy, who was at the side, said, "Leader, we have to find him for revenge. Can we not take revenge..."

Although Candy was a weak girl, she had a strong heart. After nearly being wiped out, she did not quit the Red Spider Lily adventurous group.

"No way."

"No."

The answer appeared in unison. It was the black-bellied woman and the bee.

The master of the bee, Black and White, was killed by Su Xiao. Her hatred for Su Xiao could not be reconciled. As for the black-bellied woman, she had other considerations.

In the Red Spider Lily adventurous group, the black-bellied woman could be considered to know Su Xiao the best.

After some deliberation, the black-bellied woman said, "Lona, now you can choose to quit the group."

"Are you farting?"

Lona looked at the black-bellied woman.

She turned to look at Leng Yue.

Memories welled up in her mind. In the world of Lv.2, Lona was lying on the street covered in wounds a long time ago. Her face was full of blood.

"Candy, someone here is injured, not the hostile contractor. Kiss her."

"Okay."

"Leng Yue, you don't have to worry about her. We don't know each other at all."

"It's not easy to survive."

...

Thinking of this, it was over. With Lona's strength, she would be valued even if she joined a large adventure group. How could she join the Red Spider Lily adventure group with only five people if there was no special reason?

She had been looking for the two names Leng Yue and Candy for a long time. Now Leng Yue did not know that she was the dying contractor.

"Then just treat it as me farting."

The cynical woman pushed her glasses and smiled. She had never trusted Lona before, but now it seemed that Lona was temporarily credible.

"It's like this. Let's try to recall our grudge with Saber Man."

The cynical woman picked up a wooden stick and tapped three points on the ground.

This is the Queen, Leaf, and Black-White. The three entered the low-level world with exemption scrolls, which reduced their strength. After that, they fought with Saber Man and died in battle.

"We don't have to investigate the cause of this. It is meaningless."

The black-bellied woman wiped the three spots on the ground, and Bee, on the side, curled his lips.

When we were in the Giant World, we sensed the blood marks on Saber Man. Then we began to fight. We were no match. An ordinary member suddenly showed his power and sent us away.

Leng Yue, is the identity of the ordinary member still not revealed?

The black-bellied woman looked at Cold Moon.

Leng Yue shook her head.

"No. The reincarnation paradise warned me before. If I reveal it, the consequences will be very serious."

The cynical woman used a branch to draw on the ground.

"Is that so? Then let me ask you a question. Why did the knife-man approach our adventurous group? You should know that he did not need to approach us in the attack and defense task initially, and the team blood seal was not confidential information. Does he want to take the initiative to fight with us?"

The black-bellied woman looked at everyone. Her IQ was 156. Although her strength was not excellent, her ability to infer was very strong.

Hearing the black-bellied woman's words, the women were puzzled.

"Why did the knife-man approach us in the Giant World? I don't know."

Xue Meigui's IQ was not high and 120, and she had been confused.

"The target of the knife-man may be the ordinary member. Otherwise, he will not approach us. With the character of the queen, he will say the name of Red Spider Lily ."

So, to clear our identity, knowing that there may be blood marks, the knife-man still chose to approach us, which is strange. It is connected to the abnormality of the ordinary member. Yes, that is it.

The black-bellied woman bit the nail of her thumb hard.

I just guessed that the knife-man might be different from us. Every time he entered the derivative world, he had a special task, like killing some special contractor. At that time, everyone saw that the ability of the ordinary member was very abnormal, and the reincarnation paradise would block her words. This was a situation that had never happened before.

Every time, there is a special task, a rapid increase in strength, and the powerful ability to fight contractors...

The cynical woman began to chatter. She did not notice that five eyes were looking at her in horror.

Leng Yue's scalp was numb, and the cynical woman's voice suddenly disappeared as she was talking. The reincarnation paradise blocked the cynical woman's words!

"Don't say it, Xiao Hei."

Leng Yue shouted, and the cynical woman was stunned.

"What's wrong?"

"Just now... the reincarnation paradise blocked what you said."

The cynical woman only noticed the frightened eyes of several people at this time. Her heart began to beat faster, and this fear and excitement made her subconsciously tighten her legs.

"Looks like I guessed correctly. Eh..."

The black-bellied woman's expression changed.

"What's wrong?" A few people at the side hurriedly asked.

The cynical woman lowered her eyes. She thought of something. About Su Xiao's identity, it might be a unique identity. Once exposed, she would be surrounded and killed by other contractors.

"Maybe we don't have to take the initiative to deal with him."

The cynical woman smiled a little cold. She thought of a way.

"Xiao Hei, what is in your hand?"

Candy stretched out her slender fingers and wiped them on the back of the black-bellied woman's hand.

"What?"

"What is this blue dot on your hand?"

The black-bellied woman looked at the back of her hand. She saw a small blue dot appear on the back of her hand. The blue dot enlarged at speed invisible to the naked eye and seemed to form a mark.

The black-bellied woman's expression changed one after another.

"Xiao Hei, what method did you say before?"

Hearing Leng Yue's question, the black-bellied woman shook her head.

"Nothing. I might have made a mistake."

The cynical woman recovered her face and seemed to be weighing the pros and cons.

"Give up on revenge. My previous deduction was wrong. There is a clue that I can't figure out no matter what, so those previous deductions may not be valid."

Some taboos can not be violated, even Su Xiao will try to avoid those taboos, and the cynical woman accidentally violated the taboo!

The cynical woman just insisted on revenge because she knew that both sides had already accepted the death hatred after the battle with Su Xiao.

Even if they unilaterally did not pursue it, no one would ignore an adventurous group who looked for revenge at any time.

...

On the battlefield, Su Xiao wiped the dragon flash. The battle between the red-skinned natives and the Zerg came to an end. Both sides retreated a distance.

Dozens of red-skinned natives stood not far away. These red-skinned natives seemed to be waiting for someone.

An old native came out. The old native wore feather ornaments on his head, and the other natives bowed and retreated.

"Foreign strong, the Yosenman tribe welcomes you to the Red Earth Region."

The old native was full of smiles and did not seem hostile. He was still holding food and fresh water in his hand as if he was ready to give this food to Su Xiao.

[Note: The hunter's heroic performance on the battlefield has gained a favorable impression of the Yosenman tribe. ' Favorability: Friendly(21/500).]

Su Xiao's eyes were shining. These red skin natives were different from the earth people he had met before, and this old native spoke a language he could understand.

The theme of the survival trial was survival. If he explored the world based on survival, what would happen? The answer was a huge benefit.

Chapter 448: Yosenman Tribe

Su Xiao looked at the old native. The other party wanted to pull him into the camp of the native, and the camp's favorability had appeared.

The world introduction mentioned one point before: to avoid communicating with the void creatures. The reason was that the void creatures were mostly unstable structures.

Those Zerg were void creatures, which had been seen from the other party's information.

As for whether the red-skinned native was a void creature, Su Xiao was not sure. From the information, it did not seem like it.

These red-skinned native people should be the original people of this planet. The void Zerg might be outsiders.

Not communicating with the void creatures was just a one-sided statement of the reincarnation paradise.

It could be treated as a warning. Su Xiao had to confirm the specific situation personally.

Since the red-skinned natives had the possibility of communicating, Su Xiao would certainly seize the opportunity, but he also had to be vigilant.

He had killed several red-skinned natives in the war.

"How do I leave the Red Earth Region?"

Now Su Xiao was most concerned about the retreat. Even if he communicated with the red-skinned natives, he had to prepare the retreat first.

Su Xiao opened his mouth, and the old native with feathers stepped forward.

"Foreign adventurer, keep walking in the sun's direction, and you can walk out of the Red Earth Region."

"The direction of the sun?"

Su Xiao felt that there was something wrong with this.

"Yes, it is the direction of the sun. Everything we have is guided by the sun. Of course, this requires a small tool."

The old native untied the hanging on his waist. It was a compass-like item, somewhat similar to Jack's compass in the Pirates of the Caribbean.

Su Xiao guessed that this might be a tool similar to a compass.

"Tell me your price."

The meaning of the other party was already very obvious. Food and water could be given for free, but this compass could not.

"Foreign strong man, you can call me Baal. I wonder what your name is?"

The old native Baal gave people a feeling of an old fox. Although he looked calm on the surface, he had been inquiring about Su Xiao's origin and did not mention the price of the compass.

"Byakuya."

Conventionally used a fake name,

The name Byakuya was already used. The reason why Su Xiao used this name was to reduce the feeling of incongruity.

If it were called Zhang Tiedan or something like that, once it did something big in the derivative world, it would immediately be known by another contractor. The name was too discordant.

"Byakuya, well ---, don't you go to my tribe to rest?"

Old Baal was full of enthusiastic smiles, and many wrinkles appeared on his face, like a blooming chrysanthemum.

Su Xiao hesitated for a moment and looked around at the number of red-skinned natives.

There were thousands of natives around. It would be troublesome if they entered the tribe of the other side.

But now, the favorability was: Friendly(21/500). As long as there was no huge change, the red skin natives would not besiege Su Xiao.

Even if he wanted to attack Su Xiao, the favorability would drop rapidly, and then it would have a warning effect.

A red gem slipped from the cuff to the palm of his hand. It was a Philosopher's Stone. With this Philosopher's Stone, he could make alchemy bombs and potions at any time.

He decided to take a trip to the tribe of the natives. It was impossible to snatch the compass from the hands of the natives, but he could get it by other methods.

From Old Baal's tone, he could hear that the other party could give him this compass, but he needed to pay some price.

Old Baal walked in front, followed by dozens of indigenous people.

The location of the tribe was a bit far. Su Xiao rode Bobowang for half an hour and did not see the location of Old Baal's tribe.

This was a normal situation. No one would fight near the base camp. If the war happened near the base camp, the red-skinned native would not be far away from extinction.

Forty minutes later, a wisp of smoke appeared in the front. Su Xiao found that the native people in the vicinity had sped up a bit as if they had not returned here for a long time.

"Tata Meng, Kaset Senni! (unknown language)"

A female shout came from afar, and the tribe not far away began to bustle.

This was a large tribe, and many stone houses were in front of them. Although these stone houses were simple and crude, they could shelter the wind and rain.

The dozens of natives behind Old Baal shouted excitedly, but they did not dare walk in front of Old Baal.

"Tete Mabai (unknown language)."

It seemed that they got Old Baal's approval, and those indigenous people rushed to the tribe with their big feet.

Hundreds of female indigenous people came out of the tribe. These female indigenous people were a little happy, and some were disappointed.

From the manner of these female indigenous people, Su Xiao guessed that this tribe had already implemented a similar system of monogamy or wife.

Su Xiao also found something strange. All the female indigenous people brought several children.

Some female indigenous people carried two in their arms, two on their backs, and five or six behind them.

From the age, these children were divided into three ages, which meant that these female indigenous people could give birth to two to three children each.

Tuyi (unknown language)

A young male aboriginal ran to Old Baal and puffed up his chest. He seemed to be very proud.

Old Baal smiled and patted the shoulder of the young aboriginal.

Su Xiao did not understand the native language. Old Baal saw this and helped Su Xiao translate.

"His wife gave birth to fifteen births. This is a real warrior. His blood is very good."

"Huh?"

Su Xiao thought he heard wrong. Can humans produce fifteen babies at the same time? Although these red-skinned natives have strong physical fitness, their overall structure is the same as humans.

"You don't seem to believe it. I will take you to see it."

It seemed that Su Xiao's doubts were something that could not be tolerated. Even the old fox, Baal, had some anger on his face.

"No need. Let's talk about business."

"No, this is business."

Old Baal looked at the young native beside him and said many things.

The young native's face turned red. He glared at Su Xiao angrily, then turned and rushed into the tribe.

The young native walked out of the tribe with a female native not long after. They were carrying a few children, and there were exactly fifteen of them.

"How is it? Fifteen if you say so. Look at the degree of strength and the size of the skeleton. You must be an outstanding warrior in the future."

Old Bill seemed to have transformed into a pig farm director and introduced how excellent the pigs in their field were.

It was no wonder that Old Baal and the young native were like this. The red-skinned native had been fighting with the Void Insect Tribe for hundreds of years.

The style of the Insect Tribe was to be violent. If the red-skinned native had no means of dealing with it, it would be a dead end.

The response method of the red-skinned native was to give birth. The red-skinned native could give birth to two to five descendants each. This was an average number.

The female native began to give birth at the age of 16. This process lasted until the age of 30 to 35. One could imagine how many children they could give birth to.

With his strong body and fertility, the Yosenman Tribe withstood the attack of the Insect Tribe and gave a counterattack.

How could the races that could survive in the Red Earth Region be so easy to exterminate?

Not only that, but the Yosenman tribe also had an unknown method. That method could produce stronger warriors, and the side effects were also obvious.

He lost most of his consciousness and became bloodthirsty, cold, and dull.

Su Xiao had already fought with the product of this method.

Chapter 449: Conditions

Su Xiao's primary task now was to get the compass in the hands of Old Baal.

The Red Earth Region could survive a few days ago, but it has been different in the last few days.

Su Xiao already felt that the reincarnation paradise gradually increased the difficulty of survival the next day.

There was food and water in Old Baal's tribe, but this was not a long-lived place. It should be no problem to stay here for the first five days of the survival trial.

The difficulty of the Red Earth Region in the next five days would be very terrible.

Following Old Baal into the tribe, few males in the tribe. Without thinking, one would know that the males all went to the front line to deal with the Zerg.

Not long after, a tall stone house appeared in sight.

This stone house was located in the center of the tribe, and it was especially conspicuous among the many low stone houses.

A wooden plate was tied to the stone house, and a vine was carved on the wooden plate.

This vine bared its fangs and claws, and it seemed to be alive.

Su Xiao's eyes flashed. The small tribe he killed also had this kind of vine. The small tribe regarded this vine as a totem, but Old Baal's tribe differed. This vine seemed to be a symbol.

"Come in and sit."

Old Baal walked into the stone house. There was no furniture and other items in the stone house. There were some animal skulls around the room. The center of the stone house was laid with fur.

Old Baal sat on the fur. Su Xiao sat opposite him. Bobowang did not approach the fur. The black and white fur made Bobowang panic.

Old Baal, who sat down, said, "You want to leave the Red Earth area."

Su Xiao nodded. This was obvious.

"Alright, let's negotiate a condition."

Old Baal placed the compass in front of him.

"This is the only way to leave the Red Earth Region. Without it, you won't be able to leave the Red Earth Region."

"Oh?"

Su Xiao did not ask anything, and Old Baal would take the initiative to say it.

I don't know how you entered the Red Earth Region.

But I can show you a map.

Old Baal got up and took out a piece of animal skin from the vase behind him.

The animal skin was spread in front of Su Xiao. He found that it was a simple map drawn with charcoal.

Although it was a bit rough, this was the map of Devour Island.

The structure of Devour Island was very interesting. The entire island was not connected. The Red Earth Region was the center of Devour Island.

There was a circle of cliffs around the Red Earth Region.

The span of the cliff was dozens of meters wide and deep, so it was difficult to leave the Red Earth Region.

Although there was a circle of cliffs around the Red Earth Region, it was not impossible to leave.

There was a natural stone bridge on both sides of the Red Earth Region. The stone bridge was connected to a common area.

One of the two stone bridges was already half-destroyed, and now there was only one left.

"The compass refers to this stone bridge, so you will need it if you want to leave quickly. If you follow the cliff, it will take at least ten days. But with the compass, it will take one day from here to the stone bridge."

Although Old Baal's words could not be completely believed, their credibility was not low.

Su Xiao did see the cliff. He had walked along the cliff for a long time, but because there were too many obstacles on the road, he could only give up.

Not to mention the terrain near the cliff, just the creatures near the cliff were enough to kill.

"Where is this?"

Su Xiao pointed to a circle of forest on the edge of Devour Island.

"This is the black forest, the forbidden area in the forbidden area. If you don't want to die, don't go there."

Su Xiao completely understood the terrain of Devour Island this time.

The outermost area of Devour Island was a circle of the forest, which was the black forest which occupied the largest area.

The inner side of the black forest was a common area, which was the safest and the most abundant resources.

Going further to the center was a circle of cliffs, and on the other side of the cliff was the Red Earth Region.

If you look at Devour Island from a high altitude, you will find that the island was like a target. The red of the bullseye was the Red Earth Region, the green outside the center was the common area, and the outside black circle was the black forest.

After understanding the situation of Devour Island, Su Xiao wanted to leave the Red Earth Region more.

"Tell me your conditions."

Since they wanted to trade, they might as well get straight to the point.

Old Baal gestured for the natives in the stone house to leave first.

"Byakuya, you should have seen the 'blood vine warrior', right?"

"Blood vine warrior?"

"Yes, you have their smell of blood on you. There is no need to deny this. Their smell of blood is very special."

Su Xiao's hand was close to the hilt, and he looked at Old Baal with a smile.

"Maybe I have seen them. Kill dozens of them."

Old Baal stood up with a cry, and at this time, a sharp blade was pressed against his throat.

"You killed them? Did you also kill Barry? That's great!"

Old Baal raised his hand to indicate that he was not hostile, but the excitement on his face could not be concealed.

"Barry? I have never heard of it."

"A Yosenman who used a blowdart."

"Is it that guy?"

Su Xiao nodded. There was no need to hide it now. At worst, he would kill his way out.

"I sincerely thank you."

Old Baal seemed to be very happy to know that the group of aboriginals had died.

"My 'dear' brother, you are finally dead."

Old Baal paced around the stone house. The joy on his face was not concealed.

"It seems that I helped you kill your competitor. Don't you thank me?"

Old Baal stopped pacing and sat opposite Su Xiao.

"No thanks."

"As expected."

Old Baal gave Su Xiao a lot of money.

"You killed them at night, right?"

"Huh?"

Su Xiao looked at Old Baal doubtfully.

"No doubt. If it were during the day, and it was under the sun, you would have died."

Old Baal had seen Su Xiao kill enemies on the battlefield with his own eyes, but he still said so.

"Day? The sun?"

Su Xiao murmured and did not continue to ask.

"When you killed Barry and the others, did you find something in their tribe? For example, a transparent crystal or black seed."

Su Xiao guessed that the transparent crystal should be the soul crystal. As for the black seed, he could not think of it.

"I didn't find it."

Even if he found Su Xiao, he would not say it.

"What a pity. Let's continue to talk about the compass."

Old Baal pondered for a few minutes, and after a long time, he said, "I can give you the compass, but you have to do one thing for me."

This was an unexpected result.

"What is it?"

Su Xiao was ready to rob, and there was only Old Baal in the stone house.

"Three days later, we will start a war with the Zerg. This kind of war is common, but the scale is not small. We are going to send 15,000 people."

There were 50,000 combat members in the Yosenman Tribe, and there were already a lot of 15,000 people.

"Help me do something after the war. Go to the nest of the Zerg to rob something."

"Impossible."

Su Xiao refused flatly. The Zerg must not be easy to provoke, let alone the nest of the other side.

"No need to refuse first."

Old Baal chuckled and seemed to have expected that Su Xiao would refuse.

"I will go with you."

What Old Baal did was not for the tribe or even the thing that could not be seen. Otherwise, he would not ask an outsider like Su Xiao for help.

Chapter 450: Blood Vine Warrior

If it were for Old Baal, then nature would have been different. Su Xiao went alone, then Old Baal, might be using Su Xiao, and the two of them going together was different.

Su Xiao temporarily gave up snatching the pointer, not because of Old Baal's proposal, but because Old Baal had always given him a wrong feeling.

The other party's aura was extraordinary. Sometimes it was one, and sometimes it suddenly became two. It seemed that there was something in his body.

"Three days later... Yes."

Since he could not leave the Red Earth Region, for the time being, Su Xiao explored it in the Red Earth Region.

Old Baal was overjoyed. He got up and walked out of the stone house. He did not tell Su Xiao not to tell others about this matter. Su Xiao did not understand the language of the Yosenman tribe at all.

"Woof."

Bobowang barked and came to Su Xiao's side. His eyes seemed to say: 'Master, I smell a conspiracy.'

"If you can see it, how can I not see it?"

Patting the head of Bobowang, Su Xiao connected the clues in his heart.

Blood vine warrior, totem, vine, soul crystal, black seed, old Baal, the blow dart aboriginal Barry, the hatred between brothers, and prominent tribes.

The more Su Xiao thought about it, the more attractive he felt.

"What is hidden here?"

Su Xiao had a feeling that if he knew the secret here, he would get a lot of sources from around the world.

After thinking about this, Su Xiao was not in a hurry to leave the Red Earth Region. He left the Red Earth Region five days ago. He had enough time to explore.

However, there was one thing that he had to get the compass as soon as possible.

Su Xiao wandered in the 'Yosenman Tribe' for the whole afternoon. Old Baal did not stop him, and he did not even send his subordinates to stare at Su Xiao.

The area of the tribe was not small. More than four hundred thousand people lived here, and the children accounted for most of them.

There were tens of thousands of adult female natives, and the male natives were even rarer. The male natives usually stayed in the tribe after their arms and legs were broken.

Although these disabled natives did not need to fight, their faces were wax yellow, and their eyes were deep.

It seemed that they had made a significant contribution to the continuation of their race.

He wandered in the low stone house for a while.

Su Xiao looked at a mountain behind the tribe.

This mountain blocked the rear of the Yosenman tribe. The side of the mountain was a steep rock wall. It was impossible to enter the Yosenman tribe from the rear.

The mountain peak was closely connected to the Yosenman tribe, or the Yosenman tribe established it.

Su Xiao walked to the foot of the mountain. A row of packed stone houses blocked the foot of the mountain. If he wanted to get close to the foot of the mountain, he could only enter from the front entrance.

There were dozens of red-skinned indigenous people guarding the front entrance. These red-skinned indigenous people looked stiff, and some insects fell on their faces and ignored them.

It was impossible to get close to the back mountain, but Su Xiao had a general direction, and the secret should be there.

After wandering for an afternoon, today's survival was very easy. After all, the Yosenman Tribe was a tyrant in the Red Earth Region, and no beasts were close here.

At 7 o'clock that night, Old Baal invited Su Xiao to his stone house.

A bonfire had already been raised in front of the stone house. Men, women, old and young, were gathered around the bonfire.

Among these people were Old Baal's wife, son, daughter-in-law, granddaughter-in-law, and so on.

Although the Yosenman Tribe had another name, it was similar.

Of Old Baal's seventy-two sons, sixty had died in battle. Ten of them were still on the battlefield, and the other two were injured and disabled.

Sometimes, when Old Baal was not in the tribe, he was the steward of his two sons.

There were dozens of people around the fire, which were the family of Old Baal.

Su Xiao had a question before, if Old Baal's son A died in battle, would his son A's wife be widowed?

Su Xiao vaguely remembered Old Bar's surprised gaze at that time. Old Baal replied: "How can it be so wasteful? Of course, it will be continued by the other brothers."

This made Su Xiao not only look at the cemetery near the tribe, but he suddenly felt that the grass there was more green, and the green oil was shining.

The indigenous people next to the fire danced and sang songs that Su Xiao could not understand.

Old Baal handed a large piece of barbecue to Su Xiao. After confirming that there was no problem with the barbecue, he cut half of the barbecue to the cloth.

Dinner was settled. When Su Xiao was eating barbecue, Old Baal handed him another dish.

It was a kind of black round cake, which seemed to have been fried with animal oil. It was very crisp and emitted a strange fragrance.

Su Xiao looked up and down at this suspicious cake and tried to take a bite. The taste was delicious.

Bobowang smelled the fragrance, and the big furry head came close, stretched out his head and swallowed the black cake, chewing it happily.

"What kind of cake is this?"

"The cake made by the sting scorpion brain tastes good, right?"

Old Baal enthusiastically pushed a large plate of black cake in front of Su Xiao, but he did not notice Su Xiao's face.

Thinking of the sting scorpion with an ugly appearance and a pungent smell, Su Xiao's stomach was a little churning.

The face of Bobowang on the side was green, Su Xiao only took a small bite, and it swallowed the whole cake.

Su Xiao looked at the other 'light refreshments' and began to look wrong. He would not eat food that looked suspicious again.

"Pududu, Famaa (unknown language)."

A loud shout suddenly came from the distance. Old Baal's face changed significantly when he heard the shout. He stood up with a cry and rushed to the back mountain.

Su Xiao quickly got up, picked up the cloth that was still gnawing the bones and ran to the back mountain.

When Su Xiao ran to the back of the mountain, he found many people gathered there.

In the center of the crowd, a male native was lying on the ground twitching, foaming at the mouth, as if he was epilepsy.

Old Baal rushed forward and said something to the native on the side. After the native nodded quickly, he turned and rushed into the back mountain.

Su Xiao looked at the twitching male native on the ground. If he remembered correctly, this native was the guard who guarded the back mountain during the day.

The weapon of the other party was a stone spear, which was easy to recognize.

Old Baal pressed his hand against the chest of the stone spear native, and the twitching of the stone spear native slowed down a little.

Not long after, the native who had run into the back mountain returned with a bamboo tube in his hand. The bamboo tube was filled with a liquid that looked like a mercury membrane.

The temperature of this liquid was shallow, and it was emitting cold air. From the degree of trembling of the native, this thing was freezing.

Old Baal took the bamboo tube, ignoring the extreme cold, and poured the liquid in the bamboo tube into the mouth of the stone spear native.

After pouring more than half of the bamboo tube, the stone spear native stopped twitching.

"Woola!"

A female native ran forward, her face full of tears. The native on the ground was her spouse.

Old Baal shook his head. It seemed that he was not confident.

At this moment, something strange happened.

"Ah!"

The body of the stone spear native bounced up and let out a scream. His mouth was wide open, and his hands were like chicken claws.

Hearing this scream, Old Baal turned and ran. Not only him but the surrounding natives were also the same.

"Wow ---."

The female native knelt on the ground and cried. No matter how the people around her pulled her, she tried her best to move forward.

Su Xiao also followed the crowd and retreated. Soon, only his spouse was left beside the stone spear native.

"Ah"

The sharp roar of the stone spear native resounded through the valley. His mouth emitted light, and his chest began to turn transparent.

At this moment, the body of the stone spear native was like a piece of burning iron, and his blood vessels, bones, and internal organs could all be seen.

It was as if a small sun had appeared in the body of the stone spear native.

The spouse of the stone spear native rushed to the front of the mountain and hugged him. A terrible thing happened.

Chi Chi ---.

The body of the stone spear native quickly turned into charcoal and was burned up a few seconds later.

"Ah"

More screams came, Su Xiao subconsciously covered his ears, and his ears were buzzing.

Dong!

The body of the stone spear native burst open, and the dazzling light illuminated the night into daytime. Everyone present closed their eyes.

The explosion's light faded away, and the stone spear native had disappeared. There was no residue left. There was a big pit where he was.

The surface of the giant pit had been turned into glass, which was the appearance after enduring the high temperature.
